are worth added to the cost of the flowers.

I have not told you anything of the new and superb varieties that are to be had in paeonies. Each year brings out new ones. Some of them are without any doubt acquisitions to the existing varieties. Their story is one by itself which I will leave for another day.

After your clumps become old and the blooms seem to be smaller, it is best to feed them liberally each spring by digging in bone meal about the roots. A good potato fertilizer which runs 4-6-10 is also good. If they do not then grow good blooms I would divide them and set them in a new place. This is advisable anyway after they have been set eight or ten years.

You will all find that in growing anything good it will take your best care and thought. It is not easy and you must not think of it only in the light that to do anything that is a credit to you takes great pains. What I have said to you has been gained by practice, not observation. I tell this to you to help you, to spur you on to do your best with these noble flowers. To grow them fine is grand work, but to tell others how to do it is grander and not half so much trouble.

Need I tell you that my work is interesting? I am often in my field when the newborn day stands tiptoe in the misty east. The unfolding of each new seedling keeps me in impatience until I see the enchantment either in its beauty or its lack. How can any lover of nature but go to such work with delight?

BRITISH HORTICULTURE.

The National Gladiolus Society.

This recently formed Society proposes to hold two annual shows, the first show to take place in London, on July 18, in conjunction with the Royal Horticultural Society's exhibition. The council will meet during the flowering season for the purpose of granting certificates to meritorious new varieties. A handbook is to be compiled, giving full information respecting the culture of the gladiolus, with a classified list of named varieties. It has been decided to have a trial ground at Locksheath, near Southampton. The new organization has been affiliated to the Royal Horticultural Society.

Rosarians in Conference.

The National Rose Society recently entered on a new departure in holding a conference of members. The Rev. J. H. Pemberton, the President, opened the proceedings with a well informed and interesting address on "Roses for the Garden."

Jottings.

The National Primula and Auricula Society held its competitive spring classes at Royal Horticultural Hall, on April 25, when a varied and attractive display was made.—The wearing of roses on St. George's Day gave a filip to this branch of floriculture. Nurserymen found an excellent demand, remunerative prices prevailing.—On April 27th, a deputation from the Gardeners' Company, one of the city guilds, journeyed from London to pay a visit of inspection to the chief Dutch bulb farms. The party travelled to the

Hook, and on arrival there journeyed in motors to Leiden, subsequently seeing some of the largest bulb farms.—The North of England Horticultural Society has lately brought out the first number of its monthly magazine.—The twelfth report of the Woburn Experimental Fruit Farm comprises an account of an interesting series of researches on the silver leaf disease of fruit trees. Exhaustive experiments on preventive measures, unfortunately, have not led to any definite result.

W. H. ADSETT.

SOME NEWS AND AN INVITATION.

After eight months calm and careful consideration, the postoffice department, through the Hon. Acting Third Assistant Postmaster General, has decided that this paper is not entitled to second-class rates.

We respectfully convey our compliments to the above named party and will be please go to the devil, we will pay third-class rates. We propose to "keep on keeping on" just the same.

From a reliable source we learn that Mr. W. A. Travers, acting third assistant postmaster general, has been indicted for selling certain rare stamps. We hope he gets all that is coming to him,—and then some.

The above from the Wisconsin Horticulture, the official organ of the Wisconsin State Horticultural Society, is pretty good evidence that when our Western friends get their mad up they are still able to say things with old-fashioned frontier bluntness. "Lay on, Macduff."

Fulton, Ill. Edward O. Hills, of Hills & Kirman, has decided to retire from the greenhouse business and has sold his interest to Mr. Kirman. The business will be continued under the name of John E. Kirman.

NEPHROLEPIS ROOSEVELT.

third to one-half wider than Boston and beautifully undulated, giving the whole plant a decided wavy effect, which attracts the eye instantly. Nephrolepis Roosevelt will make more young plants, produce a third more fronds, has more graceful drooping habit and will finish to a larger and finer plant in small pots than any other fern on the market. Our stock is positively free from that vicious little white scale which is causing fern growers so much trouble.

Orders received to June first will be booked at the following prices. Two and one-fourth inch pots, 40 cents each; \$3.50 per dozen; \$25.00 per hundred; \$200.00 per thousand. Twenty-five plants at hundred rate; 250 plants at thousand rate.

GOOD & REESE CO.
SPRINGFIELD, OHIO

**LARGEST ROSE
GROWERS IN
THE WORLD**

The Grandest Fern of the Age Nephrolepis Roosevelt

IMPORTANT SPECIAL NOTICE — PRICE ADVANCE.

The heavy demand from those who have seen Nephrolepis Roosevelt growing on our place and scarcity of stock compels us to advance the price on all orders dated after June first to the following. Two and one-fourth inch pots, 50 cents each; \$4.50 per dozen; \$35.00 per hundred; \$300.00 per thousand.

It is our belief the price of Nephrolepis Roosevelt for 1911 will be maintained during the season of 1912.

Nephrolepis Roosevelt is a sport from Nephrolepis Bostoniensis, but a wonderful improvement over the parent variety. The fronds of Roosevelt are from a tapered from base to tip. Each pinnae is distinctly undulated, giving the whole plant a decided wavy effect, which attracts the eye instantly. Nephrolepis Roosevelt will make more young plants, produce a third more fronds, has more graceful drooping habit and will finish to a larger and finer plant in small pots than any other fern on the market. Our stock is positively free from that vicious little white scale which is causing fern growers so much trouble.

Orders received to June first will be booked at the following prices. Two and one-fourth inch pots, 40 cents each; \$3.50 per dozen; \$25.00 per hundred; \$200.00 per thousand. Twenty-five plants at hundred rate; 250 plants at thousand rate.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The monthly meeting of this club on the evening of May 16th was well attended, considering the busy time of the year. The attraction of the evening was the paper on "Peonies," and subsequent remarks by that witty and observant devotee of the peony, E. J. Shaylor, of Wellesley Hills, than whom there is nobody in this country better qualified to talk and instruct on the subject.

An invitation to visit the gladiolus fields of B. Hammond Tracy at Wenham in August was accepted. It was decided to have the usual summer picnic, date and place to be decided by the Executive Committee. An invitation to join in the outing of the North Shore Horticultural Society at West Manchester was accepted, date to be announced later. June meeting will be Ladies' Night. Four new members were admitted.

On the exhibition table were some choice orchids from W. A. Manda, in charge of Mr. Strange. Brasso-cattleya Veitchii was given honorable mention and a vote of thanks was accorded for the others. J. K. M. L. Farquhar showed flower stalks of two Chinese lilies, *L. myriophyllum* and *L. leucanthemum*, the former receiving a report of merit and the latter honorable mention. *Lilium myriophyllum* is as hardy as a *tigrinum*, deliciously scented and declared by E. H. Wilson, who collected this and half a dozen other new lilies for Messrs. Farquhar, to be the best of all lilies, especially for this climate. *L. leucanthemum* is

of the Brownii type, very robust, bearing bulbils in the axils of the leaves from which propagation is rapidly effected. The enormous flowers are creamy white with purplish shading on outside and overpoweringly fragrant.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

At the regular monthly meeting, Stamford, Conn., May 12th, seventy-five members were present and two life members, four honorary and fifteen active members were elected. Notably among the exhibits of the evening were calceolarias, by Jas. Stewart, new early flowering chrysanthemums by P. W. Popp, sweet peas by Adam Patterson, and vegetables by A. Peterson. The preliminary schedule of the fall show is going to press and copies will be mailed to all members. Others can secure by applying to J. B. McArdle, Secretary.

TUXEDO HORTICULTURAL SOCIETY.

The Tuxedo Horticultural Society held a monthly meeting on May 3rd. There was a very good gathering. Fred Barth was elected to membership. A discussion about transplanting dogwoods took place which brought out very interesting remarks. Most all members present believe in transplanting ordinary size of dogwood just about before they start to grow. A motion that the Society have a ball sometime in June was voted on and carried.

NEW JERSEY FLORICULTURAL SOCIETY.

Albert F. Larson tendered his resignation as president of the N. J. F. S., Friday evening, May 12th, at the regular monthly meeting. He has been head gardener for A. B. Jenkins, Llewellyn Park, for the past two years, where he has showed marked ability as a grower and has won a great many prizes at the flower shows. He leaves the O. ranges to take charge of the H. C. Phipps estate at Roslyn, L. I., June 1st. He has been a hard worker for the society and has been president for the past eighteen months, having been reelected for a second term. He has the good wishes of all the members of the society.

An exhibition of My Maryland and Killarney roses from the State Experiment Station, arrived too late for our meeting, but they were certainly well grown; stems three feet long. These roses were grown for two years on same soil without manure; chemical fertilizers used only. 580 rose plants; cost of fertilizer 20 cents per month, plants average five good flowers per crop. No resting; severe pruning.

Lager & Hurrell had a fine specimen of *Cattleya Mossiae* on exhibition with twenty flowers of a beautiful dark shade extra large, which they have named *Cattleya Mossiae Reidii*, after the secretary of the society. Joseph A. Manda showed an extra fine specimen of *Oncidium Marshallianum* and Thomas Jones *Dendrobium chrysotoxa* and *Cattleya Warneri* for which they received a certificate of merit.

The society will hold its annual rose

For Now and Memorial

NEW CROP DAGGER and FANCY FERNS, now ready, A No. 1 quality, \$2.00 per 1000. Order from the house that never disappoints.

show next meeting. A special prize has been donated for the best display of outdoor roses. Following are the awards for the evening:

Class A: Cattleya Mossiae Reidii, Lager & Hurrell, 98 points; Cattleya Warneri, Thomas Jones, 90; Oncidium Marshallianum, J. A. Manda, 95; Carnations, William Reid, 83; Roses, William Reid, 78; Roses, Frank Drews, 75; American Beauty, Frank Drews, 75.

Class B: Carnations, Max Schneider, 85 points; Gladiolus, Fritz Berglund, 93.

Exhibits not in competition: Sweet peas, Max Schneider, certificate of merit; Carnations, Max Schneider, cultural certificate; Orchids, Lager & Hurrell, certificate of merit; Orchids, Thomas Jones, certificate of merit.

The judges were Charles W. Ashmead, Geo. W. Strange and John Derivan. WILLIAM REID, Sec'y.

AMERICAN GLADIOLUS SOCIETY.

Species prizes to be offered at Baltimore, August, 1911.

Open Class.

Best and largest collection of blue shades in lots of 6 separate colors, not less than 25 spikes. Vaughan's Seed Store, silver cup.

Best 6 spikes any white variety. M. Crawford, 50 bulbs White Lady.

Best 12 varieties not now on the market. P. Henderson & Co., \$10.00.

Best collection, 10 varieties, 6 spikes each. W. Atlee Burpee & Co., \$10.00.

Best vase of 12 spikes, Golden Queen. E. E. Stewart, \$5.00.

Best vase of 12 spikes, Gladiolus Pres. Taft. E. E. Stewart, \$5.00.

Best vase new seedlings, not less than 25 varieties never before exhibited. B. F. White, \$5.00.

Best vase of 25 spikes of one white variety. E. H. Cushman, \$5.00.

For best vase of any named yellow variety. A. T. Boddington, \$5.00.

Best collection Childs varieties, 3 spikes each. John Lewis Childs, \$10.00.

Exhibit containing the largest number of standard named varieties, correctly labeled. Gardeners' Chronicle, challenge cup.

Best collection, 15 varieties, 3 spikes each. Stumpp & Walter, \$10.00.

Best table decorated with gladioli, table to be laid for 6 covers. B. Hammond Tracy, Silver and glass vase.

Best centre piece for dining table. N. L. Crawford, \$5.00.

Best 25 spikes of Kunderdi "Glory" exhibited in one vase. Henry F. Michell Co., silver cup.

Amateur Class.

Best display Princepine. W. E. Kirchoff Co., gold medal.

Best 6 named varieties, one spike each. Montague Chamberlain, silver cup.

Best vase of America, not less than 12 spikes. John Lewis Childs, \$5.00.

Best collection of yellow named varieties exhibited by an amateur. A. T. Boddington, \$5.00.

Best collection of Primulinus type and hybrids. J. M. Thorburn & Co., silver cup.

Best 6 varieties of blue gladioli exhibited in one vase. L. Merton Gage, \$5.00.

L. MERTON GAGE, Cor. Sec'y.

PENNSYLVANIA HORTICULTURAL SOCIETY AND AMERICAN PEONY SOCIETY.

Bertrand H. Farr, J. H. Humphreys, Ernest Heming, J. S. Hay and other representatives of the American Peony Society held a meeting in Horticultural Hall, Philadelphia, on the 16th inst., and fixed the date of the annual meeting and exhibition as June 14th and 15th (Wednesday and Thursday). The exhibition will be under the auspices of the Pennsylvania Horticultural Society—which will also hold its own peony show at the same time. The A. P. S. prize list comprises some 16 classes and aggregates about \$200 in prize money, besides valuable cups and medals. The schedule of prizes may be obtained by writing to J. H. Humphreys, Andorra Nurseries, Chestnut Hill, Philadelphia. All exhibits must be staged by 3 p. m. on the 14th. The date is a week or so later than suits the local growers, but it was thought wisest as it would enable some important exhibitors from more northern localities to send in their best varieties. The combined committee of the P. H. S. and Florists' Club held a meeting at same time and decided to take immediate steps to raise money to improve the fall exhibition in Horticultural Hall. They have it in mind also to endeavor to get the local trade interests to take a hand—this element, once so active, being for many years not a factor; and the loss of them is probably one of the main reasons for the low ebb in which the Society now finds itself. By the trade is meant the growers and dealers in flowers and plants, not the seedsmen. The latter have been loyal all through, and in fact have for many years furnished what little life was left by their liberal offers of prize money year after year until their special prizes finally came to be about all that was offered. When a horticultural society gets to that stage it is practically dead. It is high time something was being done to bring the P. H. S. to life again.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular monthly meeting of the above Society was held in Pembroke Hall, Glen Cove, N. Y., Wednesday evening, May 10th. Messrs. Holloway, Gray and Robinson were appointed judges and their decisions were as follows:

Society's prize, outdoor flowering shrub, 1st, A. McKenzie. Lettuce, 1st, J. W. Ev-

erett. Vase of sweet peas, certificate of culture to J. McDonald. Cucumbers, certificate of culture to J. W. Everett. Asparagus, certificate of culture to J. W. Everett. Stumpp & Walter prize for tulips, 1st, A. McKenzie; 2nd, E. Westlake.

The schedule for the show which is to be held on the night of the June meeting was read and approved, and Messrs. Duthie, Johnstone and Marshall were appointed as judges for that night.

Mr. Cliffe, superintendent at "Mendon," gave a very interesting talk on the "Cultivation of Grapes Under Glass," which were listened to with hearty appreciation.

E. WESTLAKE,
Cor. Sec'y.

ST. LOUIS FLORIST CLUB.

The Florist Club's twenty-fifth anniversary on June 28th, will be celebrated with a banquet at one of the leading hotels. It was so decided at the meeting of the club which was held on Thursday of last week. The club now has a membership of 90. The committee in charge of the celebration are Messrs. Guy, Bentzen, Ostertag, Schoenle and Chandler and the officers of the club.

The monthly meeting of the club was held Thursday afternoon, May 11. Owing to small attendance it was decided to lay over all important business matters until the June meeting.

CLUB AND SOCIETY NOTES.

The annual meeting of the Utica Florists' Club was held at Genesee Hall, May 4. The election of officers for the ensuing year resulted in F. J. Baker being chosen president; Harry Brant, vice president; Charles Seitzer, treasurer and J. C. Spencer, secretary. President Baker was elected to serve for the sixth term.

The members adopted a resolution of condolence to the bereaved families of the teachers killed or injured in the recent wreck at Martin's Creek, N. J. A discussion of the Arbor Day and Mothers' Day trade was held.

The New Bedford Horticultural society will hold a rose show in June. Mrs. Fay of Woods Hole has donated a sum of money to the society for the purpose of encouraging rose culture, and the committee has decided to use part of that sum in offering prizes to amateurs who exhibit at the coming show.

Six new members were admitted at the meeting of the Albany Florist club, May 4, in the Capital City club

Boddington's Bulb Bloom.

Save Money on Your Fall Bulbs—by Ordering NOW

Our Quality Bulbs are famous for results

Mr. Florist:—You can save money on the bulbs you expect to grow this Fall, if you order them now, instead of two or three months later.

We have bought heavily of the best bulbs procurable in Bermuda, Japan, Holland and French markets, and will, until July 1st, offer special inducements to encourage our customers to place their orders earlier than usual.

Send us a list showing the bulbs you wish to grow this Fall—Lilies, Tulips, Narcissi, Hyacinths, etc.—and we will make a special and confidential quotation on your order. Our regular Fall Catalogue will be ready in July, but the prices we will make you now will be at a large reduction, for the reasons stated above.

Write for "CONFIDENTIAL QUOTATION"—and write to-day. This offer is good only until July 1st, 1911.

Arthur T Boddington
Seedsmen 342 W 14th St
New York City, N.Y.

rooms. Most of the evening was devoted to a social session with refreshments in accordance with a plan discussed at the April meeting for the purpose of getting the members out in larger numbers. As a result there was a considerable increase in the attendance and a similar entertainment will be a feature of the meetings every other month. The social committee is considering the subject of an excursion down the river to be held during August.

That the strict laws for nurserymen in Idaho have had the effect of driving many of them out of business is evidenced from information obtained by State Horticulturalist McPherson. It is shown by the records of his office that 123 nurserymen previously did business in that state, where there are now 74 who have provided their bonds, while bonds for 13 nurserymen are still pending.

PERSONAL.

Oliver C. Scoville has been appointed foreman at Colt's Park, Hartford, Conn.

Bert Lucas succeeds August Lembke in the management of the greenhouses of B. Eldredge, Belvidere, Ill.

Ed. Buschle, who was formerly with the Tromeys Flower Shop, has accepted a position with C. E. Critchell, Cincinnati.

James Taplin has accepted the position of superintendent of the Rose Hill Nurseries (Siebrecht & Son), New Rochelle, N. Y.

A. K. Gardner of Rockland, Me., has been appointed State Horticulturist to succeed Prof. E. F. Hitchins now with the University of Maine.

George Batty, former proprietor of the H. C. Beebe & Co. greenhouses, Middletown, Conn., has given up the florist business and taken a position with the Hartford & New York Transportation Co. Henry J. Koehler has succeeded Mr. Batty.

Carl Melby, who has been with the Hoskin's Floral Company, Bismarck, N. D., the past year, has gone to Minneapolis to accept a position with Donaldson's floral department. He expects later to go to the Pacific coast to reside permanently.

S. S. Butterfield, representative of the American Florist in New York, has been dangerously ill in hospital at Brooklyn, N. Y., with septic poisoning of the throat. We are glad to state that prospects are now promising for his recovery but for a time the outlook was far from encouraging.

The wedding of Maurice L. Glass of A. Moltz & Co., New York wholesale florists, to Miss Rebecca Maltz at the Adas Ieshurun Ansche Synagogue, New York, on May 16th, was an elegant affair. The edifice was prettily decorated with a profusion of spring blossoms, smilax and palms and the music was fine as well as the sumptuous feast that followed at Loeber's.

David Welch, of the firm of Welch Brothers, Boston, is seriously ill at his home in Dorchester, Mass. He

has been in failing health for the past two months and the trouble has continued to defy the best efforts of his physicians. All our readers will surely join us in wishing a full and speedy recovery for this courteous and universally popular gentleman.

Timothy O'Connor, the well-known florist of Providence, R. I., and his wife celebrated the 50th anniversary of their wedding at their home, 87 Barnes street, on May 14, in the presence of a large number of relatives and a few intimate friends. They received many handsome presents. The evening was made thoroughly enjoyable by an impromptu program of entertainment which was followed by the serving of refreshments. Mr. and Mrs. O'Connor were married at the Immaculate Conception Church by Rev. Father Cooney a half-century ago, and they have lived in Providence continuously since that time. They have two sons, Timothy L. and William H., and one daughter, Mrs. M. Joseph McCarthy. These and a number of grandchildren were present. The singing of "Put On Your Old Gray Bonnet," by Frank O'Connor was an enjoyable feature of the entertainment.

Cincinnati Visitor—Mellon Alexander, representing Lion & Co., N. Y.

Boston visitors—Winfried Rolker, New York; E. J. Fancourt, of Pen-nock-Meehan Co., Phila., Pa.; G. W. Strange, representing W. A. Manda, So. Orange, N. J.

A. N. PIERSON, Inc.

CROMWELL, CONN.

COLEUS

Verschaffeltii, Firebrand, Golden Queen, Lord Palmerston, Queen Victoria, Beckwith's Gem, Golden Bedder, Hero, Messy.

A very fine assortment of twelve kinds not listed above.

All of the above out of 2¼-inch pots: \$2.50 per 100, \$20 per 1000.

AGERATUM

2¼-inch pots, \$2.50 per 100, \$20.00 per 1000.

SALVIA

S. Splendens, S. Bonfire, S. Zurich, S. Schenley, Boule de Feu. Out of 2½-inch pots, \$2.50 per 100, \$20.00 per 1000.

CANNAS

A very fine assortment of the best varieties, nice growing stock from 3-inch pots, of the following varieties:

Wyoming, Florence Vaughan, Gladiator, Pres. McKinley, Louisiana, Buttercup, Queen Charlotte.

From 3-inch pots, \$1.00 per dozen, \$6.00 per 100.

BEGONIAS

Glorie de Lorraine, ready now, 2¼-inch pots, \$12.00 per 100, \$110.00 per 1000. For prices on quantity write for quotations.

Begonia Prima Donna, fine pink flower, especially good for outdoor bedding, from 2-inch pots, \$4.00 per 100, \$35.00 per 1000; 2½-inch pots, \$5.00 per 100, \$45.00 per 1000; 3-inch pots, \$6.00 per 100, \$50.00 per 1000. Ready for immediate shipment.

GARDEN ROSES

Owing to the call for well established Roses from large pots that will be ready to give immediate results from garden planting, we have arranged to have ready for May delivery a fine assortment of the best varieties for the purpose.

Kaiserin Augusta Victoria, Richmond, Mrs. Aaron Ward, Killarney, Pink Cochet, White Cochet, White Killarney, Enchanter.

Prices: 50 cents each, \$5.00 per dozen, \$35.00 per 100.

CHICAGO NOTES.

Memorial Day Outlook.

Plants—This has been a rather poor season for bringing bedding plants to that stage of perfection so desirable for Memorial Day. Easter being late the houses were kept filled to the last minute and since then weather has been unfavorable till the past week, when summer suddenly burst upon us, and the thermometer stood in the 90's. A large proportion of the geranium stock will be in bud only, while the summer weather has greatly increased a premature demand for blooming stock for bedding out.

Cut Flowers—At this writing, May 15th, Chicago is suffering from a temperature that would try the endurance of the florists' stock in August. If it continues another week, roses and carnations will be in poor condition for Memorial Day and out-of-door stock will be gone. As it is lilacs will be gone, snowballs doubtful and philadelphus not in. Peonies are expected to be cut from the interior of the State if the warm weather continues and will play a big part in the coming holiday.

Growers' Exchange.

The Chicago Growers' Exchange took its place in the wholesale district and recorded its first sales May 16th, at 56 E. Randolph street, the remodelled and newly decorated stand of the old Flower Growers' Market which May 1st became a thing of the past. Kennicott Bros. Co., through their manager, E. E. Pieser is the organizer and N. Mueller will be in charge with Robert Gilpin book-

keeper. The growers will have an opportunity to sell their stock on the commission basis of 7½ per cent.

Among the Retailers.

All the windows of the retail florists are filled with spring flowers and give every indication that the florists' busy season is drawing to a close. Some already report their best customers as leaving for their summer homes and are looking for a decrease in sales. Among the noticeable windows was that of A. Lange which was a perfect bower of summer flowers where apple blossoms, lilacs, cape jasimine and peonies mingled with roses, carnations, sweet peas and lily of the valley in the foreground while the tall gladioli and Beauties made an imposing background. C. A. Samuelson, 21st and Michigan avenue always uses a group of palms as a background at one end of his large show window, making a beautiful setting for the cut flowers. Mr. Samuelson thinks the flight to summer homes will be early this year.

In the Parks.

Squirrels are again causing trouble in the parks and some action is expected by the city soon. The high shrubbery along the walks near the streets is also doomed as it affords a hiding place for hold-ups. Many complaints have been made.

Trade Items.

Gov. Deneen has issued a proclamation requesting everyone to wear a flower on Memorial Day.

The Chicago Carnation Co. are cutting excellent stock of Gladiolus Mrs. Frances King, Augusta and America.

Note published last week regarding the proposed Oechslin greenhouses should have read, 125 x 130 square feet, instead of 125 to 130 square feet.

A fair grade of cattleyas are coming into the market, but Chas. McKellar, who is their chief prophet, finds they are meeting a lull in the demand the same as less fanciful flowers.

Wietor Bros. have planted out seven acres of carnations consisting of White Perfection, White Enchantress, White Lawson, Lawson, Washington, Pink Enchantress, Winsor and Victory.

Personal.

Mr. and Mrs. O. P. Bassett are expected back from California about June 1st for an extended visit.

Tim Waters is temporarily handling the Evergreen Brand Fertilizer for the D. D. Johnson Co., 143 N. Wabash Ave., Chicago. This firm has an interesting pamphlet on lawn making which can be had for the asking.

James Novak who has spent several years in Chicago has returned from Charles City, Ill., to become foreman for Wietor Bros.

Visitors—F. H. Henry, of Henry & Lee, New York, on his way to San Francisco from which port he expects to sail for China; Mr. and Mrs. Wm. Feniger, Toledo, O.; H. E. Smith, Danville, Ill.

Newton Center, Mass.—Robert K. Rodden, son of the late Robert Rodden, will carry on the Irving street greenhouses which his father ran for so many years.

Bedding Plant Bargains

Geraniums. Alphonse Ricard, S. A. Nutt, John Doyle, Mme. Buchner (white), Mme. Thibaud (pink), and Ivy Geraniums, 4 in., not in bloom, suitable for bedding, \$7.00 per 100.

Scarlet Sage, Clara Bedman or Bonfire, 4 in. pots, \$7.00 per 100.

Heliotropes, Fuchsias, Double Petunias, Ageratum (blue), **Lantanas, Lemon Verbenas, Begonias** Vernon and Erfordii, \$7.00 per 100.

Cannas, J. D. Elsele (best red), Bouvier, Richard Wallace, Egandale (dark leaved), Robusta (dark leaved), Mme. Crozy and others, all 4 in. pots, strong, assorted, \$7.00 per 100.

Honeysuckles, sweet scented, 4 in., 10c.; 5½ in., 15c.

Clematis Paniculata, staked up, 5½ in., 15 to 20c.

Ampelopsis Veitchii, 4 in., 15c.

Cobea scandens, 4 in., 10c.

Single Petunia, Inimitable, Phlox Drummondii, dwarf and grandiflora, **Centaurea Gymnocarpa** (Dusty Miller), **Coleus,** Verschaffeltii, Golden Bedder, Queen Victoria, (Tradescantia, 4c.), **Sweet Alyssum,** little Gem, **Thunbergia** (or Black-eyed Susan), **Cornflower,** assorted, **Bellis** or Bachelors' Button, **Lobelia,** dwarf or trailing, **Kenilworth Ivy,** **Pyrethrum aureum** or Golden Feather, **Snappdragon,** **Torenia Fournieri,** \$3.00 per 100.

NEWS NOTES.

Grand Forks, N. D.—The Johnson Floral Co. has purchased the greenhouse property of N. P. Lindberg.

Kalamazoo, Mich.—John Thomas will carry on the business of his father, who has been appointed city gardener.

Bristol, Tenn.—Ten acres of land has been purchased by the Bristol Floral Co. as an addition to their present holdings.

Halifax, Mass.—The Halifax Garden Co. held a free flower exhibition at their greenhouses on May 13 and 14. A good attendance of the public was secured.

Newington Junction, Conn.—Louis L. Barton has purchased a tract of land here after selling his interest in the Miller Floral Co., in Salt Lake City, Utah. He intends to erect a greenhouse and devote his time to growing roses.

Syracuse, N. Y.—Prof. Liberty H. Bailey of Cornell University received a very warm welcome from the members of the Syracuse Rose Society upon his visit on May 9th, when he gave an address upon "Back to Nature for Art." He criticised the too prevalent fashion of following book-teaching, in place of studying natural landscape effects.

CANNAS In 30 Varieties

From 3½-inch pots, strong plants, \$6.00 and \$8.00 per 100.

CHRYSANTHEMUMS

Golden Eagle, Gloria, G. W. Childs, Linwood Hall, Miss May Hankey, Miss May Seddon, Merstham Yellow, Old Gold, Oct. Frost, Patty, Virginia Poehlman, Vivland Morel.

Well established pot grown plants

THOMAS ROLAND, Nahant, Mass.

If lily bulbs could be manufactured we would make them so well that they would practically be perfect. Since this is impossible however, we do the next best thing by importing only the very best produced. Bulbs are a product of the earth, and the most mortal man can do is to cultivate them properly and increase their flowering capacity. There is no firm in existence today paying more attention to quality than we are and the grand majority pay no attention to any particulars except the price. Horse shoe Brand bulbs are today giving the best average of any brand known. They cost no more per flower than any other brand and you can depend on them. Cold Storage Giganteum, Formosum Magnificum and Auratum ready for immediate or future delivery.

Order Now.

Not How Cheap But How Good

Ralph M. Ward & Co.

12 West Broadway
NEW YORK CITY

Seed Trade

Federal Seed Bill.

Congressman Mann has introduced a bill which prohibits the importation into the United States of seeds of alfalfa, barley, Canadian blue grass, Kentucky blue grass, brome grass (awnless), buckwheat, alsike clover, crimson clover, red clover, white clover, field corn, Kaffir corn, meadow fescue, flax, millet, oats, orchard grass, rape, red top, rye, sorghum, timothy, and wheat, which are adulterated or unfit for seeding purposes within the meaning of the Act, but seeds may be delivered to the owner of them under bond to be recleaned subject to such regulations as the Secretary of the Treasury may provide and then released to the owner thereof, but the screenings removed from the seeds must be disposed of in a manner to be prescribed by the Secretary of Agriculture.

The Act holds that seeds shall be deemed adulterated "when seed of red clover contains more than three per centum of seed of yellow trefoil or any other seed of similar appearance to and of lower market value than seed of red clover; second when seed of alfalfa contains more than three per centum of seed of yellow trefoil, burr clover, or sweet clover, singly or combined; third, when any kind or variety of these seeds," named above, "contains over five per centum of another kind of variety of lower market value and of similar appearance."

Furthermore, "seed shall be considered unfit for seeding purposes within the meaning of this Act: First, when any kind or variety of clover seed contains more than one seed of dodder to 3000 seeds of clover; second, when any kind or variety of the seeds named in section 1 of this Act contains more than three per centum by weight of seeds of noxious weeds."

Agricultural Department Tests.

The Department of Agriculture announces that as none of the samples of alfalfa or red clover seed collected during the calendar year 1909 were found to be adulterated or misbranded, these seeds were not collected for examination during 1910. Of 317 samples of orchard grass collected, twelve were found to be adulterated with seed of meadow fescue or rye-grass, as compared with 55 samples found to be adulterated in the calendar year 1909. Of 371 samples of Kentucky blue grass 16 were found to be wholly or partly seed of Canada blue grass. Of 526 samples of redtop, 176 contained timothy seed.

F. J. DYER.

Notes.

Louisville, Ky.—A seed warehouse to cost \$17,000 is to be erected at 1339 West Walnut street by Wood, Stubbs & Co.

Malvern, Iowa.—A. H. Wilkinson of Chicago is to have charge of the garden seed department of the Summers' Seed House.

The Pennsylvania seed bill has emerged from committee minus the amendments of the Philadelphia delegation of seedsmen—so the war is on again. It would appear as if somebody had acted in bad faith. More later.

The W. W. Barnard Co. have leased the premises at 231-233-235 Madison street, Chicago, 45 x 183 feet, a five-

ACTINIDIA CHINENSIS, YANG TAU VINE.

Male flowers from plants which have flowered profusely for the past two seasons at the Plant Introduction Garden, Chico, California. Photographed April

18, 1910. The four vines at the Garden introduced in 1904, have borne only male flowers. Female plants are being imported by the Dept. of Agriculture.

story building (occupied at present by the Chicago American Newspaper), and after thoroughly remodeling same, expect to occupy the new quarters, January 1st, 1912.

PHILADELPHIA NOTES.

A distinguished visitor arrived on these shores on the S. S. Caledonia on the 8th inst.—Frank Cuthbertson—son of the senior member of the firm of Dobbie & Co., of Rothesay and Edinburgh, Scotland. Of course, he took the first train for Philadelphia, where he was received with open arms by the trade. On Tuesday he visited Scott's nurseries at Sharon Hill and on Wednesday took in Fordhook. He will spend a year in California before returning home.

The Farm Journal has completed contracts for its monumental new building, and will commence operations in the near future. The location will be at 7th street and Washington square, nearly opposite where the palatial new home of the Ladies' Home Journal and the Saturday Evening Post is now approaching completion. We are told on good authority that the spring editions of the Farm Journal have averaged this year 950,000 monthly, so it would appear that Messrs. Atkinson & Jenkins are pretty near "that million" they have been shouting about since their 100,000 days. If ever there was a case of deserved success, this is one. They may make the F. J. bigger in the years to come, but they will never make it better than it has been for the past 25 years.

A good story is going the rounds in Harrisburg at the expense of our Senator Heacock and a few other stalwart apostles of the doctrine of plain living and high thinking. It appears that some of the younger bloods, when letting off steam and indulging in joy riding of more or less severity, have represented themselves to be Messrs. Heacock, et al. Such procedure seemed to these sinners to be very humorous. The victims of this unconscionable conduct take a different view of it. Your correspondent was asked, with a scowl (just as if he

had had something to do with it) what he thought of the proposition. We were non-committal but our private opinion is that they (the stalwarts) are getting their reputation cheap. Usually it costs a whole lot of real money to achieve distinction in that line.

Visitors: J. N. King, Norristown, Pa.; Parker Thayer Barnes, Harrisburg, Pa.; W. C. Langbridge, Cambridge, N. Y.; J. Riley, Trenton, N. J.; G. Rosbach, Pemberton, N. J.; Frank Cuthbertson, Edinburgh, Scotland; Wm. Duckham, Madison, N. J.; Bertrand H. Farr, Reading, Pa.

NEWS NOTES.

Cambridge City, Ind.—M. H. Gaar has purchased a tract of land near here for the establishment of a nursery.

Leominster, Mass.—About \$500 worth of glass was broken by a wind storm in the greenhouse of George M. Kendall recently.

Minneapolis, Minn.—A greenhouse is to be included in the equipment of the new High school on Fourth avenue and 34th street.

Kingman, Kan.—A flower and vegetable growing business has been started here by Riggs & Johnson. They have one house and are erecting another.

Coeur d'Alene, Idaho.—Adolph Donart, florist, has purchased property across the street from his greenhouse and will move his residence there, so as to have room to enlarge his greenhouse.

Washington, D. C.—Gude Brothers Co. have purchased from the Washington Loan and Trust Co. the property formerly owned by The American Rose Company, consisting of eight acres of land with greenhouses and other buildings. The extensive range of houses is in bad shape, and will be torn down and rebuilt for rose-growing purposes, for which the location seems ideal. It is within a stone's throw almost of the Capitol building, and in course of time the land should prove a good investment for the Gudes. The old Strauss place—1 $\frac{3}{4}$ acres—is not included in the deal.

Dreer's Select Potted Roses

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

Of Interest to Retail Florists

Cleveland, Ohio—G. P. Braund & Co.'s plant at Newburgh was damaged by fire on May 5.

Clarinda, Iowa—The Clarinda Greenhouses lost considerable glass during the storm of April 30.

Charlotte, Mich.—The cut flower store of W. E. Garman has been taken over by J. H. Gibbons.

Oswego, N. Y.—Joseph and Albert Thomas are to assume the florist business of their father, A. J. Thomas.

Carrollton, Ill.—Much damage by hail was done to the greenhouse of Clint McPherson recently. The loss was fully covered by insurance.

Washington, D. C.—Mothers' day brought a noticeable trade in white carnations and the visible supply was exhausted early. Prices went up on all colors.

ST. LOUIS NOTES.

J. Cerney is building two new houses at Kirkwood. Mr. Cerney was until recently with the Woodbine Floral Co.

The Ladies' Home Circle held their monthly meeting on Wednesday, May 10, at Trump's Hall, Delemear and Taylor avenue. A splendid afternoon was spent by those attending.

Florists Sanders, Miller, Schoenle, Beneke, Weber, Herzog, Bergesterman, Bruning and Windler attended a public hearing last week Tuesday at the House of Delegates hall to defend their bill to prohibit crepe pulling. Talks were made by Messrs. Beneke, Sanders and Windler in favor of the bill. There was no one present to oppose the bill and the committee will report favorably at the meeting of the delegates as to its passage.

Visitors: Guy Reyburn, representing Henderson & Co., Chicago.

NEWS NOTES.

Lenox, Mass.—Rudolph Mauserberger has leased the greenhouses on the Cutting estate.

Orville, Ohio.—Albert and Everett Lechy of Holmesville have been here looking up a site for a greenhouse.

Highland, Ark.—The Patterson Orchard Co., of St. Louis, has established headquarters here, investing \$65,000.

Watertown, S. D.—Peter Siverts is now located at Lake Kampeska, where he intends to start a nursery soon.

Fulton, Ill.—E. J. Thompson and John Newendyke, doing a nursery business under the name of Riverside Nursery, have dissolved partnership.

Mr. Thompson has sold his interest to his partner.

Rugby, N. D.—N. P. Lindberg has disposed of his greenhouse in Grand Forks and will devote all his time to his house here.

Long Island City, N. Y.—Pankok & Schumacher, growers, will dissolve partnership. Mr. Schumacher is retiring on account of ill health.

Elmwood, Conn.—L. L. Barton of Milford has purchased 23 acres of land here and will start next month to erect a range of greenhouses for his wholesale florist business.

Peonies for Memorial Day

We have every reason to believe that we will have a good supply of Peonies for Memorial Day, although not in quite as large quantities as last year on account of the late season. Prices will probably rule about the same — perhaps a trifle higher. We will know definitely in the course of the next few days. Mean-time we invite correspondence so that your wants may be known in good time and properly taken care of.

BOXWOOD SPRAYS FOR MEMORIAL DAY

Order in good time so that stock may be reserved for you and shipped on the date you wish. Do not leave this until the last minute.

We are the introducers of this item and headquarters for it. It has become immensely popular, not only for holiday work, but all the year round. The most useful and decorative green imaginable. Artistic wreaths and designs can be made of it and find ready sale. Our stock is always clean and fresh with rich, glossy, dark green foliage. Often sold as the German Myrtle. No surplus wood. The very best quality for florists' use. **\$7.50 per 50 lb. crate.** Special prices for large quantities.

Ivy Leaves, Leucothoe Sprays, Dagger Ferns, Galax, Magnolia, Bay, Etc. — at lowest market prices. See our weekly price list.

RIBBONS. — Some of the choicest novelties, exclusive patterns, and endless variety from which to choose. Supplies of all kinds.

Flower Market Reports

BOSTON Low vitality is evident in all phases of the flower trade here at the present time. The situation is not greatly at variance from that of past years, however, as May is usually a rather embarrassing month for the flower dealer for many obvious reasons. If possible the present is simply a few degrees more contrary than any of its predecessors. Yet there is a fair call for some things. Richmond roses for instance, and the higher grades of Killarney show considerable activity and, in carnations, the white ones are moving with gratifying alacrity. Lily of the valley is very slow and gardenias are an awful drag. Cattleyas find a fair response and smilax is scarce and in active demand. Daffodils are finished, all except the poeticus section, which are coming in from outdoor gardens. Decoration day supply is a very doubtful proposition in which the weather is the principal factor.

CHICAGO The drop in temperature recorded last week was of short duration. Mid-summer heat prevails and for many days roses and carnations have had to withstand a hot wave that cannot help tending to soften the stock. The buds

have opened so rapidly that practically the same condition prevails that the Chicago market experienced two weeks ago—too much medium stock. Out-of-door flowers have developed rapidly and these added to the indoor blooms have made an accumulation not to be handled with profit. The very best only could be sold to advan-

tage and good medium went slowly, while there was nothing but the barrel left for the poor grades. Reports from the wholesalers differ considerably as to proportion of stock disposed of, but it undoubtedly depended largely upon the shipping trade the individual firms possess. An extra

Flower Market Reports

(Continued from page 757)

heavy demand for funeral flowers the past week has helped out much. The peony question is an absorbing one just at present and the possibility of home-grown peonies being in the market for Memorial Day means thousands of dollars to the peony grower and that many less dollars for the rose and carnation growers. One thing seems sure, that out-of-door flowers are likely to be gone before the end of the month.

A generally satisfactory tone prevails. The many schemes used by florists collectively and individually to create a sentiment for mother's day has brought good results. It helped materially to clean up a large surplus of carnations and many boxes of flowers or plants were sent out. This latter fact should not be overlooked by any means, because it may contain the seed for a day similar to Valentine's day.

The unprecedentedly heavy crops of roses still continue to harass the wholesale market and a return to normal conditions seems as far off as ever. Observant judges attribute the enormous and ever-increasing product largely to the adoption of the Killarneys as standard market sorts in place of the old Bride and Bridesmaid, the Killarneys being so much more prolific and easily grown and the blooms in the lower grades being so much more uniform and salable. The carnation seems to have fared somewhat better than the rose this season, values having shown more stability and less sacrifice of large crops having been required, but it was inevitable that, with such an overwhelming avalanche of roses, all sorts of stock should feel the depression and so it is that the wholesale growers and dealers are unanimous in their verdict that the season now approaching its close has been disappointing in its results. Just now large quantities of lilacs, tulips, narcissi, dogwoods and other outdoor flowers encumber the market and add to the embarrassment of those whose business is to find sale for the stock. On very few things can a specified figure be maintained. Quality, generally, is very fine. Gardenias with 12 to 18 in. stems are abundant and glorious gigas cattleyas maintain the prestige in the orchid line, while sweet peas in almost endless Spencer varieties are the best ever seen here. Smilax has

THE NEW HARDY EVER-BLOOMING CARNATION "CRIMSON KING."

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long; never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that will give as much satisfaction as the Hardy Carnation Crimson King. 2½ in. pots, per dozen, \$1.25; per 100, \$8.00; per 1000, \$75.00. Twenty-five plants sold at hundred rates; 250 plants at thousand rates.

Our new trade list of everything you need now ready. Mailed on application. Write today.

For larger size ferns write for prices. Our new trade list of everything you need now ready. Mailed on application. Write today.

**IMPORTANT SPECIAL NOTICE.
PRICE ADVANCE.**

The heavy demand from those who have seen Nephrolepis Roosevelt growing on our place and scarcity of stock compels us to advance the price on all orders dated after June first, to the following: Two and one-fourth inch pots, 50 cents each; \$4.50 per dozen; \$35.00 per hundred; \$300.00 per thousand. It is our belief the price of Nephrolepis Roosevelt for 1911 will be maintained during the season of 1912.

Obituary**Charles F. Mielenz.**

Charles F. Mielenz, florist, Troy, N. Y., died at his home on April 25. He was born in Germany sixty-five years ago. A widow, one son and three daughters survive him.

Ella Wende.

Ella, the little nine-year-old daughter of Oscar Wende, one of the gardeners at Washington Park, was killed by a street car on Sunday, May 14th, near her home, 6751 S. Paulina street, Chicago. The father was carrying the child a bunch of flowers when the sad news reached him.

May E. Campbell.

Miss May E. Campbell, associated with her mother in the florist business at 1638 Federal street, Philadelphia, died suddenly on the 7th inst. after an operation for appendicitis. Miss Campbell was well-known and popular in the trade and a familiar figure in the wholesale markets, as she did most of the buying for the business.

Gustav Peters.

Gustav Peters, though not a florist in his early life, made the handling of cut flowers his occupation for thirty years and until failing health caused him to retire he had a stand in E. C. Amling's wholesale store. Mr. Peters was born in Germany, 71 years ago in

June, and spent all his childhood in the fatherland. With his son-in-law, Chas. Arnold, he successfully managed his greenhouse plant at Desplaines, Ill. He died May 12th and the funeral was from the home at 1515 Larabee street, Chicago, May 15th. He is survived by a wife and daughter.

J. R. Tranter.

A noted British nurseryman has lately passed away in the person of Mr. J. R. Tranter, of Henley-on-Thames. For many years the deceased had been a familiar figure at the leading horticulture shows. As a dahlia raiser his variety, Mrs. Tranter, has come prominently to the front, besides others. Mr. Tranter was a member of the Committee of the National Dahlia Society, and a chief exhibitor at the Society's shows. He also raised the chrysanthemum, J. R. Tranter, which has gained favor amongst growers in America.

W. H. A.

B. Latour-Marliac.

B. Latour-Marliac, Tempie-sur-Lot, France, died a few weeks ago, aged eighty years. He was well known as

**B. LATOUR-MARLIAC.**

a hybridizer of nymphaeas, some of the best known and most valuable varieties being the result of his forty years' work. His son will carry on the business.

Tina Schenck.

This little girl, three years old, only child of Mr. and Mrs. Charles Schenck and the pet of the neighborhood, met with a sudden death on May 10, from injuries received from the falling of a large flower pot upon her head from an upper floor window sill at 1590 Amsterdam Ave., New York. The child was on the sidewalk with her go-cart, under the care of a maid when the accident occurred. Mr. Schenck is of the firm of Traendly & Schenck, wholesale florists, and nothing has happened for years which has drawn out the deep sympathy of the florist trade as has this lamentable calamity.

Clarksville, Tenn.—The wind and hail storm of April 29 broke about 800 lights of glass in the greenhouse of James Morton.

Flower Market Reports.

(Continued from page 750.)

The market opened CINCINNATI up last Monday with a brisk demand. From Tuesday to Thursday, inclusive, there was a decided falling off in trade, while on Friday and Saturday there was a reawakening in the demand, the market closing very strong. Mothers' day can be given most of the credit for the best week's end business since Easter. The demand from out-of-town for white carnations was exceptionally heavy and price ruled very firm. A little more than a sufficiency of roses is apparent. Many have to be moved in job lots. The supply of long Beauties is far in excess of the demand, while the short ones are relatively scarce. Callas are next to immovable, but lilies meet with a fair request. Outdoor lily of the valley has affected the sale of indoor stock. Local grown peonies have made their appearance and if the present mid-summer weather continues most of the earlier varieties will have finished blooming by Decoration Day.

A brisk business PHILADELPHIA was done the latter part of last week in flowers suitable for boutonnieres, such as gardenias, sweet peas, carnations, etc. The early part of the week was nothing extra. Red carnations sold poorly and roses of all kinds were rather sluggish. There was no extra demand for orchids, callas or lilies. The demand seemed to be all for the lower-priced classes of flowers except in one or two instances. For example, while good long-stemmed sweet peas sold well there was nothing doing in shorts of this popular flower—and the supply of shorts preponderated. Outdoor flowers such as lillac, tulips, irises, yellow alyssum, etc., sold fairly well, but at very low prices. The prospects for peonies for Memorial Day have improved.

The market was again ST. LOUIS glutted up with extra fine stock and everything seasonable could be had by the thousands. Business has not been so good, a great many of the retailers complaining of dull trade. On Saturday and Sunday quite a little business was done for Mother's day. It looks as though this week is going to see another big glut.

A cut rate war is being SYRACUSE ing carried on here by some of the florists. Roses and carnations are advertised at 35 cents per dozen; how long it will continue remains to be seen—there can't be much money in it at those prices. The school children this year are asked to give plants in place of cut flowers for Memorial Day. This

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

DURING RECESS.

A Good Time at Tuxedo.

The New York Florists' Club bowling team favored the Tuxedo boys with a return match on Wednesday, May 10th. Somehow the Tuxedians managed to win over the New York experts. Fred Barth carried off the prize for highest score, given by Mr. Ebel. The scores were as follows:

TUXEDO PARK.	NEW YORK.
E. Barth... 121 125	Manda 142 166
G. Thomson 130 128	Richards .. 135 135
D. S. Miller 136 143	Kakuda ... 103 113
A. Fischer. 131 129	Scott 138 116
F. Barth... 219 209	Chadwick.. 149 172

The Tuxedo H. S. bowling team will play a return match with the New York Florists' team at Thum's Alleys, Saturday, May 27th.

New York Bowlers.

Scores recorded Friday evening, May 11, were as follows:

Ch'dw'k, 202 191 186	Kakuda, 140 104 127
Manda, 166 196 169	A. R'k's, 176 150 157
Scott, 179 162 138	Shaw, 117 145 182
W.R'k's, 130 171 142	Nugent, 99 109 117

DECORATED FIREMEN'S GRAVES.

The Fire Department of Washington, D. C., has a pretty custom, worthy of emulation elsewhere, of decorating the graves of firemen. In accordance with this custom established four years ago by the then chief, Wm. T. Belt, his successor, Chief Frank J. Wagner, and a detail of men from all the fire stations went, with supply wagons, to the cemeteries where firemen are buried and strewed their graves with flowers. Sixty-eight graves of former firemen were decorated in Washington, Maryland and Washington cemeteries. F. J. DYER.

NEWS NOTES.

Syracuse, N. Y.—Henry Burt has purchased the Benedict greenhouse.

Rhinebeck, N. Y.—The greenhouses of Julius Lown have been purchased by George D. Fritz.

Landenberg, Pa.—George M. Baldwin has purchased the greenhouse plant of George M. Chandler.

Columbia City, Ind.—Benjamin Litman, formerly with Heller Bros., New-castle, has leased the Noble greenhouses for a period of ten years.

Pasadena, Cal.—H. F. Prentice of Long Beach has contracted for a three-acre tract in the southeast section of the city on which he will establish a greenhouse and raise cut flowers.

FOR DECORATION DAY AND ALL OTHER DAYS USE ARTSTONE FLOWER VASES

Artstone Vases do not, like iron, become so hot in midsummer as to burn the plants. Artstone is indestructible from exposure, while iron soon rusts, and marble gradually discolors and decays. Flowers, like gems, require appropriate settings. The artistic beauty of these creations attracts admiration and lends a touch of quiet elegance to the surroundings. They serve to enhance the beauty of the Lawn or Porch wonderfully. Popular also for Cemetery decoration. Bird baths and Sun dials made to order.

PATRICK GRACE, 55 Union St., BRIGHTON, MASS.

"INSECTS."

A paper by M. C. Ebel, read before the N. Y. Florists' Club, May 8, 1911.

An intelligent discourse on insects is always interesting to florists and gardeners, but when one is limited to a ten-minute discussion on so important a subject, as I have been by your essay committee, it does not permit of any broad presentation of all that might be said respecting the many insect pests so troublesome to those engaged in any branch of floriculture, and will afford me no opportunity to say what I might like to regarding some of the two-legged bugs we daily encounter.

In approaching your committee to learn what they had in mind when they called on me as to just what points they desired to have me elucidate I was informed that they were thinking of insecticides, but that their modesty restrained them from placing any limitation on me, and, as there would be no insecticides were there no insects, they gave me the entire field to talk on, all providing, however, that I would restrict myself to the time limit if I should attempt to cover it all. As the treatment of insects is more within my line than the cultivating of them, I will confine myself to some of the methods for their control. My experience has taught me that entirely too little thought and consideration is given by the grower to this important feature of the business, and the neglect of this at times causes them serious loss, which might easily be overcome by a little more attention to the preventing of insects getting a foothold on their plants. In every other branch, the progressive growers are alive to the new conditions and methods employed and keep themselves in tune with the times, but when it comes to controlling insects it appears that too many of them find that their grandfather's ways are still good enough for them. But plants are very much like the human being, who is not content to bear only what his forefathers suffered,—they are continually producing new diseases and insects and it is essential that the florist or gardener who is ambitious to rank with the successful of his profession should study this important phase of plant culture as he does the temperatures and fertilizing, etc.

Some growers prefer fumigating or vaporizing, and others spraying, as a means of insect control. From the results that are being obtained there is little doubt that both remedies are effective when properly applied, but improper applications, no matter how good the material employed may be, must result in failure, and carelessness oftentimes is the chief contributor when bad results are obtained. Both the methods referred to have their special merits, fumigation being more generally regarded as the most economical from the labor saving standpoint. But on many of the large places spraying is being resorted to more and more, for it is found to be the less harmful to plants, and with proper system the labor of an establishment can be so engaged in the work without additional cost above that of fumigating; in other words, when everything is done in its time and place spraying can be made one of the routines of the regular work in

a house. Fumigating requires the filling of a house, while spraying is necessary only in that part of the house where the pests have taken a hold, when cures are sought. Still, every grower should bear in mind that "an ounce of preventive is worth a pound of curative" and nowhere can this old adage be more truly applied than in the control of insect pests. Our most successful growers no longer wait for the insects to put in appearance but fumigate or spray regularly to keep the pests down, as they realize that clean plants make healthy growths. Too much care cannot be exercised in the use of insecticides to obtain proper results. Many men are satisfied to make a guess at the proportions required and will not take the trouble of careful measuring and then when failure, or worse, injury results, the remedies are immediately blamed and the careless management of those entrusted with the work seems seldom to be considered. Fumigation and spraying is regarded by too many as only boys' work, although no careful grower would set an apprentice at work to attend to the fertilizing of his houses and it certainly does not seem that one of these departments in the growing of plants is of much less consequence than the other. It must be admitted that much more attention is given today to the proper means and methods of insect control than has ever been the case in the past, and it is also true that the means for their control are more effective than they have been heretofore; but by no means has perfection been attained and great opportunity is still at hand for further improvement to those who are giving thought and study to the ravages which result in the loss of millions of dollars yearly in the horticultural and agricultural industries of this country.

To substantiate some of my assertions of the laxity found among so many growers in the treatment of insect pests, I recently came across a grower in charge of a large range of glass who condemned one of our products, because he could not get the results his neighbors were getting, as not being a uniform material. On investigating I found that he had misunderstood the directions given him by a neighbor and was using the product at half the strength prescribed.

A similar complaint came to us from one of the well-known estates of this part of the country. A visit to the place, and an investigation, found that the man entrusted with this work was trying to make a gallon reach for an area of glass for which two gallons were required. His superintendent now sees to it that he uses the necessary quantity to obtain effective results.

Most of you here are familiar with the unfortunate experience which Aphine suffered shortly after it was placed on the market, due to the placing of too much responsibility on a man whose capabilities were overestimated, and who, for some unaccountable reason, never uncovered, appeared not to be satisfied with the good thing he had but continued to experiment until it practically resulted in disaster. While the experience was a costly one and the reputation of the remedy at the time was badly shat-

tered, persistency, however, has been rewarded. For more than a year it has proven to the most critical experts that its merits are equal to all that has ever been claimed for it. Now that it has fully recovered its reputation I want to thank those who, having had faith in the product and knowing all the circumstances connected with the unfortunate encounter did not lose confidence in it, and especially the trade papers, for their impartial attitude and fairness at a time when 'the power of the press' meant much to us.

PROTECTING WASHINGTON'S SHADE TREES.

The Department of Agriculture is preparing for an onslaught upon tree pests just as soon as it is thought the leaves are sufficiently mature for the best results to follow spraying. The terrapin scale on tulip poplars, and caterpillars infesting other shade trees are to be fought by means of a new spraying outfit which has been ordered. It is reported here that the Denver park commission began spraying early in February. Several times the cry has been raised that the gypsy moth had invaded Washington. Thus far, however, according to the entomologists, the worst foe to the capital's shade trees has been the tussock moth caterpillar. The most satisfactory campaign against this pest has been to band the trees with cotton or some other soft, fuzzy material which the larvae cannot cross. This year an arsenate of lead spray is to be made use of.

**"FUNGINE"**

**An infallible remedy for mildew,
rust, and other fungus diseases.**

The Cedar Hill Gardens,

Sea Cliff, N. Y., May 8, 1911.

"I take pleasure in telling you that after having tried Aphine according to your directions, I have personally found Aphine better for black aphids on violets and mums than the Hydro Cyanide Gas, being less dangerous for the plants, as well as for the operator, and doing the same work with equal efficiency. I have not tried Fungine myself, but followed its use day after day at one of my customers' carnation and rose houses. The gardener agrees with me, and all the greenhouse men, that Fungine is a grand preventive, as well as the best destroyer of mildew and carnation rust, if applied properly. It does all it is recommended to do. We cannot be without it in rose houses."

T. H. POLBOS

Volcano Greenhouses,

Nevada, Mo., May 9th, 1911

"We received the Aphine you sent us and it is everything you recommend it to be. I am glad we now have something that we can mix just as directions call for to get the proper results."

E. D. PIERCEY, Mgr.

Kirkwood, Mo., May 1st, 1911.

"We have tested the Aphine sent us and the results were very satisfactory. We used Aphine according to directions for black aphids and find all aphids killed on first application. We have full faith in Aphine."

What the Users say

"Temperatures Easily Maintained; Fires Only Once at Night"

We have at present 1500 sq. ft. of glass and think this boiler will take care of 25000 sq. ft. of glass, at 52° in greenhouses. We have no trouble in maintaining proper temperatures, and fire but once at night. We put in the piping system according to your plan in three new houses. The two old houses we left the way they were, which caused us some trouble. We will change pipes this summer according to your plan, and will then have no trouble. Your piping plan is fine, and the Generator works well; in fact, we could not have done without it on account of the piping in the old houses. WENSEL & HECHT, Anglum, Mo.

The First Curved Eave House Was A U-BAR

Don't think because it's a Curved Eave House, it's a U-Bar Curved Eave. No one can build U-Bar Curved Eave houses but Pierson U-Bar Company. There is no Curved Eave House as light as the U-Bar.

There is no house *like the U-Bar*. Send for catalogue and see for yourself.

U-BAR GREENHOUSES

PIERSON

DESIGNERS AND BUILDERS

U-BAR CO.

1 MADISON AVE., NEW YORK

CANADIAN OFFICE: 10 PHILLIPS PLACE, MONTREAL.

Tuberous Rooted Begonias

In five separate colors — White, Scarlet, Crimson, Pink and Yellow —

SINGLE, \$2.50 per 100 \$20.00 per 1000
DOUBLE, \$4.50 " " \$40.00 " "

GLOXINIAS

In four separate colors — White, Blue, Red and Blue-bordered White. **\$4.50 per 100.**

Finest Mixed, all colors —
\$3.50 per 100.

CROTONS

Fine assortment, well-colored. 5-in. pots,
\$9.00 per dozen.

FINE FERNS

Ready for Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first-class plants of exceptionally good value,—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type, never showing a Boston frond. It has not reverted in the last four years.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$12.00 to \$18.00 per dozen; large specimens in 12-in., pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima that Scotti does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$18.00 per dozen; extra fine specimens, 12-in. pans, \$5.00 each.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted,—Pteris Mayii, Wimsetti, Adiantoides, Aspidium tsusimensense, Cyrtomium falcatum, etc.

Nice plants, 2¼-in. pots, \$3.50 per 100.

Fruit and Vegetables under Glass

YOUNG VINES

Young vines, making their first year's growth, after being planted out in the border, will need constant care to keep them growing straight and clean. Being cut back to one eye this will now be grown to considerable length and should be stopped at intervals of four feet, which helps to swell out the cane. Keep this growth tied to a wire to keep it straight, as this will be part of the rod next year. Do not allow any laterals to grow from this until it has grown half way up the house. This will give you plumper eyes at base, where they are needed for next season. After reaching the half way line they can be left to grow more as they choose. This extra head growth will cause more root action, helping to fill the new border with fibrous roots. Canes which were started late and have been used to plenty of air will not need to be closed at all now. Where it was necessary to start earlier through having pot trees or other stuff growing in the same house, these must be gradually used to more air until they can stand the ventilators open right along. Syringe with good force in the early morning and again as the sun is declining. Leave it as late as possible in the afternoon, so long as the foliage is dry by six o'clock. This will keep down red spider, etc., and invigorate the plant. Frequent waterings will be necessary, as more roots are produced. If borders are kept properly moist no shade will be needed.

SHADE FOR VINES

All older vines carrying a crop of partly developed fruit will now be benefited by a light shade on the glass, Muscats taking it a little heavier than the others. This prevents the strong sun from scalding the berries and scorching the tender foliage, through excessive transpiration. A serviceable shading is made of white lead and gasoline and needs applying with a brush.

FINISHED PEACH HOUSES

Peach houses, after having the crop cleared, will need to have all ventilators thrown wide open and the trees given a thorough syringing. This can be kept up from now on. If any pests have been troublesome, syringing with some approved insecticide twice a week will help exterminate them. Peach and nectarine trees in pots will require similar treatment. They can be taken outside and the pots plunged to the rim in ashes, which keeps them moist and stops the wind from blowing them over. Select a place where they will get plenty of sun and use the hose on them morning and afternoon.

MEALY BUG ON VINES

This is a very unwelcome visitor and when once established it is very hard to exterminate, the loose bark around the eyes, small cracks and holes affording it ample opportunity to escape the eye of the grower, and from any application which may be applied in the endeavor to kill it. This is a hard matter in the growing season, it usually being the case if solution is applied strong enough to kill mealy bug that it is harmful to fruit and foliage. If bug is noticeable on growing vines the best way is to let a boy look over them at regular intervals and kill all he can. If it has got as far as the bunches, a little cotton wool tied to the stalk will help to prevent its getting in. After clearing the crop in any affected house, wage war against them up until winter cleaning time, and then give them extra washings. A mistake is often made in storing half-hardy shrubs in fruit houses during the winter.

If these have been in contact with any bug-affected plants at any time they are sure to have some themselves, and in their turn leave some behind for the fruit grower to discover during the growing season. When once established, in a vinery it will take *time*, *work* and *patience*, and no partial supply of either, to exterminate them.

SHANKING OF GRAPES

This malady causes this withering of the footstalks of berries and often-times stems of the bunches, generally appearing when the berries show color, continuing until they are ripe and sometimes afterwards. Whole bunches have been known to go this way, but in such cases something is radically wrong. All shanked berries are sour and worthless. Should any be noticed when bunch is cut they must be removed with the scissors before being used. The causes of shanking are many and varied, the two chief ones being over cropping and borders being in bad shape, not giving the roots a chance to work as they should do. It can be seen at once that the one is as bad as the other. It is always possible to overcrop a vine even with good root action, and with no proper energy at the root shanking will show itself in time.

Vines carrying an excessive crop the first year may shank very little, but probably they will not color properly. The following season is sure to see so many berries shank. Proper care and stimulants if the growths are weak and a reduction of the crop are all that can be done when shanking commences. If the roots are into a bad sub-soil and out of control through the border being improperly made, this must be looked to in the fall and the border given a complete renovation such as HORTICULTURE advocates at that season of the year.

George H. Benson

Something More About Hippeastrums

While endorsing every word of Mr. Finlayson's article on Hippeastrums, I would like to draw attention to the fact that they can be made to produce two crops of flowers in the course of a season. While growing some of these plants we noticed that they generally send up their leaves in bunches of from four to six, and those that are flowered around the New Year will have these leaves completed by the first of April, and if then dried off slightly a flower will be pushed up that will come in about Memorial Day and there will still be plenty of time to grow another set of leaves by the end of September. As Mr. Finlayson points out, they are gross feeders. We have given them doses of manure water and sprinkling of Clay's fertilizer alternately, twice and sometimes three times a week and they seem quite able to use it all showing no bad effects from such treatment. However, the plants here are pretty well root-bound in eight-inch pots.

Memorial Day

Memorial Day, or Decoration Day, as we still like to call it, is with us once more, with its hallowed patriotic associations and its sweet commemoration of the pathetic incidents of a conflict the memories of the bitterness of which have all been wiped away. In the recognition of the day the florist has always been an indispensable factor and in some sections its importance surpasses even those great floral holidays—Christmas and Easter. Vicissitudes of the weather have much to do with the profitableness of the work the florist is called upon to do and the satisfaction he is able to give to his customer at this rapidly-moving season of the year. We hope the present season will afford him all the facilities for doing satisfactory and creditable work, worthy of the occasion and worthy of his art.

The moth nuisance

It is stated that experiments made by William Reiff of the Bussey Institution of Harvard, under the direction of State Forester F. W. Rane, have yielded remarkable results in the extermination of the gypsy moth through the artificial spread of the "wild disease" or "Flacherie," a disease contagious among caterpillars, which acts upon them as cholera in human beings. We ardently hope this will prove true. It must be apparent to all who have the misfortune to live within moth infested districts that the repressive measures hitherto practiced are utterly inadequate to cope with this fearful pest. According to statements made in the Evening Telegram of recent date both gypsy and brown-tail moths have been found on Long Island and the New York Department of Agriculture experts are busy in Jamaica and vicinity where the caterpillars have obtained a foothold. We think it is most likely that the unwelcome visitors in Long Island are the brown-tails and not the gypsies, thus far, but it is probably only a question of time before both these nuisances are disseminated over the entire country.

The Bulb Trust

The Holland Association of Bulb Exporters to America is, if rumor, occasional admissions of its representatives and trade indications mean any thing, one of the most dominant of trusts. It is a trust quite beyond the reach of our government, being domiciled in a foreign country—yet exercising absolute control over the sale of its entire line of products in this. Its hundred or more agents, a few of them even having made their homes here, are nevertheless closely banded together with the others, who are annual peripatetics, to maintain the policy and prices of the Holland organization, and, whether they live here or not, their sympathies are wholly pro-Holland. So complete is their control that they arbitrarily establish prices for this country, often much higher than their prices for the same goods in other countries. A striking example is given in the advance this season of about four dollars per thousand in the prices of the various grades of bedding hyacinths. Earlier in the season it was expected that tulips generally would be much lower than last year. This was expected in consequence of large lots of many of the finer sorts coming from new sources in the North of Holland, grown by farmers who were not exporters. It has been the policy of the exporters to discourage these farmer bulb-growers, to drive them out of the bulb business and to obtain their stocks at minimum prices for planting on their own increased bulb acreage. Evidently the Bulb Trust has accomplished its aim in getting control of the tulip situation, and they have practically maintained here the high prices of last year.

Seasonable Notes on Culture of Florists' Stock

ALLAMANDAS

These plants are favorites for flowering in pots during the summer months, and make good subjects when well grown for table centerpieces. As these plants bloom for months they are very adaptable for cutting purposes. If plants were started in a brisk heat the early part of April they should now begin to show flower. At this period they will need abundance of water—likely two or three times a day. Grow them in full sun and as the pots fill with roots, give liquid manure once or twice a week. Continue the use of the syringe every clear day and give more air as summer advances. If you want to work up a nice lot of stock they are easily propagated from cuttings of green wood. Place these where they can have a little bottom heat in a propagating bench, or use some small pots that are filled with equal parts of sand and leaf mold and plunge in the cutting bench and keep shaded until they are rooted. These young plants can be shifted into larger pots whenever the condition of the roots may require it. Increase the substance of the soil in later shifts to a good fibrous loam with about a fourth well-rooted cow manure, and add a moderate sprinkling of sand to the mixture. They should be grown on and pinched at least twice during their first season's growth. They should be dried slowly, starting in September and finishing up in October.

GERANIUMS

The proper time to make a start on geranium stock for next season is just now. Pick out some of the varieties and place them aside to plant out for future propagation so as to have stock that will give a lot of good cuttings by end of August and through September. Give them a good sunny place in good soil, and leave at least eighteen inches between the plants, for if planted too close they will make a mass of foliage with soft and drawn-up stems which makes poor material for propagation. If the season is very dry, give them a soaking of water now and then, and keep them thoroughly cultivated all summer. As the flowers are developing into full bloom they should be picked off.

GROWING CARNATIONS INDOORS

Those who wish to try this method should get their carnations planted out on the benches as soon after Decoration Day as possible. To have success with indoor culture only plant out good, stocky plants that were propagated by the middle of January, and grown on to 4-in. pot size without a check. Great care must be used after planting in regard to watering. The soil, if watered too freely for the first month is likely to get soured, but when they get a good hold of the soil they should be watered thoroughly, otherwise the plants will become hard and woody, and will fail to break away freely. Give frequent syringings which will encourage good growth and also help to keep down red spider, which often becomes troublesome. Give both day and night full ventilation, for they are truly air loving subjects. As soon as the shoots begin to elongate so as to show the stem between the leaves, the tops should be

pinched off, leaving three or four joints. Don't pinch off all the tops at once and then leave two or three weeks before pinching them again, but go over them every week and top just the longest ones, which will ensure a more even growth with a less tendency towards cropping. See that the benches are frequently cultivated during the summer. The dreaded stem-rot is reduced to a minimum by this method.

PLANTING OUT GARDENIAS

Now that the time for planting out these plants is here we must look to our soil, for much of the success in growing gardenias can be traced to the compost used. This should be of fibrous loam, two-thirds, and a third of old cow manure. Add to this mixture some coarse sand and charcoal so as to make sufficiently porous for the water to pass off readily. Plants that are nicely rooted in either 3 or 4-inch pots will make fine stock for benches. See that there is good drainage in your benches before the soil is put in. The plants can be set from 18 to 20 inches apart between the rows and about 16 inches apart in the rows. Just merely water around each plant until the roots begin to run through the bed, when they will need a plentiful supply of water. Give them a good syringing every good day for it helps to keep them free of insects, especially mealy bug, which if allowed to get a foothold, will give an unlimited amount of trouble.

SINGLE-STEM CHRYSANTHEMUMS

Where the idea is to grow single-stem chrysanthemums in pots there is no better time than from now up to the first week in June to put in cuttings for 6-inch pots. It is advisable to change the sand for this batch of cuttings so as to avoid as much as possible the cutting-bench fungus. Never let the cuttings show signs of wilting either from want of moisture or proper shade until rooted. When rooted, pot up into 2½-inch pots and thence into 4-inch, and finally to their last shift—a 6-inch pot. Never permit the plants to become too potbound until the last shift is reached. For the last shift use a rich compost. At least one-third of the bulk of soil should be of well rotted cow manure and good sprinkling of bone dust. The best place to grow these plants during the summer is on a bench where there is side ventilation which can be kept open day and night. Make it a practice to syringe several times a day.

SUMMER CARE OF PRIMULAS

A coldframe that can be made to face either north or east is the best place for all such winter-flowering primulas as *Kewensis*, *sinensis* and *obconica*. Place a coating of fine coal ashes at least three or four inches thick so the pots can be partially plunged. Shade during the summer with lath or cloth, which will keep the plants cooler than when they are covered with glass that has been whitened. Stock that is in 3-inch pots should be potted up before they are potbound. A good mixture to use is well rotted fibrous loam, three parts, leaf mold and well decayed cow manure one part each. Add enough of sand and fine charcoal to give porosity and sweetness to the whole.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Violets, Crotons, Marguerites, Masdevallas, Raising Perennials, Sweet Peas.

MENDEL'S LAW AS RELATED TO HEREDITY AND BREEDING.

By Dr. Herrmann Decker. Translated from "Cosmos" by Gustave Thommen.

V.

When we consider how, in practice, the results obtained by breeding according to Mendel's law so closely meet its demands, then we may surely predict that this law will be of the utmost importance to the business of the breeder and that it will stimulate activity in breeding to a high degree, in the near future. This is the more convincing because breeding, carried on under Mendel's law, becomes a more safe and less costly occupation.

Biffin, member of Cambridge University succeeded in raising new and constant varieties of wheat in a few generations. These new varieties were secured by following up a carefully considered plan, adhering to Mendel's law and combining the best and most useful qualities of several standard sorts of commercial wheat.

Having made sure that such qualities as length of halm, prolificness, size of kernel, immunity against rust, (under same conditions of soil), etc., do obey Mendel's law, convinced Biffin, that new and constant varieties of wheat which would fulfill the expectations of agriculturists could be produced and he obtained them in two or three generations. From this we may gather, what immense treasures the breeder may yet be able to offer to the farmer and husbandman, by closely following Mendel's law.

A word of warning and advice to those who may undertake breeding in any line according to Mendel's law, will not be in vain. In breeding along the lines of this law, the breeder will soon become aware that many things have to be carefully considered and that plain sailing is not always to be expected. In fact, many times, the breeder may almost lose courage, because something will seem to prove the rules of Mendel's law wrong. These perplexities have their origin in the selection of the parents. How can the breeder always be sure that these are pure? The longest and most elaborate pedigree is often enough misleading and of no value.

Our "Blue Andalusian" fowls had so far been regarded as a pure variety (although it was well known that "breaks" occurred regularly). But the very fact that these "breaks" occur, proves that the blue offspring of the black and white parents, consists of bastards only and so can not be constant or pure. Then, even if the parents really are pure (in conformity to Mendel's law), there will often be disappointments in regard to the result of some crossings. This will happen when the breeder undertakes to "pair off," characters or qualities which have no relation to each other.

For instance: If we should choose the red in the petals of one parent and the blue in the other as character marks, we may not know whether the one or the other really is pure; either or both might contain white and being impure in this way, white would

appear later on in the offspring. And even if both parents really are pure as to each color, then the red might belong to a red sapjuice, while the blue might be a deposit of blue color grains. These would be two characters which could not be combined, because they belong to two dispositions, of which none could suppress the other. Success in such a case could not be expected.

It is absolutely necessary that any two chosen qualities shall belong to the same class of characters. Many times close study of the first and second generation will be needed to get to the bottom of the question and to find the mistake made at the start. After finding and correcting the error, the goal will easily be reached and Mendel's law confirmed.

What heredity is and how occasioned, nobody can say, even today. We only know the laws under which its working can be demonstrated and taken advantage of. Yet, we have a burning desire to unveil this secret of secrets. Mendel has shown us where we must apply the lever if we wish to proceed. He has laid the foundation and many willing hands are now helping to further the progress of the building. That so much has been accomplished already, in this heretofore hopeless territory and that so many great results are sure to be yet obtained, only quickens our impulse and heightens our courage.

Now, what is it that is so new and unprecedented in this theory? That all living things, are successive series of character marks, chains of qualities; which at sexual union, are compared and are paired off, while one is preferred at the same time. The dispositions to all these characters and qualities are independent and indivisible and are at union easily joined in pairs and in the following generation just as easily separated. To have given to the world the knowledge of this fact, is Gregory Mendel's great merit.

But, what are these dispositions? Here we hesitate. Better let us ask first, what are they *not*? Let us remember, that all theories which reckon with original dispositions, assume that the small parts of the fertilized egg, by increasing in size and numbers, become organs and parts of the body. This small part becomes the left eye, that one the right leg, etc. Mendel's dispositions are *not* of this kind. They are separate, constant powers, which do not enlarge or grow; they remain what they are always and pass from one generation to the other individually and indelibly for all time. The disposition to become this or that, exerts itself as soon as a new being begins its existence. For instance, the disposition to be toothed, in a leaf, begins its work as soon as the leaf begins its growth; it is present in the plant before the first leaf is even formed; yes, even in the seed. The dispositions controlling height of plant, color of seeds, bearing capacity of parents, sugar contents of fruits, etc.—all these go through the generations and work. The dispositions are capacities or arrangements which set certain transactions in motion.

In the seed and in the germ they lie dormant and only present themselves, one after the other, side by

side, as their services may be required in the course of the development of a body. Being transmitted by heredity from generation to generation, all these dispositions meet and working hand in hand, acting one upon the other, they force the beginning body to form into a harmonious whole, according to a mutual plan.

This is a subject for thoughtful reflection and only deep and careful study, combined with well considered experiments (excluding philosophy and preconceived opinions), will bring us further.

One hundred years ago, Dalton put his "Theory of the Atoms" in place of the vague conceptions entertained as to substance. He claimed, "that substances are built up of separate atoms and that the multiplicity and variability of the chemical substances is the result of the manifold and various ways in which the atoms combine and group themselves."

Today we meet with the same thing in biology. And just as chemistry has, in the last few decades, advanced to the very foremost position, so do we hope that the new theory, "which regards the living being as a mosaic of qualities" will bear fruit and will open for biology (the greatest and most important branch of science), the way to still greater success.

(THE END.)

BRITISH BUMPTIOUSNESS.

Touching the British visitor report: We must commend Mr. Brunton on his able and condensed report. Out of the maelstrom of entertainments he has kept his head very well and given us a very common sense account of their experiences. Of course, it is to be deplored that they should have touched our Boston friends on the raw in connection with their great exhibition. But that was a frank and free expression of opinion and that is what is wanted all the time. Let us not be too sensitive about a little criticism. If it is honest and to the point, it is wholesome; and in that direction lies progress. We will do better next time! And, maybe the Temple Show will do better, next time! You don't suppose these bright boys came to see us without learning something—in spite of their native insularity, do you? Of course not. Both countries are benefited. "Sock it" to us! That's what we want!

G. C. WATSON.

TACOMA ROSE SHOW.

E. R. Roberts, former superintendent of Tacoma parks, and A. A. Hinz and H. W. Manike, florists, will be the judges of Tacoma's first annual rose show, to be held June 16 and 17 under the auspices of the newly organized Tacoma Rose Society.

The Rose Society has not yet decided where the coming show will be held, but expects to lease the first and probably the second floor of the Milbank building on C street for the spectacle. F. C. Smith, another professional florist, has been named as floor manager and the society discussed preliminary plans for the exhibit hall settings. An elaborate floor plan will be designed to the end that the show will be one not only of floral but decorative beauty.

LILACS AT ARNOLD ARBORETUM.

The collection of the common lilacs has been much enlarged and now contains nearly all the principal varieties, although some of the plants are still too small to flower. The blooming came on with a rush last week, and most of them are already finished. The earliest species in the collection is the white-flowered *Syringa affinis*. This slender shrub with fragrant flowers is a favorite ornament of the gardens of Peking. Nearly as early is another north China lilac, *Syringa ob-*

lata, with large pale purple, fragrant flowers. Nearly as early to flower as these two Chinese species is *Syringa hyacinthiflora*, a hybrid between *Syringa oblata* and the common lilac. This hybrid grows to a large size, and the small, blue-purple double flowers are very fragrant. It is interesting as one of the early hybrids in this genus. More beautiful and in every way a more useful garden plant is another hybrid, *Syringa chinensis*, raised many years ago in France. The name is unfortunate for its parents are *Syringa*

vulgaris, now known to be a native of the Balkan Peninsula, and Persian lilac. The flowers of this hybrid are produced in long clusters which are so heavy that they become semi-pendant on the slender branches. There are varieties with rose-colored and with pale nearly white flowers. Another Chinese species, *Syringa pubescens*, has small leaves, and small, long-tubed pale purple flowers which are produced profusely in small clusters. The value of this plant is in the delicate perfume of the flowers.

BUFFALO PARKS.

Buffalo City Parks, flushed with the first bloom of spring, are ready for the vast throng of pleasure seekers that will visit them during the summer.

The park system of Buffalo includes, in addition to 31 small parks, six of greater extent. In these latter are the botanical and zoological exhibits, the recreation grounds, the lakes, lawns and driveways. Drivers of automobiles, carriages and saddle horse have for their use miles of road and paths kept in perfect condition by park superintendent Seymour. On Humboldt Parkway, the old speedway is being seeded down. The road is completed between Ferry street and the park and two rows of trees have been added. Humboldt Park is in shape for the summer with the exception of a number of needed lights still to be placed. The wading pond has been emptied and cleaned and the lawn and flower beds groomed.

At South Park which is under the direction of Prof. Cowell, the collection of tropical plants has a national reputation as being one of the finest in the United States. At present there are masses of orchids in bloom, lemons and oranges nearly ripe and the bananas are growing rapidly.

The Park Commissioners have in view the immediate improvement of Cazenovia Park by the erection of a casino and refectory, the cost not to exceed \$30,000. It will contain rest rooms, shelters and a lunch department. The new island, six acres in

extent, which was made when the new lake was constructed, is almost finished. It will be accessible from Cazenovia street, through the park and from the park drive near Abbott road and will be one of the most beautiful spots in Buffalo.

A trip through Forest Lawn found everything in the pink of condition, Superintendent Troup being a busy man getting things shaped for Memorial Day. The placing of urns and blooming plants has already begun and by the end of the week the beautiful resting place may be seen in a mass of blooming plants and flowers.

E. C. B.

DECORATION DAY.

Long years ago ye marched away.

Buoyant with patriot impulse, all:

To me it seems but yesterday

I heard the shrill life's morning call!

And once I saw the setting sun

Gleam on your bayonets, heard the drum!

Into the twilight, one by one

Ye vanished, and our hearts were numb.

Alike it flamed on battleship

Enveloped in war's sulphurous gloom;

Oh, there was many a whitened lip,

And many a stout heart met its doom!

Nor Spartan pluck, nor the fierce stand

At Lodi's bridge, on victory bent,

Displayed tenacity more grand,

Or courage more magnificent.

In honor of that far-off day

I hear the bells of memory chime;

Sweet bells! Their tongues shall chant

alway

Your valorous deeds thro' coming time.

The world gives loudest plaudits oft

To guilty kings, not knowing yet

That he who proudly bore aloft

The "old flag" wore a coronet!

Arthur Elwell Jenks, in *Boston Journal*.

A SIM SPECIALTY.

As an illustration of the extent to which enterprise and hustle can be carried we think that a house of tomatoes, plants already from 5 to 6 feet tall and well-laden with good-sized fruit, at Wm. Sim's place in Cliftondale, Mass., takes the cake. This house was in full glory with a phenomenal crop of sweet peas at the time of the National Flower Show! Another house with tomatoes planted from four-inch pots two weeks ago, is following along with fruits as big as plums. Nearly the entire place is in tomatoes at the present moment and the first picking was marketed on May 22nd. Violets, sweet peas and tomatoes follow and lap over one another at this remarkable establishment in a way to bewilder one. A field of corn, several acres in extent, was planted from pots last Saturday and the house where this corn was germinated was all settled down to tomatoes within 24 hours. Mr. Sim grows Comet, exclusively, as a greenhouse tomato and he has 50,000 of them. Asked about how he escapes white fly he replied that white fly gets no encouragement in houses grown so cool in winter as is necessary for violets. He has given up the frames for tomato growing entirely, and has two large houses constructed during the past winter from the discarded sash, which he finds much more economical as to labor than the sash frames were.

PERSONAL.

John Quinn has accepted a position with Edward Walsh, Hartford, Conn.

Ralph H. Amory has taken a position at the Elitch-Long Greenhouses, Denver, Colo.

Harry Menken is now in the employ of H. Magnuson, Bridge street, Manchester, Mass.

F. B. Tinker is now in charge of the Scott-Martin Floral Co., Denver, Colo., Miss Scott being no longer with the concern.

C. F. Schader has been elected to the presidency of The Golden State Plant & Floral Co., Santa Monica, Cal., to succeed T. H. Dudley.

Walter Edmond Eglington, late of Newport, R. I., has taken a position as orchid specialist with J. A. Carbone of West Berkeley, Cal.

John Dewar of R. & J. Farquhar & Co. will sail from Boston on the Ivernia, June 12th, to make an extended European tour of several months.

F. J. Cullen, of Thomas Cullen & Sons, Witham, Essex, and E. W. King, Coggeshall, England, reached New York on the Oceanic, May 17, and proceeded to Fordhook, whence they go to California.

The papers report Mrs. "Jack" Gardner as seriously ill at her home in Brookline, Mass. All friends of horticulture will wish a speedy recovery to this energetic, philanthropic lady, who has always been ready to promote, by all means in her power, the advancement of horticultural art.

Norman J. Coleman of St. Louis, Mo., editor of Coleman's Rural World, passed his 84th birthday last week. Mr. Coleman was at one time lieutenant governor of the state, secretary of agriculture under President Cleveland and president of the American Association of Nurserymen. He is looking forward to meeting all his old friends at the nurserymen's meeting here next month. He is daily at work as editor of his paper and is hale and hearty at this ripe old age.

Boston visitors: D. Fuerstenburg, Philadelphia, Pa.; Andrew Wilson, New York City; W. A. Manda, South Orange, N. J.; J. J. Karins, representing H. A. Dreer, Philadelphia, Pa.; Wallace R. Pierson, Cromwell, Conn.

STRINGENT RULES IN NATIONAL CEMETERY.

In the national cemetery at Arlington the Government will not permit any "vases, urns, tubs, hanging baskets, or other fixtures intended for plants, or any chair, settee, or other obstruction." An order containing this inhibition and ordering the removal of any of the "obstructions" named was made in October, 1903. This order provides further that no "trees, shrubs, vines, or other plants of any character or description will be permitted" on any burial lot. The widow of Captain John C. Dougherty came into conflict with the terms of this order when she tried to plant some ivy and roses on her husband's grave. She is aroused over the "unjust discrimination" of the officials, who permit things planted prior to last October to remain, and she declares that she will plant shrubs there despite orders, or will have the body of her husband removed to some place where she may do as she pleases.

F. J. DYER.

SELAGINELLA EMMELIANA.

This graceful little lycopodium in its green form is well-known among the florist trade and needs no description. Our subject is as the name indi-

cates, a golden yellow form of this useful plant, so much used for table decoration and jardiniere work. It is listed in Dreer's catalogue.

HARRY A. BARNARD'S JUBILEE.

An interesting presentation took place at the Royal Nurseries, Bush Hill Park, on the 29th ult., when Mr. Barnard was presented with a time-piece and ornaments inscribed as follows: "Presented to Harry A. Barnard on the celebration of the jubilee with the Lows, of Clapton, as a mark of esteem and affection from all employed at the Royal Nurseries, Bush Hill Park, April, 1911."

HARRY A. BARNARD

Mr. Stuart H. Low, who made the presentation, remarked on the extraordinary adaptability to change Mr. Barnard had always shown from the days when orchids were rare plants until the present time. The swiftly changing features of the horticultural trade appeared to come quite naturally to Mr. Barnard, and he moved with the times without difficulty. Mr. Barnard, in replying, nearly broke down, but being reminded by Mr. Low that he had faced greater dif-

ficulties, he rose to the occasion with his usual readiness, and made a good speech, giving some advice to the younger generation. The extraordinary vigor of Mr. Barnard was evident, even during his recent visit to the United States, when he was dubbed by his companions "an old hustler."—*Correspondent in Gardeners' Chronicle.*

CICADAS THREATEN WASHINGTON.

Washington.—According to the Department of Agriculture the cicada or 17-year locust has been located in Maryland, not far from its capital. The insects are scheduled to emerge from the pupa state this week, or not later than the first week in June, and for four or five weeks they are scheduled to flit amid the leafage of the seat of government, and the adjacent country. Moreover, Washington will not monopolize the attentions of the cicada, for it is expected to prove a destructive pest this year in practically all of the eastern and in some of the western states. The Department specifically mentions Connecticut, Indiana, Michigan, New Jersey, New York, North Carolina, Pennsylvania and West Virginia as being within the "sphere of influence," as statesmen say, of the 17-year locust, but Plainfield, N. J., is seemingly the worst infested place yet discovered, millions of the pupae being found there, and the greatest damage is looked for in Virginia and New Jersey. The damage done by the cicada is by piercing the young sprigs and stems in depositing their eggs.

F. J. DYER.

Brampton, Ont., Can.—W. E. Calvert, florist, has purchased four acres of land adjoining his property which he will use for market gardening.

Obituary

Ransom B. Jones.

Ransom B. Jones, florist, Stamford, Conn., died on May 7th.

C. O. Hunt.

C. O. Hunt, St. Elmer, Chattanooga, Tenn., died May 6th. His business will be continued by his wife.

S. A. de Graaff.

On April 25, S. A. de Graaff, senior member of the firm of Graaff Bros., Ltd., died at Leiden, Holland, aged 71 years.

George L. Chadborn.

George L. Chadborn, well known as a manufacturer of lawn mowers, died at his home, Newburgh, N. Y., May 11, aged 77 years.

A. W. Lempe.

Despondent over business cares, Arthur W. Lempe, 23 years old, a florist, committed suicide by drinking carbolic acid at the home of his parents, 1000 25th avenue, Milwaukee, Wis., on May 15th. Lempe had a floral shop at 581 Downer avenue.

Seth C. Wood.

The death of Seth C. Wood, a successful nurseryman and orchardist, occurred May 16 at his farm home, on the Long Bridge road, north of Knowlesville, N. Y., at the age of 69 years. He leaves his wife, one daughter, Miss Jessie M. Wood, of Rochester; one son, Edward H. Wood of Holley, and one brother, Jay Wood, of Knowlesville.

John G. Forbes.

John G. Forbes, for many years a prosperous florist of Auburndale, Mass., died on May 18th, after two years or more of sickness which caused him to sell out and retire from business two years ago. John Forbes was reputed to be the best flower salesman coming into Boston forty years ago, when he represented C. J. Power of South Framingham, Mass. He went into partnership with F. R. Mathison, as Mathison & Forbes, at Egleston Square, Boston, and on the dissolution of the firm started in Auburndale, where he has been ever since. His old partner, Fred Mathison, outlived him but three days.

Eggert Nagel.

This well known pioneer florist of Minneapolis, Minn., met a shocking death on the evening of May 16. Mr. Nagel was on his way to a meeting of the West Side Commercial Club. It was raining heavily, and as the car approached Mr. Nagel left shelter and started across the street. An automobile came through the blinding rain at the same moment, running rapidly, and pressed him so closely that he was compelled, to escape the auto, to try to run across in front of the car. He was struck by the latter, thrown thirty feet and picked up unconscious. He was taken to his place of business, where he died in a few minutes.

Mr. Nagel was 69 years of age, a native of Hamburg, Germany, and

came direct to Minneapolis from that country 46 years ago. For 16 years he was manager of the Mendenhall greenhouses, the first of the kind in the city. Later he entered business for himself and some time afterward took his son into partnership. He is survived by a son, Theodore W. Nagel, a daughter, Mrs. D. G. Miner, and a brother living in Davenport, Iowa.

The funeral was on May 18th at Lakewood Cemetery. About 35 florists attended in a body. Theo. Wirth, Hugh Will, Aug. and Oscar Swanson, Gust. Matinquist and Jerry Jorgenson were pall bearers. C. N. R.

Fred. R. Mathison.

On Tuesday afternoon, May 23rd, there was laid away in its last resting place the body of one of the finest men who ever adorned the florist trade of America. Endowed with an intellect far above the average, sturdy, industrious, and self-reliant, Fred. Mathison carved out for himself an

FRED R. MATHISON

honored record as a business man, and by his whole-souled generosity and companionable traits won a large place in the hearts of his associates. He was pre-eminently one of the famous "Old Guard" of the Boston horticulturists, four-fifths of whom have now gone to rest.

Fred. R. Mathison was born in Cod-sall Wood, Staffordshire, England, 70 years ago. Forty-three years ago he came to this country. He obtained employment in Arlington, Melrose and Woburn, successively, and then went to South Framingham, Mass., where we knew him first about the year 1873 as a flower grower of ability in the employ of the late C. J. Power. A few years later he went into partnership with John Forbes, who had been salesman for Mr. Power and who, strangely, was buried on the day Mr. Mathison died. Sunday, May 21. The new firm leased the Howard Greenhouse at Egleston Square, Boston, and carried it on for some years, when Mr. Mathison went into partnership with the late Charles Evans as Mathison & Evans at Watertown, Mass. After a few years they

separated, Evans retaining the old establishment and Mathison erecting new rose houses at Clematis Brook, about 25 years ago, which he conducted until his death with the exception of an interim when he leased the place to two employes, Anderson & Williams, who finally had to abandon it.

Mr. Mathison had been in poor health for two or three years, and had been very low for some months, the cause of death being given as dropsy. In his time of health he was a genial participant in all the festivities of the craft and active in their organizations, a most entertaining and practical talker in club meetings and elsewhere. President John Burton appointed him as a director of the Society of American Florists to serve for the years 1892-1893-1894. Messrs. M. H. Norton, Thomas J. Grey, Alex. Montgomery, P. Welch, Jackson Dawson and Wm. J. Stewart acted as pallbearers at the funeral. Burial was at Mt. Peake Cemetery, Waltham, Mass. He leaves a widow.

MASSACHUSETTS HORTICULTURAL SOCIETY SPRING SHOW.

The spring exhibition, held in Horticultural Hall, Boston, on May 20th and 21st was not notable for size or magnificence, but the exhibits were of excellent quality and variety considering the vagaries of this exceptional season. A specimen hydrangea from A. W. Preston, gardener J. L. Smith, said to be only a year old, was a triumph of cultural skill and well merited the silver medal bestowed on it. The plant bore 168 large heads of bloom, was gracefully symmetrical without stakes or other supports and measured over 6 feet through.

Another exhibit, one which received much attention from visitors, was a display of tree and shrub flowers from the Arnold Arboretum. The variety shown, each under label, was very extensive. Among the showiest subjects were the lilacs of which about fifty varieties were staged and the flaming Azalea Kaempferi from Japan.

Much interest attached to a group of *Lilium leucanthemum* and *L. myriophyllum* shown in vases by R. & J. Farquhar & Co. These together with a display of May-flowering tulips were awarded honorable mention.

Thirty-three varieties of lilacs came from the Blue Hills Nursery, a rich group of orchids from Mrs. J. L. Gardner. The other exhibits are sufficiently explained in the list of awards (other than the foregoing) which follows:

Calceolarias—six varieties: 1st, E. A. Clark. *Pelargoniums* six named show or fancy varieties, in not less than eight-inch pots: 1st, William Whitman; 2d, Mrs. J. L. Gardner; 3d, William Whitman. Six named zonal varieties: 1st, Mrs. Winthrop Ames.

Gratuities: Dr. C. G. Weld, 6 plants, *Hydrangea hortensis*; E. A. Clark, *Calceolarias*; Dr. C. G. Weld, Darwin tulips; George Page, display of *Iris Florentina* and lilacs; Blue Hill Nurseries, collection of lilacs; Mrs. J. L. Gardner, display of orchids; George Page, *Oncidium sphacelatum*; E. A. Clark, *American Beauty* roses; Mrs. E. M. Gill, annuals and other flowers.

First Class Certificate of Merit: Dr. C. G. Weld, for *Laelio-Cattleya*; L. C. Hyena x L. C. Canhamiana rubra.

Cultural Certificate: Miss Cornelia Warren, Superior cultivation of *Cattleya citrina*.

CLUBS AND SOCIETIES

AMERICAN NURSERYMEN'S ASSOCIATION.

Officers and Committees for 1910-1911.

President, Wm. P. STARK, Louisiana, Mo.
 Vice-President, E. S. Welch, Shenandoah, Ia.
 Secretary, John Hall, 204 Granite Bldg., Rochester, N. Y.
 Treasurer, C. L. Yates, Rochester, N. Y.
 Executive Committee: J. H. Dayton, Painesville, O.; E. M. Sherman, Charles City, Ia.; H. B. Chase, Huntsville, Ala.; Wm. P. Stark, ex-officio, Louisiana, Mo.; John Hall, ex-officio, secretary, Rochester, N. Y.

Chairmen of Committees.

Transportation: D. S. Lake, Shenandoah, Ia.; Chas. M. Sizemore, Louisiana, Mo.
 Tariff: Irving Rouse, Rochester, N. Y.
 Legislation East of Mississippi River: Wm. Pitkin, Rochester, N. Y.
 Legislation West of Mississippi River: Peter Youngers, Geneva, Neb.
 Co-Operation with Entomologists: J. W. Hill, Des Moines, Ia.
 Program: J. H. Dayton, Painesville, Ohio.
 Publicity: Orlando Harrison, Berlin, Md.
 Exhibits: J. W. Schuette, 5600 Gravois Avenue, St. Louis, Mo.
 Arrangements: John Hall, Rochester, N. Y.; J. H. Dayton, Painesville, O.; F. A. Weber, Nursery, Mo.
 Editing Report: John Hall, Rochester, N. Y.; Prof. John Craig, Ithaca, N. Y.
 Entertainment: F. A. Weber, Nursery, Mo.
 Forestry: A. J. Brown, Geneva, Neb.
 Co-operation with Fruit Growers and Associations: J. M. Irvine, St. Joseph, Mo.
 Trade Opportunities: Jefferson Thomas, Harrisburg, Pa.
 Nurserymen's Share in Civic Improvement: J. Horace McFarland, Harrisburg, Pa.
 Membership: John Watson, Newark, N. Y.

Program for Annual Convention, St. Louis, Mo.

Wednesday, June 14th, 9 A. M.

Addresses of Welcome—Mayor of St. Louis, Thomas L. Cannon, Secretary of Convention Bureau City of St. Louis.
 Responses, J. W. Hill, Des Moines, Iowa.
 President's Address—W. P. Stark, Louisiana, Mo.

Reports.

Secretary—John Hall, Rochester, N. Y.
 Treasurer—C. L. Yates, Rochester, N. Y.
 Transportation Committee—D. S. Lake, Shenandoah, Iowa; Charles M. Sizemore, Louisiana, Mo.
 Legislative Committee—East of Miss. River, Wm. Pitkin, Rochester, N. Y.; west of Miss. River, Peter Youngers, Geneva, Neb.
 Tariff Committee—Irving Rouse, Rochester, N. Y.
 Committee on Co-Operation with Entomologists—J. W. Hill, Des Moines, Iowa.
 Committee on Publicity—Orlando Harrison, Berlin, Md.
 Committee on Co-Operation with Fruit Growers and Associations—J. M. Irvine, St. Joseph, Mo.
 Committee on Trade Opportunities—Jefferson Thomas, Harrisburg, Pa.
 Committee on Nurserymen's Share in Civic Improvements—J. Horace McFarland, Harrisburg, Pa.
 Committee on Membership—John Watson, Newark, N. Y.
 Committee on Root Gall—E. A. Smith, Lake City, Minn.
 Committee on Entertainment—F. A. Weber, Nursery, Mo.

Wednesday Evening.

Meeting of State Vice-Presidents, subject to announcement.
 Meeting of American Nurserymen's Protective Association, in the Southern Hotel, at 8 o'clock. Thomas B. Meehan, Secretary.
 Meeting of Retail Nurserymen's Association. Guy A. Bryant, Secretary.

Thursday Morning, June 15th, 9 O'clock.

Report of Vice-Presidents on Officers and Place of Next Meeting.
 "The Nurserymen and the Entomologist, Prof. S. J. Hunter, Lawrence, Kans.
 "Spring Versus Fall Planting of Fruit

Trees," Dr. J. C. Whitten, Professor of Horticulture, Columbia, Mo.

"Ethics of Our Business," Harlan P. Kelley, Salem, Mass.

"Fraternity Among Nurserymen," Charles T. Smith, Concord, Ga.

"Standardization of Grades," W. J. Maloney, Dansville, N. Y.; E. P. Barnardin, Parsons, Kansas.

"Standardization of Prices at Wholesale," T. J. Smith, Geneva, N. Y.

"Standardization of Prices at Retail," Abner Hoopes, West Chester, Pa.

"Should Large Buyers not in the Trade, Parks, Cemeteries, Public Institutions, etc., be Given Trade Prices?" Thomas B. Meehan, Dresher, Pa.; Wm. Pitkin, Rochester, N. Y.

Friday Morning, June 16th, 9 O'clock.

"How to Extend Our Wholesale Markets," E. S. Welch, Shenandoah, Iowa.

"How to Extend Our Retail Markets," J. M. Pitkin, Newark, N. Y.; F. H. Stannard, Ottawa, Kans.

"Our Mailing List—Who are Entitled to Trade Lists?" E. W. Kirkpatrick, McKinney, Texas; Jim Parker, Tecumseh, Okla.

"Our Mailing Lists—Should They be Classified?" C. J. Maloy, Rochester, N. Y.; A. J. Robinson, Bedford, Mass.

"Our Mailing Lists—How Best Kept Up-to-Date?" C. J. Brown, Rochester, N. Y.

Entertainments.

Wednesday, June 14th, 2 P. M.—Special cars to Missouri Botanical Gardens.

8 P. M.—Protective Association meetings, etc.

Thursday, June 15th, 2 P. M.—No definite arrangements yet.

7 P. M.—Ladies ride to Summer Gardens.

8 P. M.—Shaw Banquet.

Friday, June 16th, 1 P. M.—"Steamer Alton" trip on the Mississippi River. Arrive at Jefferson Barracks 4.15 p. m.; military music, dress parade, etc.

AMERICAN POMOLOGICAL SOCIETY.

Fruit growers throughout the country, but more especially the citrus growers and the producers of sub-tropical fruits, will be interested in knowing that the volume containing the proceedings of the American Pomological Society meeting held at Tampa, Florida, last February has just come from the press. Secretary John Craig of Ithaca, New York, writes that it forms an indexed book of over 300 pages. He further states that the information contained within its covers is contributed by experts and specialists in their particular fields.

This volume is valuable on a three-fold account. It contains the fullest presentation of methods of handling, transporting and marketing citrus fruits to be found anywhere; it contains an important symposium on the status of pecan culture in the Gulf regions; orchard heating is one of the topics which is a live issue today, and this is discussed in the light of the most recent advances. In addition to these subjects, orchard management forms another important chapter. The history, classification and propagation of the mango by Professor Rolfs of the Florida Experiment Station is the most important contribution on mango culture thus far published. The Japanese persimmon, its propagation, culture and a method of processing the fruit so that the astringency is removed, forms an interesting chapter by Prof. H. Harold Hume of Glen Saint Mary, Florida. Persons interested in these topics and desiring the publication should write to the secretary of this national society.

The Pacific Coast Association of Nurserymen will meet at San Jose, Calif., on June 21.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

All the committees of the Gardeners' and Florists' Club of Baltimore are making progress in their S. A. F. & O. H. work of preparation. The ladies' committee have proved their efficiency, and their chairman, Mrs. Isaac H. Moss, is proving to be not only a hustler, but a lady of excellent executive ability. The ladies started out to land 13 prizes for bowling, etc., for lady contestants, and they secured 18 splendid valuable prizes, from magnificent silver cups to cut glass and other things that inspire the feminine admiration and taste. There will be no lack of an enjoyable time for the fair sex.

The program proposed for the entertainment of the coming conventioners will not only prove there is a "fellow feeling" with Baltimoreans, but that Maryland hospitality is a chronic habit with its citizens. The Governor, and the Mayor of Baltimore will be on hand at the opening of the convention to extend a genuine welcome and turn over the keys of the city to the convention guests.

Mack Richmond, who has charge of the floor exhibit space, says more space is already disposed of than was ever sold at any previous convention. The exhibitors will be from a dozen or more States and the 60,000 square feet of unobstructed floor in the perfectly lighted armory will afford ample opportunity for artistic effective arrangement of exhibits. The unprecedented hot spell does not put the least embargo on the earnest workers, and last night at the regular monthly meeting, with roasting weather, the Club had the best attended meeting ever held in any summer in its history. It was the convention work that made the members "forget it"—the weather. Interested occupation is better to help counteract unduly hot weather—so cover up the thermometer and simply surmise, or "guess," it is "quite warm."

At a previous meeting of the Club Edward Kress, of Baltimore, brought in for inspection a new rose of his own creation which he has been quietly testing for three years. It was of such excellence that the President of the Club, on request of the members, appointed a committee to visit Mr. Kress and inspect the plants. Last night the committee reported the rose was not only an ideal garden one, but that it possessed unusual merit, being a profuse bloomer (monthly), the blooms fully 6 inches in diameter, firm and full, and the foliage of a splendid attractive character. The color is deep crimson red, of a very velvety appearance. The rose is perfectly hardy. Some of the members conclude this rose is destined to become prominent—indeed famous.

Last night the Garrage bowling place was secured for the S. A. F. & O. H. contests. These are the finest alleys in the city and will enable the lady contestants to bowl at the same time the men do. It is located near the Belvidere Hotel.

Boddington's Bulb Bloom.

Save Money on Your Fall Bulbs—by Ordering NOW

Our Quality Bulbs are famous for results

Mr. Florist:—You can save money on the bulbs you expect to grow this Fall, if you order them now, instead of two or three months later.

We have bought heavily of the best bulbs procurable in Bermuda, Japan, Holland and French markets, and will, until July 1st, offer special inducements to encourage our customers to place their orders earlier than usual.

Send us a list showing the bulbs you wish to grow this Fall—Lilies, Tulips, Narcissi, Hyacinths, etc.—and we will make a special and confidential quotation on your order. Our regular Fall Catalogue will be ready in July, but the prices we will make you now will be at a large reduction, for the reasons stated above.

Write for "CONFIDENTIAL QUOTATION"—and write to-day. This offer is good only until July 1st, 1911.

Arthur T Boddington
Seedsmen
342 W 14th St
New York City. N.Y.

AMERICAN PAEONY SOCIETY.

The spring meeting of the American Paecony Society will be held in connection with the exhibit of the Pennsylvania Horticultural Society at Horticultural Hall, Broad below Locust street, on Thursday and Friday, June 8th and 9th. The Show Committee in charge of this year's work are as follows: Chairman, B. H. Farr, Reading, Pa.; J. H. Humphreys, care Andorra Nurseries; S. Mendelson Meehan, care Messrs. Thos. Meehan & Sons; C. Sim, care Henry A. Dreer, Riverton, N. J.; J. J. Steyer, Concordville, Pa.

The schedule of the Exhibition is as follows:

Commercial Classes.

Class.

1. Largest and best collection of named varieties, one flower of each, \$25, \$15, offered by American Paecony Society.
2. Fifty blooms, one variety, named, white, \$10, \$5, offered by B. H. Farr, Reading, Pa.
3. Fifty blooms one variety, named, dark pink or rose, \$10, \$5, offered by Andorra Nurseries, Chestnut Hill, Pa.
4. Fifty blooms, one variety, named, flesh or salmon-pink, \$10, \$5, offered by Cottage Gardens Co., Queens, N. Y.
5. Fifty blooms, one variety, named, crimson, \$10, \$5, offered by Thos. Meehan & Sons, Germantown, Pa.

Amateur Classes.

Open to amateurs and private gardeners only.

6. Largest and best collection of not less than twenty-five varieties, named, one of each variety, \$15, \$10, offered by T. A. Havemeyer.
7. Collection of not less than twelve varieties, named, one of each variety, open only to exhibitors not residing within 100 miles of Philadelphia, \$10,

\$5, offered by Henry A. Dreer, Inc., Philadelphia.

8. Collection of white varieties, named, one bloom each, \$6, \$4, offered by W. Atlee Burpee Co., Philadelphia.
9. Collection of dark pink or rose varieties, named, one bloom of each, \$6, \$4, offered by Robt. Scott & Sons, Sharon Hill, Pa.
10. Collection of salmon and flesh-pink varieties, named, one bloom of each, \$6, \$4, offered by Thos. Meehan & Sons, Germantown, Pa.
11. Collection tricolor varieties, named, one bloom each, \$6, \$4, offered by Peter Henderson Co., New York.
12. Collection crimson varieties, named, one bloom each, \$6, \$4, offered by Geo. H. Peterson, Fairlawn, N. J.
13. Six blooms of any one variety, named, \$6, \$4, offered by W. W. Kline, Reading, Pa.

Open Classes.

14. Best six blooms of Duchesse de Nemours, \$2.50, offered by F. H. Wild Floral Co., Sarcoxie, Mo.
15. Best vase of twenty-five pink peonies of one variety, \$5.00, offered by Henry F. Michell Co., Philadelphia.
16. Best twelve pink varieties, six blooms each, \$10.00, offered by S. G. Harris, Tarrytown, N. Y.
17. Best collection of Japanese varieties, one bloom each, \$5.00, offered by Henry F. Michell Co., Philadelphia.
18. Best new American Seedling Peony, not in commerce previous to 1908, name of originator to be given, \$10.00, offered by Andorra Nurseries, Chestnut Hill, Pa.

AMERICAN SEED TRADE ASSOCIATION.

The 29th Annual Convention will be held at Marblehead, Mass., Tuesday, June 20 to 22, 1911. The opening session is called for 10 o'clock a. m.

The Rockmere Hotel has been selected for the headquarters and the

following rates have been offered to the membership:

For 75 to 100 persons, the best rooms at \$5.00 per day, each person. These rooms have bath or running water. For 100 persons in smaller rooms, or large rooms in nearby cottages, \$4.00 per day, each person. For 30 persons in small rooms in cottages, \$3.00 per day, each person. Rates include all meals and accommodations; should be secured in advance, if possible. Marblehead is about 16 miles from Boston and it is necessary to transfer from the South Terminal to the North Station, which may be made on the Boston Elevated. Baggage should be checked through to Marblehead.

On account of the necessary change in the convention city made since the Executive Committee met in January, it has been necessary also to change the program. As this is not quite completed, it will follow shortly.

The latest crop reports from the prominent growers will be a feature, and there will be reports of much interest from our State correspondents in regard to Legislative action in the various States this past winter.

C. E. KENDEL, Secretary.

YONKERS HORTICULTURAL SOCIETY.

On Friday, 19th inst, a well attended meeting was held in Wiggins Hall. Business relating to the spring show was discussed and it was decided to hold that exhibition in Hollywood Inn, on Wednesday, June 14th. A good

SOME EVANSTON FLORISTS.

Evanston is Chicago's nearest north suburban town and has as progressive, wide-awake florists as can be found anywhere in the country. Most of them have their own greenhouses and their retail stores are models of taste and convenience. Evanston has many florists and several are now retired, leaving the active work to their sons. Farthest north is the new place of R. F. Gloede, a cut of which is given here. Five modern houses are set in spacious grounds, artistically laid out. The front is a perfectly kept lawn containing flower beds while the rear shows the nursery stock all so complete and harmonious that no one would think it a newly executed piece of work. About four years ago his old place was bought by the drainage canal commissioners and he bought the ground for the new one, putting into effect his favorite motto, "Leave

the world more beautiful than you find it." The rustic fence and entrances are particularly beautiful.

The next place on the way back to Chicago is that of M. Weiland, one of the veteran florists of this vicinity, seventy-three years old and retired, leaving the trade well represented by his four sons, John and George in Evanston, Peter Weiland in New-castle, Ind., Henry Weiland in Denver, Colo. Peter Olinger in Cincinnati, and John Didier in Chicago, sons-in-law, are also florists. The six are all well established and have retail stores with greenhouses. The original Weiland plant is now in the residence district and must soon give way to the growing city. Geo. Weiland's houses on the opposite side of the railroad are being replaced by a modern range of eleven houses, 25 x 125 feet, with ample service sheds. A fine retail

store is part of this equipment and Mr. Weiland last summer purchased the entire block.

The Fischer Bros. are progressive young men who opened a retail store on Dempster street and have worked up a fine trade. They built a small but model range of houses last year and will extend their area soon. Peter Fischer has retired and rented his greenhouses. John Weiland's large establishment on Greenwood street is in fine shape, centrally located and was built last year at a cost of \$32,000.

N. K. Welter grows all the flowers for his retail store, which is at 527 Main street. In his two large ranges were seen an immense supply of Boston Market carnations, large, elegant blooms, and Mr. Welter says his cut has been almost unlimited during the entire season with prospects for plenty for Memorial Day.

schedule has been drawn up, and members of neighboring societies are cordially invited to compete.

Darwin tulips were finely shown by S. Untermeyer and Supt. H. Turner, and were awarded a certificate of merit, the judges adding that they had never before seen so fine an exhibit in that section of the tulip family.

Members are looking forward to a good time at a clam bake to be held at Rye very shortly.

H. M. B.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club will celebrate its 25th anniversary June 28th, 1911, with a banquet to its members and invited guests at Peckmann's Hotel at 7 o'clock. This was decided at a meeting by the committee in charge. Secretary Beneke will mail all invitations in June with acceptances returnable by the 15th. There are quite a few who were at the first meeting 25 years ago who will be present with a seat at the head table.

CLUB AND SOCIETY NOTES.

The Rochester Florists' Association has selected the five managers to represent the association on the Board of Managers of the Rochester Industrial Exposition Association, as follows: George B. Hart, Charles H. Vick, F. J. Keller, E. P. Wilson and John Dunbar. At the organization

meeting President Hart was present, and was elected a director.

The Preliminary schedule of the First Annual Dahlia Exhibition of the New Haven County Horticultural Society, to be held at Harmanie Hall, New Haven, Conn., Wednesday and Thursday, September 13-14, 1911, has been issued. There are 59 regular classes for amateur and professional exhibitors, also generous specials from the following donors: Lord & Burnham Co., New York; Pierson U-Bar Co., New York; H. A. Dreer, Philadelphia; Forbes & Keith, New Bedford, Mass.; John Lewis Childs, Floral Park, N. Y.; R. & J. Farquhar & Co., Boston; A. W. Davidson, Ansonia, Conn., and H. W. Farnam, New Haven.

For further particulars, apply to the secretary, F. H. Wirtz, 86 Nicoll street, New Haven, Conn.

A HOUSE WARMING.

Doubleday, Page & Co., as on several previous happy occasions, opened their new offices and plant, The Country Life Press, at Garden City, Long Island, N. Y., on Tuesday last, to invited guests, largely horticultural, to the number of 500 or more. A special train from the Pennsylvania Terminal was put on for the accommodation of the guests of the company and hospitality was extended without limit. Attendants and guides were on hand to conduct the visitors from one depart-

ment to another, through the work-rooms, which were all in full operation, the offices, reception rooms, library and other appurtenances of this great establishment. Refreshments were served in the beautiful flower gardens which have been laid out in the park-like grounds. Altogether, it was a revelation to the visitors of what is possible under up-to-date policies and philanthropic enterprise in the equipment and adaptation of a modern publication outfit. Over all, the atmosphere of country life holds sway—and what a contrast to the old-time factory aspect of such establishments!

RECIPROCITY.

President Taft, at the Associated Press dinner in New York, said in reference to the proposed reciprocity with Canada, that "the question we have to answer is whether we propose to maintain an artificial wall across a country 3700 miles in length to prevent the natural trade that would flow between two nations of people of the same language, of similar character, traditions, business habits and moral aspirations, when the removal of that wall would furnish economic advantage to each country without the added responsibility of government and political control." That leaves little more that needs to be said, and we believe that the great majority of people on both sides of the "artificial wall" are fully in accord with the president's views.

Dreer's High Grade Hardy Perennial Phloxes

These are not dug from the field, but are one-year-old, field-grown plants which were dug early in the season, cut back, potted up into three-inch pots, and are now well established, with a good ball of soil, and will give a wealth of bloom this season.

STANDARD COLLECTION OF CHOICE HARDY PHLOX

Price for any of the varieties listed below, **\$5.00 per 100, \$40.00 per 1000**

HARDY PHLOX

Jean d'Arc (Tall.) A good standard late white.
Louis Blanc (Tall.) Reddish-violet, with purple shadings and darker eye.
La Vague (Medium.) Pure mauve, with aniline-red eye.
La Mahdi (Tall.) Deep reddish-violet, with darker eye.
Louise Abbema (Dwarf.) Very large dwarf, pure white, of fine form.
Mme. Paul Durtie (Tall.) A delicate lilac rose, reminding one of some of the beautiful soft pink Orchids.
Mozart (Tall.) Ground color white, suffused salmon; aniline-red eye.
Mrs. Jenkins (Tall.) The best tall early white for massing.
Obergartner Wittig (Medium.) Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Pantheon (Tall.) Bright carmine rose.
Prosper Henri (Dwarf.) Pure white, with large decided eye of rosy magenta.
Pacha (Dwarf.) Deep rose pink, suffused with solferino-red and carmine-purple eye.
R. P. Struthers (Tall.) Rosy carmine, with claret-red eye, fine.
Sunshine (Dwarf.) Large, aniline-red with crimson-red eye and light halo.
Selma (Tall.) Large flower, pale rose mauve, with claret-red eye.
Siebold (Tall.) Bright vermilion red, overlaid with orange scarlet; crimson-red eye.

Albion (Medium.) One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.
Antonin Mercie (Medium.) Light ground color, upper half of petal deeply suffused bluish blue; large white halo.
Baccabante (Tall.) Tyrian rose with crimson-carmine eye.
Beranger (Dwarf.) Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.
Bridesmaid (Tall.) White, with large crimson-carmine centre.
Belle Alliance (Medium.) White, with large pure red eye.
Clara Benz (Dwarf.) Lovely carmine rose, with darker eye.
Colibri (Tall.) White, with crimson-carmine centre; very late.
Consul H. Trost (Medium.) Pure red, with bright French-purple eye.
Champs Elysees (Dwarf.) A very bright rosy magenta.
Cara d'Ache (Medium.) Geranium-red, with old rose shadings and white eye; very effective.
De Miribel (Medium.) White, suffused with bright rosy scarlet, red eye.
Edmond Rostand (Medium.) Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.
Eugene Danzavillier (Tall.) Lilac, shading white towards the edges; large white centre.
Edmond Boissier (Dwarf.) Bright reddish-violet, with large white halo.
Eclairer (Tall.) Brilliant rosy magenta, with large lighter halo.
General Giovaninelli (Dwarf.) Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
General von Heutz (Medium.) Scarlet, with rose shadings and crimson-red eye.
Hermine (Dwarf.) The dwarfiest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.
Helena Vacaresco (Dwarf.) Very large-flowering dwarf, white.
H. O. Wijers (Tall.) White, with bright crimson-carmine eye.
Henry Murger (Tall.) White crimson-carmine centre.
Henry Marcel (Medium.) Pure red, with bright salmon shading.
Henry Boyer (Medium.) Tyrian rose, with lighter shadings.
Jules Cambon (Medium.) Brilliant reddish-purple, with exceptionally large, pure white centre.
Sarabande (Medium.) Reddish-violet, with lighter shadings.
Von Goethe (Tall.) Tyrian rose, suffused with carmine lake and carmine-red eye.
Von Hochberg (Tall.) The ideal crimson Phlox.
Vesuvius (Medium.) One of our own seedlings; pure red with bright purple eye; a dazzling color.
Von Lassburg (Medium.) The purest white in cultivation, individual flowers larger than any other white.

THREE FINE NEW HARDY PHLOX

Price of the New Varieties:

\$1.50 per doz.; \$10.00 per 100; \$90.00 per 1000

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.
Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flower, of dwarf habit.
Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

HENRY A. DREER, Inc., 714 Chestnut St., Philadelphia

The Above Prices Are Intended for the Trade Only.

A. N. PIERSON, Inc.

CROMWELL, CONN.

COLEUS

Verschaffeltii, Firebrand, Golden Queen, Lord Palmerston, Queen Victoria, Beckwith's Gem, Golden Bedder, Hero, Messy.

A very fine assortment of twelve kinds not listed above.

All of the above out of 2¼-inch pots: \$2.50 per 100, \$20 per 1000.

AGERATUM

2¼-inch pots, \$2.50 per 100, \$20.00 per 1000.

SALVIA

S. Splendens, S. Bonfire, S. Zurich, S. Schenley, Boule de Feu. Out of 2½-inch pots, \$2.50 per 100, \$20.00 per 1000.

CANNAS

A very fine assortment of the best varieties, nice growing stock from 3-inch pots, of the following varieties:

Wyoming, Florence Vaughan, Gladiator, Pres. McKinley, Louisiana, Buttercup, Queen Charlotte.

From 3-inch pots, \$1.00 per dozen, \$6.00 per 100.

BEGONIAS

Glorie de Lorraine, ready now, 2¼-inch pots, \$12.00 per 100, \$110.00 per 1000. For prices on quantity write for quotations.

Begonia Prima Donna, fine pink flower, especially good for outdoor bedding, from 2-inch pots, \$4.00 per 100, \$35.00 per 1000; 2½-inch pots, \$5.00 per 100, \$45.00 per 1000; 3-inch pots, \$6.00 per 100, \$50.00 per 1000. Ready for immediate shipment.

GARDEN ROSES

Owing to the call for well established Roses from large pots that will be ready to give immediate results from garden planting, we have arranged to have ready for May delivery a fine assortment of the best varieties for the purpose.

Kaiserin Augusta Victoria, Richmond, Mrs. Aaron Ward, Killarney, Pink Cochet, White Cochet, White Killarney, Enchanter.

Prices: 50 cents each, \$5.00 per dozen, \$35.00 per 100.

PHILADELPHIA NOTES.

Notice changed date (June 8-9) for exhibition of American Peony Society in announcement in another column.

Among the pioneers of the early-closing movement in this city have been Wanamaker, Pennock-Meehan and Rice. The announcement comes again this year that during June, July and August the closing hour will be 5 p. m., daily, and 1 p. m., Saturdays—for these firms. We hope to see the late-closing ones take their courage in their hands and give their help a much-needed respite during the hot months. They won't really lose anything in the long run. Shorter hours are the order of the day for all of us—except the newspaper man.

Our distinguished friend, P. Joseph Lynch, was in Philadelphia recently arranging for supplies for the new addition to the Heller Bros.' establishment at New Castle, Ind. The new plant will cover nine acres and the initial erection of glass will cover some 100,000 square feet. The first two carloads of glass for this enterprise has been already shipped by our hustling glass manufacturer and fellow member of the Florists' Club of Philadelphia, Edward H. Flood. From what we can gather the glass contract was placed at an unprecedentedly low figure. Those who want to get in on the glass proposition had better hurry up. It is selling away below cost yet, but that will not last long. The manufacturers are getting their wind again since the Supreme Court decision and the business will soon be back on a business basis. So our building friends had better take time by the forelock.

The report which has been circulating around for many months that C. C. Trepel, who has made a success of flower and plant selling in the department stores of Manhattan and Brooklyn, is to open up with one of our big firms here (presumably Gimbel Bros.), seems to be well founded, and we look for developments. From what we have heard we believe Mr. Trepel is the man to show us Philadelphia the way. It is usually the other way about. When something had to be done in New York—it took a Philadelphian to show them. We hope the rumor is true. It will not hurt the retailers. It will only enlarge the market. That's what we want. Bigger market, so we can put up more glass. All the growers say so. After we have put up more glass, of course, we can increase our prices for our product on account of the enlarged market. The thing is as simple as A B C—more market; more glass; more flowers; bigger price!

But, joking aside, the enlargement of the selling market is really a serious thing, and from whatever direction it comes it is welcome, even if it only proves a temporary relief. You may make up your minds to one thing, however, the department stores are going to get all the immediate profit—and the growers will take just what's coming to them, and no more. The growers are not merchants yet. About forty million years from now we may look for that kind of a development. Rome wasn't built in a day. But we're progressing. The Chicago wholesalers are offering to gamble now.

Visitors: George Carson Boyd, Wil-

mington, Del.; E. W. King, Coggeshall, Essex, England; F. J. Cullen, Witham, England.

DETROIT NOTES.

Ed. Bleil, who with Miss Hattie Hobzhauer started "The Flower Shop" last fall, has severed his connection with this concern.

Tuesday, May 22nd, is Flower Day at Breitmeyer's. Society ladies will do the selling and the proceeds are for the benefit of the Tuberculosis Hospital.

In view of the coming flower show and in anticipation of other notable events in the florist line next winter, J. F. Sullivan, for many years the best club's secretary, is now being urged to serve as our next president.

Very disquieting news came from the sick room of Mrs. J. F. Sullivan last week, when it was reported that her recent auto accident had caused internal injuries and an operation was necessary. Still, after two days of anxious waiting things began to mend and as proofs of sincere sympathy were first coming to Mr. Sullivan so are now joyous wishes of speedy and complete recovery extended.

INCORPORATED.

Chicago, Ill.—W. E. Lynch Co., general florist business, capital stock \$20,000. Incorporators, Andrew J. Ryan, Edward J. Prebis, Irvin Livingston.

Des Moines, Iowa—The Perry Nursery Co., capital stock \$10,000. Incorporators, E. F. Edmondson, C. E. Wilson, S. M. Edmondson, E. B. Wilson and Ralph Edmondson.

Seed Trade

The Pennsylvania Seed Bill.

The latest in connection with this bill is that it passed the Senate on the 16th inst.; ayes, 42; nays, 1; the solitary one being Senator Buckman of Bucks Co.

Dodder or Canada thistle, more than one seed in three thousand, prohibited in the following:

	Percentage of purity.
Timothy.....	97
Alfalfa.....	
Crimson Clover.....	
Mammoth Red Clover.....	
Medium Red Clover.....	93
Alsike.....	
German Millet.....	
Hungarian.....	
White Clover.....	90
Perennial Ryegrass.....	
Red-top (hulled or solid).....	85
Canadian Bluegrass.....	75
Orchard Grass.....	70
Kentucky Bluegrass.....	
Red-top (unhulled).....	

and that the percentage of purity on these items shall be as marked on the margin, opposite each. The bill is now up to the Governor who will undoubtedly sign it.

All the amendments suggested by the Philadelphia seed delegation have been included so that the paragraph in last issue of HORTICULTURE proves to have been premature.

The farmers' clause, section 6, has been added since. It reads:

"The provisions of this act shall not apply to seeds that are grown and sold and delivered by a farmer on his own premises."

The question occurs here, what would happen to seeds grown, sold and delivered by a seedsman on his own premises? How can any one tell where a farmer leaves off and a seedsman begins or vice versa?

Section 2, which makes an official seed testing station of the Department of Agriculture, at a cost of 25c. per sample, is, we think, commendable; but it ought to include testing for vitality as well as purity—while it only mentions purity. If this were done it would be a real service and reasonable at the price and would bring in enough revenue to pay for itself, and more.

Personally, we agree with the general opinion of the trade, that arbitrary percentages are wrong in principle. We go further—we think that legislation of any kind for the seed business is uncalled for and unjust. The business as it is, is arduous and difficult enough, without adding a lot of heart-breaking red tape to it. We are sorry the bill has gone through; but section 6 ought to fix it.

G. C. WATSON.

New York's "Pure Seed" Bill.

With further reference to Assemblyman Gregg's New York State pure seed bill, now entitled: 2 Rdg. 925, 2098, Int. 834, I have just been advised that this bill was passed in the Assembly on May 15th and has gone

over to the Senate. It is now in the hands of the Agricultural Committee of the Senate, of which Hon. James H. O'Brien, Senator, is chairman.

I would recommend to the trade throughout the state to file protests

¶ You must have the best of lily bulbs to produce good flowers. You cannot afford to economize in the price of lily bulbs like you could in the price of garden hose because cheaper garden hose would merely be less valuable; whereas an ugly plant or flower has no value at all. Don't try to economize too much on the first cost of lily bulbs because it does not pay in the end. Most importers, both famous and infamous, buy where they can buy cheapest with little regard for quality. There are no bulbs produced with more care than Horseshoe Brand Bulbs. Cold Storage deliveries at any time.

Ralph M. Ward & Co.

12 West Broadway
NEW YORK CITY

Not How Cheap
But How Good

with the Senate Agricultural Committee by first mail. Yours very truly,
MARSHALL H. DURYEA,
New York State Correspondent, American Seed Trade Association.

Unfavorable Reports from Europe.

Advices received within the past two weeks regarding European seed crop are far less favorable than earlier in the season. Some weeks ago, reports while not altogether satisfactory, were very much more encouraging than last year, but recently there has been a change for the worse and this affects biennials, especially root crops such as beets, carrots, mangels, turnips, etc. If very recent information regarding beets and carrots can be relied on, it seems that we are in for as short crops as last season, and with no reserves to fall back on, prices are likely to reach new high levels the coming season. We shall be able to give more detailed information later on, but enough is known at present to cause a great deal of anxiety on the part of the trade throughout the country.

The Home Outlook.

The extreme heat of the past week or ten days together with the severe drought, are causing seed growers in all parts of the country a good deal of worry, with the possible exception of those in California. A change for the better—that is, for cooler weather and good rains, would be very welcome and, as it is yet early, crops have not suffered any very serious damage thus far, with the exception of the grain and hay crops in which seedsmen are only indirectly interested. Peas are generally coming up in a satisfactory way, but a few good rains would be highly beneficial and helpful towards securing good crops.

Indications at this time are that the pea crop in Delaware and Maryland will be decidedly short, owing to the extreme drought as well as heat, but the former is more directly responsible for the shortage. Undoubtedly, the pack in the two states named will not be even as large as last year, which was rather below average. We shall be able to give more definite information in the course of a few weeks as packing will not begin until after June 1st, owing to the crop being late this year.

A New Seed House.

A new seed house is to be started in Albany under the firm name of Houghton & Sherman. Mr. Sherman is of the former firm of Sherman & Eberle. He sold out his interest two years ago to his partner, Frederick W. Eberle, and after thinking it over for a considerable time, has decided to again engage in the business with which he has been connected for a great many years. It would seem as if Albany had something of an oversupply of seed houses, but as the majority of those engaged in the business draw their trade largely from other parts of the country, the addition of one more may not make very much difference. We certainly offer Mr. Sherman our best wishes for success and hope he will do everything possible to uphold the good name and reputation of the seed business.

HENRY F. MICHELL CO., 518 Market Street PHILADELPHIA

Notes.

The fifth annual meeting of the Iowa Seed Dealers' Association will be held at the Chamberlain Hotel in Des Moines on Tuesday, June 6th.

San Francisco, Cal.—A new seed firm, the Hallowell Seed Co., has begun business at 266 Market street. The manager, H. Hallowell, was formerly with C. C. Morse & Co.

Carlos Jensen, manager of the export department for L. Daehnfeldt Odense, Denmark, is making a two months' visit to America this spring. He spent May 15th and 16th in Chicago and, talking to our correspondent there, said he had a very exalted opinion of American seedsmen and that he never should forget the royal way in which he had been entertained here, though a stranger.

Josiah Young, the Troy seedsman, who went into bankruptcy some few months ago, has bought the greenhouses connected with his former business, from the receiver and is now conducting this and it is the wish of all who know Mr. Young, that he may be prosperous and successful in this department. His old store is occupied by another line of business and at the present time, our genial friend, H. W. Gordinier, enjoys a practical monopoly of the seed business in Troy.

Hjalmar Hartmann & Co. report with regard to the present outlook for cabbages for crop 1911: The winter was very mild and not very moist, so that the over-wintering of cabbages was extraordinarily good and with only a very little percentage of death heads—5-10 per cent of the late cabbages and 35-50 per cent of the early cabbages. The heads started growth very early, but severe frosts with storms the 5th, 6th and 7th of April injured the new shoots somewhat and it is not easy to say to what extent this late winter will influence the fur-

ther growing, but as far as the present outlook goes, the crop is prosperous.

Hjalmar Hartmann & Co. are sending out to the American trade the following communication.

As we have heard that a New York representative of a new Danish firm, has been offering an early cabbage named "Earliest Danish Summerballhead," as being precisely the same as our "Copenhagen Market," we warn those buying any seeds thereof from him or his firm, as to be the same as offered by us under the name "Copenhagen Market," that it can absolutely not be genuine, if not grown from our stock.

"Copenhagen Market." we found in our trial grounds in 1908 and seed thereof was offered the first time to the trade by us September, 1910, and we decided then to name it "Copenhagen Market." No other firm can sell any seeds as the same as "Copenhagen Market" or named so, when not bought from us. "Danish Summerballhead" is an old well-merited "Summer Cabbage," grown and offered by us for at least seven years, but not as early, large-headed and equal maturing as "Copenhagen Market."

To avoid confusion, which seems to be the result of above named representative's acting, we have taken steps to forbid him to offer any seeds not grown by us as precisely the same as "Copenhagen Market," in order to protect the interests of our customers and the trade.

CATALOGUES RECEIVED.

Fairbanks, Morse & Co., Inc., Chicago.—The Eclipse Pumper.

J. G. Harrison & Sons, Berlin, Md.—Sheet of Surplus Stocks of Fruit and Ornamental Trees and Shrubs. Wholesale quotations.

Watkins & Simpson, London, England.—Seeds of Vegetables and Florists' Flowers, also Perennials and Biennials for Summer and Autumn Sowing.

CHICAGO NOTES.

Peonies.

Peonies have made a new record this year. At this writing, May 22nd, the market has been flooded with them for over a week and thousands of dozens have arrived too far open for cold storage, and with no demand, they become worthless in a short time. The Chicago Carnation Co. are now cutting their peonies at Joliet, Ill., and even closer to Chicago buds are showing color. The first shipments came in from Glen Ellen, twenty miles north, today. Vaughan & Sperry are using their entire force to put peonies into cold storage as fast as possible. The flowers are not quite so large as in former years, because of the rapid development by the excessive heat, but the quality appears first class.

A New Record.

The Weather Bureau recorded the

Established 1874.

highest temperature for May since the establishment of the department here. Ninety degrees was reached day after day, while nearer the earth 96 degrees in the shade was not uncommon in various parts of the city. Under the glass the plants had a severe test of their powers of endurance, for this almost intolerable condition lasted over a week.

Trade Jottings.

Chas. Erne has resigned his position as head of the cut flower department of the E. H. Hunt Co. No announcements are made yet as to Mr. Erne's plans or as to who will be his successor.

J. P. Brooks of Morton Grove has the material on the ground for three new houses, 27 x 100 feet. The John C. Moninger Co. furnish the material and work will commence immediately after Memorial Day.

Kennicott Bros. Co. will open their branch commission house on the second floor of the Fairbanks Building, next week. The manager, Nick Miller, is suffering from a badly sprained shoulder, which has delayed the opening.

Fifty growers are now in the Flower Growers' Association, and practically all the stock is taken. A meeting for completing all details preliminary to opening will be held June 5th. With so many new opportunities to handle his stock next season, the grower can feel confident that quality is going to count more than ever.

Geo. Walther, retail florist, 435 W. 63rd street, finds it worth while to mail his customers a leaflet on the care of plants at this time of the year. It answers the double purpose of giving practical help and advertising the store. This store has again adopted the plan of closing at 6 o'clock three nights each week during July and August.

Hunt Bros. of Park Ridge, Ill., are growing some fine salpeglossis which are 4 feet high and of beautiful coloring. They also grow the *Dimorpha theca aurantiaca*, the deep orange African daisy and it proves a splendid hot weather plant. As a window flower it cannot be excelled in hot weather as it withstands any amount of heat; in fact, will not open in less than 72 degrees.

Personal.

Mrs. Frank Beu is the latest to

suffer with a very sore hand as the result of injury handling stock.

E. E. Peiser underwent the ordeal of an examination at the Wesley Hospital by five physicians Sunday. The X-ray was used and a heart difficulty located.

Charlie Johnson of the Washington Floral Co., is again about after a serious operation on his neck. A tumor was removed and one week afterward he was in the market again.

Flower Market Reports

BOSTON Boston has been suffering from an overloaded market for the past two weeks and the only consolation is the immediate proximity of Decoration Day, which is easily the best flower holiday in the year for the New England florist. Roasting weather last week is followed this week by cold and inclement skies, but the fact is that all garden material required for Memorial orders is far ahead of the average date and so we have peonies in abundance—a rare condition for this holiday—while on the other hand, our old standby, the white lilac, has already gone into innocuous desuetude. Carnations are in ample supply and roses are very abundant. Lily of the valley from outdoor sources is just right, as are also snow-balls and azaleas and the earlier rhododendrons. Sweet peas are being held in their beds by the growers until the holiday is past and their number is legion. Altogether, we would say that the Decoration Day outlook distinctly favors the buyer and the grower's best hold is to unload without going into any argument as to price.

The right kind of **BUFFALO** weather for the plantsman to bring the flowers into bloom for Memorial Day, but not the kind that growers of roses, carnations and other cut material want, with the mercury at 90 in the shade and 115 to 120 under glass, as has been experienced from Thursday to Sunday last. The hot wave that struck here brought on the outdoor stock to such an extent that its effect was felt on Saturday, when the market received tulips by the thousands, and lilacs in wagon loads, together with an enormous supply of narcissi, lily of the valley and other material. Shipments of roses are fully open, carnations, in sleepy condition, and peas much faded in color. Daisies are about the only bloom that could stand under such conditions. It cannot be said that trade was dull, but high prices were out of the question from the wholesalers' point of view. A few weddings and a light sprinkling of other floral work was had but there was plenty of stock to take care of all that was secured. The only thing that is scarce is good smilax and plumosus.

The third week in May **CHICAGO** was a new experience to even the oldest florist in Chicago. Never in the history of its wholesale market has so many flowers been lost, and never has the sun shone hotter in the month of May for nearly two weeks. Everything under glass was rendered soft, all stock suffering and none more than roses. Carnations in some localities are reported to have been ruined for Memorial Day, while in others a more hopeful feeling prevails. Beauties stood the test well and hold up to quoted price with no superfluous stock. On the 20th rain came, lasting three days, and considerably reducing the temperature. The demand increased but not the quality, the flowers not so soon recovering from a temperature of 120 degrees under glass. Peonies were ready for market a week earlier than in any previous year and arrived in enormous quantities to be thrown out worthless.

BOXWOOD SPRAYS FOR MEMORIAL DAY

A splendid lot—the finest we ever offered—for Memorial Day, \$7.50 per 50 lb. case. Low prices in quantity. Immediate shipment.

PEONIES

Good supply assured. We offer mostly of the better qualities

\$8.00 and \$10.00 per 100

Medium quality, \$6.00 per 100

June Prices on Peonies, \$30 to \$50 per 1000

Five thousand dozens of peonies from Kennicott's were a total loss and on Friday Manager Peiser telephoned twenty-one hospitals to send for flowers if they wished them. The result was a surprise, for not one responded, the thermometer being near the hundred mark probably the cause. Sweet peas shortened in stem, but not in number and quantities were lost. At this writing, May 22nd, appearances are for clearer and cooler weather and

upon this the florist is pinning his hope for Memorial Day business.

The extremely hot weather of last week has brought an over-abundance of flowers to the market, but very few of them were in a good salable condition. Prices are so much at variance that it is practically impossible to make any quotations of a reliable nature.

Flower Market Reports

(Continued from page 791)

NEW YORK Trade has been and is very slow in this market. Apart from the ups and downs due to the irregularities of weather, the steady process of diminishing towards summer dullness is plainly evident. Demand drags on every item. Roses average very low—partly because of light demand and largely because of excessive supply. Carnations are more plentiful than before, although there were more than enough for all ordinary needs right along. Decoration Day hopes are the cause of the present quotations, and it is greatly to be desired that same be realized, although the outlook is far from encouraging. After Decoration Day a little flurry is looked for in wedding and other June decorative work.

PHILADELPHIA Week ending May 20th was an average one as regards the general volume of business, and while prices were low, we believe on the whole that they fully averaged up to the same date last year. Consequently, the grower, wholesaler and dealer have nothing to complain of. The general opinion is that roses are not quite so plentiful now as they were; and while they have, like everything else, suffered from the hot weather, they are pretty good quality and the clean-up of stocks has been good. One would have expected the hot spell to bring the carnations in with a rush, but the influx has been really quite moderate, and while many of them show a weather-wilted look they stand up about as well as anything. Sales of these have been good and compare very favorably with roses. This condition is no doubt helped very much by the church processions and other recent affairs that have used up large quantities of low-priced flowers—like carnations. Each denomination and church picks out its own special Sunday for these demonstrations, and the flower trade may expect to feel the good effect for some little time yet. Orchids fairly plentiful, quality good, demand light. Lily of the valley is in normal demand, but nothing like what it will be soon when the June weddings commence. Outdoor sweet peas are now commencing to arrive and they are extra fine as to size, substance, stem and foliage. Blue cornflowers are in, and selling freely. Baby gladioli, such as Bride, Painted

Manufacturer of Florist Wire Designs,
All kinds of Florist Supplies.

New crop Dagger and Fancy Ferns, \$1.75 per 1000. Green and Bronze Galax, 90c. per 1000; by the case, \$7.50. Boxwood, 50-lb. case, \$7.50; by the lb., 25c. Laurel Wreaths, 10-inch, \$1.75 per doz.; 12-inch, \$2.25 per doz.; 14-inch, \$3.00 per doz.; 16-inch, \$4.50 per doz. Laurel Trimming, 4 and 5c. per yd.

Lady, May, Blushing Bride, etc., are also a new and favorite item. German and Spanish iris blooms, galore. There will be plenty of peonies for Memorial Day. Greens and dagger ferns, new, good, plentiful.

ST. LOUIS The St. Louis market has not changed much from the week previous and is still glutted up with a lot of stock that is not of very good quality. Carnations are good and so are sweet peas, but roses are feeling the effect of the hot weather and are small and soft. Prices have taken a big drop and the commission man says it's better to sell in big lots cheap than to dump them. Peonies, cape jasmines, lily of the valley and lilies are very plentiful and not much sale for them. The reason of all this is that the retail business has been very dull all of last week. The hot weather kept transient trade down.

CARNATIONS—HARDY

THE NEW HARDY EVER-BLOOMING
CARNATION "CRIMSON KING."

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long; never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy Carnation Crimson King. 2½ in. pots, per dozen, \$1.25; per 100, \$8.00; per 1000, \$75.00. Twenty-five plants sold at hundred rates; 250 plants at thousand rates.

Our new trade list of everything you need now ready. Mailed on application. Write today.

For larger size ferns write for prices. Our new trade list of everything you need now ready. Mailed on application. Write today.

IMPORTANT SPECIAL NOTICE.**PRICE ADVANCE.**

The heavy demand from those who have seen *Nephrolepis Roosevelt* growing on our place and scarcity of stock compels us to advance the price on all orders dated after June first, to the following: Two and one-fourth inch pots, 50 cents each; \$4.50 per dozen; \$35.00 per hundred; \$300.00 per thousand. It is our belief the price of *Nephrolepis Roosevelt* for 1911 will be maintained during the season of 1912.

HOW TO PREPARE ADVERTISING COPY.

From "How to Advertise a Retail Store."

In preparing copy for the printer the advertiser should not assume that the compositor will rectify any mistakes. In the strictest sense of the word the compositor has no right whatever to change any portion of the copy. He is supposed to set up every word exactly as it is written, except where words are unmistakably misspelled.

Cut and chop and rewrite your copy until it is as you wish it before you send it to the printer. Once in his hands let the copy be as complete and final as it is possible to make it.

Typewritten copy is most legible and therefore most desirable, but written copy is as good as any, no matter how badly scratched up and interlined, if it is perfectly legible.

When words are eliminated by scratching, do it thoroughly, so there will be no question about it. Do not leave an isolated word among a lot of scratched-out stuff—as it may be overlooked.

Write on one side of the paper only, and number the sheets consecutively. If you find it necessary to eliminate a sheet, renumber those that follow if there are not many of them, but where there are many this can be obviated by adding the number of the page eliminated to the one preceding it, making it stand for the two pages.

If sheets are added they may be numbered as follows: Supposing that after page 2 you wish to add three pages. You simply number them as 2 a, 2 b and 2 c.

PUBLICATIONS RECEIVED.

Report of the Board of Park Commissioners, Wilmington, Del., 1910.—A fine art production as to paper, printing and illustrations. It shows that the total area of Wilmington's parks and other open spaces is 467.69 acres, well cared for under the management Edw. R. Mack, supt. The total expenditures for 1910 were \$16,566.74 for maintenance and \$6953.70 for improvement.

Transactions of the Massachusetts Horticultural Society for the year 1910. Part II. This book contains the annual report of the trustees; list of exhibitions and prizes awarded during the year, with detailed reports of the various committees thereon; report of the delegates to the State Board of Agriculture; report of secretary and librarian, necrology and list of members. There are seven full page illustrations of views in gardens visited by the Garden Committee.

A brochure just published by the Park Floral Company of Denver, Colo., sets forth in unique phrase and most artistic setting the achievements and purposes of this up-to-date and eminently enterprising retail flower concern. Among the photographic inserts are two in colors, by the latest color-photograph process. We commend this little publication to the perusal of the florist trade, having no doubt that they will find it interesting and suggestive of how to elevate and promote their business interests.

DURING RECESS.

Baseball at St. Louis.

Paddy Patton of Smith's Wholesale House is organizing a baseball team composed of the members of the four wholesale houses and says his team will play any team the retailers may make up, the game to take place at the florists' picnic in July, which will give them all plenty of time to get practice.

Chicago Bowlers.

Score made by Chicago Summer Bowling League, May 16. No names have been selected yet and the teams bowled under number:

No. 1.	No. 2.
Huebner, 129 172 200	Fr'dm'n, 155 130 162
Dezman, 160 143 132	Schultz, 143 188 164
J. Zeck, 161 198 177	Graff, 167 202 120
No. 3.	No. 4.
Goerisch, 150 151 131	Asmus, 163 147 163
Wint's'n, 117 95 108	Vogel, 122 124 189
Kraus, 170 185 153	Wolf, 158 171 132
No. 5.	No. 6.
Lerner, 139 109 174	Armst'g, 107 88 124
Fink, 107 121 128	Olsen, 178 138 176
A. Zeck, 135 204 193	Schlos'n, 167 126 98

New York Bowlers.

Madison did not bowl New York on Saturday, May 20th, because of the illness of William Duckham, its head pin strike artist. Later on it will take its medicine. New York is bowling some these days, and will keep in practice every Friday evening until convention. Tuxedo comes to New York Saturday, May 27th, for the "rubber," each team having won a game.

Scores at the practice game Friday, May 19, were as follows:

Fenrich, 137 188 148	R'kards, 133 141 114
Nugent, 129 109 104	Ch'dw'k, 227 195 230
Shaw, 144 143 133	Scott, 130 148 133
Manda, 168 156 181	Kakuda, 171 167 180

New York Florists' Club Outing.

The annual outing is to be held on June 28th. The outing committee want to make this one of the most enjoyable occasions of the kind ever held, and are departing somewhat from the usual procedure. They are dispensing with the souvenir programme and the expense of the entire outing will be met by the proceeds from the sale of tickets, and they ask those who have been in the habit of advertising in the programme to be equally generous in buying tickets. The sail up the beautiful Long Island Sound will extend to two hours or more, depending upon promptness at the dock—a delightful sail, and better music than ever before, with the usual refreshments. The sports at the grove will be curtailed somewhat, giving the ladies and children more chance to compete than heretofore and obviating the rush and "three ring performance" difficulty. Members wishing to donate special prizes for any particular event will be welcome to do so and will have attention and thanks. Jos. S. Fenrich is chairman of the Outing Committee.

The fruit crop, while not so large as last year in Oregon, will be good. Reported injury by frost was much exaggerated, and excepting for peaches or very tender or early blossoming fruits in the colder sections, but little damage was done. Apples will be a good average crop.

UNITED STATES DEPARTMENT OF AGRICULTURE.

The 1910 Year Book.

The seventeenth volume of the Year Book (1910) will soon be issued by the U. S. Department of Agriculture. In appearance and make-up it differs but little from its predecessors; it contains 28 articles; 49 full page illustrations, of which eight are colored; and 31 text figures.

The Department's appreciation of the service of the late Senator Jonathan Prentiss Dolliver rendered to agriculture during his public career is expressed in the selection of a portrait of him as a frontispiece.

The Fourteenth Annual Report of the Secretary, for the fiscal year ended June 30, 1910, occupies the first 156 pages and gives the "general report of the operation of the Department," which, under the law, must form a part of the volume. This report, supplemented by the statistical matter found in the appendix, gives a more complete and comprehensive summary of agricultural conditions in the United States than can be found in any other single publication.

The next 320 pages, divided between 28 articles contributed by many members of the scientific force of the Department, contain data upon many of the important questions now prominent in the public eye, and equally vital to the agricultural and urban population both as producers and consumers of the food stuff of the nation.

PATENTS GRANTED.

992,140. Weed and Insect Destroyer. Thomas E. Anderberg and Archibald R. Gardner, Sandy, Utah.

992,514. Limb Support. George F. Messler, Fullerton, Cal.

992,529. Hotbed. Charles Abraham, Richfield, N. J.

NEWS NOTES.

Winterset, Iowa.—The stock of the Fairmount Nursery has been sold and the business will be discontinued.

Des Plaines, Ill.—The Geo. M. Garland Co. are to build a fireproof factory here next fall. This building will be about a mile from the present site and eventually the whole business will be transferred to the new building.

NEWS NOTES.

Wilmette, Ill.—Nic. Miller's greenhouses have been leased by James Bernard.

Alvin, Tex.—Cook & Cook have retired from business and Mr. Sheffield has the management.

Hermiston, Ore.—A nursery has been started here by J. W. Craik, formerly of Kellogg, Idaho.

Hamilton, Ohio—The greenhouse of Miss Emma Vinen has been purchased by C. J. Frew, Jr.

Marietta, Ohio—The Marietta Floral Co., a new company, have purchased the Smith greenhouses and will continue the business.

Cambridge City, Ind.—Five acres of land near the city have been purchased by M. H. Gaar for an addition to his present nursery.

Leominster, Mass.—A section of the roof of George M. Kendall's cucumber house was demolished by a heavy wind storm on May 6th.

Black Hall, Conn.—The firm of Brown & Howard, who leased the Black Hall Greenhouses on January 1st, has been dissolved and James F. Barclay of Rhode Island has purchased the stock and has secured a lease for five years. For three months Mr. Brown has suffered constantly with the sciatic nerve and rest from business activities was the only course.

"FUNGINE"

An infallible remedy for mildew, rust, and other fungus diseases.

The Cedar Hill Gardens,
Sea Cliff, N. Y., May 8, 1911.

"I take pleasure in telling you that after having tried Aphine according to your directions, I have personally found Aphine better for black aphids on violets and mum's than the Hydro-Cyanide Gas, being less dangerous for the plants, as well as for the operator, and doing the same work with equal efficiency. I have not tried Fungine myself, but followed its use day after day at one of my customers' carnation and rose houses. The gardener agrees with me, and all the greenhouse men, that Fungine is a grand preventive, as well as the best destroyer of mildew and carnation rust, if applied properly. It does all it is recommended to do. We cannot be without it in rose houses."

T. H. POLBOS.

Volcano Greenhouses,
Nevada, Mo., May 9th, 1911.

"We received the Aphine you sent us and it is everything you recommend it to be. I am glad we now have something that we can mix just as directions call for to get the proper results."

E. D. PIERCEY, Mgr.

Kirkwood, Mo., May 1st, 1911.
"We have tested the Aphine sent us and the results were very satisfactory. We used Aphine according to directions for black aphids and find all aphids killed on first application. We have full faith in Aphine."

F. W. UDE & SON.

SCALECIDE

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lemo Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water. Send for Booklet, "Orchard Insurance."

B. G. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

What the Users say

'Test at 32° Below Zero; Kroeschell Boiler Easy to Fire With Soft Coal.'

I have 7,800 sq. ft. of glass; this boiler would take care of about two green-houses of the same size. I maintain a temperature from 50 deg. to 80 deg. Did not have the least bit of trouble when thermometer was 32 deg. below zero. In zero weather fired at half past nine in the evening, went to bed, slept all night, got up at 5:00 in the morning, and found a good fire at that hour. The boiler is giving the very best of satisfaction. Yours is the first hot water boiler I have had in use, but have fired steam boilers of different makes. **The Kroeschell is certainly the best and quickest heating boiler** that I have had anything to do with. As to the Kroeschell Generator, I would take no amount of money for it; I can run the water over the boiling point and have no trouble. I give your boiler, generator and piping system the highest praise. F. H. HAMILTON, R. F. D. No. 3, Robbinsdale, Minn.

FOR DECORATION DAY
 AND ALL OTHER DAYS USE
ARTSTONE FLOWER VASES

Artstone Vases do not, like iron, become so hot in midsummer as to burn the plants. Artstone is indestructible from exposure, while iron, soon rusts, and marble gradually discolours and decays. Flowers, like gems, require appropriate settings. The artistic beauty of these creations attracts admiration and lends a touch of quiet elegance to the surroundings. They serve to enhance the beauty of the Lawn or Porch wonderfully. Popular also for Cemetery decoration. Bird baths and Sun dials made to order.

PATRICK GRACE, 55 Union St., BRIGHTON, MASS.

Seasonable Notes on Culture of Florists' Stock

VIOLETS

Now that the violet planting season is at hand, the first essential is strong and healthy stock, as no amount of nursing will ever make a sickly violet pay. Almost any good soil will grow violets, but the most suitable is a strong calcareous one that will retain moisture without becoming sodden. Sod that was stacked up last fall and not piled any higher than about 14 inches so that it got a thorough freezing is the best for violets. It is of great importance in preparing a compost to have at least for each four parts of well-rotted sod one part of thoroughly decomposed cow or stable manure, and, if possible, mix charcoal at the rate of one bushel to 25 bushels of the compost. After the violets are planted in the house the weather conditions we are bound to have will try the patience and skill of the best of growers. See that every care is given in the way of careful watering and frequent stirring of the surface of the soil once a week. Keep the glass fairly well shaded with all the ventilation the weather will permit so as to maintain as cool and as dry an atmosphere as possible. Syringing should be attended to on all bright days early enough in the morning so the foliage will be dry before night. This is a very essential item. The plants should be kept clean and growing all summer, to form strong blooming crowns by fall.

CROTONS.

The first batches of cuttings that were propagated should now be far enough in their growth to require a shift into either 4 or 5-inch pots. They like a compost of turfy loam with about a fourth or fifth of well-decayed cow manure and some bone meal—say about a four inch pot full to a bushel of soil. Give them a very moist atmosphere with plenty of syringing so as to keep down the red spider, thrips and mealy bug, all of which increase very rapidly when the air of the house becomes too dry. To have the markings of their foliage show in fullest brilliancy they should have no shade, unless the leaves actually burn. These plants are very serviceable for the decoration of table, room, and conservatories, but when intended for this use they should be gradually hardened off in removing from their tropical quarters for they are very susceptible to cold and sudden changes.

MARGUERITES

The early-propagated portion of the coming season's stock should now be far enough advanced to require 4 and even 5-inch pots. Size and vigor are only imparted by special good summer treatment which is always a permanent gain to this winter flowering stock. It is better to keep them growing on in pots during the summer for they make more compact plants by having their root room restricted. A good compost to use is of turfy loam three parts, well-decomposed manure one part. They should get their final shift by the last week in July and be kept pinched. When the pots, in their last shift, become filled with roots liquid manure should be given once a week. Older or left-over plants from last spring can now be planted out and will furnish cuttings for fall propagation. These will give nice medium-sized flowering plants for spring.

MASDEVALLIAS

The craze for big and fancy orchids has caused these

and other very interesting genera to be greatly neglected. If there are some of these orchids that have not received attention early in the season,—but where the compost is still in good condition—it is best not to disturb them. They would be greatly helped by a top dressing of chopped live sphagnum. Some of the old material can be removed to a depth of about an inch so as not to disturb the roots. These orchids do better in a house that has a northern aspect as they come from the cool ravines of the Andes and are found from 7,000 to 12,000 feet above sea level. They are very much like *odontoglossum* as to summer requirements. Fresh air should be given at all times when possible, in greater or less quantity according to outside condition. Keep up an abundance of moisture by wetting down the paths and under the benches two or three times a day in fine weather. These orchids must never suffer for want of water at the roots; they are indeed better to be kept rather on the wet side, for they have no pseudo-bulbs to store up nourishment. *Masdevallias* are very free-flowering and ought to be more widely grown. *Masdevallia Harryana* has excellent lasting qualities along with rich colorings and is a charming subject. Another very useful one is *Masdevallia Tovarensis* which blooms about midwinter.

RAISING PERENNIALS

Now is the time to sow seed of the most desirable perennials. The demand for this class of plants is increasing every year so every florist who has the land to spare should sow some. Plants from seeds sown now and transplanted when large enough into the border or field and given some care as to watering will get well enough established to stand the winter. The seed should be sown in frames where it will be convenient to water them. Any good light soil that has been made fine will be suitable. Keep shaded and moist until they have started. Don't sow too thickly. When the seedlings are large enough to handle prick them out and keep shaded for few days in other frames. This is better where you have the frames to spare. They can be transplanted again into cold frames where they can stay during winter and have slight protection in severe weather. They can stand about 8 to 10 inches between the rows with about from 4 to 5 inches apart in the rows. They are better and stronger when grown this way the first year than when planted out in open ground.

SWEET PEAS

It behooves every florist to see that his sweet peas have good care now as all indoor flowers such as roses, carnations, etc., are rapidly deteriorating in quality. Now as we are getting hot and dry weather a generous mulch between the rows will be found of great benefit. It is always better to keep the flowers closely picked. Never let seed pods develop; pick them off, for if allowed to stay on, the vines will speedily decline in vigor. Where you can reach them with the hose give them overhead syringings late in the afternoons of hot days as they enjoy it and will repay you with better foliage, flowers with longer stems, and a general vigor of the whole plant.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Adiantums*; *Reuchers*; *Chrysanthemums*; *Cuttings of Perennials*; *Leaves in Frames*; *Left over Astilbes*; *Pruning Flowering Shrubs*.

Our exhibition notes from England tell of classes in the carnation show schedules providing for the exhibition of methods of packing the

blooms for shipment. This, it seems to us, would be a good feature to add to our carnation and rose exhibi-

tions in this country. It would provide a test of great value in any commercial show and would be an education very generally needed if one may judge by the looks of the majority of shipments as received at the wholesale houses and flower markets in the distributing centres or by the number of complaints made by buyers to whom reshipments have been made. Rose packing is better done, as a rule, than carnation packing but there is still plenty of room for improvement and in the case of other flowers such as daffodils and asters, in their season, one can see in any wholesale commission house some terrible examples of how badly it can be done. The loss to the grower through this one cause is no small amount often far exceeding the selling commission which he is disposed to regard as a grievous burden. A well-skilled packer is one of the indispensable adjuncts of a flower or plant growing establishment.

What plant registration is

We have been accustomed to regard the plant registration department of the Society of American Florists as intended solely for the purpose of

securing to the originator or discoverer of a new species or variety of plant the right to such name as he may select for it, provided such name has not already been given to a plant in the same class, and for placing on record permanently such detailed description of the specific characteristics of the plant registered as may be required for its identification. Such adjectives as "handsome," "lovely," "free-blooming," "robust-growing," "non-bursting," "magnificent," etc., and other words and phrases couched in the prevailing grandiloquent catalogue style and which might serve the disseminator in advertising his novelty, have, in our humble opinion, no place in a purely technical record such as the S. A. F. registration should be. It rests with the Society officials in charge to restrict within proper bounds this tendency to laud a new production. If one applicant is permitted to do it, no one can blame the others for following suit. It is clearly up to the societies to put an end to this panegyric bombast.

The line of progress

Among the "Impressions of the American Tour" as given in the British journals by the horticultural visitors on their return to England, that by Mr. L. M.

Graves in the Horticultural Trade Journal of recent date is, to our mind especially interesting and entertaining. The gentleman disclaims either journalistic ability or talent as an impressionist, but we should say he was fairly well endowed with both. There is much that he observes in regard to our American customs and American floriculture, both in criticism and in praise, which must be recognized as just and fair. In the matter of florists' products here, as being in the main, roses, carnations and hardwooded imported plants, he presents an issue which sooner or later will force itself upon the American florist. As regards a greater diversity in cut flowers we have already made a gratifying start as the stock in any first-class florists' refrigerators will show. In the line of plants, it is a fact that a large part of the goods offered in the florist shops, and particularly at Easter, are imported stock for which a considerable amount of money has been sent abroad. It might be to the advantage of the American trade to more closely watch and study the European flower markets, recognizing the fact that they are much longer established than ours and that we can undoubtedly learn from them much of value as to the probable course our own demand will take in the years to come.

Skill in

flower packing

Fruits and Vegetables Under Glass

MULCHING

Now that the hot weather is with us all borders will be better with a mulch of some kind over them. This will help to retain their moisture; keeps the borders cool, forms a cover as it were, which can be damped often without injury to the roots, and this will help draw up surface roots. Where cow-manure was used as a stimulant, little more will be wanted, but if this was applied to early houses and has worn down, a light mulching of old mushroom bed can be added. Young vines growing in newly-made borders will need no stimulants, yet a mulching is beneficial. Spent mushroom bed can be used on these or new leafsoil will also answer the purpose. There is just a chance if the leafsoil is not good, that it may contain the mycelium of some fungus which may work its way into the soil to the detriment of the roots. All sticks and other rubbish must be picked out and only the half-decayed leaves used. Mulchings will need to be four inches thick to answer the purpose. Young peach trees making their first season's growth will not need mulching.

ORCHARD HOUSE

As orchard house fruit commences to show signs of ripening cease feeding and use less atmospheric moisture. All ventilators can be left wide open and a light shade will prolong the season of the fruit. One-half of the house can be so treated and the other left without shade. The early varieties could be worked up to this latter end, which all helps to make a succession. To be sure of finishing pears to perfection they should be tied to the tree to prevent bruising should they fall. A pear often requires a week or ten days to finish up after picking and will often drop off so long before being ripe. By tying a piece of raffia on the stalk of the fruit and then an inch or so back on the wood the fruit can be left to hang until it is ripe without fear of bruising. Apples are best propped up to the sun similar to peaches. A few strong stakes will need to be put to the tree to pull it into shape and get the fruit on one side. Wire of moderate strength should be bent into the shape of a dipper (rim and handle) and cotton wool twisted around the rim to prevent bruising. When this is reversed and tied into position by the handle the apple will rest on the rim and get all the benefits of the air and being exposed both apples and pears can be finished outside. Plunge the pots to the rim in ashes and give a light shade with cheese cloth through the hottest hours of the day.

KEEPING PEACHES AND NECTARINES

At times we find ourselves confronted with the problem of holding peaches and nectarines for a week or so to have them in for some special occasion, which may have suddenly presented itself. This is no easy task as peaches and nectarines grown inside are hard subjects to keep for any length of time. A few days or a week perhaps is the limit, after they are ripe. They should be

left on the trees until there is danger of their falling and then handle with the utmost care, as a slight bruise on a ripe fruit soon shows itself. Some varieties are given to drop their fruit, while others will hold them for sometime. Duke of York has every other good point but this. It finishes its fruit in record time and seems to want to be rid of them just as quickly. Alexander is another instance of this. Hale's Early, Peregrine and Thomas Rivers are not so liable to drop their fruit. Pot trees can be kept back by placing them in a cool shady place, but after the second swelling has commenced with those planted out little else can be done excepting keeping the house wide open. The fruit can be kept for a few days in an ice box if handled carefully when being gathered.

MELONS

Melons will now be easily grown in cold frames. Make a good sized mound in the center of the sash and when planting press down firmly. Do not allow too many lateral growths to remain; leave enough only to get a crop. After fruit is set close the sash up to one inch when syringing late in the afternoon. After they attain the size of eggs place a piece of wood on an inverted pot for them to rest on, to keep them off the wet soil where snails and other things are liable to mark them.

George H. Benson

Lilium myriophyllum

The subject of our cover illustration this week is one that bids fair to be a very familiar object in commercial floriculture within a very few years. *Lilium myriophyllum*, although introduced some years ago in England, is a new-comer in this country, the bulbs having been collected for R. & J. Farquhar & Co. of Boston by E. H. Wilson on his last Chinese collecting expedition. It is said that the climate in this country suits *L. myriophyllum* much better than that of England. Mr. Wilson considers it the best of all lilies. It grows naturally on shallow soil and moss on rocks and is a great favorite with the natives of Northwestern China who grow it universally on the roofs of their porches. It is absolutely hardy, more so even than *speciosum*. Its forcing qualities are such that the prediction that it is to be the Easter lily of the future—and home-grown at that—seems not unreasonable. The flower is white, with a slight suffusion of pink on the outside and a tint of almost canary yellow at the centre. It is delightfully perfumed, reminding of the jasmine and lacking the heavy oppressive odor of most lilies. It usually throws up secondary stems from the bulb which give a second crop of flowers. It grows to a height of four to five feet.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS
AND ORNAMENTAL HORTI-
CULTURISTS.

At the Mid-Lent meeting of the Executive Board the following changes were made in the rules governing the Trade Exhibition:

Rule 3. Exhibition space shall be designated in square feet. The charges for space shall be as follows:

Minimum charge	\$10.00
Flat rate, per sq. ft.25

Exhibition space shall be limited to 6 feet 6 inches above the floor, except for plants, greenhouse structures or other exhibits which necessarily extend to a greater height. Plant and cut-flower exhibits may be also built up to any height authorized by the Superintendent. All exhibits, except as above specified, which extend above 6 feet 6 inches in height, shall be charged 10 per cent. additional on the entire space for each 6 inches of additional height of any part of the exhibit. All signs must be kept within the space limits. Where tables are against the walls, wall space up to 6 feet 6 inches above the floor and of the length of the table will be furnished the exhibitor without extra charge. Wall exhibits projecting above this height will be charged for the additional space, at wall space rates. Signs on the wall or elsewhere shall not extend higher than 6 feet 6 inches above the floor in any exhibit. Wall space, without floor or table space, or when exceeding in dimensions the amount allowed with the exhibition space, shall be charged as follows:

Minimum charge	\$5.00
Flat rate, per sq. ft.10

Wall exhibits shall not project over one foot from the wall. Exhibitor's signs must be kept within limits of wall space.

Exhibitors must furnish at their own expense all tables, cloth and other accessories and incidentals. The Superintendent will be willing, so far as his other duties will permit, to assist exhibitors in securing tables and other needed articles; but neither the Superintendent nor the Society will pay for or assume any financial responsibility for the purchase or placing of such articles.

All signs shall be uniform in character and be furnished by the Superintendent of Exhibition at cost and no other signs to be permitted.

Charges for freight, cartage or expressage will not be paid or guaranteed for exhibitors. Goods shipped, charges collect, will be refused, unless the owner is on hand to pay the charges.

Rule 5. Add (Garden Requisites) to Section F.

Change number of rule 19 to 21 and add: Rule 19. While the Society will exercise all due care to safeguard the exhibits, it will not assume any responsibility or liability for any loss or damage to any exhibit.

Rule 20. The Executive Committee will make such further rules as it may deem necessary for the proper conduct of the exhibition.

Attention should be called to the fact that these rules, and especially the one concerning the signs, will be strictly enforced. No signs will be permitted in the hall other than those of the uniform character which have been adopted by the Board. Exhibitors should take note of this and see that their signs are ordered in advance. Copies of the complete rules and plans of the floor space may be secured of the Superintendent, Mack Richmond, of Baltimore, Md.

Hotel Belvidere, located on Charles and Chase Sts., has been selected as the hotel headquarters for the Society. The president's reception will also be held at this hotel. Applications for rooms should be sent in early so as to secure good accommodations. The hotel is located within a few minutes' walk of the Armory where the meetings and exhibitions are to be held.

Department of Plant Registration.

Public notice is hereby given that the Conard & Jones Company, of West Grove, Pa., offer for registration the roses described below. Any person objecting to the registration or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date:

Ruby Queen—Queens Scarlet X Wichuraiana. Bright rich ruby red, with clear white center, flowers quite double, three to three and one-half inches across, opening out flat and perfect, color brilliant carmine, base of petals pure white. The plant is a strong vigorous climber, with handsome glossy foliage and entirely hardy.

May Queen.—Mrs. DeGraw X Wichuraiana. Vigorous, erect-growing climber well furnished with handsome foliage, bearing great numbers of lovely large roses, fully as beautiful as the finest Tea roses. Color, clear coral pink, very bright and handsome. Entirely hardy, an early and abundant bloomer.

Pearl Queen.—Hardy climbing rose crossed with Wichuraiana, other parent unknown. Very regular flowers, double, fragrant. Color, clear pearl white, faintly tinged with deep rose, deepening at the centre. A hardy grower and tremendous annual bloomer.

Royal Cluster.—Dawson X Hermosa. Magnificent double white hardy climbing rose. A hardy, vigorous climber and prodigious bloomer; blooms in immense clusters, flowers, full medium size, beautifully formed, delicious, spicy fragrance, color, white, sometimes faintly tinted with blush.

H. B. DORNER, Secretary.

May 25, 1911.

AMERICAN PEONY SOCIETY.

Intending exhibitors at the Philadelphia show will please notice that all exhibits must be staged before 3 o'clock on the opening day, June 8th, and that all entries should be sent to the secretary, Mr. A. H. Fewkes, Newton Highlands, Mass., entries to be in his hands not later than the morning mail of the 5th of June. All goods for exhibition purposes to be sent the society in care of Mr. David Rust, Secretary, Penna. Horticultural Society, Broad and Locust streets, Philadelphia, and all shipments to be prepaid. Exhibition blooms coming collect will not be accepted, as the committee have no funds from which to pay out of town charges.

The society would also appreciate advice as early as it can be given to the secretary of approximately how many entries will be made, even if this number is later reduced, in order that the proper accommodation may be ready when the entries come in.

In the schedule of prizes which we published last week it should be inserted that under Class 14 the Duchesse de Nemours should be Calot's, white and not Guerin's pink.

The Retail Florists Association of St. Louis will hold a very important meeting on Monday night, June 5th, at 8 o'clock. Some very important business is to be transacted.

HORTICULTURAL SOCIETY OF
NEW YORK.

Announcement.

An exhibition will be held in the Museum Building, New York Botanical Garden, Bronx Park, New York City, in cooperation with the Garden, June 10th and 11th, 1911. The schedule of classes and premiums is as follows:

Peonies: P-1 3 white varieties, P-2—3 light pink varieties, P-3—3 rose varieties, P-4—8 crimson varieties, 6 flowers each, P-5—collection of singles, 3 flowers of each kind, first and second prizes in each class, \$5.00, \$3.00; P-6—largest and finest collection, not less than 6 flowers of each variety, \$25.00, \$15.00.

Miscellaneous: M-1—collection of hardy roses, M-2—collection of hardy flowering shrubs and trees, M-3—collection of hardy rhododendrons and azaleas, or either, M-4—collection of hardy herbaceous plants, first and second prizes in each class, \$10.00, \$5.00; M-5—collection of irises, \$5.00, \$3.00; M-6—6 orchid plants in bloom, 6 varieties, \$10.00, \$5.00; M-7—3 orchid plants in bloom, 3 varieties, \$6.00, \$4.00; M-8—1 orchid plant in bloom, \$3.00, \$2.00; M-9—collection of cut orchids, \$6.00, \$4.00.

Mr. Richard Richter will have charge of the arrangements on behalf of the New York Botanical Garden.

Please note that this and succeeding exhibitions during the summer will be held in the Museum Building, New York Botanical Garden, Bronx Park, New York City.

Plants and flowers for exhibition should be sent by express, prepaid, addressed: Horticultural Society, Museum Building, New York Botanical Garden, Bronx Park, New York City.

On Saturday, June 10th, a meeting of the Council, Horticultural Society of New York, will be held in the Lecture Hall, Museum Building, New York Botanical Garden, at 2.30 o'clock.

A meeting of the Society will take place in the Lecture Hall, at 3.30 o'clock, followed by a public lecture at 4 o'clock, by Dr. William A. Murrill on "The Royal Gardens at Kew, England," illustrated with lantern slides. Address all communications to the Secretary, Horticultural Society of New York, Bronx Park, New York City.

NATIONAL GLADIOLUS SOCIETY
OF ENGLAND.

Orange, Mass., May 29, 1911.

Editor Horticulture:

I have the following account of the first meeting of the National Gladiolus Society, England, from the Secretary, M. Atkinson, The Flagstaff, Locksheath, Southampton, who also informs me that they will hold their first show in July, the particulars of which will be sent me later.

L. MERTON GAGE.

The National Gladiolus Society.

President: Sir Francis Burdett, Bart. Patrons and Patronesses: Lady Burdett, The Earl of Listowel, K. P. The Countess of Listowel, The Lady Victoria de Trafford, Mrs. Burdon Muller, Sir Perry Van Notten Pole, Bart. The Countess of Ellesmere.

Members of the Council: Messrs. Kellway & Sons, Mr. Peter R. Barr, Mr. Frank Lilley, Mr. C. H. Arkesson, Mr. Charles Blomfield, Mr. Maurice Pritchard, Mr. A. J. Bliss, Messrs. James Carter & Co., Mr. W. C. Bull. Three other members will be enrolled.

The first meeting of the council was held at the Royal Horticultural Hall (by kind permission of the R. H. S.) on Thursday, March 14th, at 4.15 p. m.

The following rules and regulations were passed:

That the society be known as the National Gladiolus Society.

That it consist of a president and a coun-

Poddington's Bulb Bloom.

Save Money on Your Fall Bulbs—by Ordering NOW

Our Quality Bulbs are famous for results

Mr. Florist:—You can save money on the bulbs you expect to grow this Fall, if you order them now, instead of two or three months later.

We have bought heavily of the best bulbs procurable in Bermuda, Japan, Holland and French markets, and will, until July 1st, offer special inducements to encourage our customers to place their orders earlier than usual.

Send us a list showing the bulbs you wish to grow this Fall—Lilies, Tulips, Narcissi, Hyacinths, etc.—and we will make a special and confidential quotation on your order. Our regular Fall Catalogue will be ready in July, but the prices we will make you now will be at a large reduction, for the reasons stated above.

Write for "CONFIDENTIAL QUOTATION"—and write to-day. This offer is good only until July 1st, 1911.

Arthur T. Poddington
Seedsmen 342 W 14th St
New York City, N.Y.

oil of not less than six and not more than twelve members, and that such members on election shall serve for three years.

That a handbook be compiled as soon as possible, giving all available information respecting the cultivation, etc., of the Gladiolus, with a classified list of named varieties and that the handbook be issued annually to members.

That the subscription for Home members be fixed at 10/6d per annum and 15/- for foreign members.

That the benefits conferred on subscribers are as follows:

(a) Free copy of Society's handbook; (b) Free admission tickets for subscribers and one friend to all the shows organized by the Society; (c) Exemption from entry fees in all classes in such shows; (d) Expert advice on cultivation, etc., of Gladioli; (e) The right to submit any new varieties to the Council for the purpose of obtaining a certificate.

The Society intends to hold at least two shows annually: prizes and medals will be offered for competition, both for amateurs and the trade.

At suitable times during the flowering season, the Council will meet to consider any new varieties that may be submitted by growers, and if in their opinion it will be merited, they will grant a certificate and include the variety or varieties in their next handbook in the classified list, with the name of the grower and date of certificate.

The Society has a small piece of ground situated at Locksheath, which has been granted them by the Locksheath Nurseries, Ltd., for use as a trial ground. Should any members desire the Society to test the bulbs bought from growers, or to test new seedlings, they will have the right to send up to a hundred bulbs of each variety, to the Secretary, to be grown on the trial ground on their behalf. A nominal fee of 1/- will be charged by the Society. The Society undertakes to grow such bulbs carefully and to report fully to the members on their growth and to inform them of the flowering of such bulbs, sending them the cut blossom. These may also be submitted to the Council if the member desires. At the expiration of the season the bulbs will be returned with a full report.

Members purchasing new and costly va-

rieties will find the trial ground of great value, as there have been many complaints in the past from persons who have purchased an expensive bulb represented to be a new variety, and have found, in the flowering season, that the bulb was of some well known stock.

Members sending bulbs for trial are requested to state the firm the bulbs were purchased from, the date of purchase, and the name of the variety. In making purchases of costly bulbs, members are advised to inform the salesman that they intend sending one or two bulbs for trial to the National Gladiolus Society.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club will hold its regular business meeting on Thursday afternoon, June 8th, at 2 o'clock. Secretary Beneke has sent out special notices for this to be known as the silver jubilee meeting and a large turn-out of members is expected.

Chairman E. W. Guy of the trustees will call a meeting of his committee next week to arrange for the annual picnic. This yearly event is always looked forward to with pleasure by the trade at large and it may be this year that it will be held on the East Side near Belleville. At this meeting they will decide on place and date.

CLUB AND SOCIETY NOTES.

It is expected that E. J. Shaylor, the eminent peony specialist of Wellesley, Hills, will make a very interesting and comprehensive exhibition of peonies under correct name, at Horticultural Hall, Worcester, on June 8th.

They are just laying plans for a much larger Apple Show in Portland, Ore., than ever before. While the Horticultural Society has always held an apple exhibit in connection with their annual meeting, they never at-

tempted holding a large one until last year, and this year they expect to about double the size, having at least from 10 to 20 carloads of apples and other fruit on exhibit.

Frank A. Weber says that everything is now in shape for the opening of the annual meeting of the American Association of Nurserymen at St. Louis. Mr. Weber is chairman of the entertainment committee and has some great things in store for the visiting nurserymen and especially for the ladies. President Stark will be down from Louisiana, Mo., next week and lend his assistance for the opening.

DURING RECESS.

Chicago Bowlers.

Bowling scores, May 23, made as follows:

Vogel	188	113	115	Olsen	179	172	197

Boston, Mass.—A baseball team has been formed to represent the Boston Cut Flower Exchange and on Saturday, June 3, they play their first game with the team at W. H. Elliott's, Madbury, N. H.

Boone, Iowa—A severe hail storm broke more than half the glass in the greenhouse of J. Lochrer on May 19th. Much damage was done to the stock in the houses, also. No insurance.

BRITISH HORTICULTURE.

The Carnation Show.

There was a varied and attractive display at the 10th show of the Perpetual Carnation Society, held at the Royal Botanic Gardens, London, on May 2 and 3. In the class for the best group of cut carnations (not less than twelve varieties) the gold medal was secured by Young and Co., of Cheltenham, prominence being given to White Enchantress, Winsor and Hon. Lady Neeld. C. Engelmann, of Saffron Walden, Essex, took the premier position for the three best vases of British novelties—Carola, Regina and Rex. The second place was taken by W. E. Wallace, or Eaton Bray, Beds, with May Day, Delight and Scarlet Glow. B. E. Bell, Guernsey, scored in the American novelty class, James Whitcomb Riley being particularly meritorious. An indication of the high pitch the culture of carnations has reached by the market growers was afforded in the contest for the Covent Garden cup. Two varieties of market blooms had to be shown in vases, also packed in boxes; W. E. Wallace was the winner with Rose Pink Enchantress and White Enchantress. The arranging for effect, and the efficient packing were alike very creditable. The second prize fell to the proprietors of the Thatcham Fruit and Flower Farm, Newbury, Berks, newcomers at this show.

In the selected varieties, White Enchantress secured the honors in the white section. Amongst the scarlets Beacon was the winner. Carola was the best crimson. Stuart Low & Co., of Enfield, had a well arranged group and H. Burnett, of Guernsey, Channel Islands, had a brilliant array of the leading sorts. There were but few new introductions to receive attention. The only award of merit made by the committee in this branch was secured by C. F. Waters, of Deanland Nursery, Balcombe, Sussex, who showed a new deep cerise variety named Edith Waters. Some capital specimens, grown in pots, were exhibited, and these gave evidence of vigorous growth.

Some Little Known Vegetables.

At a recent meeting of the National Amateur Gardeners' Association, in London, W. F. Giles, a representative of Sutton and Sons, of Reading, gave an interesting lecture on "Little known vegetables; their culture and use." Of late considerable interest had been shown in this subject, Mr. Giles stated. This was probably due to the fact that so many English people travel, and meet with certain unknown vegetables abroad, and on their return inquire whether such can be grown in their own gardens. Most English gardeners could easily grow them, but the lecturer was not sure, except in a few special instances, that they could be so suitably cooked as on the continent. It was somewhat remarkable that considering the large number of different types of vegetables which are suitable for cultivation in countries with a temperate climate only a small proportion are grown in all. Even in the commoner kinds of vegetables different nations have their peculiar fancies. For instance in potatoes, English people prefer a white fleshed kind which will cook floury, whilst in

ASPLENIUM FILIX-FOEMINA VICTORIÆ.

No branch of outdoor gardening can be more engrossing and pleasurable to the lover of the beautiful in Nature than the culture of ferns. A fern grotto in a suitable place and properly cared for is a delight all summer long and we often wonder that this feature is not more generally introduced in home grounds. Among the hardy ferns the Aspleniums are in the first rank as to variety and usefulness. They are found all over Europe, America, Asia and northern Africa. Few ferns are more generally admired than *Asplenium filix foemina* the "Lady

Fern," in the scores of forms into which it has sported. There is almost no end to its diversity of frond; some are feathery, some tasselled, others tufted like parsley, others twisted and distorted, and to these variations distinctive names have been given. Our illustration shows one of the most interesting forms in which the pinnae cross each other with beautiful regularity. We got the photograph from H. A. Dreer, Riverton, N. J., who has been making a specialty of the hardy deciduous ferns and can supply these fancy forms in large assortment.

France yellowish fleshed sorts which have a close waxy texture are more generally liked. Again, in this country we prefer the delicious marrow-fat peas with wrinkled seeds, but on the Continent the small, round seeded kinds are largely grown. In some parts of America the flat-headed or Drum-Head cabbage is preferred to the tender little conical hearts eaten in this country, whilst in France the cabbage is not often served as a vegetable at all. Even amongst what are usually regarded as English vegetables there are many types almost unknown to the general public, although familiar to most gardeners. W. H. ADSETT.

PHILOSOPHY AND BREEDING.

Mr. Editor.—I have been quite interested in the articles in HORTICULTURE on "Mendel's Law" but there is a statement made in the concluding article which I think requires further explanation. Near the end of the paper occurs these words in brackets "excluding philosophy and preconceived opinions." Now, Mr. Editor, the literal meaning of the word philosophy, as given by the lexicographers is, the love and pursuit of wisdom and knowledge. A more modern idea perhaps is that philosophy assumes to be the critic of the sciences. Now if breeding is a science it must harmonize with every other science, for nature cannot conflict, unless there is something wrong with what we understand as nature;

then there must be confiction until nature itself is straightened out. However, as I reason true philosophy and the true science of breeding must harmonize and therefore we cannot exclude philosophy from breeding.

GEORGE F. STEWART.

West Medford, Mass.

CORNELL BULLETIN ON SWEET PEAS.

The first report of the co-operative work between the National Sweet Pea Society and the Horticultural Department of Cornell University is being published as a bulletin of the Cornell Experiment Station. It is just off the press and may be secured by all residents of New York State interested in sweet pea culture, and by non-residents who are members of the National Sweet Pea Society. The secretary of this society is Harry A. Bunyard, care of Mr. Arthur T. Boddington, 342 West 14th St., New York City.

This first bulletin contains mainly the results of fall and spring planting tests in addition to a very thorough study of the forcing or winter-flowering type of sweet peas. The Department of Horticulture has been studying these types under glass for the past two seasons, and this bulletin contains the results of this study. The bulletin has been prepared by Professor John Craig and Mr. A. C. Beal of the Department of Horticulture.

Dreer's High Grade Hardy Perennial Phloxes

These are not dug from the field, but are one-year-old, field-grown plants which were dug early in the season, cut back, potted up into three-inch pots, and are now well established, with a good ball of soil, and will give a wealth of bloom this season.

STANDARD COLLECTION OF CHOICE HARDY PHLOX

Price for any of the varieties listed below, **\$5.00 per 100, \$40.00 per 1000**

HARDY PHLOX

Albion (Medium.) One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Anton! **Mercie** (Medium.) Light ground color, upper half of petal deeply suffused bluish blue; large white halo.

Baccabante (Tall.) Tyrian rose with crimson-carmine eye.

Beranger (Dwarf.) Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.

Bridesmaid (Tall.) White, with large crimson-carmine centre.

Belle Alliance (Medium.) White, with large pure red eye.

Clara Benz (Dwarf.) Lovely carmine rose, with darker eye.

Colibri (Tall.) White, with crimson-carmine centre; very late.

Consul H. Trost (Medium.) Pure red, with bright French-purple eye.

Champs Elysees (Dwarf.) A very bright rosy magenta.

Caran d'Ache (Medium.) Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium.) White, suffused with bright rosy scarlet, red eye.

Edmond Rostand (Medium.) Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.

Eugene Danzanvillier (Tall.) Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf.) Bright reddish-violet, with large white halo.

Eclairer (Tall.) Brilliant rosy magenta, with large lighter halo.

General Giovanelli (Dwarf.) Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.

General von Heutz (Medium.) Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf.) The dwarfiest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

Helena Vacaresco (Dwarf.) Very large-flowering dwarf, white.

H. O. Wijers (Tall.) White, with bright crimson-carmine eye.

Henry Murger (Tall.) White crimson-carmine centre.

Henry Marcel (Medium.) Pure red, with bright salmon shading.

Henry Boyer (Medium.) Tyrian rose, with lighter shadings.

Jules Cambon (Medium.) Brilliant reddish-purple, with exceptionally large, pure white centre.

Sarabande (Medium.) Reddish-violet, with lighter shadings.

Von Goethe (Tall.) Tyrian rose, suffused with carmine lake and carmine-red eye.

Von Hochberg (Tall.) The ideal crimson Phlox.

Vesuvius (Medium.) One of our own seedlings; pure red with bright purple eye; a dazzling color.

Von Lassburg (Medium.) The purest white in cultivation, individual flowers larger than any other white.

Jean d'Arc (Tall.) A good standard late white.

Louis Blanc (Tall.) Reddish-violet, with purple shadings and darker eye.

La Vague (Medium.) Pure mauve, with aniline red eye.

La Mahdi (Tall.) Deep reddish-violet, with darker eye.

Louise Abbema (Dwarf.) Very large dwarf, pure white, of fine form.

Mme. Paul Durtie (Tall.) A delicate lilac rose, reminding one of some of the beautiful soft pink Orchids.

Mozart (Tall.) Ground color white, suffused salmon; aniline-red eye.

Mrs. Jenkins (Tall.) The best tall early white for massing.

Obergartner Wittig (Medium.) Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.

Pantheon (Tall.) Bright carmine rose.

Prosper Henri (Dwarf.) Pure white, with large decided eye of rosy magenta.

Pacha (Dwarf.) Deep rose pink, suffused with solferino-red and carmine-purple eye.

R. P. Struthers (Tall.) Rosy carmine, with claret-red eye, fine.

Sunshine (Dwarf.) Large, aniline-red with crimson-red eye and light halo.

Selma (Tall.) Large flower, pale rose mauve, with claret-red eye.

Siebold (Tall.) Bright vermilion-red, overlaid with orange scarlet; crimson-red eye.

THREE FINE NEW HARDY PHLOX

Price of the New Varieties :

\$1.50 per doz.; \$10.00 per 100; \$90.00 per 1000

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flower, of dwarf habit.

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

HENRY A. DREER, Inc., 714 Chestnut St., Philadelphia

The Above Prices Are Intended for the Trade Only.

Obituary

Mrs. Margaret M. Le Moul.

Mrs. Margaret M. Le Moul, wife of Emil Le Moul, florist, Fourth avenue, New York, who has been sick since Easter, died on May 15.

John Wolf.

John Wolf, an employe for eleven years of the Elm City Nursery Co., New Haven, Conn., committed suicide in Bridgeport on May 11. He was 48 years of age. He leaves a wife and family.

Lacy Young.

Lacy Young of the Deamud & Young Fern Co., died at his home in Thompsonville, Mich., May 16th, at the age of 36 years. For ten years until the time of his illness he had been connected with the firm and was well known and popular. Interment at Fremont, Mich.

Prof. Robert O. Graham.

Prof. Robert O. Graham of the Illinois Wesleyan University died suddenly at Bloomington, Ill., on May 26, aged 55 years. He was a prominent educator and at the time of his death was president of the State Horticultural Society. He was an authority on fruit culture.

Cyrus G. Pringle.

An expedition in search of botanic specimens, a week or more previous, resulted in the death on May 25, at Burlington, Vt., of Prof. Cyrus Guernsey Pringle, curator of the herbarium at the University of Vermont, and one of the best known botanists in the United States. He caught a cold which developed into pneumonia. He was 73 years old and unmarried.

Charles Armitage.

Charles Armitage, president of Hitchings & Co., greenhouse builders, died at his home in Montclair, N. J., on May 22, aged 65 years. Death was caused by heart disease, resulting from shock sustained in an automobile collision some weeks ago, but Mr. Armitage had been in failing health for some time previous. It has been the writer's privilege to know Mr. Armitage personally for many years. He was a most affable, polished and kindly gentleman—always courteous and considerate. He is survived by his wife, one son and four daughters, to whom we extend sincere sympathy.

Lemuel Ball.

At his home in Wisconsin, May 24th, Lemuel Ball, a noted palm grower and florist of Philadelphia, aged about sixty years. A special meeting of the Florists' Club was called on the 25th inst., and appropriate action taken for the funeral services, which took place on the 27th inst. Mr. Ball came of an old and respected family in the northeastern section of the city. He engaged in manufacturing business early in life but this not proving a success, he, with his younger brother, Charles D. Ball, started in the florist business at Tacony—some thirty years ago—under the title of Ball Brothers. They grew cut flowers and bedding plants mostly in

AZALEA PATH, ARNOLD ARBORETUM.

the early days. Later, Mr. Ball quit the flower growing and went into the clothing business with George Castor. On the dissolution of this partnership he went back to the florist's business, erecting the plant at Wisconsin where he became noted finally as one of the most successful palm growers of the country, and continued that line to the day of his death. His brother, Charles D. Ball, also conducts a large palm growing establishment in the same vicinity. Mr. Ball married Miss Castor, a sister of the George Castor mentioned above. She died a good many years ago. One daughter survives. Lemuel Ball was well known in trade circles, and was a very upright and highly respected citizen—esteemed by all who knew him.

G. C. W.

Lloyd G. Blick.

The demise of Lloyd G. Blick, of Norfolk, which was announced last week, removes one of the finest men in our business, and one who was esteemed not only locally, but all over the country. He had many warm friends in the trade, and a number of them including Mr. and Mrs. Edward Reid, of Philadelphia, made the long journey to Norfolk to attend the funeral services. He is survived by a brother, J. W. Blick, and two sisters, one of whom, Miss L. A. Blick, was associated with him in business. Mr. Blick was in his 46th year. We all appreciate the following quotation from a local paper:

"Few men were blessed with a happier disposition. Few men were so popular. So companionable was he, indeed, that it was a privilege to know him, and no one in Norfolk had a wider or larger circle of friends, each of whom will feel his demise as a personal loss. He was a man of sterling integrity and his kindness of nature and affability were most remarkable."

G. C. W.

THE THINGS I PRIZE.

These are the things I prize
And hold of deepest worth:
Light of the sapphire skies,
Peace of the silent hills,
Shelter of forest, comfort of the grass,
Shadows of clouds that swiftly pass,
Music of birds, murmur of little rills,
And after showers
The smell of flowers,
And of the good brown earth—
And best of all along the way,
Friendship and mirth.

Henry Van Dyke.

PHILADELPHIA NOTES.

Charles E. Meehan is glad to be back in harness again after a two weeks' siege of illness, and we are certainly glad to see him. He may not realize it himself, but we all have missed his wise, witty and energetic personality every minute of the time. When a man, by dint of pluck, perseverance and shrewd business ability, has carved for himself a dominating place in the markets of his locality, he is wanted every day, and there is no place for sickness. Our sentiment is: we forgive you this time, old scout, but don't let it occur again.

The fourteenth annual spring exercises of the National Farm School, Bucks County, Pa., will take place on Sunday, June 4th. A special train will leave the Reading terminal at 9.30 a. m. Among the exercises will be the dedication of Pennsylvania Hall, consecration of memorial trees, installation of freshman class, and inspection of farms and buildings. Addresses will be made by Jacob A. Riis, Professor F. H. Green, Governor Tener, Attorney-General John C. Bell, and others. Professor Fancourt, of the Horticultural Department, will be on hand to welcome florist friends.

M. Rice reports much progress and prosperity in Europe and a whole lot of the other thing—just the same as it is here—under similar economic laws—but they are changing more quickly there than we are. The British must not be judged by the luxury of the Hotel Metropole in Brighton, where Mr. & Mrs. Rice had to give their order four hours in advance before they could have the distinction of taking tea there. They are putting some common-sense laws in force in Britain, and also in Germany, in this year of our Lord, and we Americans also are beginning to wake up. As Joseph Fels says: "As Great Britain fiddles the world dances." We are keeping close tabs, and one way or another are bound to get in line—and maybe give a tip or two in return.

HORTICULTURE:

Malden, Mass., May 22, 1911.

Please withdraw my adv. from your paper (for Vincas) as I am all sold out.
H. HANSEN.

INCORPORATED.

Muncie, Ind.—The Williams & Clark Floral Co., capital \$10,000. Incorporators, Emma Longfellow, C. C. Clark, and R. J. Williams.

San Benito, Tex.—San Benito Sem-Tropical Nursery, capital \$1,000. Incorporators, J. C. Miller, J. George Bower and M. W. Jones.

Springfield, Ill.—The W. E. Lynch Co., capital \$20,000. Incorporators, Andrew J. Ryan, Edward J. Prebis, Irvin I. Livingston and W. E. Lynch.

Dansville, N. Y.—The Maloney Bros. & Wells Co., nursery and seed business, capital \$60,000. Directors, Wm. F. Maloney, Albert E. Maloney, Frederick W. Wells.

NEWS NOTES.

Missoula, Mont.—J. H. Smith is now store manager for the Missoula Nursery Co., formerly foreman for the same firm.

New York, N. Y.—The four-story building, 117 West 28th street, has been leased by the S. S. Pennock-Meehan Co., for a term of years.

Wilmette, Ill.—The Northwestern Floral Co., on June 1, will move to their new plant at Grosse Point. Their present place has been leased by Jas. F. Bernard as reported in the last issue of HORTICULTURE.

WOOD BROTHERS

Fishkill, N. Y.

Please mention Horticulture when writing.

Just as sure as little apples some growers could make more money doing general housework than growing lily bulbs. They persist upon buying the cheapest they can and expect the best results. There is as much difference in lily bulbs as between a buzzard and a bird of paradise. It always pays to buy the best, and the best produced, of course, are not the cheapest. Grow them well—take care of them—they want plenty of moisture and remember that liquid manure is to the lilies what yeast is to bread—they There is no better flower than a lily for funeral work and nothing more appropriate—your business requires them all the year around. Cold Storage Horseshoe Brand lily bulbs ready for immediate or future delivery.

Not How Cheap
But How Good

Seed Trade

Effect of the Drought.

Although there have been occasional showers over New England and the Atlantic States in general during the past week, the drought has not been effectively broken and conditions have only received a little temporary help. We stated some weeks ago, that the pea crop in Delaware and Maryland would be light and recent advices fully confirm this. It is now so late that rain would not have any material effect in those states. Indiana and Ohio both need rain badly. Crops of all kinds are suffering for the lack of same. It is, of course, not too late for improvement, but unless we have rain very shortly, early peas, at least in these states, will be light. Fortunately we get better reports from Michigan and Wisconsin where the bulk of the seed peas are grown. Conditions in those states up to the present time are reported to be very favorable and if we can have the same conditions continue for the next six weeks, we shall be reasonably assured of a good average crop of seed.

Transplanted crops such as cabbage, tomatoes, cauliflower, etc., have been seriously affected by the drought as a considerable percentage of the plants have failed to make a live of it and when others have been set out, they have fared but little better.

European Outlook.

We have had no further advices affecting European seed crops, since our last report but do not think conditions are going to prove quite as bad as many in the trade fear. We are simply expressing an opinion, which perhaps is the result of the hope that is in us, but we should get something more definite in the way of news within the next few weeks.

Seedsmen's Convention.

Referring to the approaching Seedsmen's Convention at Marblehead, Mass., it may be well to suggest that those contemplating attending this convention, would do well to secure rooms. There is not much probability of the house being overcrowded but, at the same time, it costs very little to secure a reservation and if for any reason it cannot be used, it can be easily cancelled. It is hoped that the seedsmen will turn out in goodly numbers but being so far east and the season being so late the country over, it would not be surprising if the attendance was rather lighter than usual.

Canners' Convention for Rochester.

As predicted in these columns weeks ago, the committee having the matter in charge, has chosen Rochester as the place for the next National Canners' Convention. A few details remain to be arranged to the satisfaction of the committee, but Rochester's representatives will certainly concede any reasonable request and it may be considered as settled.

We congratulate Rochester. She has been working for this for several years and has accepted defeat philosophically each year. She has been a good loser and deserves to win.

PERENNIAL FLOWERS

Every florist should have a fairly representable collection of "Perennial Flowers" in his establishment be it either for the purpose of growing them for cut-flowers or plant trade. Many of the best varieties are readily grown from seed but in order to have them fairly large in the spring they should be sown in June.

We offer a very complete collection in our "Wholesale Seed Catalogue." Write for it to-day

HENRY F. MICHELL CO., 578 Market St., Phila.

Notes.

Waco, Tex.—Headquarters for the Rush Park Seed Co. of Independence, Iowa, are to be established here.

Toledo, Ohio—Charles Burge is to erect a 30 x 60 concrete and brick seed house at Ontario and Lafayette streets to cost \$8,160.

Atlantic, Iowa—C. E. Livingston's interest in the Botna Valley Seed House has been purchased by W. F. Shindley and W. T. Woodward.

Considerable damage was done to the fields of young onions south of Chicago by the severe storm the night of the 27th. There was a high wind which, with the rain and hail, drove the young onions from the soil and the fields are white with the ruined plants.

PUBLICATIONS RECEIVED.

Board of Park Commissioners of Minneapolis, 28th Annual Report, 1910. This is a remarkable and truly splendid publication. It contains a vast amount of detailed information which is of general interest but especially so to those who are concerned in parks and playgrounds and the providing of outdoor recreation and amusement for the people of a great city. There are 37 full page engravings showing scenes of beauty and enjoyment in the various parks and playgrounds and 14 maps and plans showing improvements completed or projected. Minneapolis park system comprises 3392 acres, much of it being of great natural picturesque beauty. There are seven lakes of which the largest is Lake Calhoun, 460 acres. The total expenditure for land and improvements up to Dec. 31, 1910, has been \$5,550,175.40. The past five years have been marked by great progressive activity under the inspiration and direction of that most proficient and tireless superintendent Theodore Wirth. Minneapolis is highly favored in having acquired his services just at this time when such a man was needed to develop and at the same time wisely conserve the splendid natural attractions which were at her doors.

Seventh Annual Report of the State Forester of Massachusetts, 1910. State Forester Rane has here presented an

excellent and very interesting report on the work and future needs of his department. Forest fires, reforestation and particularly the work on the suppression of the gypsy and brown-tail moth are treated with particularly full detail and there is very much in the book that every resident of Massachusetts should carefully peruse. The book is well illustrated with half-tones and diagrams.

VEGETABLE PLANTS

CABBAGE, Wakefield, All Head, Succession, and other varieties, \$1.00 per 1000; 10,000 and over, @85c. per 1000.

PERSONAL.

John E. Lager, of Summit, N. J., sailed for a European visit on the Lusitania, May 30.

M. Walsh has accepted the position of manager and grower for J. Kopelman, Oaklawn, R. I.

N. Ireland, lately with the Forest Hills Cemetery, Jamaica Plain, Mass., has been appointed foreman for A. Cowee, Berlin, N. Y.

Lucien Le Clere is now employed in the Poehlmann greenhouses, Morton Grove, Ill. He was formerly in business with his father in Lexington, Ky.

Wm. H. Gear, Cincinnati, returned Friday from Martinsville, Ind., where he has been spending the last ten days recuperating from sciatic rheumatism.

Frank L. Budlong, of the J. A. Budlong & Son Co., Providence, R. I., and Mrs. Irene D. Wilton, of New York, were married in Providence, R. I., on May 17th.

D. Cameron, American representative of Sander & Son, St. Albans, Eng. and Bruges, Belgium, will sail from New York on the Oceanic, June 21, to return in October.

E. Fred Rowe, for many years connected with James Vick's Sons, of Rochester, has left his position with that house to take a place with the McFarland Publicity Service as chief of its copy department. When Mr. Rowe arrived in Harrisburg to assume his new duties he found a pleasant remembrance from his former employers and associates in the form of a vase of beautiful American Beauty roses, bearing the inscription, "Best Wishes of Old Friends and Former Associates of Vick's."

Visitor in Cincinnati: Frank J. Farney, representing M. Rice & Co., Philadelphia, Pa.

St. Louis Visitors—John G. Esler, secretary of The Hall Association, Saddle River, N. J., in company of director J. F. Ammann, was a visitor recently, looking over the damage done by hail a month ago.—Martin Reukauf of Bayersdorfer & Co., Philadelphia, Pa., and Sam P. Seligman of Wertheimer Bros., New York.

Flower Market Reports

BOSTON Tens of thousands, perhaps hundreds of thousands of grassy mounds, throughout New England, were strewn with flowers in lavish quantities last Tuesday. Nowhere in the country is the sentiment and spirit of Memorial Day more generally observed and carried out than in this section. It is beautiful, patriotic and humanizing—this custom of decorating the graves, not only of fallen heroes but of family and friends who have gone before. Nature provides the material in abundance at this time of the year and the humblest need not go without flowers, while for those who are able and desirous to spend money for the occasion the florist is well prepared to serve, up to any amount. Boston florists maintained moderate prices on all flowers, as usual at this time, and the quantity disposed of far exceeded that of any previous celebration. The amount of business transacted from Saturday till Tuesday was something astounding. We know of one wholesaler, the amount whose sales on Saturday were the largest on record for one day—outdistancing the sales of the largest day ever, at Easter or Christmas, by nearly 25 per cent! We have no doubt that the same is true of all the wholesale establishments, including the flower markets. Express companies were overloaded with flower boxes incoming and outgoing—in fact, flowers and floral design work seemed to be the main commodity on the street, in town and out of town. Peonies came in large quantities from points further south, Philadelphia principally. New York was drawn upon for carnations, materially helping the market on this commodity in that town. Locally, there were no lilacs, and other things that usually are just right for Memorial Day were all finished, despite the fact that up to May 1 the season was three weeks behind hand. Roses were in great abundance, and good as a rule. There were mountains of stocks, double and single, and we marvel at the strange course of a grower who will devote his greenhouses to forcing single stocks to be marketed by the bushel at Decoration Day for a ridiculous sum. Everything was well cleaned up in retail as well as wholesale places, and nobody has any fault to find with the great Memorial Day of 1911. And we might add that the artificial flower dealer also reaped a harvest—the keeping qualities of the metal wreaths appealing to many of the more humble buyers and it is only fair to the manufacturers and dealers in these goods to say that they are much more artistic and natural this year than ever before.

CHICAGO The serious glut in flowers continued to the end of the month and yet thousands of dollars' worth of orders had to be turned away because stock had become so soft with the continued hot weather as to be unfit for shipping. There is such a dearth of good stock that prices are going to hold steadily and the grower whose plants have weathered the unusual conditions will find the dollars coming in. Beauties probably held firmest of all through the month. Roses became soft and carnations sleepy. Peas

FOR THE JUNE GIRL

What is more beautiful and effective than a Peony Decoration for this joyous occasion? We have an unlimited supply, the newer varieties, mostly white and the lighter shades, delicate pinks, some darker ones too; splendid quality, really exhibition blooms.

Prices exceptionally reasonable—\$30.00 to \$40.00 per 1,000.

FESTIVA MAXIMA—\$6.00 per 100, \$50.00 per 1000.

Some good medium qualities at \$20.00 to \$25.00 per 1000.

CATTLEYAS \$6.00 per dozen.

SWEET PEAS 75c and \$1.00 per 100.

VALLEY \$4.00 per 100.

BOXWOOD 50 lb. cases, \$7.50.

NEW CROP DAGGER FERNS splendid large fronds, \$2.00 per 1000.

THREE SPLENDID NEW ROSES

"MELODY," the best yellow rose to-day; awarded Silver Medal at the National Flower Show, Boston, 1911.

"DOUBLE PINK KILLARNEY," the Killarney that will supersede the Killarney now grown.

"PRINCE DE BULGARIE," entirely different from any rose grown.

showed up poorly, but it is thought the plants are not permanently injured as was at first feared. Peonies, so far, have been a disappointment as untold numbers went to pieces. There are, however, many that are opening up in good shape side by side with those that are worthless. As was expressed in one of the largest houses, "We have to sell for 70 per cent of the regular price and then give two

peonies for each one." Lily of the valley is very good; stocks also, and gladioli, daisies, etc., furnish a good variety to choose from. Even those longest in the business found themselves confronted by new conditions for Memorial Day this year. After ten days of watching the mercury climb to the 90's a severe rain and wind storm came and the balance of

Flower Market Reports

(Continued from page 823)

the month was expected to be decidedly cool; but not so, the heat was only intensified and the official record of 94 degrees was reached and a temperature of 115 to 120 degrees under glass was recorded day after day. Shipping trade suffered severely, for stock was in no condition to reach distant points in salable condition, and wholesalers wisely notified their customers to that effect. The hot wave continued till the afternoon of the 29th, when the thermometer suddenly dropped to 63 degrees. An unusual number of telegraph orders came in at the last because many retailers had either deferred ordering till the last hour or had cancelled orders placed earlier. This was one of the times that Chicago florists would have found a Sunday mail a great convenience.

The past week has been the hottest on record for May, the thermometer registering 96 degrees in the shade. Business was only fair. Roses are rapidly deteriorating—in fact, half the stock received is open and unsalable. Only a little high-class stock is coming in and that little brought good prices. First-class Beauties are scarce, though there are plenty of cripples. Carnations were in good supply. The quality is on the down grade. Red show the effects of the weather more than any of the other varieties; even the best have that sleepy appearance. Callas are about played out for this season. The demand for lilies is improving. The supply of lily of the valley is limited. Most of the sweet peas received are of poor quality. There is a fair supply of marguerites with a good call. Flowers for Memorial Day were overabundant, all outdoor stock being in full bloom. While the volume of business was as good as last year, nearly half again as much stock had to be handled to reach last year's mark. Never were peonies so plentiful and a good many had to be carried over. Roses were in heavy crop and it required a good deal of sorting to get out shippable stock. The call for carnations exceeded that of any other flower, consequently price held firm on good stock. The demand for common fern was exceptionally heavy, while other green goods were only in fair demand.

NEW YORK proved a very acceptable oasis in the desert and brought a welcome relief to the grower and wholesaler, who have

MILLINGTON, MASS.

found little to encourage them in the few past weeks. There has been a perfect avalanche of flowers—much more than the demand could assimilate—but it has all been taken up at one price or another and is out of the way, with prospects for a very rapid reduction in the receipts from now on. Boston was, as heretofore, a godsend to the New York carnation growers and the prices locally were well maintained for Decoration Day in consequence. Of roses, peonies and outdoor bloom there is an unlimited supply. Fancy material has lagged but the beginning of June should see an improvement in demand for choice material. It cannot come too soon.

PHILADELPHIA As we write, we can hear the echoes of

"Marching Thro' Georgia" while the parade goes down Chestnut street. So, you will naturally pardon us for touching but lightly on such mercenary subjects as the flower markets of Philadelphia—under such flamboyant conditions—this week. They tell us that the volume of the flower business was equal if not a little more than that of last year and that the general trend was for flowers of the lower-priced kinds—those that were showy and gave a lot for the money. Carnations and peonies were the favorites—then followed roses. Outdoor stock like mock orange, snowball, iris, corn-

flower, was in good demand and sold readily at fair prices. Of course, the very hot weather had its effect on the quality of everything. This condition brought most crops in with such a rush that the quality and stamina was away below par. Wherever good, straight, fancy stock was shown, it brought standard price, without question. Wherever anything below that level appeared, any old price the buyer was willing to pay. And there was

Flower Market Reports.

(Continued from page 825.)

any amount of such low grade stock. Growers came in with wagon loads and sold for any absurd figure. Many of these growers were truckers (who are never heard of in the business except at this time), and of course they took whatever was offered them and demoralized the market. But on the whole it was a pretty good Memorial Day week.

The local market was again crowded all of last week, with a slow demand for any kind of stock. The majority of the retailers report a slow business week. The extremely hot weather caused it and consignments came in very poor—in fact, all stock, home-grown as well, is of very poor quality. On Monday, May 29, prices advanced a few cents and the demand for Decoration Day started off good, but here the plant trade is much better than the cut flowers for this day and cheap prices are demanded for cut flowers for decoration purposes. Three cents for poor carnations is too high and other stock about the same. Roses are very poor now. Peonies sell well when good. Sweet peas are still too many. All kinds of greens are in plenty.

FORCING LILACS AROUND PARIS.

By Josef Vales in Moeller Deutsche Gaertner-Zeitung.

(Translated by G. Bleicken.)

In the vicinity of Paris, where the culture and forcing of lilacs exclusively is carried on extensively, you can buy forced lilacs from the middle of October up until June. The rules followed in the growing and forcing of these, although not new, will perhaps prove valuable to the trade, especially for such as contemplate to go into forcing lilacs on a larger scale.

The plants for forcing are dug in the middle of August, only such as show flowering buds being selected. The plants must be "drawn in" after digging; that means they have to stand in the shade to ripen off slowly. Foliage, which does not come off by itself has to be removed. The "drawing in" takes about four weeks. Yet the bulbs must not shrivel and it may become necessary to water dry balls, in order to prevent too rapid drying off, and to secure a natural and regular ripening of the wood. When all growth has ceased—about the time of the first night frost, all watering must stop for good, not to be renewed until one week before forcing time. This first watering is given in order to start the buds again; sometimes this takes two good waterings. Of course plants dug up at the natural fall season for later forcing do not need to be dried off like the first batch.

Before forcing commences the plants must be pruned and special attention must be paid to the work, else it does more harm than good. All twigs not ending in a flower bud must go entirely; only such as grow out of the root or the neck of the plant are left on; of two such shoots only one is left on. In case of a leaf and a flower bud on the same twig, they remain, the leaf bud to be pinched out later.

For colored lilacs there are forced "Andenken an Ludwig Spaeth" and "Charles X;" for whites "Marly." Marly is a rose color, but bleaches to pure white in the forcing houses, the same being covered with tiles or tar paper on boards. Into this air-tight roof windows are fitted every ten feet to give light for the workman inside and at the same time the little light which the plants require for growth. Marly houses are usually 30 to 40 feet long and 12 feet wide, the back 12 feet and the front 9 feet high. All direct sunlight must be excluded during the forcing. The heating pipes run along the walls.

In these houses the plants are dug in, as they come out of the nursery or the sheds, the larger plants in back, the smaller ones in the front part of the house, and covered over with soil to the depth of 3 to 4 inches. The houses are started with heat from 82 degrees to 88 degrees F., after November, 88 degrees to 102 degrees F. After planting a thorough watering is given, and again as the buds expand, at the first watering, syringing of twigs and buds is also beneficial. As soon as the buds have opened to about one inch length, all twigs are disbudded, and only the two end buds remain. If one of these is a leaf-bud it is now pinched out. Walks are located either through the centre of the house or along the side.

In 18 days after planting, the first sprays are cut. The flower sprays are cut with the one-year-old wood left on to length of 20 inches. Some especially fine sprays for large decorations are had with a length of six or seven feet.

A little different from the Marly treatment is the forcing of the colored lilacs. For them the houses have glass roofs. More light and more air are necessary—about twice as much of both as in the Marly houses. In consequence of more airing and less heat the time required to force colored lilacs is considerably longer. One colored variety, Sangana, has flower buds along the whole length of her twigs, therefore is not disbudded. The flowers are a little smaller though. Straw mats are used here in covering the houses at night. In the autumn a temperature from 76 degrees to 82 degrees F. is sufficient; later on, 82 degrees to 88 degrees F. Always give for a few days (say four to five) a lower temperature at the beginning.

The storage of the plants is best done in sheds. After carefully drying them off they are brought into the sheds, where they are handled over several times, always watering any balls that have become too dry, and looking out always that no flower buds commence to shrivel up. After pruning them finally, they are put away in layers 8 to 10 feet high; boards or shutters are put over them and mats again over them, hanging down on all sides to the ground.

In this manner the dormant lilacs are stored away until spring, and are not uncovered till May to give the flowering plants for June, when all out-of-door lilacs have gone to seed. Of course this is the last lot for that season in the storage house, the other batches being taken out according to need. Always water the batch to be used, one week before commencing to force.

In conclusion we have to mention that in Paris all lilacs are cultivated in the nurseries six to seven years before forcing. This assures flowers of absolutely first class quality. In the fourth and fifth year all are transplanted with a good ball, and cultivated thoroughly during their stand in the out-door grounds. By this manner of culture almost every twig carries good flowering buds, and not useless leaf-buds, which with less careful culture will merely turn up in larger quantities.

GREENHOUSES BUILDING OR CONTEMPLATED.

York, Pa.—Edwin Foust, one house.

Grand Rapids, Mich.—R. Jonker, two houses.

Kalispell, Mont.—Kalispell Gardens, addition.

Elmhurst, Ill.—Geo. H. Rabe, range of houses.

Kalispell, Mont.—A. Salmon, range of houses.

Tewksbury, Mass.—M. A. Patten, one house.

Providence, R. I.—Joseph Kopelman, one house.

Guilford, Conn.—Branford A. Latham, one house.

Austin, Minn.—A. N. Kinsman, carnation house 27 x 160 feet.

Morrison, Ia.—R. R. Davis Co., cucumber house 40 x 400 feet.

CHICAGO NOTES.

"Hampton Court Garden."

Among the fine pieces of landscape gardening this spring will be a Hampton Court Garden at the Armour summer home, Lake Forest, Ill. It will be superintended by Bruce McGregor, whose brother so successfully planned the same effect at the World's Fair, at St. Louis.

Geraniums.

The growers of bedding stock, particularly of geraniums have had their special trials this year. The late Easter kept the plants in the background till the warm weather came and all at once the season was upon them and the grower not able to meet an unusually early demand. There are a great quantity of geranium plants at the various greenhouses, but for every plant in bloom there are several not yet showing color. Almost a month of extreme heat has burned the blooms badly on some plants. Nevertheless, geraniums sell, for there is nothing else so satisfactory, but waiting on customers this year is not altogether an unalloyed pleasure.

Personal.

George Fisher and Miss Dora Shapiro will be married at the home of Mr. Fisher's parents, Kalamazoo, Mich., June 6th. The groom is a member of the firm of H. A. Fisher Co., of Kalamazoo, and Battle Creek, Mich., and is located in Chicago as purchaser for the house. Mr. and Mrs. Fisher will be at home to their friends, August 1st at 5007 Forestville avenue, Chicago, and have the best wishes of the trade.

Geo. Woodruff is now home from the hospital and is gaining strength daily.

Mrs. John Zeck, who underwent a severe operation on her foot, is home again and slowly recovering.

Chas. W. McKellar is back from Hot Springs, Ark., and feels quite himself again.

T. Waters is helping Fisher Bros., of Evanston, through their spring rush.

Chas. Schneider has again opened a downtown retail store, this time at 32 Washington street, on the bank floor. The store has been newly decorated and Mr. Schneider has put in a stock of fancy jardiniere and other florists' wares, which he will handle with cut flowers, plants, etc.

H. Philpott arrived in Chicago on Memorial Day to attend the Milwaukee-Chicago club meeting, Thursday, June 1st. The return cards so far show that a large number of the Chicago club members are expecting to attend. Mr. Philpott says the cool weather at Winnipeg has stimulated trade there and that the florists at St.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University. Gardeners who understand up-to-date methods and practice are in demand for the best positions. A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Dept. H, Springfield, Mass.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

WANTED about July 1, a first-class carnation man. Must be young, single and absolutely temperate. A growing place for the right man. References required. C. G., care HORTICULTURE.

WANTED—Two or three young men, 2 or 3 years' experience as greenhouse assistants at private place, 20 miles from Boston; wages \$50 per month. Address M. J., care HORTICULTURE, Boston.

FOR SALE

BOILER FOR SALE.

A Hodge make of East Boston tubular steam boiler in use a few months only, and in splendid condition. Length 13 ft. 4 in., diameter 40 in., 2 in. tubes, modern rocker grate, and complete front and all irons for bricking in. Price, loaded on your team here or on cars, \$100.00—and it is worth \$400.00. W. C. Ward, 577 Adams St., E. Milton, Mass.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write FARSHLESKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

FOR SALE—Beautiful 40 acre farm located in the "Garden Spot of Illinois." Large greenhouse, small nursery. With team, implements, nursery stock, \$2000. Greatest bargain in the country. M. Benson, Dongola, Ill.

BUSINESS CHANCES

PARTNER WANTED—An old established seed and implement house wants a live, hustling, young man to buy part interest and help in the active management of the rapidly growing business. The concern stands well in the trade and with proper help and management, can be made one of the largest in the country. All correspondence, confidential. Address Conservative, care HORTICULTURE.

Paul and Minneapolis appeared to be having a busy time when he was there on the 29th.

August Jurgens is taking down two of his houses and putting things in good shape generally for another year. He finds his auto delivery a great help in facilitating that branch of the business.

Visitors: Leslie Gregg, with Kring Bros., Fairbury, Ill.; Mr. Bolter, Oshkosh, Wis.; Mr. York of Lakeside Floral Co., Houghton, Mich.; Mr. Burt, Jackson, Mich.; James Wild, Sarcoxie, Mo.; Andrew Peterson, Hoopetown, Ill.

THE BLISTER RUST OF WHITE PINE.

The dangerous European disease of white pine (*Cronartium ribicola*), which was recently introduced into America, was by the prompt and active co-operation of all parties concerned, eradicated, as far as found; but there is no evidence that all the cases have been found, nor is there any means of preventing the importation of more diseased white pine nursery stock.

The reforestation movement has created a market for a considerable amount of white pine stock, and the producing capacity of the American nurseries has not kept pace with the demand. The prices for American trees are higher than European prices for the same grade of stock, so that while pine stock has been imported for years for ornamental grounds, it has been only during the last five years that the importations have been for reforestation. While the monetary first cost of imported stock is less than that of American stock, the various items of expense which necessarily are incurred bring the two nearer together than would at first be thought, and the risks of injury from the long trips, and the danger of importing destructive insects and fungous pests are so great that any but the most venturesome should be deterred from importing such stock.

There are many American nurserymen who regularly import their one-year-old coniferous seedlings, and it is safe to say that in the spring of 1909 ten million coniferous seedlings were imported into this country from European nurseries, and that of these, several millions were white pine. A few foresters familiar with European conditions and appreciating the danger of importing the fungus, refuse to accept foreign white pine seedlings and transplants.

The United States Department of Agriculture investigated the outbreak in 1909 of this disease, and has just issued a report on the subject (Bureau of Plant Industry Bulletin 206), in which a full and detailed account of the fungus producing the disease is given, the public is assured that there need be no undue apprehension as the disease has been eradicated once, and can be again should it be imported, but advising that America should raise her own white pine seedlings, and that importations from affected countries be prohibited.

With the importation stopped, the methods of prevention are briefly: Watch the Ribes (currants and gooseberries) during the first and second seasons; keep five-leaved pines at least 500 feet from Ribes; remove and burn all diseased pine trees, making inspections of the trees from the last of April to June 10 and of the Ribes from July 1 until late in the fall, removing diseased bushes and burning them; do this annually as long as any diseased trees or bushes are found.

The preference of this parasite (*Cronartium ribicola*) for the five-

leaved pines is of special significance to America, since the species are naturally present through the western, northern and northeastern forests and are planted more or less commonly throughout the country. The chances of great losses if this fungus should even approximate its past record in Europe are very good. Estimates of possible damage show that such losses would very soon exceed the total value of all coniferous stock ever imported into the country.

The United States Department of Agriculture should be informed promptly and accurately of every importation of white pine and Ribes.

THE BULB TRADE.

Washington—According to Consul Frank W. Mahin of Amsterdam, the United States sells to Holland about 400,000 pounds of bulbs a year and buys from that country about 6,650,000 pounds a year. This is very near the proportion of the Dutch trade to the rest of the world. The record of the past two years, as furnished by the General Society for Bulb Culture at Haarlem is given as follows, (a kilo being equal to 2.2046 pounds):

Countries	Imports from		Exports to	
	1909	1910	1909	1910
	Kilos.	Kilos.	Kilos.	Kilos.
United States	180,200	152,700	3,483,200	3,071,000
United Kingdom	504,800	649,500	6,478,800	6,446,400
Germany and Austria	52,000	68,900	4,733,500	4,432,200
France, Belgium, Italy, Spain, Portugal, Greece and Turkey	482,400	543,300	945,100	937,900
Scandinavia and Denmark	1,800	1,200	1,709,400	1,725,000
Russia	1,000	1,900	519,100	578,500
Japan	9,100	100,900		
Other countries	100		53,400	46,900
Total	1,231,400	1,518,400	17,922,500	17,237,900

It is explained that the shipments by parcels post would largely increase the totals here given. The trade has doubled in exports and trebled in imports during the past ten years. Tulips, hyacinths and some varieties of narcissus constitute the bulk of the trade.

Japan is becoming a more important origin of supply every year. Shipments from that country began with 3311 kilos in 1902. They increased but little until 1910 when they suddenly jumped to 100,900 kilos. The maximum shipments from the United States were 205,100 kilos in 1907. Great Britain has made great gains in bulb exports, which have increased 800 per cent. in 10 years. The figures for the United States would be greater, it is explained, but for the fact that Germany and Austria formerly bought American bulbs in Holland, but now import them direct from the United States.

Early frosts threatened the Dutch bulb crop but good weather since then has made the prospect good for a normal but retarded crop.

F. J. DYER.

NEWS NOTES.

Marshalltown, Iowa.—It is rumored that Stark Bros.' nursery in Louisiana, Mo., will be moved here. They employ about 400.

Huntington, Ind.—Suit for the dissolution of the greenhouse firm of Oliver H. Diffendurfer and Anthony Bieberich was filed on May 24th. The partnership was formed in 1909.

A mosquito repellant is soon to be added to the insecticide specialties of the Aphine Manufacturing Co., of Madison, N. J.

THE FLOWER SHOW AT BOSKOOP (HOLLAND).

After a speech by the Minister of Agriculture, the show was opened by Prince Henry. The judges from abroad present were Roehrs (U. S. A.), Pynaert, Closon, Kuyk, Stegman, Vuylsteke (Belgium), Hansen (Denmark), Ernst, Muller, Brodersen, Dahnhardt, Hammelbacher, Buchner, Stofregen, Siebert, Frendeman, Lambert, Tintelman (Germany), Russell, Culberth, Cutbush, Thomson, Brydon, Cheal (England), Grummes, Sagulin (Finland), Ramelet, Roger, Bois, Boullet (France), Scaravatti (Italy), and Kirchlechner (Hungary).

They attended the dinner given by the Town Council and the Pomological Society, the boat excursion to the harbors of Rotterdam and the lunch given by the Holland-America line on board "The Ryndam."

The show was visited by Queen Wilhelmina, the Queen Mother, the Duchess of Albany, the Count of Arnstatten, the four ministers of agriculture, public works, home affairs and colonies, the English legation, the Mexican mission, the Japanese ambassador, etc. altogether 60,000 persons visited the

show in 14 days. It was a great success in every respect. Of all plants sent in, rhododendrons and azaleas occupied the first place, further lilacs, roses, hydrangea, Japanese maples, peonies, lilies, buxus, palms, aucuba, etc., etc. There was not room for all the plants which were sent. Among the rhododendron novelties, Pink Pearl, White Pearl and Strategist excelled, as fine maculated Sappho, Mme. Jules Porgues and Mme. van Houtte. Among the several azalea groups there were very remarkable varieties and new crosses. The Japanese cherries, especially the double-flowered Shirofugen, Hisakawa and Benifugen, were very beautiful. The clematis plants were exhibited in cones with fence-work. Deutzias, magnolias and glycines, the beautiful dark red *Malus floribunda* *atrosanguinea*, the lilacs, prunuses, tree-peonies, double-flowered *Amygdalus persica* Clara Meyer, etc., all drew special attention. Among the dwarf Polyantha roses, Jessie gave a very favorable impression, while many Hybrid Teas exhibited their flower in great perfection.

Among the novelties there was much which could not remain unnoticed: The *Azalea mollis* x *sinensis* varieties, T. Koster and Beauty of Boskoop, *Azalea mollis* Betsy van Nes, *Azalea occidentalis* hybrids, the rhododendrons Direktor Siebert, Mme. B. de Bruin, Aucklandii hybrids and Everestianum fl. pl. Prince Camille de Rohan, the clematis varieties Prins Hendrik and Mr. Patyn, roses Elna Teschendorf, Louise Walter and Lady Hillingdon, the lilac Mlle. van Tol.

This first Boskoop show was of more than ordinary importance in its kind. It was closed on the 20th of April.

18th April, 1911.

Aphine Manufacturing Co.,
Madison, N. J., U. S. A.

Gentlemen:—
I have to thank you for the Aphine received a few weeks ago.

I have tried this insecticide on a new species of Coccid, Stictococcus dimorphus, Newst., which attacks cacao, with very favorable results. This pest is a very difficult insect to keep under control.

Yours faithfully,

W. GOWDEY,
Government Entomologist.

\$2.50 per gallon—\$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has the equal of destroying mildew on roses and carnation rust.

\$2.00 per gallon—75c. per quart.

Send for name of nearest selling agent.
Aphine and Fungine can be used in house or field.

What the Users say

"Temperature Easily Maintained in Zero Weather; Kroeschell Runs all Night Without Firing."

Your boiler is taking care of 3500 sq. ft. of glass, but I expect to add that much more next season. Am not afraid but that the No. 1 boiler will take care of 7000 sq. ft. of glass, although it is only rated at 6000 sq. ft. I have had no trouble in keeping 55° at night, and 60° to 70° in the daytime in zero weather. After we got used to firing, we attended fire about every five or six hours. We have not fired any at night after 10.30, and not often fired any before 6.00 o'clock in the morning.

H. M. PASKINS & CO.,
Basil, Ohio.

BOBBINK & ATKINS

Nurserymen and Florists

RUTHERFORD, N. J.

World's Choicest Florist and Nursery Products.

We are growing in our greenhouses and in our 250-acre nursery a large variety of material constantly in demand by florists. Our New Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

B. & A. SPECIALTIES

Palms, Bay Trees, Boxwood and Hardy Herbaceous Plants, Evergreens, Roses, Rhododendrons, Vines and Climbers, Bulbs and Roots, Conifers, Pines,

We have a quantity of H. T. ROSES in fine assortment of kinds, ask for Lists and Prices.

Florists are always welcome visitors to our nurseries.

We are only a few minutes from New York City; Carlton Hill station is the second stop on main line of Erie Railroad.

Bobbink & Atkins Heart Cypress Tub

We take pleasure in directing the attention of our patrons to our Plant Tub Department. We are now thoroughly well equipped to supply tubs in any quantity, size or shape. Write us for prices on special sizes and shapes.

ROUND TUBS, Less 20 per cent. to the trade.

Seasonable Notes on Culture of Florists' Stock

ADIANTUMS

Where bench-grown adiantums show unmistakable signs of deterioration throw them out and plant new stock. Give the house and benches a thorough cleansing to kill all fungus and insects. Before putting in the soil give the benches a good coat of hot lime, and see that you give good drainage. Use a compost of turfy loam three parts, cow manure and leaf mold each one part, and enough of sand to keep the compost porous. Strong plants from 3 or 4-inch pots will make fine stock. Keep the house well ventilated, without allowing strong currents of air to blow on the plants. See that they have a light shade during the summer, just enough to break the strong rays of the sun. Where you intend to carry old plants over for another year you should withhold water so as to sweeten up the soil, and then remove whatever loose surface soil you can. Give them a rich mulch and under these conditions new growth will finally appear and grow stronger and more abundantly for the short spell of rest.

BENCHING CHRYSANTHEMUMS

A very important program now is the planting of young stock. Give your houses and benches a good cleaning and wash-down and when they have dried out give the benches a coat of fresh whitewash. For these plants it is very hard to say what forms the ideal soil, for fine flowers are produced in differing soils. I think sod that was laid up last fall and cow manure added in proportion of one part to three of soil forms a splendid material. In filling the benches see that they are just level full, but don't neglect to press firmly around the edges of the bench. The distance apart to plant should be governed by the grade of flowers and the varieties you propose to grow. If your aim is to have fine flowers with good foliage, strong-growing sorts should have from 8 to 10 inches apart. After planting don't allow your plants to become choked up with weeds; stir the surface regularly and fumigate once a week if the weather permits. Give abundant ventilation both top and bottom for this is very essential. To keep the house in a favorable atmospheric state for their growth they should have frequent syringings daily. See that they have water when the surface of the sod becomes dry, but never practice in overdoing it.

CUTTINGS OF POINSETTIAS

When the cuttings are about three inches long they should be taken off. Have some powdered charcoal handy so you can dip them in as soon as possible to stop bleeding. It is better to have some new and rather gritty sand placed in your propagating bed than to trust to old sand. Protect them carefully from the sun by shading and see that they are kept well watered. It will take from three to five weeks for them to get rooted in. They should be potted off while the roots are small. Leaf mold and loam with some sand will

do for the first potting and after potting keep them shaded and rather close until they get established, when they can be grown in cooler quarters. During their growth avoid dryness at the root or soggiess, which will show itself in the loss of foliage. Plants that you want to grow for cutting should be planted before they get too much potbound. A good compost to use is fibrous loam three parts, well decayed manure one part. For pans don't propagate until about July 15, which will be sufficiently early.

FERNS IN FRAMES

All small-growing ferns can be grown satisfactorily in frames during the summer. They should be plunged in ashes or spent hops up to the rims and the sashes raised high enough to allow an abundance of air at all times. All ferns such as are used for table ferneries can be grown in this manner better than in a house, because, on all warm days, you can maintain the proper condition of atmosphere by giving them a great deal of air direct. Many ferns of stronger growth used during the winter as decorative plants will be found to put on a vigorous growth of perfect shape and compact sturdy habit, by this treatment. Shade the sashes just heavy enough to intercept the sun's rays. One of the most important points in frame culture for ferns during the summer is the cool bottom you have by plunging the pots to their rims. They can stay here until the middle of September with good results.

LEFT-OVER ASTILBE JAPONICA

Where you have the ground to spare and have some of these plants left over from Memorial Day, don't throw the plants away. Give them a rich and rather moist piece of ground. Divide the large clumps in half and give them from 15 to 18 inches in the rows, and about two and a half feet between the rows. Keep the ground well cultivated and you will have heavy clumps by the fall of the second year, which you can divide into two or three pieces. These will force just as well as imported stock. Every grower should plan to do this with any left-over plants.

PRUNING OF FLOWERING SHRUBS

As the flowering shrubs go out of bloom is the proper time to prune them, so they will have time to make a good growth and set their flower buds. All shrubs that set their flower buds in the fall should be pruned just after blooming; such as spiraeas, lilacs, deutzias, forsythias, loniceras, weigelas, philadelphus, viburnums and many others too numerous to name. On the other hand, all shrubs that set their flower buds on the current year's growths, such as hydrangeas, hardy roses, etc., will stand pruning hard back in the spring, which produces better and larger flowers. In pruning all the former shrubs they will probably all require some reduction of the tops to put them in shape, but it would be better to reduce the number of growths rather than to do too much shortening. Remove all dead or weak wood and cut back any growth that is straying away from the others and you will vastly improve the next year's bloom.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Begonias; Nerines; Orchids; Pansies for Winter Flowering; Roses carried over; Smilax.

less those who decided on Marblehead, Mass., gave the matter their very careful consideration and quite possibly could not have selected a more desirable spot. It would seem that many of the western members who seldom get a sniff of sea air, would be glad to journey a few hundred miles further in order to enjoy this pleasure. It is generally conceded that the convention at Atlantic City last year was thoroughly enjoyed by all, and there is no reason why this year's meeting should not be equally enjoyable. We hope to see a large and representative turnout.

Very welcome is the rain which has come at last to refresh the thirsty crops and restore the parched-up land to normal condition and fertility. The

aggregate loss to all departments of agriculture and horticulture because of the scanty rainfall of the past two seasons is almost beyond computation—far up in the millions and hundred of millions. The showers, thus far, welcome as they have been, are but as a drop in the bucket that is needed, but perhaps they are only a beginning of what is to be a season of rainfall which will go far towards averaging up for past deficiency. The destruction wrought in nurseries and gardens, in the eastern section of the country, at least, during the winter of 1910-11 is most pitiful, especially among the conifers. The winter-killing of evergreens is something not easily explained, as a rule, so contradictory are the effects under what seem to be parallel conditions but, in the present case, all experts seem agreed that the insufficiency of moisture during the two previous seasons was a dominant factor in the ruin which this spring has disclosed—much more so than the immediate winter inclemency.

The extended and constantly lengthening lists of varieties of peonies, rhododendrons, roses, sweet peas and other plants of commercial prominence have been the subject of frequent criticism, as is well known. In a general way the protest is justifiable, the lists of too-nearly-alike varieties and the introduction of new sorts that are no better than those already in general use furnishing good reason for such disapproval. But we should not forget that the well-known standard varieties of today were the untried novelties of yesterday and it is only by raising and testing new things that any progress can be made. Again, there are always local conditions and influences that play an important part in establishing the merits or demerits of a plant in different locations. For instance, we find in the Arboretum Bulletin in this issue a list of rhododendrons that have proven reliably hardy in the Arboretum, some of which are quite similar to one another, yet it would be unwise to cut such a list down, as the worst behaved in one garden would often prove to be the best behaved in another and, again, the best behaved in one particular year might be the worst behaved in the next. This reasoning would apply generally to all classes of plants and flowers and condemnation based on individual tests should be sparingly indulged in. Somebody else may have equally good reason to draw opposite conclusions.

Some have surmised that the place chosen for this year's Seed Trade Convention, while ideal so far as the hotels and surroundings go, is a little too far east to draw the western members. Doubt-

The Seedsmen's
 Convention

A BEAUTIFUL MASSACHUSETTS ESTATE.

The committee on gardens of the Massachusetts Horticultural Society made its first visit of the season last week to the estate of George E. Barnard at Ipswich, Mass., to inspect his recently constructed rock garden and also his gardens of spring-flowering plants.

Although the season had been very unfavorable thus far on account of the unusual lack of rain during the past two months, the numerous gardens on the estate proved well worthy a visit. The most noticeable change made in the grounds since the committee's inspection of the previous year was the extension of the rock garden. This has been carried up on the adjoining hillside and a structure erected composed of large rocks, making it the most conspicuous feature of the estate.

A miniature rocky ravine, thickly bordered with *Osmunda* ferns nearby, through which a stream of water flows from the height above makes another attractive feature, and when the present plantings of hardy perennial shrubs and herbaceous flowering plants cover the rocky mass it will be a model rock garden. On the upper slope of the hill forming a suitable background for the rockery, is a row of spruces, and the lower slopes are filled in with a collection of rhododendrons and azaleas now in fine flower.

Although lacking as yet the finish which will be added when the rocky bank is covered with flowers and foliage, the whole scheme is effective and promises to make this estate a notable one on the North Shore. To the head gardener, John S. Critchley, credit is due for the skill and taste displayed in bringing to a completion this notable undertaking.

Conspicuous among the masses of flowering plants in the various gardens were marigolds, pansies, zinnias, geraniums, iris, lupins, yellow alysum, columbines in blue, white and yellow; *Lychnis viscaria*, *Hesperus matronalis* in white and purple, *Keria japonica*, *Deutzia Lemoinei*, *Silene* and *Azalea mollis*.

The visiting committee consisted of President Charles W. Parker, chairman of the garden committee, and Messrs. Charles Sander, J. B. Shurtleff, Jr., William Nicholson, Arthur F. Barney and Wm. P. Rich.

THE BOSKOOP SHOW

Rhododendrons, Lilacs and Azaleas.

ROSE MELODY.

Your correspondent, in the course of an interview recently with E. J. Fancourt, of the S. S. Pennock-Meehan Co., received an interesting report from him on the behavior of the new yellow rose "Melody."

"You may state," he said, "to the readers of *HORTICULTURE*, that when we introduced Melody the early part of the season, we referred to same as being a winter bloomer and we now wish to state for the benefit of those who have purchased stock of this variety, that much to our surprise it has proven to be an excellent warm weather rose and all during the extremely hot spell we have had for the last two or three weeks and up to the present time, we have had an immense cut and the stock has been fine and the color has held up well.

"In fact, Melody today will average a better quality of flower for this late season than any other variety we are getting in (we refer to such varieties as the two Killarneys, My Maryland, Richmond, etc.). We might also add that we have found a big demand for the flowers of Melody during May and right up to the present time."

This will be pleasing news to all those who have been enterprising enough to invest in this new rose.

PHILOSOPHY, REAL AND SPURIOUS.

Editor *HORTICULTURE*:

The criticism by Geo. F. Stewart of a passage in the articles on "Mendel's Law," lately published in *HORTICULTURE*, is to the point and the translator of the articles is willing to shoulder the blame for not having given in the translation the true meaning of the author's sentence.

The author of the article on Mendel's Law really means to say, "excluding philosophizing and preconceived opinions," and does so express himself in his work, meaning that any superficial and light sort of philosophy, the kind which many people take for the true article, not knowing any better, is to be excluded in the search for further knowledge.

The whole of Mendel's Law is based upon true philosophical data and only because all these do harmonize with every other science, has Mendel's discovery been acknowledged as a law by philosophers.

Mr. Stewart's point is well taken and I trust he will see now that the error lies wholly with the translator in not giving the proper definition to the author's sentence. There is certainly a great difference between philosophy proper and "philosophizing," as is sometimes done in a hurry and often by people who could not define the meaning of philosophy if they tried. Against such does the author send out his warning.

I trust that the above explanation will meet with Mr. Stewart's approval and thank him for having noted the error.

GUSTAVE THOMMEN.

Billerica, Mass.

THE SHAW BANQUET.

The twenty-second annual banquet to gardeners, florists and nurserymen, provided for in the will of Henry Shaw, will be given at the Southern Hotel, St. Louis, on June 15th, at 7 p. m. *HORTICULTURE* acknowledges with due appreciation the kind invitation of Professor Trelease to be present on that occasion.

THE BOSKOOP SHOW

Rhododendrons Pink Pearl and White Pearl.

CLUBS AND SOCIETIES

AMERICAN PEONY SOCIETY'S SHOW.

As we go to press the peony show of the year, that of the American Peony Society, opens in Philadelphia. We shall have a full account of the prize winners, and other features, in our next issue. On the 6th, two days before the opening, our Philadelphia correspondent reported the following entries, which would indicate that a splendid exhibition of this glorious "once a year" flower has taken place, the best fiftys and the best twelves having the largest list of entries, while the other classes all had good representation. Classes 1 to 5 are commercial; 6 to 18, amateur. The Pennsylvania Horticultural Society classes, although numbered 1 to 8, are not the same as the American Peony Society's 1 to 8. C. A. Reeves, of Cleveland, occupied 300 square feet of space with a general collection not for competition, comprising some 1300 blooms. Thomas Meehan & Sons, and The Cottage Gardens Co., both exhibited in the competitive class (No. 1) for the largest and best collection of named varieties, one bloom of each, for the American Peony Society's premier prize, and no doubt there were others before the entry list was closed.

Thomas Meehan & Sons, Gtn., classes 3-4.
Cottage Gardens Co., Queens, N. Y., 1-2 3 5.
E. B. Van Vorst, Hackensack, N. J., A. Anderson, gard., 7-13.
Prof. A. P. Saunders, Dept. of Chemistry, Hamilton College, Clinton, N. Y., 6 to 18; also P. H. S. classes 3-5 6-7-8.
Mrs. F. S. Kellogg, New York Mills, N. Y. (same as Saunders).
C. A. Reeves, 2-3-4-5.
Lakeview Nurseries, Cleveland, O., 15-16, and 300 ft. space not for competition; 1300 blooms, a general collection, not for competition.
S. G. Harris, Tarrytown, N. Y., 2-3-4-5-14-15-16 and P. H. S. 1-2-5-6-7.
Geo. H. Peterson, Fairlawn, N. J., 2-4-5-15-16 and P. H. S. 3-5-6-7-8.
Andorra Nurseries, Chestnut Hill, Phila., 1-2-3-4-5-16.

The foregoing entries were sent direct to David Rust, secretary of P. H. S., Philadelphia. Mr. Fewkes at this writing (June 6th) has not sent in his list of entries, but it looks as if it was going to be "some show."

Thomas Meehan & Sons offer a prize for the best painting of peonies. Fifty entries have already been made for this. These paintings will be exhibited and judged at the peony show.

AMERICAN SEED TRADE ASSOCIATION.

The program for the annual convention of the American Seed Trade Association has been completed and copies of the program will be sent out to all members of the association by the secretary within a few days.

There are three entirely new features on the program this year, which should prove of much benefit to all members in attendance.

Telegraphic crop reports which will be received from most of the growers in the U. S. and also some from Can-

ada, giving the very latest crop conditions up to Tuesday, June 20th.

Question box, to provide for general discussion and to obtain information on any subject that is of particular interest to any member of the association.

Questions may be mailed or handed either to the president or secretary of the association.

State correspondents. Each state correspondent is asked to make a verbal report if he is present, otherwise a written report, of all legislative matters that have come up in the past year within their state or states.

The social features of the program have not been forgotten and arrangements have been made to enjoy as much as possible of this delightful summer resort, as will permit outside of the regular sessions of the association.

The annual banquet will be given on Wednesday evening, June 21st, and arrangements have been made with the hotel, that there will be no extra charge for this banquet to the seedsmen that are guests of the hotel.

The American Seed Trade Association has not held its annual convention in the State of Massachusetts but once since its organization. Inasmuch as the Massachusetts seedsmen have always taken an active and prominent part in the association, it seems very fitting that the association should appoint their meeting place in this State again this year.

Mr. E. L. Page, president of the American Seed Trade Association, informs us that he has heard from many of the growers in the U. S. signifying their willingness to send in telegrams (night letter) giving the latest crop conditions in their section up to June 20th.

YONKERS HORTICULTURAL SOCIETY.

At the regular meeting, June 2, the executive committee made a most satisfactory report with regard to the coming show, all prize money being already assured.

H. Nichols, superintendent for H. Trevor, exhibited a fine collection of sweet peas in twenty varieties and received a cultural commendation. A similar award went to L. Milliot for some fine gloxinias. The next meeting, July 7, will be of a social character. P. Macdonald, T. Mahoney and J. Hoffman were appointed a committee to make arrangements.

H. M. B.

UNION CLUB MEETING AT MILWAUKEE.

Over forty members of the Chicago Florists' Club accepted the hospitality of the Milwaukee Florists' Club on June 1st, reaching that city at 8.30 P. M. via the Chicago-Milwaukee electric. The meeting was turned over to the Chicago boys, President Philpott presiding. A paper on roses was read by Mr. Keimel of Elmhurst, Ill. An elaborate Dutch supper was served and the club left for home feeling that they had been royally entertained. A return visit has already been decided upon, the date not yet announced.

FLORISTS' CLUB OF PHILADELPHIA.

The regular monthly meeting of the above club was held on the 6th inst. This meeting was unique in the club's history in having as its essayist of the evening their only lady member, Mrs. Sarah I. Smith, of Secane, Pa. Her subject, "Violets and Carnations From a Woman's Point of View," was ably handled, and a most frank and charming document. Mrs. Smith was present, but did not have courage enough to take the platform, so the good knight, Sir Otto Thilow, occupied the forum in her stead. The essay committee reported that at the July meeting they would have as the feature of the evening Paul Huebner on, "Railroad Gardening." Mr. Huebner is the superintendent of the landscape department of the Reading Railroad system, and is recognized as one of the ablest in his line of business in the country. Election of new members, reports of committees, and other routine, took up the balance of the meeting.

S. A. F. CONVENTION REMINDER.

Chairman Vincent of the local committee is sending out as a "Convention Reminder," the following interesting statistics of Baltimore, the convention city. We take pleasure in presenting, on the opposite page, a diagram of the Armory floor where the exhibition will be staged and the meetings held. It is said to be the finest and most convenient hall ever placed at the disposal of the Society for its annual convention.

Some Interesting Facts About Baltimore.

The first steam railroad in the world—the B. & O., 1828.
First monument to the memory of George Washington.
The first two cruisers of the present navy.
The first silk ribbon mill in America.
The first submarine boat—built by Ross Winans.
The first College of Dental Surgery.
The first iron building—the old "Sun" building.
The first telegraph line—between Baltimore and Washington.
The first telegraphic dispatch, worded: "What God has wrought."
The first metal pens used in America.
The first Medical Society in the United States—organized 1788.
The first Gas Light Company in America.
The first Water Company in America.
The first electric railway—Baltimore to Hampden.
The first Lodge of Odd Fellows—1819.
The oldest shot tower in the United States—still standing.
Baltimore packs more oysters and vegetables than any other city in the world.
Baltimore is the largest manufacturer of straw goods and fertilizers in the United States.
Baltimore has the finest natural forest park in the United States in Druid Hill.
Baltimore built the largest dry dock in the world "The Dewey" now in Manila.
The best hall in America for the purpose of holding exhibitions—60,000 square feet of unobstructed floor space.
The first monument to Christopher Columbus.
The leading clothing manufacturer in the United States.
The Star Spangled Banner was written in Baltimore by Francis Scott Key.
Baltimore has the finest oysters in the world, fresh every day from the Chesapeake Bay.
Baltimore has one of the finest trolley systems in the world, including a line between Baltimore and Washington.

Class 42—The Sutton & Sons prize (Reading, Eng.), Cup, value \$25.00, for the best table of Sweet Peas to be arranged on a space four by three feet and not to exceed three feet in height (amateurs and gardeners only).

Class 43—Watkins & Simpson's prize for the best six vases Spencer or Unwin Sweet Peas, \$10.00.

Class 44—The C. C. Morse & Co.'s prize, a silver cup, value \$25.00, for the finest collection of Sweet Peas (open to the trade only).

For further particulars write to
HARRY A. BUNYARD, Sec.,
 342 W. 14th St., New York City.

FLORISTS' CLUB OF WASHINGTON.

Wm. R. Smith, superintendent of the Botanic Garden, addressed the Washington Club on the evening of June 6, on the beautification of the Capital. He said it was the most beautiful of the world's cities, and he referred at some length to its beauti-

ful trees and the great variety of them.

The members of the club have reported that great annoyance is caused by the neglect of persons who receive gifts of flowers to make acknowledgment of them. The club appeals to the public to acknowledge such gifts and to the "June bride" especially, according to the Washington Herald the club says:

"If you receive flowers on your wedding day from admiring friends, acknowledge the fact—don't keep the admiring friends in any doubt as to whether they were delivered or not. If you don't you may get the innocent florist into a peck of trouble."

The club does not confine this advice to brides, however. It applies to funerals as well as to weddings. Unfounded complaints have been received so frequently of late that the club appointed a committee to see what could be done, as it had become evident that some action was necessary.

The club decided to hold its annual outing on July 26, at Chesapeake Beach, when the members will indulge in a basket picnic. Committees are making the necessary arrangements.

Indorsement was given to the proposed Sunday closing law, which is under consideration by Congress, to apply to the District of Columbia.

Resolutions on the death of the late Edward A. Moseley, a member of the club, were adopted. Mr. Moseley was secretary of the Interstate Commerce Commission, but he was also an enthusiastic amateur florist.

Plans for participation in the Na-

tional Convention at Baltimore, during the third week in August, were discussed. The club contemplates chartering special cars and attending in a body.

F. J. DYER.

CLUB AND SOCIETY NOTES.

J. K. M. L. Farquhar of Boston lectured before the New Bedford Horticultural Society on the evening of June 5, on "Rose Culture."

In honor of the American Association of Park Superintendents, which will hold its annual meeting in Kansas City in August, a reproduction of the organization's seal in a flower bed is to be made in the middle parking just outside the entrance to Swope Park. The bed will be round, about forty feet in diameter and will reproduce a large live oak. It is planned to photograph the members at the park gateway.

An injunction to prevent aeroplanes from flying over their greenhouses in Waltham and Waverley is to be brought by E. Allan and Herbert Peirce against the coming aero meet that starts June 15, on the Metz grounds.

Whether or not a property owner can prevent flying machines from soaring over his land is something that has never before been broached. Attorney W. J. Bannon, of Waltham, who has been retained by the Peirce Brothers denies that they have any intention of preventing the aero meet from starting, but that the gardeners and florists wish to protect their property from any possible accident.

Boddington's Bulb Bloom.

Save Money on Your Fall Bulbs—by Ordering NOW

Our Quality Bulbs are famous for results

Mr. Florist:—You can save money on the bulbs you expect to grow this Fall, if you order them now, instead of two or three months later.

We have bought heavily of the best bulbs procurable in Bermuda, Japan, Holland and French markets, and will, until July 1st, offer special inducements to encourage our customers to place their orders earlier than usual.

Send us a list showing the bulbs you wish to grow this Fall—Lilies, Tulips, Narcissi, Hyacinths, etc.—and we will make a special and confidential quotation on your order. Our regular Fall Catalogue will be ready in July, but the prices we will make you now will be at a large reduction, for the reasons stated above.

Write for "CONFIDENTIAL QUOTATION"—and write to-day. This offer is good only until July 1st, 1911.

BRITISH HORTICULTURE.

The Temple Flower Show.

In brilliant weather and under the most favorable auspices, the great show of the Royal Horticultural Society was opened in the historic Temple Gardens in London, on May 23rd. The grounds were crowded with a fashionable assembly, for the presence of the King and Queen gave an added social importance to the event. The best samples of the florist's art were to be seen, whilst the groups of flowering shrubs and trees in the grounds, and the rock gardens, afforded interesting objects for countless admirers. As usual the orchids made a magnificent display, such noted orchidists as Messrs. Charlesworth & Co., J. Cypher & Sons, J. & A. McBean, Sander & Son, E. V. Low and others, contributing their finest treasures. Most of the leading British rosarians were represented and there were one or two notable novelties in this section. W. Paul & Son, of Waltham Cross, received an award of merit for a new H. T., Portia, a shapely bloom, of flesh color and very fragrant. They also received an award for Sylvia, a white-flowered hybrid Wichuraiana. There was a splendid array of the Rambler type, whose popularity appears to be steadily on the increase amongst rose lovers. The whole display was one of the finest collections of roses which has ever been brought together in London.

Amongst the hardy shrubs an object of attention was Davidia involucreata, which Messrs. Veitch & Sons have introduced from China. A first class certificate was awarded. As custom-

ary, J. Waterer & Sons, of Bagshot, Surrey, were to the fore in the rhododendron section. They received a special award for Corona, of a fascinating shade of pink, and a valuable addition to their admirable assortment of these subjects. Other rhododendrons receiving awards were: Loder's White, of the R. indica type (shown by G. Reuthe, of Keston, Kent); R. Glory of Littleworth, orange and pale primrose, and R. Littleworth Corallina, soft flesh pink, both shown by Miss Mangles, of Seale, Surrey. R. and G. Cuthbert, of Southgate, Middlesex, received an award of merit for pink azalea Duchess of Portland; a superb cross between the sinensis and mollis varieties. Carnations formed an attractive feature, the best American and British kinds being well represented. W. Wells & Co., Ltd., of Merstham, Surrey, made a good display with White House, Pink Delight, and other well known varieties. C. H. Herbert, of Acocks Green, Birmingham, showed Progress, a new rose-carmine. Cutbush & Sons, of Highgate Nurseries, London, N., had a particularly fine collection.

Jottings.

The carnation, Lady Hermione, has been selected for the bouquet to be offered to the Queen on Coronation day by the Gardeners' Co. This was raised by the late Martin Ridley Smith, President of the National Carnation Society; it is the offspring of Crusader, crossed with the pollen of the old blush Malmaison, and is of a salmon pink tint, with sweet fragrance.—A very satisfactory report was presented at the annual meeting of the British

Gardeners' Ass'n., held in London, during the Temple show week.—Messrs. Barr & Sons are shortly removing their nursery from Surbiton to Taplow in Bucks. Their gorgeous displays of tulips in the blooming season have been a familiar object to travelers on the London and South-western railway line.—At the annual festival banquet of the Gardeners' Royal Benevolent Institution, held in London on May 23rd, the sum of £2400 was collected.

W. H. ADSETT.

PERSONAL.

Frederick Stewart has taken a position with H. W. Field, Northampton, Mass.

Julius Roehrs, Sr., has returned from his European trip looking the picture of perfect health.

Howard R. Morgan has resumed his former position at Miss Bell Miller's greenhouses, Springfield, Ill. For the past four years he has been with J. F. Wilcox of Council Bluffs, Ia.

Harry Turner has accepted the position of superintendent of the Untermyer estate at Greystone, N. Y. He is succeeded at Castle Gould by Mr. Virt, who was his assistant while there.

Visitors in New York: P. M. Koster, Boskoop, Holland, and W. J. Ebbinge & Van Groos, Boskoop; W. J. Eldering, Haarlem. Mr. Koster will sail for home on the Rotterdam, June 27. Thomas Gould, Jr., and wife, Ventura, Cal., on their honeymoon.

Coldwell Lawn Mowers

Hand, Horse and Motor

Coldwell's Motor Lawn Mowers

Will do the work of three horse
lawn mowers — and do it better

¶ They will mow up 20 per cent grades. ¶ They leave no hoof prints as horses do.
¶ They will roll the lawn smoothly. ¶ They do away with the expense of two
men and three horses. ¶ They are of no expense when not in use. ¶ They
are simple to operate and economical. ¶ They are a necessity on every large lawn

LOECHNER & CO., 11 Warren Street, New York

The man who knows everything has not been born; but the man who thinks he does is born at the rate of a dozen a minute. As he grows older, however, he realizes how little he knows or rather sees how much he don't know. The bull-headed kind are ashamed to admit it, but the real wise man you will always find seeking knowledge, asking questions, and reasoning out things continually.

The reason why Horseshoe Brand Bulbs are superior to most brands is principally because a shrewd Japanese grower and exporter reasoned carefully years ago, and rightly came to the conclusion that it paid to throw away defective plants in the lily fields rather than to allow them to be marketed as his product. Moreover he reasoned further and concluded that it was policy to spend more money for fertilizer and labor in cultivating the bulbs to avoid being obliged to stand a loss for crippled plants, until at the present time, his crops are perhaps the finest in the world. There are no better bulbs produced that we know of, and they are offered to you as reasonable as we can afford to sell them. Just try the Horseshoe Brand next fall. Cold Storage bulbs ready for future or immediate shipment.

Write us.

12 West Broadway
NEW YORK CITY

Not How Cheap
But How Good

Seed Trade

The Drought Broken.

The protracted drought which has extended over almost the entire Atlantic seaboard and as far west as Pennsylvania, has been effectively broken, copious rains having fallen over the territory within the past week. While this rain comes too late to be of service to peas in the south, and many early vegetables, it will be of great benefit at all points from New Jersey, north, and as far west as New York and Pennsylvania. In the two latter states but few crops have advanced to a point where they will not be greatly benefited by the rains.

Truckers in Jersey and Long Island have earnestly hoped for rain for weeks and it is now believed that enough has fallen to carry them along for some considerable time, while the indications are that there may be a swing to the other extreme, and they may get more moisture than they require.

The Pea Crop.

Peas, which are a matter of great interest to the seed trade, and especially growers, are in very satisfactory condition, and barring a repetition of last year's intense heat and drought just as peas were coming into bloom, there should be a fair average crop. Reports from all the large packers of the country are encouraging. This includes Michigan, New York, Wisconsin and Indiana. Ohio may now also be included in this class. For a time it was thought that peas in Indiana and Ohio had suffered from the lack of moisture, but the crop in these states has not developed to a point where it is too late for them to derive full benefit from the recent rains.

About Onions.

There are reports from the onion-growing sections in New Jersey, Pennsylvania, New York and Ohio, that the cutworm is busy and injuring the onion crop. It is rather early to say with any confidence what damage has been done, but beyond doubt it is considerable, as some reports state that the farmers were plowing up their onion lands and planting other crops. It will doubtless be some weeks before the extent of the damage is fully known.

For Rochester in 1912.

In last week's issue we mentioned the fact that the Canners' Convention of 1912 was to be held in Rochester, subject to certain demands which they would make on that city. We are informed that all of these demands have been conceded and it is therefore now settled that Rochester will have the convention of 1912. This city is building a very large convention hall which will give a larger floor space than even the great Auditorium at Milwaukee. The distance from the principal hotels to Convention Hall is not great and it can be reached in from 10 to 15 minutes by car. The site of the Convention Hall we are informed, is the old Industrial Home, which was located almost in the heart of the city and was an eye-sore to the residents. Many of the old buildings will be razed and others reconstructed, so that when the convention meets there in February of next year they will have one of the best lighted and largest halls they have ever exhibited in;

PERENNIAL FLOWERS

Every florist should have a fairly representable collection of "Perennial Flowers" in his establishment be it either for the purpose of growing them for cut-flowers or plant trade. Many of the best varieties are readily grown from seed but in order to have them fairly large in the spring they should be sown in June.

We offer a very complete collection in our "Wholesale Seed Catalogue." Write for it to-day

HENRY F. MICHELL CO., 578 Market St., Phila.

in fact it is not too much to say that it will be the largest.

Rochester is a very wide-awake, up-to-date town. No city of its size in the United States has as ample and good hotel accommodations, and now that they are going to have a convention hall of the dimensions referred to, they hope to get not only a large number of industrial conventions, but many of a political character.

Counter Trade.

Trade holds on, as was expected, very late this year, and in most of the retail stores counter trade is still active. This is especially true in New England and in most of the leading seed centers, with possibly the exception of New York City and the south, where trade is pretty well over for this year. So far as the volume of business done is concerned, it is generally accepted that it will fall somewhat below last season. Reports, generally, state that the mail order houses have not done as large a business as a year ago and at the final wind-up it will doubtless be found true of those depending largely on counter trade.

Pennsylvania Seed Bill.

We are advised by Senator Heacock that the Pennsylvania Seed Bill is dead. As reported in a recent issue of HORTICULTURE this bill was up to the governor. From the above it would appear that the governor has refused to give it his sanction. We are proud to be able to send this good news to the trade, and are gratified that the great State of Pennsylvania cannot be quoted as joining in the widespread insanity for oppressive legislation aimed to harass an innocent and, at best, a difficult and poorly paid business. Burpee, Holmes, Maule and the rest of them have not worked in vain after all.

Notes.

Reports from Holland are that the weather has been most favorable for the development of bulbs and that all bulbs from that country, particularly the hyacinths, will be remarkably fine this year.

The A. W. Schisler Grain Co., at 810 N. 4th street, St. Louis, will move this week to much larger quarters one block south, 708 and 710 N. 4th street. Mr. Schisler was formerly with the Schisler-Corneli Seed Co.

A. T. Boddington states that he has had two crop reports from C. C. Morse & Co., both very pessimistic and the last worse than the first, on the condition of the sweet pea crop which is said to be the poorest in years. Fortunately, Boddington has a hold-over stock of excellent quality.

Howard M. Earl of Burpee's left Philadelphia on the 4th inst. on his annual crop inspection tour to the Pacific Coast. He expects to arrive home again in time for the sweet pea "fest," which opens in Philadelphia June 23rd. "The Chief," as W. Atlee Burpee is affectionately known among his cohorts, is president of the Sweet Pea Society this year. So all the Chief's lieutenants have to be on deck to grace the occasion.

Of Interest to Retail Florists

A FLOWER MARKETING LITIGATION.

William C. Walter, a florist who has a store at Fifteenth and Cheyenne streets, has no right to sell his own flowers to himself, according to the contention of the Denver Wholesale Florist Company.

The company filed suit in the district court recently, naming Walter and Attorney Ernest Morris as defendants.

The complaint sets forth that June 30, 1909, seven florists of the city organized the Denver Wholesale Florist Company, agreeing to sell cut flowers raised in their greenhouses only to the company. In the agreement were Walter, Emil Glauber, J. V. Benson, L. C. Waterbury, Fred Hall, Ben Boldt

and C. F. Maler. Each took 1000 shares of stock in the company, paying \$1 par value for each share. They agreed not to assign any of the stock for a period of three years. To hold them to this agreement, the stock of the company was placed in the keeping of Morris, as trustee.

It is alleged in the complaint that Walter April 1 opened a retail store and has violated the agreement by selling his cut flowers to this store run by himself instead of selling them only to the Denver Wholesale Floral Company. It is set forth that, according to the agreement entered into by the stockholders, any one who violated its terms would forfeit his stock.

Morris, it is alleged, refuses to turn over Walter's 1000 shares of stock to the company, asserting that the company should first protect him with an indemnifying bond.

The court is asked to decree Walter's stock in the company forfeited

to the common treasury and to order Morris to turn it over.

Walter asserts that the company agreed to sell him his own flowers. When protest was made because he opened a retail store, he says he told his associates that he would buy his own flowers from the company and pay it 15 per cent. commission, the same as any other retail dealer would. He says this plan was agreed to.

Stockholders of the company declare that it isn't in any sense a trust and that they organized it merely for the purpose of mutual profit and protection. *Denver Republican.*

CHICAGO NOTES.

Trade Notes.

The floral auto parade June 3rd could not be counted as an important event from the florists' standpoint. Several beautiful autos were seen but the decorations were almost without exception done with artificial flowers.

Chas. Erne has deferred the opening of a retail store till later in the summer and will remain till that time with the E. H. Hunt Co. as before. This firm reports a good spring trade and will soon begin to put the store through its annual cleaning process.

The Chicago Growers' Exchange was of short duration, the growers selling their stock under its auspices on the 7½ per cent. basis being notified June 5th to make their sale tickets in their own names as previously. The Exchange was organized two weeks ago by E. E. Pieser and Henry Van Gelder in the old Flower Growers' Market.

Memorial Day quickly used up a large amount of bedding stock. Plants that were in bloom and those showing color, of course, had preference. The extreme hot weather made the demand more centered on that one week than possibly ever before, and the delivery of the stock was no small item, every available conveyance being pressed into service night and day.

The only geranium in short supply was Poitevine. There were enough late plants of all other varieties to fill the after-Memorial orders for lawns, window boxes, etc., and these are now about taken care of. The trade is getting more and more to be confined to the outlying districts, especially in the vicinity of the cemeteries, and the downtown florists had little part in it with either plants or flowers.

The final steps were taken June 5th to perfect the organization incorporated under the name of the Chicago Flower Growers' Association with a membership of over fifty growers. The meeting was held in the parlors of the Palmer House and John Kidwell was elected president, Wm. Merrett vice-president, Geo. B. Weiland secretary, and Anton Then treasurer. These and various business and two growers from Niles Center, Ill., will constitute a board of managers and will meet on the 8th to discuss time and place for opening. The business is to be in the hands of a manager who is not yet secured.

Robbers stole some money and valuable papers from the store of A. S. Kidwell, florist, 929 East Forty-Third

street, June 2. The cracksmen opened the safe by knocking off the knob of its combination and then using dynamite. The robbery was discovered when Kidwell opened the store.

Personal.

H. W. Rogers, with Weiland & Risch, will spend two weeks at his old home on Spring Lake, Mich., and other northern points.—Ernest Farley is now with the J. B. Deamud Co.—E. Wienhoeber is serving on the grand jury this week.—Nic. Miller still is off duty nursing his shoulder, which was hurt in a fall two weeks ago.

Visitors.—H. G. Pauli, Davenport, Ia.; A. L. Glaser, Dubuque, Ia.; F. Rentschel of the Capital City Greenhouses, Madison, Wis.; Frank Bentley of Crabb & Hunter, Grand Rapids, Mich.; Wm. Dittman, New Castle, Ind.

Thomas F. Galvin, Inc., has leased the entire building at 1 Park St., Boston, in which the flower store of Julius Zinn is located, for a term of 15 years. Mr. Galvin will not occupy it, however, until his lease of the present store on Tremont street has expired. The move is in line with extensive plans for developing the Galvin business.

Flower Market Reports

This week is "between BOSTON hay and grass," Memorial Day having passed and school graduations not yet started. All flowers have dropped off in demand and price, and as there are lots of them the sale of stock at wholesale calls for the exercise of much sagacity in order to realize anything for the grower. American Beauty roses are in most active demand, with Richmond, Maryland, Killarney and White Killarney following in order as named. Bride and Bridesmaid are the most difficult to move. Carnot is coming in now and will soon occupy a front seat. Kaiserin, on account of its liability to bruise in handling, is not making much headway. Carnations are reduced in quality but not in quantity. Many of the blooms now coming in are puny and indicate that the plants are about used up. In addition to the flowers listed in regular table, peonies from \$4.00 to \$8.00 stocks from \$2.00 to \$3.00 and astilbe at \$1.00 and \$2.00 should be mentioned.

The trade was well satisfied with memorial week's business. Things were a little quiet at beginning of the week but lost time was made up on Saturday, Sunday and Monday. The severe hot weather a week previous cut off a good portion of out-door material, but peonies of eastern and western shipment were a good help-out. Carnations, together with lilies, roses, iris and deutzia helped to make up what was needed. No complaint can be made regarding the following week, cut flowers being in good supply on most lines except peas, which were scarce for a few days. Home-grown peonies are coming in more plentiful and things cleaned up fairly well at the end of the week. Weddings are beginning to be noticeable since June 1st, and the demand for lily of the valley and white roses is daily on the increase.

June opens with an abundance of stock but the quality does not average up to that of former years. There are plenty of roses but the long-stemmed ones, so much in demand for commencements, are scarce, while there is more short stock than can be handled to advantage. Many soft roses that will not bear shipping are turned over to the street fakirs and by this means the actual quantity thrown away is less than that of two weeks ago. Beauties are of good quality but the hot weather has made them small. Carnations are poor and fancy stock hard to find. A good demand exists for good shipping stock and when it can be found it sells readily. Size has rapidly diminished during the past three weeks. Iris is about gone and the season has been a disappointment to many. Peonies are selling slowly and much of the stock taken from cold storage for Memorial Day opened up poorly. All in all the extreme heat has changed market conditions and made a record not to be desired. New ferns from Michigan and Wisconsin are in and sell from \$2.50 to \$3.00 per 1000. Smilax continues very scarce.

TYING TAPE SPECIAL

A new Pennock-Meehan introduction for tying boxes and packages. It is a highly finished extra quality tape, very strong and almost as economical as ordinary twine, adds elegance and exclusiveness to the box or package.

DETROIT The recent heated spell seems to have cooked all the life out of the flowers and while the demand for Decoration Day was very brisk indeed the poor quality drove many a lot of carnations and roses into the dump cart. Last week was much cooler and all stock shows a great improvement, but even a very heavy demand would not cope with the enormous quantities shipped into this market. It was a blessing for the growers that a local society held a flower sale for the benefit of a hospital for crippled children. Some 200 high school girls sold

30,000 carnations, 20,000 roses and many peonies for whatever the purchaser would give, netting thereby some \$2,000 for their institution and disposing of goods which without this sale would have been lost. Peonies are coming in very fast and many of them are being put into cold storage for future use. Local growers have an assortment of peonies which it is difficult to beat. Lilium longiflorum are more than abundant at present. Most of the plant growers have completed their bedding and report a complete clean-up at good prices.

Flower Market Reports

(Continued from page 855)

NEW YORK An unwieldy surplus of all kinds of flowers continues to encumber the wholesale market daily. Rose growers are still cutting heavily, although the quality runs rather poor as a rule and there is no evidence as yet of any general emptying of houses for replanting. Carnations and lilies are also badly accumulated and peonies, in all grades of good and bad quality are heaped high in the commission houses. Prices rule very low on everything when large quantities are in question. The retail trade is fairly busy with steamer work and graduation demands are already in sight. The conditions are generally favorable for the retailer who can practically dictate values on stock wanted. Sweet peas are abundant, the Spencer waved varieties predominating.

PHILADELPHIA Our last week's report covered the market here to the wind-up of Memorial Day business Tuesday night. There was not much left over Wednesday morning, but the last four days of the week had little to show in the way of live business. The "June weddings and things" did not materialize, and, as a consequence, there were long faces by Saturday night—which seemed to suggest Gilbert's doleful ditty:

"O why, O tell me why, is everything at sixes and at sevens."

Ninety-nine per cent. of the stock that came in was not up to the mark and prices ruled accordingly. The one per cent. of really first-class stock that could be culled out from this enormous mediocre mass brought good prices. We heard of one lot of American Beauty roses from a good grower (and a fair average of what is now coming in) on which one thousand flowers were culled over to get ten real specials. The ten brought \$4, but how about the other 990?—all the way down to 5c. There were lots of good Killarney around, but Maryland had the call. It is to date the best pink rose for hot weather. In white roses Kaiserin ought to be the leader now, but our mercenary growers insist on giving us White Killarney instead. There are fewer and fewer Kaiserin being grown. Kaiserin is the best summer rose as to quality. Mountains of peonies around. Only the fancies bring any kind of a price. Lily of the valley and sweet peas, normal. Orchids slow. Gardenias and a host of other things we ought to tell you about will have to wait.

ST. LOUIS Business for the last week was quite satisfactory. This being the month of weddings and school graduations a lot of business is now expected. There are quantities of cut flowers consigned to this market every day, but the quality is very poor. Extra quality in roses seems out of question at present and the prices are not over \$6 per 100 for the best. Carnations are becoming small and the market is crowded with a lot of this poor stock which do not bring more than \$10 to \$15 per 1000. Sweet peas are plenty and of good quality. Candidum and Harrisii lilies are in fine, also corn flowers, iris and gladioli. Local florists report that shipping orders were much better than the home demand for Decoration Day.

WASHINGTON The best trade for Memorial Day ever known in the District has been followed by an excellent "commencement" business. Commencement exercises are being held every day and will continue until the 20th. Many novelties have been seen this year. A class of 39 at the Cathedral School wore straw hats trimmed with natural flowers. At the National Park Seminary one class carried arm baskets, another showers, another arm sprays, another floral scarfs, another wands, another crooks. The excellent state of trade makes everyone feel happy, notwithstanding long hours and hard work. There is a plentiful stock of everything and prices rule about normal. Only one exception might be noted: the hot weather forced the peonies to such a degree that they have been of unsatisfactory quality.

FATHERS' DAY.

This occasion has been fixed by common consent for the third Sunday in June. Whoop it up. A red rose is the badge. Just as silly as Mother's Day, of course; but so long as there is business in it, "any handle is good enough to turn the crank with," as Jock Macpherson used to

say. It appears that Mrs. J. B. Dodd, of Spokane, Washington, is the sponsor for the new movement, as was Miss Jarvis, of Philadelphia, for Mothers' Day. The writer of this paragraph is now about a million years old, and has lived in many families. His experience is that the best man in the bunch is the mother-in-law. She chops the wood, brings up the family, does everything and gets no credit—only a lot of abuse for her trouble. If we ever wear a flower it will be for the mother-in-law.

Advertise Your Stock In Horticulture

If you could figure up how much business you do not get because someone had forgotten your address or 'phone number, or because someone did not know you had what they wanted you would be surprised at the amount you had lost.

Advertise Your Stock In Horticulture and Stop This Leak

During Recess

Good News for Barnegat.

That item in last week's HORTICULTURE about the Aphine Mfg. Co. having a mosquito repellant cooking in the incubator, is certainly good news for Barnegat. Glory be! The writer hopes that Mr. Ebel will make it "double strong" and sure death! A repellant is good, but an annihilator would be still better! Blessings on you, Mr. Ebel! If you succeed in your laudable endeavor you will rank with Lydia Pinkham as a Friend of the Human Race.

Once a year Commodore Westcott invites "the boys" down to Barnegat. He means well, but this is the way it looks to some of us thin-skinned lads:

VIEW OF BED ROOM AND RELATIVE SIZE OF MOSQUITO.

We pay the North American and Bradford the compliment of a reproduction. The bed post stunt for sharpening the stinger is a revelation. Aha! so that's how the villains do it, eh! Well, well, education certainly is a great thing. Even the mosquitos have got it. G. C. W.

British Horticultural Traders' Reunion.

We have received from Mr. J. S. Brunton a copy of the menu and list of toasts at the reunion dinner of the British Horticultural Traders who recently visited this country. It was held at Anderton's Hotel, London, on May 24. The toasts were: "His Majesty the King," "The President of the United States," "America," "American Horticulture," "The Ladies," "The Horticultural Press" and "The Chairman." The enjoyable affair closed with the singing of "Auld Lang Syne."

New York Bowlers.

At the practice game on Friday evening, June 2, W. J. Eldering of Holland was present as a visitor. Scores were made as follows:

Chubbine, 217	191	294	Kakoda	132	134	118
Manda	134	181	198	Shaw,	114	141 158
Irwin,	170	168	195	Scott,	191	118 141
W.R.'k'ds, 172	163	161	Nugent,	109	113	92
A.R.'k'ds, 178	169	132	Eldering,	—	108	89

The Elliott Auction Company of New York City will have their usual annual trade sale of plants shortly—probably about the middle of June.

RAILROAD STATION GARDENING.

See Cover Illustration.

Comparison of depots and grounds of railroads in this country and abroad offer results in unfavorable comment by travelled persons. American railroads, concerned largely with securing dividends and eliminating expenses which bring no visible returns for the outlay, expend little money and effort in the cultivation of the beautiful and esthetic. Possibly less is done in this line now than was done by them twenty years ago. Then the Baltimore & Ohio, for example, maintained a large force of gardeners, and had greenhouses in which were grown bedding plants for use around the stations. The road does little of this now. More, perhaps, is done by the Pennsylvania, but more attention is paid by the latter road to shrubbery, which may show better judgment. The Santa Fe railroad has done a good deal in the way of building attractive station houses, as has the Southern and Union Pacific, and other roads do something to make their depots and terminals attractive. It must be admitted, however, that the efforts in this direction fall far short of what might be considered desirable, from the point of view of the public. Often citizens associations take in hand the improvement of grounds around railroad stations without cost to the railroads, and some roads give prizes to employes who make the best showing around depots.

This is a subject in which the advocates of the "city beautiful" idea can arouse interest. Practical horticulturists and landscape gardeners will naturally help to cultivate public taste in the beautification of what now are too frequently unsightly places. R. Vincent, Jr., of White Marsh, Md., while abroad recently, was impressed by the different style of treatment of station grounds and premises by the European railroads, which in the main are government-owned. Perhaps beauty is not an asset in this country which can be turned into money, but many persons believe that it is. At any rate, a photograph of a Berlin depot interior which was brought back by Mr. Vincent, and which is loaned to HORTICULTURE by Prof. L. C. Corbett of the Department of Agriculture, Washington, shows how attractive a big railroad station can be made, and it should furnish a valuable object lesson for American railroads.

Look Carefully Through The Buyers' Directory

It is the Key to the offers of Advertisers in each issue.

It will remind you of the things you need now.

ST. LOUIS NOTES.

The National Clock and Electrical Co. are now housed in their new quarters, 1906 Pine street, much larger than the old one, which was destroyed recently by fire.

The W. C. Smith Wholesale Floral Co. have a quartette of good singers in Messrs. Smith, Ossick, Patten and Windler. They are now rehearsing for the florists' picnic.

Ostertag Bros. had a \$500 job at the Jefferson Hotel planting of the window boxes. Kalisch Bros. also had a \$500 job planting Bellevue Garden. Both were splendidly executed.

Our four wholesale houses have started early closing June first. They will close at 5 P. M. each day and at 12 M on Saturdays until September. This was hailed with great delight by the employees.

Secretary Beneke of the St. Louis Florists' Club has sent out the invitations for the 25th anniversary banquet of the club, which takes place June 28th at Peckmann's Hotel. Among the invited guests are all the officers of the S. A. F.

Phil. C. Scanlan, the outgoing Park Commissioner, was the guest of honor at a banquet given by his many friends at the St. Louis Club, last week. The incoming Park Commissioner, Dwight F. Davis, Mayor Kreismann, ex-Mayor Wells and David R. Francis, were the speakers.

Shaw's Garden opened its gates to the public for the first time this year on Sunday last. The weather was so very hot that the attendance was not near what it used to be on these public Sunday openings. According to the gate keeper just 7794 passed through from 2 o'clock to closing time. Those who braved the heat were well repaid, as the garden never looked more attractive. Superintendent Irish was on hand to greet the visitors and in groups with a guide they inspected all points of interest.

Visitor—Harry Balsley, Detroit, Mich.

PHILADELPHIA NOTES.

Frank Forney permanent representative in Chicago of M. Rice & Co., has been in Philadelphia for a week or more looking over the new season's offerings and getting in touch with the fountain-head of things. The firm is now busy opening up new arrivals, photographing novelties and getting their sample lines ready for the new campaigns.

Mr. Hansell is now running the retail end of W. C. Smith's establishment at 60th and Ludlow streets. The old greenhouse range has now shrunk to almost nothing and it is a hard job to find it with stores and dwellings erected almost all around. Big changes have come over that neighborhood since the elevated went through to 69th street.

"The finest and best" in flowers is what Charles H. Fox offers his customers according to a big sign on the building 211 South Broad street, which he will occupy as soon as alterations are completed. He is at present located at 223 South Broad street. Is it permissible to ask if a double superlative is more high-toned than a double negative?

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale, and all soft-bodied insects. An excellent cleanser for decorative stock. Used as a spray, you can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has no equal for destroying mildew on roses, and carnation rust.

\$2.00 per gallon, 75c. per quart.

FOR SALE BY SEEDMEN

Send for name of nearest selling agent.

Our products are not alone endorsed, but are continuously used by leading commercial growers, professional gardeners, park departments and state colleges of the country.

Aphine and Fungine can be used in house or field.

COLDWELL LAWN MOWERS.

Coldwell lawn mowers have been continuously on the market for over thirty years, during which time the output has increased from less than 750 per year to over 750 per day. The manufacturing plant has also increased from a small shop to a plant which covers over 154,000 square feet of floor space. We recently had the pleasure of an inspection of the new establishment now being fitted up for occupancy by this enterprising concern. The building is six stories high, with a water front on the Hudson River of over 1000 lineal feet and a dockage depth of 20 feet. On the other side of the building is the main line of the West Shore R. R. with sidings for the use of the factory, so that loading and unloading of material by rail or by water is all done on the company's premises. The building is magnificently equipped with a 750 horsepower engine, automatic sprinkling outfit throughout—in fact everything that experience could teach, business sagacity suggest or ample capital buy have been incorporated in this wonderfully perfect plant.

The demand for the motor mowers made here has made all this equipment necessary. They are made with all the fine workmanship of an automobile and are rapidly putting the horse mowers out of commission in this country and abroad.

RHODODENDRONS AT THE ARNOLD ARBORETUM.

From Bulletin No. 6.

Many of the rhododendrons in the collection at the base of Hemlock Hill are now in flower and can be most easily reached from the South street entrance. Owing to the heat and drought of May the flowers are smaller than in more favorable seasons and they will probably not last long in good condition.

The variety of these plants which can be successfully grown in this climate is not large, and they are mostly derived from a few species. The most important of these species are three rhododendrons of the eastern United States—*Rhododendron catawbiense*, *Rhododendron punctatum* and *Rhododendron maximum*. The first grows only on the high summits of the southern Alleghany mountains where it sometimes covers enormous areas, but is rarely found much below an altitude of five thousand feet. This plant is very hardy and in cultivation forms a broad, low bush; it grows slowly, however, and the flowers are of a rather disagreeable purplish rose color. It is most interesting for the part which it has played in the production of the principal race of garden rhododendrons. Several plants are now in flower along the drive not far from the South street entrance. The second species, *Rhododendron punctatum*, is also a native of the southern Appalachian region where it grows at much lower altitudes than *Rhododendron catawbiense*. It forms a dense low bush with small leaves thickly covered on their lower surface with dark dots, and small, reddish purple flowers in small compact clusters which are a good deal hidden by the young branches which, growing before the flowers open, overtop them. This plant, of which there are good specimens in the collection, will not be in bloom for several days. There are two hybrids of this species known in gardens as *Rhododendron Wilsoni* or *arbutifolium*, and *Rhododendron myrtifolium*. The former is a cross with the alpine *Rhododendron ferrugineum* and the latter with the alpine *Rhododendron hirsutum*. In habits and foliage they are handsomer plants than their American parent, and are useful for small gardens and for the margins of beds of larger plants; they will not be in bloom for several days. *Rhododendron maximum*, the third of the American species, is found occasionally in New England swamps and is very common along the borders of streams in mountain valleys south of New York, often growing to the size of a small tree and sometimes forming impenetrable thickets of large extent. This is the latest of the rhodo-

dendrons to flower here and will not be in bloom for several weeks. The flowers and the flower-clusters are much smaller than those of *Rhododendron catawbiense* and, like those of *Rhododendron punctatum*, they are hidden by the branchlets of the year which surround and rise above them. A hybrid of *Rhododendron maximum* and *Rhododendron catawbiense*, raised in England and known as *Rhododendron delicatissimum*, is in this climate one of the most beautiful and desirable of garden rhododendrons. It has white flowers tinged with pink, which appear after those of most of the other *catawbiense* hybrids have passed. Another English hybrid of the same parentage, *Rhododendron Wellesleyanum*, is less hardy here than either of its parents; and among a large number of seedling plants of *Rhododendron maximum* crossed the some of the red-flowered *catawbiense* hybrids, raised near Boston, only a few have been able to bear the cold of the New England winters. Other species in the collection are the European *Rhododendron ferrugineum* and *Rhododendron hirsutum*, the Japanese *Rhododendron brachycarpum* and *Rhododendron Metternichii*, the first with yellow and the other with rose-colored flowers. Several plants of a hybrid of this last crossed with garden hybrids of *Rhododendron catawbiense* have proved hardy in the Arboretum and promise to be valuable additions in the collection. *Rhododendron ponticum* of southern Europe and Asia Minor is hardy only in sheltered positions and is not a desirable plant for this climate. In England it is the common rhododendron of parks and game preserves. *Rhododendron caucasicum* is an early-flowering species from the Caucasus, with compact clusters of yellowish white flowers. There are several hybrids and varieties of this handsome plant in cultivation which have proved hardy in the Arboretum and deserve to be better known here than they are at present. The flowers of many of these have already faded, but a plant called *coriaceum* at the front of the group, just beyond the turn from the Valley Road into Hemlock Hill Road, gives a good idea of the plants of this parentage.

The large plants in the collection are all hybrids of *Rhododendron catawbiense* and it is these hybrids which are generally planted in American gardens. They are of different parentage and have been obtained by crossing *Rhododendron catawbiense* with *Rhododendron maximum*, *Rhododendron ponticum*, and with *Rhododendron arboreum*, and other species with highly colored flowers from the Himalayas. A large number of these hybrids are cultivated in Europe, but only a few of them in which the blood of *Rhododendron catawbiense* predominates are really hardy in New England.

The Arboretum is often asked for a list of the varieties which can be grown here. The following which can be seen in the collection either as large or small plants have been the most successful in the neighborhood of Boston: *album elegans*, *album grandiflorum*, *atrosanguineum*, *bi-color*, *Charles Bagley*, *Charles Dickens*, *delicatissimum*, *Edward S. Rand*, *Everestianum*, *F. L. Ames*, *H. W. Sargent*, *Hannibal*, *Kettledrum*, *King of*

the Purples, *Henrietta Sargent*, *Lady Armstrong*, *Mrs. Millner*, *Mrs. Charles Sargent*, *Mrs. Harry Ingersoll*, *purpureum elegans*, *purpureum grandiflorum*, *roseum elegans*, *Sefton*.

Like most plants of the Heath Family to which the rhododendrons belong, it is impossible to cultivate them in soil impregnated with lime. The area in the eastern states, therefore, where they can be successfully grown is comparatively small.

The Laurels (*Kalmia latifolia*) will be in bloom before the end of another week. They are planted beyond the rhododendrons at the northern base of Hemlock Hill and furnish the last and one of the most beautiful of the yearly flower shows of the Arboretum.

Large plants of the Golden Chain, *Laburnum vulgare*, are occasionally seen in the neighborhood of Boston where this handsome European tree has long been planted. It is not very hardy, however, and succeeds only in sheltered positions. A better plant for this region is the so-called Scotch *Laburnum*, *Laburnum alpinum* of the mountain region of central Europe. This is a large shrub or small tree blooming about two weeks later than *Laburnum vulgare*, and the bright yellow flowers are produced in longer clusters than those of the other species. It grows rapidly and is perfectly hardy. A large plant now in full bloom can be seen close to the Shrub Collection on the Forest Hills Road. This is perhaps the most desirable yellow-flowered shrub or small tree which is hardy in this climate, and it is unfortunate that a plant of this character, which is so generally cultivated in Europe, should be so little known in American collections.

NEWS NOTES.

Los Angeles, Cal.—Jack D'Ortenac of the Redondo Floral Co. has sold his share to Albert Knopf.

Traverse City, Mich.—The Wolverine Nursery Co. of Paw Paw, contemplate opening a branch office here.

Paducah, Ky.—Fire damaged the seed warehouse of Gardiner & Co. to the extent of several thousand dollars, on May 26.

St. Augar, Ia.—The Gilbertson Nursery Co. are building a 40x100 onion storage house. A side track is being laid to the building.

Waterloo, Wis.—Thirty acres of land in the southwest part of the town have been purchased by the McKay Bros. Nursery Co.

Rockford, Ill.—A barn belonging to R. H. Shumway, seedsman, was partially destroyed by fire on May 25. Damage about \$500 with no insurance.

Fulton, N. Y.—G. W. Perkins has purchased the flower store of C. B. Wetherby. Mr. Wetherby will hereafter devote himself to the growing end of the business.

Scranton, Pa.—A 30x100 brick building, four stories high, will be erected by the Scranton Florist Supply Co., beside their present building. It will be used for making designs for florists use.

What the Users Say

"FIRES TWICE DURING NIGHT IN COLDEST WEATHER: KROESCHELL BOILER FAR BETTER THAN CAST IRON BOILERS."

With your No. 11 boiler I am heating 27,000 sq. ft. of glass, but have no doubt this boiler would take care of 37,000 sq. ft. We have not had the least bit of trouble to maintain proper temperatures. In very cold weather I fire twice during the night. I had two cast iron boilers before, but yours are far better. Last winter I heated 17,000 sq. ft. of glass with my small boiler, your No. 7 maintaining a temperature of 50° when outside temperature was 6° above zero; (the regular rating of No. 7 boiler without Generator, is 15,000 sq. ft. of glass) with the Kroeschell piping system in connection with the Kroeschell Generator. This piping system and the Generator are entirely satisfactory. I take pleasure in recommending the system and boilers to anyone.

ANTON J. PAULY, Attica, N. Y.

Aquilegias

AMERICAN HYBRID COLUMBINES

Among the spring flowering hardy border plants none are more admired for their grace and beauty than the Columbines. The variety of colors presented in this genus is equalled by but few garden subjects. For the rockery and semi-wild garden the aquilegias are all well adapted and effective but they enjoy a situation which is not too dry.

The illustration herewith is from a photograph of one of Henderson's "American Hybrid" Columbines and represents the highest perfection of size, form and other qualities admired in the single forms. The foliage is equally robust. The single varieties are, and should be, more popular than the double flowered sorts but there are some superb blooms among the latter also.

Hybrid Tea Rose F. R. Patzer

This beautiful rose of which a portrait appears as cover illustration to this issue is one of Dickson's Pedigree Irish introductions of 1909. It has made a good impression among rosarians as a garden variety, being free-flowering, blooms well-formed and highly tea-scented. We have not heard of its being given any trial under glass for cut flower purposes but it would seem a likely subject as the color is quite distinct, the petals being pink on the outside, and buff changing to orange pink on the inner surface. We are indebted to H. A. Dreer for the photograph from which the engraving was made.

Mushrooms

If in growing mushrooms gaining conditions and procuring lively spawn are the most important factors, as claimed by most growers, there certainly are exceptions at times as I have experienced in the bed illustrated.

The manure for this bed was obtained the first week in March, and was turned outdoors, as no suitable sheltered place was available. During the first week it was drenched with a heavy rain, frozen, and covered with snow, in fact, if I had been preparing for commercial purposes I would have given up in despair; however, to make the best of the situation I made the bed up, put in my glass and waited for results.

After four days, seeing the glass had remained at 58 degrees, I determined to spawn at once, believing it would not rise to a suitable temperature. After spawning the bed started to rise until after one week it had risen to 110; opening the bed and examining the spawn I found it to be very light in color and hot as if it was useless; however, I opened up the bed all around and allowed the steam to escape. Remaining at 110 degrees four days it commenced to drop, when at 80 degrees,

MUSHROOM BED

On Summer Estate of G. P. Grant, Jr., Concord, Mass.

which is high to cover with soil, I soiled and covered with straw.

English and Pure Culture spawn was used. The P. C. evidently stood the test best as shown on the front end of the bed. After six weeks mushrooms appeared and on May 8th picking was commenced. Thirteen good pickings had been made up to the time it was photographed June 1st, and it looks as if it will be in bearing for some time to come.

In spawning beds at 90 degrees or slightly over it is generally put on the bed just deep enough so that it is as a rule flush with the outside of the bed, so it can readily be seen what my bed was subject to in the line of heat.

Improving the Exhibition

In the "upward revision" of the rules and regulations regarding the annual convention exhibition of the S. A. F. as announced in our recent report of the doings of the Executive Board the influence of the National Flower Show at Boston is plainly seen. After its experience at Boston which was certainly an eye-opener, the Society is justified in assuming a position of more confident firmness in the establishment and enforcement of regulations more in accord with the practice in other lines of similar industrial enterprise. The ruling as regards display signs will perhaps meet with the most opposition but its wisdom and fairness are evident and the general appearance of the exhibition will be more in keeping with what the people are justified in expecting from the representatives of a profession in which refinement and good taste are supposed to be particularly well developed.

We commend to the special attention of our Hail readers who own greenhouses, the little talk on hail and hail insurance, by John G. Esler at New York, which appears in this issue. It happens to be a most timely subject and one that was brought home in a most forcible manner at the very time when Mr. Esler was speaking, to a large number of growers about Baltimore as our news notes from the stricken district indicate. Mr. Esler remarked that it is usually after and not before a hailstorm that a man makes application for insurance—a statement unfortunately true but entirely in accord with human nature ever since the world began, we presume. As to the attitude of the S. A. F. towards the Hail Association, Brother Esler knows full well that the S. A. F. has been at all times friendly and we do not think he will be disposed to disagree with us when we say that the success achieved by the Hail Association was only possible through an independent organization such as was formed as the outcome of the S. A. F. discussions.

There are unmistakable signs of the approaching end of the flower-buying season in and about the centres where fashionable society doings are the source and support of a large part of the florists' business. This early close of the season is attributed by some to the exodus to England to witness the coronation pageant. That event may have more or less influence in the present case but it is, nevertheless, a fact which all city florists can vouch for, that the term of metropolitan gaieties has been going through this shortening-up process steadily for quite a number of years—commencing later and ending earlier and thus gradually shrinking at both ends. There are other and various explanations put forth but we have no doubt that the rapidly growing appreciation for country attractions and rural pastimes, aided and abetted by the automobile is really the controlling factor in this trend of the people's fancy away from the florist and his flowers for so large a part of the year.

Thus, through the seasonable seductions of the out door life the florists' exotic offerings are neglected, the garden and the park encroaching upon the cut flower's position in like manner and with like effect as the greenhouse plant grower has stolen a march on

The gardeners' opportunity

the Christmas and Easter flower trade. Surely it is time that the cut flower business as a distinctive industry should seriously consider ways and means for self-protection. As for the gardener, it is easy to see that his art is growing in prestige and importance and he should see to it that he, himself, shall keep up with the vast movement which, properly utilized, means so much to him. He has now in sight the greatest opportunity ever opened to him in this or any other country. While deploring anything which tends to interfere with or obstruct the popularity of the flower business, we look upon the remarkable growth and development of the garden passion as a most inspiring and hopeful augury for the advancement of American horticulture in its highest quality.

Seasonable Notes on Culture of Florists' Stock

BEGONIAS

Now is a time when all flowering begonias root with the greatest of ease. An ideal place is a shaded house where the ventilators can be adjusted so as not to have sweeping air currents blowing through it, with an atmosphere that is charged with a reasonable amount of humidity. The new side growths including such as come directly from the base of the plant make the most satisfactory cuttings. When rooted they should be potted off into 2½ or 3-inch pots, in sandy loam, leaf mold and sand. In the shifts after this use a turf-like, crumbly soil three parts, well decayed cow manure one part, and enough of leaf mold and sand to lighten the mixture. The floors and benches should be kept cool by frequent wettings during the hot weather. For shading the house, a thin mixture of naphtha and white lead will do.

NERINES

When the foliage of nerines begins to turn yellow it shows that they are finishing up their growth. Place them outdoors on a bed of coal ashes and gradually diminish the amount of water. When all the foliage assumes a golden hue the pots should be laid on their sides on a sunny bank high piece of ground where they will not be likely to get much water. They can be given this treatment until the middle of September when they should be moved into a frame or cool greenhouse. When the flower scapes make their appearance remove about an inch of the surface from top of the pots and give a top dressing of rich compost. As they begin to make fair growth they will take an abundance of water with overhead syringing. Give an application of liquid manure once a week.

ORCHIDS

The judicious use of liquid stimulants for orchids will increase vigor and strength. All terrestrial orchids like an occasional weak dose of manure water in their growing season. Such as calanthes, cymbidiums, cypridiums, phaius, pleiones, sobralias, thunias and others are benefited by feeding providing they have plenty of strong roots. With epiphytal orchids there are some

growers who condemn it entirely, while others think it impossible to grow orchids without its use. The Cookson formula is very good. It can be made by mixing three ounces of Potassium nitrate and two ounces of Ammonium phosphate in a three-gallon jar. When feeding orchids use one ounce of this solution, to a gallon of water, but all this feeding must be done with great care or harm will result. Give weak applications of liquid feeding, say at intervals of about ten or twelve days. Dendrobium Phalaenopsis should be suspended in a warm moist house close to the glass. Syringe in the middle of the afternoon and close the house down early enough to cause a moist atmosphere, for most dendrobiums just revel under these conditions. Provide a proper gentle circulation of fresh air, without any cold draughts.

PANSIES FOR WINTER FLOWERING

Now that you have plenty of room in cold frames, a good lot of pansies should be started for next winter's flowering. They can be sown any time within the next two weeks on a well dug and finely made soil. Sow the seeds in drills about four inches apart. When plants are large enough to handle they should be transplanted to stand about nine inches apart each way, if you want good-sized clumps with vigorous bushy crowns and a densely fibered ball of roots that will be ready to plant out in the house in October. Give plenty of water always. The plants should be pinched back frequently.

ROSES CARRIED OVER

Water should be gradually withheld from all plants to be carried over so as to ripen up the wood. They should be well syringed twice a day for a few weeks which will help keep the wood plump while being rested. Roses thus treated will lift well. When you lift your plants look them over carefully and trim out all the weak wood, pruning the good wood back to about a foot. After the plants are set and well firmed down give them a thorough watering. From now on the general routine of work will be syringing which should be done several times daily, ventilating, watering and weeding. Keep the surface of the beds stirred to prevent an accumulation of weeds. Stake and tie as soon as necessary. Give close attention to all their wants whether big or small items, which is generally the secret of success.

SMILAX

In selecting a place for a bed of smilax it should be borne in mind that smilax wants at least 60 degrees of heat in the winter and at least ten feet for head room. They like a heavy turfy loam and good barnyard manure in equal parts. Vigorous plants coming out of either 3 or 4-inch pots make ideal stock. Allow a foot between the rows and about nine inches between the plants in the rows. Don't allow the young trailing shoots to ramble and become twisted before you string them, but run the strings up for the young plants soon after they are planted. Syringe twice a day to prevent red spider and help the plant to sustain itself while developing its foliage. Keep a well ventilated and moist growing temperature. Let the strings be well ripened before you start to cut them.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Asparagus plumosus; Care of Asters; Hydrangeas; Pelargoniums; Stocks for Next Winter; Summer Care of Palms.

CLUBS AND SOCIETIES

THE HORTICULTURAL SOCIETY
OF NEW YORK.

A meeting of the society, accompanied by an exhibition, was held Saturday, June 10th, at the New York Botanical Garden, in Bronx Park. The exhibition, which was held in the basement of the large Museum building, was also open on the following day, Sunday. Prizes were offered for roses, peonies, shrubs and trees, and herbaceous plants. Mr. T. A. Havemeyer made a large exhibit of peonies, irises, and rhododendrons and azaleas. Mrs. F. A. Constable sent a collection of choice peonies and roses. A large collection of roses was staged by Gen. E. A. McAlpin. The display of peonies by the Cottage Gardens Co. was superb.

The next exhibition will occur at the same place, the Museum building of the New York Botanical Garden, on Saturday and Sunday, July 1st and 2d. Prizes will be offered for Japanese irises, outdoor roses, sweet peas, herbaceous plants, shrubs and trees and vegetables. Address all communications to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City, who will be glad to send schedules.

The following are the awards made at the exhibition held on June 10th and 11th:

Three white peonies, 6 flowers of each, T. A. Havemeyer, A. Labodny gardener, first; 3 light pink, 6 flowers of each, T. A. Havemeyer, first; 3 rose, 6 flowers of each, T. A. Havemeyer, first. Collection of single peonies, T. A. Havemeyer, first. General collection, Cottage Gardens Co., first; Mrs. F. A. Constable, Jas. Stuart gardener, second. Hardy roses, Gen. E. A. McAlpin, John Woodcock gardener, first; Mrs. F. A. Constable, second. Flowering shrubs and trees, H. Darlington, P. W. Popp gardener, first. Hardy rhododendrons and azaleas, T. A. Havemeyer, first. Irises, T. A. Havemeyer, first; John Lewis Childs, second. Best orchid plant, C. Moore, J. P. Mossman gardener. Special prizes were awarded to: John Lewis Childs, certificate of merit for Philadelphia Virginia; Bobbink & Atkins, special mention for a collection of herbaceous plants; John Lewis Childs, special mention for a collection of gladioli; Julius Rebers Co., special mention for a collection of cut orchids; T. A. Havemeyer, special mention for a collection of hydrangeas.

GEORGE V. NASH, Secretary.

AMERICAN ASSOCIATION OF NUR-
SERYMEN.

Extract from report of John Hall, Secretary. Presented at St. Louis meeting, June 14.

It is to be regretted that in large organizations of such practical value as this there are annually recurring fluctuations in the membership. Over forty of those whose names were on last year's list failed to renew the current year. Each one of these delinquents has received from the secretary at least two, and, in some cases, more reminders of the importance of renewing. But there is another and a brighter side to the situation. He early began to surmise that there would be a shrinkage, and being somewhat of an optimist is not easily discouraged. Heeding the declaration of Richelieu that "there is no such thing

as fail," he at once entered upon a widespread campaign after new material. This has resulted in our not only making up the loss referred to but of bringing the enrollment for this year to a point over thirty in excess of last year's registration. If members have not already made an analysis of the membership roll with reference to representation by localities we commend such a study as affording considerable food for thought and some interest as well. As an illustration I will mention the states having representation of six or more, viz.:

Colorado,	6	Iowa,	12
Connecticut,	6	Kansas,	21
Illinois,	25	Michigan,	20
Indiana,	15	Missouri,	19
Nebraska,	10	Oklahoma,	6
New Jersey,	8	Oregon,	6
New York,	78	Tennessee,	13
Ohio,	28	Texas,	9

I trust that this reference may awaken a new interest among members, even to the creating of a friendly rivalry to see which state can next year make the largest addition to its present representation.

FINANCIAL STATEMENT.

Dec. 14, 1910, to June 3, 1911.

1910			
Dec. 14.	Balance after closing last year's account.....	\$233.65

		\$2,771.85	

This amount will be added to by unpaid bills and new memberships.

WESTCHESTER AND FAIRFIELD
HORTICULTURAL SOCIETY.

At the regular meeting held in Stamford, Conn., Friday evening, June 9th, 85 members were present. The preliminary schedules for the fall show were distributed. Pres. Stuart appointed a committee of seven to assume charge of the floral display connected with "Wonderland" Fair and Bazaar, to be held in Stamford, June 14-17, for the benefit of the Day Nursery.

The Society will hold its first annual outing and games next month, executive committee to make arrangements and report at July meeting.

Judges' report on exhibits was as follows: Chas. Adcock, lettuce, four varieties; Jas. Stuart, Aquilegia long-spurred hybrids, and Carrillo & Baldwin, Dendrobium thyrsoiflorum, highly commended; A. S. Peterson, Jas. Aitchison, peonies, and P. W. Popp, peonies and Spiraea Queen Alexandra, vote of thanks.

Several new members were introduced and much impressed with our large attendance and fine exhibits. Pres. Stuart spoke of the large number of classes in schedule for fall show and urged the members to secure prizes for same, which without doubt will be the largest and best ever held in this section.

J. B. McARDLE, Sec'y.

AMERICAN PEONY SOCIETY.

The American Peony Society convened at Philadelphia, Pa., on the afternoon of June 8, as briefly recorded in our last week's issue.

Winthrop H. Thurlow, in the absence of A. H. Fewkes, acted as secretary.

Address of President Farr at Opening
of Philadelphia Meeting.

The passing of another year marks the ninth in the history of the American Peony Society, and it is gratifying to see again so many faces that have become familiar from having met them as regular attendants of so many former meetings. This loyalty of the older members, the steady increase in membership of the society, and the interest taken in the present exhibit are encouraging evidences of the continued popularity of the Peony, and of the enthusiasm which still animates the members of its society. Though but a handful in numbers you are to be congratulated on the success which has so far attended your efforts, for the solution of the problem of the Peony nomenclature is such a vast and difficult undertaking that it would not have been surprising had the work ended in failure. That such is not the case is due to the perseverance and determination of the members of the society aided by the efficient support given by the authorities of Cornell University, and the generous contribution of plants from the most prominent growers in this country and in Europe. Small as our membership is, it is doubtful if any similar society has ever conceived, carried out and concluded an operation of this kind on anything like as complete and comprehensive a scale as the Peony test at Cornell.

For the information of those who have not kept fully in touch with the work at Ithaca I will state that there have been two bulletins published in addition to the preliminary check list and a third is now ready for the printer, covering the work accomplished to date. The first bulletin prepared by Dr. J. Elliott Coit contains a history of the Peony, notes on cultivation, etc., and the preliminary work of nomenclature with a description of some fifty varieties. The second bulletin known as No. 278, covers the work of the special committee in 1909, when the principal work of identifying the vast collection in the Cornell plots consisting of 1933 lots under approximately 1600 names, was seriously begun. Descriptions in detail were taken in 235 varieties besides revising the descriptions of the 50 varieties of the previous bulletin which were taken before the plants were mature, and it was found necessary to alter the descriptions in many cases after seeing the mature plants, making altogether 285 varieties, of which descriptions were published up to 1910. In the year 1910, 285 additional varieties were identified and described together with 55 synonyms; also a list of 100 best varieties for cut-flower purposes and 100 best varieties for landscape effects were added, all this to be comprised in the next bulletin soon to be printed, making altogether about 570 varieties that have been described in every detail of foliage, habit of growth, frag-

rance, value commercially, and accurate records taken of the colors as compared with the color chart of the French Chrysanthemum Society which has been adopted as the official color chart of the American Peony Society.

A large number of names appearing in the Cornell plot cannot be traced to any authentic origin and are without, doubt, in most instances, old varieties, re-named. A still larger number were recognized as synonyms of well-known varieties, such kinds as *Eduhis Superba*, *Whitleyii*, *Fragrans*, etc., appearing under as many as 25 to 30 different names each. After eliminating all of these synonyms there are probably not more than four or five hundred distinct varieties in the Cornell plot, excluding Mr. Hollis' collection of upwards of 100 seedlings which have been named, and a collection of seedlings under number from Goos & Koenemann. It will be seen at once therefore how thoroughly this committee has covered this field with the upwards of 600 varieties that have been described—more varieties in fact than are actually to be found at Cornell. This is accounted for from the fact that many well-known, authentic varieties were not included in the Cornell planting, and the committee has supplanted its work at Cornell by visits to other large collections where these additional varieties could be found. Among the places visited by the committee in 1910 were the Peony fields at Wyomissing, Andorra, Cottage Gardens, Geo. E. Hollis, T. C. Thuriow's Sons and E. J. Shaylor. The few varieties still unidentified at Cornell are mostly inferior sorts or those of such obscure origin that identification is practically impossible.

The first collection at Cornell having therefore served its purpose, steps should be taken to bring this portion of the test to a close and to dispose of the plants, which according to the original agreement, belong to the society excepting three of each kind which are to belong to the university for a permanent planting of established varieties. This has already been accomplished for a new planting of three of all varieties described in the original plot have been planted in a new section, and represent the completed work and at the same time the share of the Peonies which are to belong to Cornell.

In addition to the original planting there is another later one consisting of a series of collections from a number of growers of their best varieties for the purpose of determining by comparison the varieties best adapted for commercial use and for landscape work, and of compiling a list of 100 of the best varieties for these purposes. According to agreement these plants are to be eventually returned to their original owners. They have reached full development, and from them the committee has prepared a tentative list of the 100 varieties to be submitted to the society for discussion and approval.

Under the circumstances it would seem as if Ithaca would be the logical place for the society to hold its next business meeting, as by that time the new lots will have reached perfection, and members may then have an opportunity of seeing and judging the completed work of the committee. Whether it would be advisable to hold a com-

petitive exhibition there at the same time or to depend for an exhibit on the flowers from the Cornell plots, is a matter to be considered. A suggestion has been made that it might be well to exhibit in several places next year, selecting points east, west, north and south so that all members might have an opportunity to exhibit at a point easily accessible and within their latitude.

Our experience in Philadelphia this year shows the futility of attempting to arrange a date to accommodate a latitude different from that in which the exhibit is to be held, emphasizing the fact that the show should be held as far as possible to give the best accommodation to the local competitors upon which the exhibit must depend for its best display. The unforeseen and unprecedented weather conditions are largely at fault this year, but the fact remains that the season for our local growers is so nearly over that it is difficult for them to show any but their latest varieties. That we are able to have so good a display is due to the energy and enthusiasm of exhibitors from a distance to whom we are greatly indebted for their contribution to the success of this exhibition.

Regarding the future work of the society much remains to be accomplished. There are still many varieties that are well known and in commerce especially among the later introductions that it is desirable to add to our official list. The committee is still engaged in this work which must be done by individual effort in the various collections. This work is comparatively easy, being merely to have the opportunity of seeing and describing these remaining varieties which, being of later origin are not difficult to identify, and we are assisted in the remaining part of the work by the long list of varieties we now have which serve as a key for comparison and make the remaining work comparatively easy.

The next great work which the society, in my opinion, should bend its efforts toward is the publishing of a Peony manual which should be the final revision of all the work heretofore accomplished, and which should stand as the official manual or catalog of the American Peony Society. The publishing of this work should, in my opinion, be done by the society, and when completed can be made a valuable work that will find a ready sale, which will eventually repay the cost of publication. The cost of such a work will be considerable, and should not be undertaken until the present work has withstood the test of criticism and all corrections made that are possible, and until the finances of the society are in a condition to carry out the project.

It was with some such thought in mind that a number of the members in going over the matter, volunteered to make contributions toward the premium list this year which would save to some extent the depletion of the treasury of the society, that has necessarily followed each year the offering of a long premium list by the society, and which had to be made up from the small income derived from the annual dues of its few members. When this matter was mentioned to others a very generous response was made, and the society has reason to feel grateful to

those who have so generously assisted in raising the premium fund this year, as by so doing they have helped in a great way toward the fulfilment of the ultimate end in view.

Report of the Secretary, 1911.

The present membership of the society is sixty-two, not including five honorary members.

Once more we are called upon to record the death of a charter member, George Hollis, of South Weymouth, Mass. He had been in feeble health during the past year, his death occurring in April. He was a quiet, genial gentleman, a great lover of flowers, and had for many years made a specialty of the peony, raising many seedlings, a number of which, when better known, will rank among the most choice varieties. One of his latest productions was the variety "Loveliness", and it is all its name implies. In his death the society loses a member whose interest in the peony was not due to mercenary or entirely to commercial motives, but rather to a true love for the flower and a wish to make its beauties more widely appreciated.

It is gratifying to note the increased interest that is being taken by the amateurs in our society, as is indicated by their applications for membership, and it behooves the commercial element among our members to take cognizance of this fact, for it is largely upon the amateur that the dealer in peonies must depend in future for his best trade. This is one of the factors which should be taken into consideration in the framing of the future policy of the society. The utmost encouragement possible should be extended to the man who grows the peony from a pure love for the flower and admiration of its many varieties; the man who makes them his hobby, as distinguished from the man who grows them because some particular variety in quantity makes a big mass of color in some particular spot in his garden.

The exhibition last June, in connection with the Boston meeting, was a very creditable one, considering the peculiarities of the season. There were several large and fine displays by growers about Boston, but all the competition for the prizes was by growers outside of the state.

A. H. FEWKES, Secretary.

Report of Committee on Nomenclature.

The peony plantation is now almost in full bloom; although it was two weeks late at the middle of April, it is now ten days ahead of time, owing to the excessively dry and hot weather, which visited this region in common with the whole northeastern country during the latter part of May. I may add that, the result of last year's studies made by Mr. Farr, Mr. Dauphin and Mr. Batchelor, have been compiled by Mr. Batchelor, and are now ready for the printer. Our printing establishment is rather congested at the present time with the bulletin-matter from various departments, and it will be quite impossible to get the bulletin out to be of any service the present season. The reprint of Bulletin 278, made possible by the generosity of a peony lover and enthusiast of New York, is now available for dis-

tribution, and I trust will be made use of by all persons interested in peony culture. This bulletin is only sent outside of the State to members of the Peony Society and to officers of the State Experiment stations interested in horticulture.

Wishing you a very successful meeting, and assuring you and the members of the Society of our desire to co-operate in the fullest manner possible in your good work, believe me.

Yours sincerely,

JOHN CRAIG,

Comm. on Nomenclature.
Cornell University.

A letter was read from Secretary Fewkes enclosing his resignation from that office. Mr. Brown voiced the regrets of the Society in losing a secretary who, since its organization, has filled the office faithfully and efficiently. He moved and it was voted that the resignation be accepted with regret. The following officers were elected: President, B. H. Farr, Reading, Pa.; vice-president, C. J. Maloy, Rochester, N. Y.; secretary, A. P. Saunders, Clinton, N. Y.; treasurer, J. H. Humphreys, Chestnut Hill, Phila.; director for three years, E. A. Reeves, Cleveland, Ohio.

The following question was read for discussion: "What shall be considered the proper size of a plant for the retail trade?" An interesting discussion ensued and it seemed to be the opinion of those present that a "three to five eye" or wholesale division should be grown a year to make a strong plant for retail.

On the question "At what stage should a peony blossom be cut to get the best results as a cut flower?" there was also considerable discussion. It was generally considered that a bud should be cut just as it was breaking into the bloom, but Pres. Farr remarked that some varieties such as Madame Lebon should be left on the plant a little longer. Mr. Brown thought this question would be a valuable one to discuss at the next meeting. The cut flower business in peonies is increasing every year.

The Exhibition.

The vestibule of the hall was occupied by the splendid exhibit of the Andorra Nurseries. This firm, E. A. Reeves, and Bertrand H. Farr, were the stars of the show and reaped a rich reward in glory and orders. Cornell University sent a nice collection of well-grown blooms, which were much admired. Jno. Lewis Childs exhibited some fine gladioli of the new and choice sorts like Europa and Sulphur Queen, also two vases of Calla Elliottiana—very well-finished flowers.

The Meehan prizes for best paintings of peonies were awarded to the exhibits of Miss Elizabeth Chase Burt and Helen K. McCarthy. We are not artists, but of all the rank decisions of a committee—as Gordon Smirl used to say when he got the worst of it on 'mums, "sich jedging!" There were twenty-five entries.

W. W. Harrison, Glenside, Pa., exhibited a collection of out-door grown roses (not for competition).

Henry A. Dreer exhibited a fine collection of hardy roses, embracing some fifty varieties of the most popu-

lar favorites of the day. This proved a great attraction to the show. Hoopes, Bro. & Thomas, on the second day, sent in a fine exhibit of their new climbing roses. These proved a centre of interest. James Farrell their foreman, who is recognized as a leading hybridizer—and worthy of being classed with Dawson, Walsh and other pioneers in the rose world—stated that he considered their "Purity" climber to be one of the best things they had got yet. This will not be sent out until next year. Their Christine Wright is already on the market. Seedling No. 36 looks very much like an improved American Pillar. Their seedling No. 46 is a great improvement on the original White Rambler—flowers three times the size and borne in the greatest profusion. Columbia is very delicate in its coloring and beautiful in the bud. No. 65 is three times the size of Crimson Rambler, and will give even more bloom than that remarkable variety. All the sorts mentioned from Hoopes are the work of Mr. Farrell.

Peony Awards.

Collection of named varieties: Cottage Gardens, first; B. H. Farr, second.

Fifty blooms white, George H. Peterson, first; E. A. Reeves, second.

Fifty dark pink, E. A. Reeves Cottage Gardens Co.

Fifty salmon, S. G. Harris, Tarrytown, N. Y.

Fifty crimson, Cottage Gardens, E. A. Reeves.

Twelve varieties, F. B. Van Voorst.

Twenty-five pink, E. A. Reeves.

Twelve pink, S. G. Harris.

Rose Awards.

Twelve hybrid tea, Miss Gertrude Ely.

Eighteen remontant, W. W. Frazier.

The judges were J. H. Humphreys, Chestnut Hill, Philadelphia, Pa., W. W. Kline, Sinking Spring, Pa., and W. H. Thurlow, West Newbury, Mass.

It was voted that the next meeting be held at Ithaca, N. Y., and a committee was appointed to consider the advisability of holding auxiliary meetings in different localities. Resolutions were passed on the death of George H. Hollis of South Weymouth, Mass., also thanks for the hospitalities shown by the Pennsylvania Horticultural Society.

MASSACHUSETTS HORTICULTURAL SOCIETY.

At the Rhododendron Exhibition on June 10-11, 1911, the following awards were made for plants and flowers:

Orchids—Display of 25 plants arranged for effect with foliage plants: 1st, J. T. Butterworth; 2d, Mrs. J. L. Gardner, 3d, J. T. Butterworth.

Gold Medal—E. J. Shaylor, collection of peonies.

Silver Medals—R. & J. Farquhar & Co., display of peonies, iris and other plants; Walter Hutton, Calla, Cattleya, Wellesiana.

Bronze Medal J. T. Butterworth, specimen *Miltoia vexillaria*.

First Class Certificate of Merit—F. J. Rea, new aster, *Amellus Beaute Parfait*; Langwater Gardens seedling, *Cattleya Lodigesii* x *Laelia purpurata* alba.

Cultural Certificate—J. T. Butterworth, specimen *Cattleya Mendelii* Morganiana.

Honorable Mention, Milton Lockwood, new hybrid peony, *L'Esperance*; R. & J. Farquhar, display of tree peonies; R. & J. Farquhar, iris pallida.

Vote of Thanks—Walter Hunnewell, display of rhododendrons; Mrs. D. S. Greenough, hybrid columbines.

Gratuities—Mrs. J. L. Gardner, display of rhododendrons; T. C. Thurlow & Sons Co., peonies; Wm. Whitman, peonies; Mrs. J. L. Gardner, peonies; Harvard Botanic Garden, water lilies; J. T. Butterworth, orchids; Wm. Whitman, palms and Canterbury bells; Mrs. E. M. Gill, cut flowers.

NEW YORK FLORISTS' CLUB.

The meeting of the New York Club on Monday evening, June 12, was a good one, full of animation. The three essayists were all on hand and read their papers—John G. Esler on Hail Insurance, Robert MacNiff on The Auction Business, and L. W. C. Tutbill on Advertising, the latter bringing out quite a lively discussion and general approval of the views expressed.

There were numerous committee reports. Resolutions of condolence on death of John H. Taylor were presented by W. F. Sheridan. Frank Traendly reported for the transportation committee recommending the "certificate plan" to the Baltimore Convention and it was voted that the members go in a body on Monday afternoon, August 14.

Among the exhibits shown was a *Cybotium* species from R. G. Wilson which the committee were not able to name and asked for further time. The same exhibitor showed also a new blush sweet pea. John Lewis Childs made a fine display, including gladioli, dwarf calla "Mrs. Roosevelt," and calla "Elliottiana," peonies La Coquette, Mme. de Galhan, Floral Treasure, Susie Mallard, Felix Crousse and Couronne d'Or. Cottage Gardens Company showed a fine collection of peonies.

Committees were appointed as follows: On death of daughter of Charles Schenck, Messrs. H. A. Bunyard, C. H. Totty and Robert Simpson. On the death of Chas. Armitage, Messrs. F. H. Traendly, H. A. Bunyard and J. Austin Shaw.

NEW JERSEY FLORICULTURAL SOCIETY.

The "Rose Night" of the Society was held Friday evening, June 9th, at Orange. There were not so many rose exhibitors as usual but the exhibits staged were excellent. S. M. & A. Colgate, Wm. Reid, gard., won the special prize for the best display. In the exhibits for points the orchid display was exceedingly fine. Cologynne Dayana by Lager & Hurrell, received 99 points. Thomas Jones showed a *Cattleya gigas* with 42 flowers which received 99 points. Joseph A. Manda had a fine *Oncidium rubes* for which he received 95 points. Cultural certificates were given to C. W. Ashmead for roses, Max Schneider for strawberries and Lager & Hurrell for *Dendrobium suavisima*. Certificates of merit to C. W. Ashmead for strawberries and Lager & Hurrell for *Brassavola Digbyana*. The judges were Malcolm MacRorie, John Hayes and John Deravan.

The Society will have an intermission during July and August. Dederick Kindsgrab will act as president for the rest of the term.

ST. LOUIS FLORIST CLUB.

The club held its 25th anniversary meeting on Thursday afternoon, June 8. According to Secretary Beneke the meeting was the best attended of the year. President Connon and all the other officers were present. Chairman Guy of the trustees reported that the invitations for the 25th anniversary banquet on June 28 had been mailed and that all arrangements are completed for this great event. The trus-

tees were instructed to arrange for the annual picnic to take place July 20. Chairman D. E. Weber of the Bulletin Committee called for more co-operation and made quite an interesting talk. Frank H. Weber, chairman of the Entertainment Committee for the Nurserymen's convention, made an interesting report. Henry Emmidt of Belleville, Ill., showed a sport of Cana King Humbert which was red on one side and green on the other, producing both yellow and red blooms on the same plant. On July 13 the nomination of officers takes place.

PARK SUPERINTENDENTS AT NEW HAVEN.

The Eastern Branch of the Association of Park Superintendents had a meeting and outing as guests of Superintendent Amrhyn at New Haven, Conn., on Saturday, June 10. Most of the day was devoted to sight seeing and social enjoyment. Headquarters were at the Tontine Hotel, but dinner was served at the Farm at East Rock in picnic style and greatly enjoyed. The visitors were conveyed by autos all through the various parks and the ascent of East Rock was made on foot and in carriage. A stop was made at the grounds of the Elm City Nursery Co. Among the visitors was Christopher Clark, 84 years old, the "grand old man" of Northampton, Mass., who extended an invitation to the Branch to hold its next meeting in Northampton in September. The invitation was unanimously accepted.

New Haven has a grand park system in which the two picturesque rocky eminences, East Rock and West Rock, 500 feet high, form a unique feature, and Mr. Amrhyn has carefully preserved all the natural attractions.

POSTAL EXPRESS FEDERATION.

At the Parcels Post Conference, New Willard Hotel, Washington, D. C., April 25-26, the committee on permanent organization presented the following resolutions which were adopted:

Resolved, That an organization be perfected to be known as the Postal Express Federation, to be composed of all persons, corporations and associations interested in the establishment of means whereby the Government of the United States shall, through its postal service, carry parcels and packages at reasonable rates.

And be it resolved, That a temporary Executive Committee of five be elected at this meeting, with power to appoint sub-committees to represent the several States and Territories of the United States of America, and to perfect a suitable organization for the end desired.

The following executive committee was then appointed: William T. Creasy, Catawissa, Pa.; F. F. Ingram, Detroit, Mich.; George J. Kindel, Denver, Colo.; F. W. Burkart, Buffalo, N. Y.; George P. Hampton, New York, N. Y., chairman.

Bills have been introduced in Congress embodying the recommendations of the conference. All friends should write their Congressmen at once, to use their influence in favor of immediate action along the lines recommended by the Postal Express Federation, and as set forth in the Sulzer bill, H. R. 9844, and Howard bill, H. R. 8386.

All associations, corporations, firms and individuals favoring a modern parcels post are urged to send in their names at once to George P. Hampton, 53 Bliss building, Washington, D. C.

NATIONAL SWEET PEA SOCIETY.

Owing to the slow development of the growth of sweet peas this season, the society has decided to advance the date for annual exhibition at Philadelphia to June 29-30. Schedules are being mailed to members, and can be had upon application to David Rust, Horticultural Hall, Philadelphia, or to the secretary, Harry A. Bunyard, 342 West 14th street, New York City.

H. A. Bunyard, George Kerr, M. C. Ebel, George C. Watson and others were the guests of W. Atlee Burpee at dinner at Dooner's on the 8th inst. The Sweet Pea Society's affairs were talked over and programs and policies for the good of the society were given a good forward boost. Mr. Burpee has made an earnest effort to arrange his international engagements so as to be present in person.

CLUB AND SOCIETY NOTES.

The Milwaukee Florists' Club met at the Hotel Blain on the evening of June 1. There were several talks, following which the members enjoyed a dinner. About seventy-five attended.

Arrangements have been made by the Albany Florists' Club for a family clambake to be held late in August. Frederick Goldring has invited the club to meet at his place, Font Grove, Slingerlands, on the evening of July 6.

The annual picnic of the Gardeners' and Florists' Club of Boston, has been arranged for July 26th, and is to be held at Caledonian Grove, West Roxbury. Ladies' Night will be observed with due ceremonials next Tuesday evening.

The St. Louis Ladies' Home Circle held a day's outing at O'Fallon Park on June 12. Miss Matilda Meinhardt, secretary and treasurer of the Circle, is traveling in Europe this summer and Mrs. Steidel, president, has taken up her duties. They will have several of these out-door meetings this summer.

The regular monthly meeting of the Cincinnati Florists' Society was held in Jabez Elliott Flower Market, Monday, June 12. The following members were nominated for office to be balloted upon at the annual meeting to be held July 10: For president, C. E. Critchell and Gus Adrian; vice-president, Wm. Murphy and Ray Murphy; treasurer, E. A. Foster; secretary, A. Ostendarp; directors, Herbert Green-smith and Al. Heckman, Jr.

SUMMER SCHOOL AT CORNELL.

Announcement is made of the first opening of the Summer School in Agriculture of the New York State College of Agriculture, Cornell University, July 6—August 16, 1911. A copy of the calendar, with rules for admission, fees, courses of instruction, lectures, excursions, etc., may be had on application to Albert Russell Mann, Secretary to the College of Agriculture.

J. F. Rosenfield, who has a ten-acre field at West Point, Neb., has announced that this will be his last year in peony culture in Cuming County. He has bought a forty-acre tract of land near Omaha, upon which he and his son, Reno, have planted 55,000 peonies.

Obituary

Mrs. J. M. Charlton.

Mrs. J. M. Charlton, wife of J. M. Charlton, of John Charlton & Sons, nurserymen, Rochester, N. Y., died May 27.

John Jorden.

John Jorden died at his home, Geneva, N. Y., on May 28, aged 73 years. Mr. Jorden was for many years a nurseryman and had resided in Geneva since he was three years of age. About 15 years ago he retired. He leaves one sister and one brother.

John Flanagan.

John Flanagan, landscape gardener, died at the home of his daughter in Berkeley, Calif., on June 1, aged 85 years. He retired from business about five years ago. He spent over forty years in Cambridge, Mass., before going to California.

Otto Kaiser.

Otto Kaiser, a local florist at Jarrett Town, a suburb of Philadelphia, died on the 9th, aged 78. Mr. Kaiser grew a general collection of plants and did a local business only and in a limited way, consequently he was almost unknown except to a few of the trade of the present generation.

NEWS NOTES.

Woodstock, Conn.—F. H. Miller has installed a thousand gallon compressed air tank to supply water for his greenhouse.

Grand Rapids, Mich.—Plants covering a space of 2 acres and totaling 32,000, represent the tomato business of the Grand Rapids Greenhouse Company. Forty bushels are being picked and shipped daily, and are competing favorably with the Texas and other southern tomatoes at present on the market.

Waltham, Mass.—A deer was grazing peacefully in the outskirts of Waltham (Allan Peirce's bailiwick) yesterday afternoon when another deer came along. She was not only in the outskirts of Waltham, but also in a hobble skirt.

It was too much for the deer. He apparently went violently insane and dashed through Main street with an ever increasing crowd giving chase. Doubtless believing the deer in the hobble skirt was close upon him, the deer stopped when opposite the greenhouse of James Silman and, with a groan of despair, leaped through the glass roof.

When the deer was extricated, he was badly cut, and his right foreleg broken.

He was taken to the city stables, where City Veterinary W. E. Peterson tried to save his life, but without success. The deer caused a damage of \$200 in the greenhouse.

There was an unconfirmed rumor last night that the S. P. C. A. officials were undecided whether to attempt to have hobble skirts abolished or put blinders on the unprotected and unsophisticated wild animals.—*Boston Journal.*

A TALK ON ADVERTISING.

L. W. C. Tuthill Before the New York Florists' Club.

Your good committeeman, Shaw, is to blame for this! Honest Injun, I am guiltless. Take it out on him, and jolly me along; for Ad. men are a thin-skinned, sensitive lot; their business makes them so; they have to tell the truth; that is, if they want to stay in business.

Three years ago a boiler man blew into our office and said he had some money to spend, telling the good, dear public that his boiler was the best on earth—a world beater—a nine-day wonder, and all that sort of bombast. After a couple of hours' talk we told him we would take his account under one condition; and that was, that he send, at his own expense, one of his wonder boilers to my home in the country, and install it. Then I would give it a month test of every conceivable kind. If the boiler panned out as he claimed, we would frame up the Ads. accordingly. If it didn't, we would tell exactly what it would do—and no more. Did he stand for it? He certainly did not. Why? Because he knew his boiler would not stand up to his extravagant claims. And he knew we knew it. Still he thought his exaggerations on paper would sell his boiler. He thought that was what one was licensed to do in an Ad. He went to another agency and placed the business with them. For two years they have been running "hot air" Ads. of the most virulent type. Yesterday, that same man walked into the office and said his company is now ready to do business with us, based on our original proposal. The "Hot Air" hadn't paid.

This incident illustrates in a nutshell, the advertising situation of today. Exaggeration must go. The truth, only, pays.

Last week I was standing on the corner of 28th street, talking to one of your prosperous commission men, when one of the "has beens" passed along. I remarked: Brown isn't the man he used to be, is he?

To which our friend replied—"No, and he never was." Advertising—real advertising—never was anything but telling the truth. It never was a mystic something, into the hopper of which we could pour a few plugged dollars, and get a bag of golden coins at the other end. It never was a gamble. It never was one of the necessary evils that the publishers' fiends incarnate schemed up to harass business men and entrap their hard-earned coin. But it is the biggest, strongest factor in business today. Next to money—it is the most essential. Science records things; but advertising makes things live.

Elbert Hubbard, in one of his recent preachments on the Red Blood in advertising, says:

"The reputation that endures, or the institution that lasts, is the one that is properly advertised. But of all Ambassadors of Advertising and Bosses of Press Bureauism none equals Moses, who lived fifteen centuries before Christ. Moses wrote the first five books of the Bible, and this account includes a record of the author's romantic birth and of his serene and dignified death. Moses is the central figure in the whole write-up. Egyptian history makes not a single mention of Moses or the Exodus, and no record is found of the flight from Egypt save what Moses wrote. At best it was only a few hundred people who hiked, but

the account makes the whole thing seem colossal and magnificent. And best of all, the high standard set has been an inspiration to millions to live up to. What turned the trick? I'll tell you—the writings of Moses, and nothing else. So able, convincing, direct and inclusive were the claims of Moses that the world, absolutely, was won by them. In the Mosaic code was enough of the saving salt of common sense to keep it alive. So it lived and keeps on living. All literature is advertising, and all genuine advertising is literature."

And Hubbard ought to know, for he doubtless does more successful advertising, both personal and otherwise, than any one man in the country.

The peculiar thing about advertising is that pretty much everyone thinks he knows just how it ought to be done. If you and I were to start in the business of growing roses; the first thing we would do would be to get a good foreman—a man who thoroughly understood roses and how to grow them. If we want an automobile we don't go to a blacksmith; but if we want to do some advertising, then that's different—we can do that ourselves. That's easy! Or, we ask some friend who is free with his pen, to get up something snappy. What happens? In the first place the man who owns a business is generally so near his business that he can't see it. He has lost the sense of how the other fellow—the fellow he wants to land—looks at his proposition from the outside. So he starts off his wonderful Ad. with the usual extravagant claims, and says:

"My rose is the only rose for you to grow this season. It has 49 petals to every bloom, against 42 3-16 of its nearest competitor. Get in line. First come, first served. Don't delay! Send your order today. If they are good enough for John Birnie, they are good enough for you. Greatest money maker of the season. Order now!"

Now every word of that Ad. is true. But what selling power has it? What actual reasons has he given why you should let loose your good money for his blooming old rose? Suppose he had told a frank story, just as he would if talking directly to a customer; suppose he had said:

"Last season it was plain to be seen that the public had grown tired of pink roses, and wanted yellows. That's why I am so happy—I have a yellow that's going to be a winner—and it's a Killarney, too. It's an unusually free bloomer—has long stems and a deep, rich green foliage. Its silken sheened petals glow like gold. Its buds are big, solid, dependable ones that ship splendidly and stay half open for a surprisingly long time. Remember that last point—it's a thing your commission man is always howling for. I am going to sell 150,000 of my stock of 250,000 cuttings. How many do you want? Better step lively—you know that a new Killarney always goes like wild-fire."

Such an Ad. actually tells something about the rose—its qualities—its superior points—it has *some selling power*. In your opinion, which Ad. gets the business?

On the other hand, your friend with the easy pen, writes the Ad. and feels that it is of first importance to make it funny. He says: "That is the thing that attracts the public." So you stand for a joke of the vintage of 1812, and then lug in by the nape of the neck your little business story. The result?

The funny story seldom is *funny*—in advertising. Everybody knows you get red in the face to bring it in—and the Ad. instead of being a good, serious, earnest, business appeal to men in business houses—is more apt to be smiled at over the cheese sandwich

and beer. Hit a business man at his business in a business way. That's the way!

When you buy space of your good friends, Faxon, Shaw, Stewart and Butterfield, for heaven's sake, don't fill it as full as you can with text. If your space is small, better tell one thing—and tell it well, and leave plenty of white space around the text. The white space sets it off. Makes it look interesting. For example: Three or four roses in a vase, is a beautiful sight—each rose presents its individuality—its grace. A vase crowded full is just a vase of roses—one, grand big bunch. A mass that neither attracts nor impresses.

Some day, advertising will be reduced to an exact science. With a certain given expenditure it will be safe to figure on certain results. When that day comes we will know what advertising really is. Authorities differ now. Which reminds me of my somewhat irreverent, but precocious little niece who was one day sitting by the window drawing, and drawing on sheet after sheet of paper; when finally her grandmother, somewhat impatiently, said: "Why Tuddie, what are you doing?" Tuddie slowly replied: "Making a picture of God." Grandmother, very much shocked, said: "Why that's very, very naughty—no one makes pictures of God—no one knows how God looks." A long pause and more scratching of pencil. Finally, Tuddie replied: "Well, they'll know how he looks when I get this done."

PERSONAL.

Chas. L. Seybold and F. Bauer, of Baltimore, sailed for Europe on June 12, to be absent about six weeks.

L. W. C. Tuthill, of the Tuthill Ad. Agency, New York, fell from a motor cycle and sprained his ankle, so that he has to go about on crutches for a time.

Frank Drews, head gardener for Thos. Edison, Llewellyn Park, Orange, N. J., resigned on June 1 to take charge at the Essex County Country Club, West Orange, N. J.

George M. Stumpp of New York sailed for his customary annual visit to his old home in Germany, on the Kaiser Wilhelm II, on Tuesday, June 13. He was accompanied by W. H. Siebrecht of Astoria.

Mr. and Mrs. T. Benjamin George will give a reception on Wednesday, June 21st, at their residence in Hyde Park, Cincinnati, O., in honor of their daughter Bessie who was secretly married to Mr. Alanson A. Knowles about six months ago.

W. Taat, representative of M. Van Waveren & Son, Hillegom, Holland, met with a painful accident in the Boston subway last week. He has been in feeble health for some time, and stumbled in front of an incoming train and his foot was cut off at the instep. At the hospital, to which he was taken, it was found that amputation at the ankle was necessary. Otherwise Mr. Taat is progressing favorably, and will be able to leave the hospital in about three weeks. He represents one of the largest and most reputable houses in Holland.

SOUTH AMERICAN FLORICULTURE.

A paper read before the N. Y. Florists' Club by J. McHutchison.

The title "South American Floriculture" is a misnomer. There isn't much floriculture in countries where orchids hang from every large tree, in the forest, every small garden contains a hot-house assortment of plants and the most magnificent palms and flowering plants line the streets of every city. You get enough of floriculture during the week. Tonight you can forget you are florists and come with me through a few South American countries.

The trip I took was a 10-weeks' cruise in the Hamburg-American Line steamer *Blucher*. There were 214 of us in the party—mostly widows and bachelors—and they had about every convenience on board except a matrimonial agency. January 21st, the day we left New York, was an unhappy mixture of fog, rain and cold. Three days later overcoats were discarded, light clothes brought out and we were looking over the rail at the flying fishes.

Six days after leaving New York we were in Barbadoes, called sometimes "Little England," in British West Indies. We had been passing the Caribbean Islands the whole day previously, though it was too dark to see Martinique where Mt. Pelee destroyed the city of St. Pierre and did so much damage a few years ago. Barbadoes is beautiful. Ninety per cent of the people are black. It is the most densely populated place on earth—200,000 inhabitants in an area of 166 square miles. We drove through avenues lined with cocoanut palms and mahogany trees with the flaming Hibiscus, blue Plumbago and Bougainvillea brightening up the roadside gardens. The principal products are sugar cane, cotton, tobacco and so forth.

We crossed the equator on January 31st with appropriate ceremonies. The ship's crew were dressed up in fanciful costumes and the men passengers and crew who had not crossed the line before, were lathered with a white-wash brush, shaved with a two-foot razor, imaginary teeth were pulled and salt water pills given to them; they were then smothered with toilet powder, and, thrown over backwards into a 5-foot salt-water tank, he finally escapes through a canvas tube with a two-inch stream of water on his rear to facilitate his passage.

Pernambuco is an ordinary Brazilian city with a population of 200,000. It exports sugar principally. It has a busy harbor inside the coral reef that lines the Brazilian coast for hundreds of miles.

February 2nd we were at Santos, a port with vast shipping activities. Brazil furnishes about 80 per cent of the world's coffee supply and most of this is shipped from Santos by German and English firms. It used to be the most unhealthy city imaginable. Across the river from Santos on the flats at one time lay over 100 good ships, their crews dead and no other sailors would run the risk of taking them out. This place was called "the graveyard." Men died there of fevers like flies. Now all is changed. The graveyard has been destroyed, the fevers have gone, and the city is now

as healthy as the other Brazilian cities.

From Santos we went to San Pauli. How many North Americans ever heard of San Pauli? Yet it is the cradle of Brazilian independence and the most modern city in Brazil, with a population of 400,000, with broad tree-lined avenues, monumental public buildings and handsome residences. Their open trolley cars were made from St. Louis models. The avenues are in most instances lined with coffee trees, the Australian silky oak and the beautiful Jacaranda mimosa-folia which grows with us in southern California. The municipal opera house there is a beautiful building—built and owned by the city. It cost about 8,000,000 United States dollars and is, I think, finer than the famous Paris opera house.

I ought not to pass here without mentioning the San Pauli R. R., which covers the sixty miles between Santos and San Pauli, climbing 3600 feet up the face of the mountains. I never saw a railroad like it. It is mostly tunnels and viaducts and there isn't a square foot that is not waterproofed and that is something when you consider that the average rainfall is 11 feet per year and 10 inches of water has fallen within 24 hours. The railroad was built and is owned by the British and English rolling stock is used. Its profits are over 40 per cent a year, but Brazilian laws prevent more than 7 per cent. being paid in dividends, so all surplus goes into unnecessarily fine stations and improvements.

We reached Montevideo, the capital of Uruguay, in the teeth of a pampas storm, but that soon went down and we visited Villa Delores, a large private zoo, and drove through the many beautiful parks and boulevards largely planted with Eucalyptus and other Australian trees. We were there two days and there was not a single revolution recorded during that time, though one cropped up a few days later.

Now we enter the Straits of Magellan and after staying a day at Punta Arenas, the southernmost town in the world, we continue through the straits, going out of our course to get into the sounds, the glaciers and fjords rivaling those of Norway and Alaska. In one place where we anchored five glaciers were within two miles of us and coming to the water's edge, the blue ice glistening in the sun. The channel is about 400 miles long, very narrow and dangerous in places for we saw many wrecks on the banks, the mountains on either side often lined with snow, but we have to keep hustling to get up the west coast as far as Valparaiso.

This is a cosmopolitan city and the principal seaport of Chile. Its population increased 100 per cent within the last two years while New York gained only 48 per cent. There are still some evidences of the earthquake that visited them a few years ago. Chile is called the shoe-string republic, because it has coast line of 2600 miles and an average width of only 150 miles. Santiago is its capital city. Like all South American cities, it is made as a fit place to live in. Too bad our cities are not built on the same principle. In Santiago and Valparaiso the street car conductors are

mostly women. Santiago is built on a plain, surrounded by mountains. Right in the center of the city is a rocky mountain called Santa Lucia. It has been landscaped and beautified with statues and hanging gardens. From the top at sunset, we get a fine view of the pinnacled snowclad peaks of the Andes with the sun shining on them after the city is in darkness. It has not rained in Chile for two years, though the Aconcagua Valley beats anything I ever saw for productiveness, not even excepting the Compagna in Italy.

The famous Trans-Andean railroad is a marvel of constructive engineering. It runs from Valparaiso, Chile, to Buenos Ayres and we crossed it from end to end. Its mountain scenery is grand and we pass at the feet of Mt. Aconcagua, 23,200 feet, which makes it the highest mountain in the western hemisphere. Still, I do not think that the scenery from the train is any finer than in many parts of Switzerland or over the Canadian Rockies on the C. P. R. R.

By going under the central peaks of the Andes in the tunnel, we pass under the boundary line between Chile and the Argentine. You will remember that a few years ago these two countries were on the verge of war, but a settlement was reached by King Edward's arbitration. The two countries then built a monumental statue of Christ, "The Christ of the Andes," and placed it in the pass, right on the boundary line amid the everlasting snows and on the tablet is this beautiful inscription: "Sooner shall these mountains crumble into dust than the people of Argentine and Chile break the peace which they have sworn to maintain at the feet of Christ the Redeemer," and let me tell you, gentlemen, that those two nations will never fight while that statue stands there.

It takes from daylight to dark to cross the Andes from Los Andes to Mendoza, which is all made on narrow gauge, then all night and all the next day we cross the pampas of the Argentine as level as a billiard table and not a hill in sight for 600 miles and very few trees, but there are cattle, horses, sheep and ostriches on both sides of the track and thousands of scarlet flamingoes in the water. I never saw so many cattle before. In one place the track runs along for 175 miles without a curve. What a contrast after crossing the Andes!

Buenos Ayres, meaning "Good Airs," is a modern city of 1,400,000 people. In beautiful parks, boulevards and plazas it surpasses either Paris or Berlin. The climate is warm and pleasant and in the afternoons the business men drive through the beautiful gardens and boulevards in Spanish style, for the language and life of the people is Spanish. It would take me an hour to tell you much about this fine city. Its avenues, plazas, and boulevards are not duplicated in the United States. Their capitol building is finer than ours in Washington. Their custom house is finer than our New York one. We went through the famous newspaper office, *La Prensa*. In the parks they have whole avenues lined with 40-foot palms. I saw specimens of *Phoenix canariensis* as high and broad as a five-story building and furnished to

the ground. Everything has the appearance of newness in their bright sunshine. Even their famous Avenue Mayo is only four years old, lined with buildings of uniform height and architecture. Their four miles of splendid docks have been reclaimed from the Rio de la Plata and are always filled with numbers of large steamers flying the flag of every maritime nation—except the Stars and Stripes.

On March 11th we arose at 6 a. m. to see the entrance of Rio de Janeiro harbor. Huge granite rocks, one of them called the sugarloaf, guard the entrance on either side like sentinels, the city lining the various bays on the left. The entrance is so narrow that its discoverer called it the "River of January," but it widens out to a very large bay, dotted with beautiful islands. Nature seems to have exhausted its resources in making this harbor and the Brazilians have followed suit by making their capital city worthy of its harbor. There are avenues lined with four rows of royal palms 80 feet high and the five miles of gardens and boulevards along the half-moon shaped Botofoga Bay cost them 40,000,000 American dollars and every dollar counts. From Corcovada—a 2300-foot rock with a perpendicular drop of 1500 feet—you look right down upon this city of 900,000 people spreading itself out among the valleys and slopes of the mountains. All ships anchor in the bay, for these artistic people want their water front for gardens and pleasure.

We read in our papers here about six months ago of the naval mutiny at Rio. Well it was the real thing. Most of the naval buildings are on Cobras Island and they are still standing, riddled with shell holes. The men who mutinied on the warships bombarded these buildings, then surrendered and the men in the barracks, not knowing it, then revolted and the new dreadnoughts trained their 12-inch guns on the island and nearly blew it off the map. It impressed us as showing what these people thought of their city that neither the mutineers nor the government fired a shot at the city itself. The battleships lay there still but the breachlocks of the guns have been removed, they are only half-manned, and while these dreadnoughts, the San Pauli and Minas Ceraes, are about the largest and most modern afloat, they could not even answer our salute.

The Botanical Gardens of Rio are famed the world over and rightly so, too. I spent nearly a whole day there. One avenue of royal palms dividing the gardens is half a mile long. There are avenues 20 ft. wide so embowered with bamboos that not sufficient light gets into them to take a photograph. Other avenues are lined with *Areca lutescens* and all kind of tropical plants, for there are over 800 varieties there. What beautiful places these South Americans have to spend afternoons or Sundays in with their children! Most of the consulates are at Petropolis, about 40 miles up in the mountains from Rio. The U. S. Consulate there is almost as good a building as the Portuguese, which is more than can be said of some places. We stayed only a short time at Bahia. There is an upper and lower city. It is the diamond market of Brazil but

we want to push on to Para, 105 miles up one of the tributaries of the mighty Amazon.

Para is the principal port for rubber and other products of the vast country watered by the Amazon and its tributaries. Here we see tropical vegetation in all its luxuriance. I dug up gorgeous colored caladiums growing between the trolley tracks. Bananas grow wild everywhere. Anything will grow there. In Para I saw trees 7 to 8 feet high growing out of a church spire. A house with a thatched roof collects dried leaves and in a few months there are trees growing on the roof. In the botanical gardens in Para we saw the trees which produce the rubber of commerce. It's not a *Ficus elastica* but has a small narrow leaf like *Eucalyptus* and it's certainly a money-maker for Brazil. You have heard of the floating islands of the Amazon; a snag gets stuck in the river, it dams back leaves and branches, then seeds germinate and trees grow on it and when a freshet comes down the river out goes the island. In the rainy season the Amazon sometimes rises 40 and 60 feet and floods the country for thousands of miles. It is truly a mighty river—and a peculiar one, as it doesn't confine itself to one stream. No one can truly say they have seen the Amazon but only a part of it, for you have to go 1000 miles up to get into one stream and by then you have passed where many of its largest tributaries enter. The Amazon is really a series of lakes and swamps connected by rivers. Its mouths where it enters the ocean are 150 miles wide. Steamers of 6000 tons go up 1000 miles to Manoes and 2000-ton steamers can go 2000 miles. Altogether in the Amazon and its tributaries there are over 40,000 miles of navigable waters.

We stopped at Trinidad long enough to see the Botanical Gardens there and to visit the lake of pitch 40 miles away. This is the seventh wonder of the world. It comes out of the lake just as you see it in barrels and though it is exported in large quantities, the lake never grows less. Sometimes pieces of wood come up with the pitch and it is a curious fact that the wood does not grow on the island and in no place nearer than the mainland.

We dropped in at St. Thomas in the Danish West Indies and took a stroll through coconut groves and looked over the castles of the old time pirates who made St. Thomas their rendezvous in the old days. We passed Porto Rico and five days later came up New York harbor in a fog so thick that the city was barely visible.

We felt like millionaires in Brazil. Their language is Portuguese and they use Portuguese money of reis and mil-reis. A million reis amounts to about \$260 in our money. Trolley fares or a post card costs 400 reis and 1000 reis is an ordinary tip for a waiter. All through South America they have a pleasant way of naming their streets and parks after some historical event. It is just as if Broadway were called Fourth of July Street.

All of the South American cities are fine places to live in. They are made beautiful. A city like Buenos Ayres or Rio, for instance, has more acreage in parks and gardens than five cities of the same size in the United States and they are fine parks too, not open

squares of grass dead half the year. They plant good trees and fine palms, not of the common varieties, but varieties like *Cycas circinalis*, *Phoenicophorum sechellarium*, *Licuala grandis* and *Phoenix rupicola* in magnificent specimens and they keep them in fine shape too, so that a drive or walk through these parks is a refreshing diversion after a day's work.

We always think of Brazil as having a very hot climate. True the average is high, but it never really gets hot. The maximum temperature of Para, only 11 miles south of the equator, is only 78 degrees. We get it hotter than that right in New York City sometimes and they get it in Buenos Ayres, too. On the entire trip we were never over-bothered with mosquitoes and there are so few flies that even in the hottest cities meat is hung outside without protection. The cities down there are nearly all progressive and up to date. Even in the smaller cities they have fine trolley cars and electric light systems and the streets are well lighted. In Rio they have mosaic sidewalks and in Buenos Ayres they have five times more policemen per 1000 population than we have.

The growth and prosperity of the South American republics has been amazing within the past two or three decades. Englishmen and Germans of intelligence and business or mechanical ability control the commercial, shipping and engineering enterprises of South America. North America is represented only in a few isolated places. Every railroad in the Argentine with one exception was financed and built by Englishmen and are now officered by them. The public water works of Buenos Ayres were built and are run by Englishmen. In the year 1909 Englishmen took 250 million of dollars in dividends out of the Argentine alone. The docks at Santos and at Rio, also the wonderful trans-Andean R. R. which runs across the continent from Buenos Ayres to Valparaiso, more than 800 miles over and through the Andes, are owned in England. The engines and rolling stock on the Chilean railroads and most of their trolley systems were installed by the Germans. Even their soldiers all wear German uniforms. There are over 40,000 English residents in the Argentine and only 400 Americans. The banks, docks and railroads are controlled by the English or Germans and we as a nation are hardly known there, and why should we be? They see large 10 and 12,000-ton British, German and Italian steamers entering their ports but never an American one. Why, the American consul at Santos told me that last year 393 large steamers left that port laden with Brazilian products but a steamer flying the American flag has not been in there in ten years. No wonder that the United States has had little share in the thriving prosperity of the wealthy regions south of the Equator.

So long as the banking laws of the United States forbid any branch of American banks in South America, and so long as we have no ships of our own and prevent foreign ships from trading from one American port to another en route to South America, the Monroe doctrine will appear a farce to South American republics and their trade will go to Europeans who know how to handle it.

AN IMPROVED VENTILATOR ARM.

"The Advance Co., of Richmond, Ind., manufacturers of greenhouse ventilating apparatuses and fittings have invented a new devise in the form of an arm to be used in connection with their ventilating apparatus to be called the "Twistless." The following illustrations were taken from an arm giving the same throw and opening as an 8 inch elbow arm. The cross rods are 8 inches long and the rod that fastens to the sash is 21 inches long.

The first of the above cuts shows the arm in a right angle position. It is in this position that an elbow arm twists the shafting pipe the most. In this new arm they have eliminated the twisting when the arm is in this position by reducing the distance from the center of the shafting pipe to the center of the rod rivet without reducing the throw.

The second cut shows the arm in a closed position. When in this position the distance from the center of the shafting pipe to the center of the rod rivet is 8 inches or the same as in an elbow arm. The advantage of the arm when it is in this position is that it is more rigid and easier to start.

The third cut shows the arm in an open position. When in this position the arm has the same distance from the center of the shafting pipe to the center of the rod rivet as it has when it is closed, namely 8 inches. The arm is very rigid in this position and it requires no strain on the machine or other parts of the apparatus to hold the sash open.

The above cut shows the construction of the arm. Two duplicate castings are riveted together by a center rivet to form the part of the arm that clamps the shafting pipe. One bolt is all that is required to hold this arm securely to the shafting pipe as the rivet that holds the two clamp parts together also forms a hinge in the proper place on the opposite side of the pipe from the bolt. After the

two clamp parts are together an 8 inch rod is fastened to each one of them near the outer edge. The rods are then crossed and fastened to the rod bracket which carries the rod that is afterwards fastened to the sash. The rod bracket is so constructed that it carries the sash rod between the two 8 inch cross rods. The sash rod being carried on the inner side of the bracket is more rigid and has no tendency towards side action. The manufacturers say that the standard new style arm will give the same sash throw as their standard elbow arm and when at right angles the rod will stand only 7 1/2 inches away from the center of the shafting pipe.

Over six thousand of these arms are already in use. Much more might be said but the Advance Company, Richmond, Ind., will be pleased to answer any inquiries.

AN INTERESTING EXPERIMENT IN ROSE GROWING.

At the June meeting of the N. J. Floricultural Society, a letter was received from the N. J. Experiment Station at New Brunswick describing their treatment of My Maryland roses under glass. This experiment was planned to study the character of their red shale soil as adapted to roses. This red shale soil is of the same physical character as clay soil and should be of the proper physical condition for roses. They found that carnations succeeded much better if about 30 per cent of sand was mixed with the soil, so that they decided to study the effect of different proportions of sand upon the roses and compared the red shale soil without sand with plots containing 10, 20 and 30 per cent of sand. You will note that 30 per cent sand means quite a sandy soil. They have cropped these plants without rest for two years, and the plots having 30 per cent of sand are equal to the others. These plots have also received nothing but chemical fertilizers since the experiment started, and the last crop was as fine as any they have secured, and they are planning to carry the plants along without rest for another year. The plants are own-root stock and are grown on raised benches with tile bottoms with less than 4 inches of soil on the benches. No new soil or manure has been added since the experiment started. The initial application of fertilizer for one thousand square feet was as follows:

19,200 grams	ground limestone
13,600 "	acid phosphate
3,600 "	superphosphate
1,400 "	nitrate of soda

These amounts can be reduced to pounds by dividing by 453, which is the number of grams to the pound. At the present time they would probably use another source of nitrogen in place of nitrate of soda, preferably concentrated tankage dried blood or ground fish, and they have applied 1800 grams of concentrated tankage per one thousand square feet each month as a top-dressing of nitrogen. This is the only material that is applied after the initial application, which is stirred into the soil at planting time. This entire lot of chemicals will not cost over \$2.00 per 1200 square feet for the entire season, which is very much cheaper than any application of manure could be. They have experimented during the

past year with American Beauty roses, also Killarney, and feel certain that equally as good crops of roses can be grown with chemical fertilizers as with animal manures, providing the proper physical condition of the soil is secured and maintained and provided the proper chemicals are applied. They are going to have a new range of greenhouses built this summer and will be able to experiment on a larger scale.

WILLIAM REID, Sec'y N. J. F. C.

SEEN AT MANDA'S.

Among the many interesting novelties to be seen at this noted South Orange establishment, Polypodium Mandaianum will most impress the visitor. This superb crested form of *P. aureum* is remarkable for its vigor and rapid growth. The fronds, which are of enormous size, will keep from four to six weeks in water, after cutting, and are in great demand for use in large floral decorations. There are several begonias of especial promise, *semperflorens* crosses, both pink and scarlet, which will undoubtedly become popular. A new and very distinct *Nephrolepis* with red-ribbed fronds adds one more gem to the lengthening list of this sportive genus. Among the desirable things for choice plant collections is a *Fourcroya*, with foliage handsomely variegated with white, and entirely devoid of the usual marginal spines. A great commercial future is in sight for the European novelty, *Adiantum Farleyense* Glory of Dewtreth, which differs from the *Farleyense* type in bearing spores. Among the things not new but yet little known is *Dracaena Rothiana*, a thick leaved species, which Mr. Manda terms a "money maker." It has been rarely grown outside of botanical gardens, but has all the qualities of a good florists' decorative plant. Mr. Manda reports the demand for *dracenas* of all kinds as very heavy this season.

At the time of our visit a large shipment of cacti was being packed for India, and a load of *phalanopses*, over 6000 plants, was just coming in. There are no less than 108 distinct species and varieties of *Cattleya Trianae* now in this establishment, all tints from pure white to scarlet. For *cattleyas*, *dendrobiums* and all propagated stock frames are utilized in summer, and the plants thrive much better than in the greenhouses during the hot months.

PLANT TRADE IN SYRACUSE.

The bedding-out season still continues and will not be finished for a week or two yet. It has been the best ever known here. *Geraniums* have been in most demand, *S. A. Nutt* being the favorite; very few white ones are used now. *Cannas* sold well. The call for *Vinca variegata* was very large, many florists being sold out soon after the rush began. Each year there is a larger number of porch and window boxes. Large flower pots filled with scarlet *geraniums* and vines are seen on the steps of many houses. Insects and caterpillars were becoming quite destructive, but a heavy thunderstorm with a deluge of rain a few nights since thoroughly washed trees and everything else and it is hoped the pests were completely disposed of for a good time at least.

HAIL INSURANCE.

A paper by John G. Ester before The New York Florists' Club.

What General Sherman said of war, applies as well to hail. A few weeks ago I visited St. Louis and saw some of the disaster caused by the storm of April thirteenth, last. A breakage of over 37,000 square feet of glass, nearly all double-thick, out of 50,000 feet, in one range, will give you some idea of what hail can do when it gets busy. This storm was three miles wide by forty miles long, and broke seventy-five percent. of the glass in the fifty or more greenhouses in its path. And The Florists' Hail Association paid for nearly all of this loss without a quiver.

As to the formation of hail, nearly every scientist has a theory all his own, but in my estimation they have about as much evidence to convince the man from Missouri, as the various gentlemen who describe the golden streets of The New Jerusalem, that their guess is correct.

It would tire you to enumerate the freaks of hail storms, but suffice it to say that the storm that does the most damage is the one that has wind enough to carry the stones so that they hit the glass at right angles.

Various devices of protection have been tried but nearly all have proved either too costly or too cumbersome to be practical, and hail insurance still remains the best and easiest way for the person who owns a glass house to recoup himself for damage by hail. Therefore it will not be irrelevant to say a word or two about the mutual benefit conferred by The Florists' Hail Association of America.

It is nearly twenty-five years ago since the S. A. F. christened The Florists' Hail Association, and placed the infant upon its doorstep, with the admonition to go forth into the world and be a Good Samaritan, but on no account to come back and trouble its dad. On June first, 1887, the State of New Jersey adopted the orphan and for twenty-four years it has gathered experience, and the fact has been developed that a majority of the owners of glass are very much more interested in hail insurance after, than before a hail storm.

Since the day of its incorporation this association has never paid a dollar for attorney's fees, notwithstanding the fact that up to date over \$213,000 has been disbursed to its members for glass broken by hail. Likewise, it has never paid a single cent for office rent, fuel or light, for its officials. And here comes our loudest whoop. Not a dime has been paid to an agent for commissions. We employ no agents. We only do business in the State of New Jersey, and are not amenable to any other state.

He who wishes to come or rather sends to New Jersey for hail insurance, can procure the same without any rakeoff to anyone. Reformers take notice, and when you plan to eliminate the middleman, think of The Florists' Hail Association as the one organization that has wiped that individual off the slate.

By prompt payment of losses and straight-forward dealing The F. H. A. has won an enviable place in the insurance world, and with its sixteen hundred members, insuring over thirty-five million square feet of glass, and a reserve fund of over twenty-five thousand dollars for a backbone, it

can afford to sit quietly by and wait until a hail storm drives the uninsured into its fold.

In conclusion, allow me to advise: Don't shingle your hot house with single-thick glass and be sure to lock the door before the horse is stolen.

GREAT HAIL STORM IN MARYLAND.

On the evening of June 12, while the members of the Gardeners' and Florists' Club of Baltimore were assembled transacting committee business for the coming convention of the S. A. F. and O. H., a terrific electric storm started, and made great havoc among many of the greenhouses of the members. Telephone calls came reporting great losses from hail. Isaac H. Moss of Govans, Md., who has two extensive plants, a mile or so apart, had the glass in all his houses completely riddled. Many valuable plants were also destroyed. Mr. Moss estimates his loss at about \$8000. F. Bauer, Govans, also is a heavy loser. Mr. Bauer had left in the morning for New York, to sail for Europe the next day. M. Thau, Govans, suffered severely. In less than two hours after the damage, Mr. Thau had given his order to a dealer for the replenishing of his glass. William Paterson, Govans, had five greenhouses riddled. At the same place the conservatories of Andrew Anderson, Hans Anderson and Andrew Bartell were damaged, the loss being thousands of dollars. Greenhouses at Ruxton and at Pikesville were badly damaged. Stevenson Bros., who had just completed two fine greenhouses near Towson, had nearly every glass broken, and they also had loss at their houses at Govans. Edward A. Seidewitz's Mt. Washington greenhouses, were greatly damaged. Floral View Nursery lost \$2000 and George Cook \$800. James Hamilton, Mt. Washington, who is a large rose grower, suffered greatly by loss or complete destruction of plants as well as glass. He estimates his loss as over \$10,000. John L. Waggoner and H. L. Kline, near Towson, had glass demolished, and many plants in their houses were destroyed. At Hampton, one of the finest colonial places in the state, there was great destruction of the fine old trees, the beautiful driveway being completely strewn with trees. At the greenhouses of Mrs. T. Harrison Garrett, in which is a magnificent collection of rare ferns and tropical plants, great damage was done.

In the track of the hail storm the wind was terrific, and fruit and other trees were uprooted by the hundred. It was the most destructive storm in this state for over twenty years. In many cases out-door crops in gardens and fields are completely ruined.

DAMAGE BY HAIL IN MICHIGAN.

On Sunday night, June 11, a destructive hurricane swept over a large part of the state, ruining gardens, unroofing buildings, etc., and, in the vicinity of Flint, where it was accompanied by hail, inflicting great damage on glass structures.

One of the heaviest losses sustained was that of Hasselbring, the florist, whose greenhouses are located west of the city, and everything is completely ruined.

There are 13 buildings, which have 100,000 square feet of glass, and 50,000 square feet of this was broken. The lights in the buildings on the north side were all broken and also 17 lights in the windows of the residence were demolished. The loss, which cannot be estimated at this time, will run into thousands of dollars. Thirty thousand carnation plants were ruined and also 20 acres of fruit crops. The tomato plants which were in two houses are a total loss. Most of the damage was caused by the hail. This is the third time in seven years that the greenhouses have been damaged by storms. Harry Schott, who conducts a small greenhouse and also raises garden truck on 15 acres near the Hasselbring greenhouses, suffered heavy loss, all the garden truck being ruined.

OTHER STORMS.

Fostoria, O.—A violent hail storm broke about 5000 feet of glass in the greenhouses of the Fostoria Floral Co., on June 3.

Detroit, Mich.—A severe storm on June 4 did much damage to the country about here. The Alma greenhouse suffered a loss of about \$1000.

Boone, Ia.—A very severe storm did much damage in this section. L. Loehrer lost 5000 lights of glass, and the damage at the greenhouses of I. Kemble was considerable.

NEW AZALEAS OF MERIT.

In a letter written by August Haerens from Italy, on May 21, Mr. Haerens has the following to say:

"We took first prize, golden medal, in Florence, notwithstanding that most of the extra fine varieties of azaleas were spoiled on account of delay on the road; it has taken twelve days for exhibits shipped by grand express from Ghent to Florence (about same distance as N. Y. to Chicago). We exhibited the following: Lady Roosevelt, Easter Greetings, Haerens' Lorraine, Winfried Haerens and Mlle. Suzanne Haerens, double pure white; ten other sorts intended for exhibiting arrived spoiled by the long transit. It was wonderful how perfect Easter Greetings, Haerens' Lorraine and Winfried Haerens unpacked after thirteen days' confinement, traveling a distance of some 1370 kilometers. Please make a note of this and let the trade that is interested know. Of the Lady Roosevelt only one plant unpacked in good condition."

Messrs. Rolker of New York, who are the American agents for Aug. Haerens, state that several of the above mentioned azaleas were shown at the National Flower Show in Boston, but escaped the scrutiny of the judges and consequently received no special recognition there.

Washington, D. C.—Every year the ceremony of decorating the graves of the Confederate dead in Arlington National Cemetery is carried out. These exercises took place this year on Sunday, June 11, the hottest day the Capital has seen, it is said, at this date in 34 years. A wreath from President Taft was among the floral tributes placed on the graves of the 264 Confederate soldiers buried in Arlington.

BOBBINK & ATKINS

WORLD'S CHOICEST FLORIST AND NURSERY PRODUCTS.

We are growing in our greenhouses and in our 250 acre nursery a large variety of material constantly in demand by florists. Our Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

B. & A. SPECIALTIES.

PALMS, BAY TREES, BOXWOOD AND HARDY HERBACEOUS PLANTS, EVERGREENS, ROSES, RHODODENDRONS, VINES AND CLIMBERS, AUTUMN BULBS AND ROOTS, CONIFERS, PINES.

Florists are always welcome visitors to our nurseries. We are only a few minutes from New York City; Carlton Hill station is the second stop on Main Line of Erie Railroad.

THE BAY STATE NURSERIES,

North Abington, Mass.

AN "UP-THE-HUDSON" ESTABLISHMENT.

We don't believe there is in the country a finer lot of symmetrical specimen conifers of the small and medium sizes than are to be seen in the nursery grounds of Wood Bros., at Fishkill, N. Y. From their continuous advertising of greenhouse stock, it is not generally known what an extensive nursery business is done by this firm. Root pruning and transplanting is carried on unremittingly, and every plant is a specimen, in condition for removal. The loss from winter-killing has been unprecedentedly heavy this season, Thuyas—especially the compacta—and Retinosporas, such as plumosa and filifera being killed out by hundreds. This is concurrent with the experience in other nurseries throughout this state, New Jersey and elsewhere. Some seedling blue spruces caught our eye, and compared with those in a row of genuine Kosteri were fully equal to if not superior to that widely known variety.

In the greenhouse department all has been hustle hustle for the past two months, for Wood Bros. are regular advertisers in HORTICULTURE. Geraniums, of which they had an enormous stock, are cleaned out. A great variety of geraniums is grown at this establishment, not merely a few of the leaders such as Nutt and Poitevine, and they find this policy pleases the buyers, who are glad to get a chance at something different once in a while.

The demand for young cyclamens, roses and cannas, Mr. Wood tells us, has been much better this year than it

HOLLAND NURSERIES

Best Hardy Rhododendrons, Azaleas, Conifers, Clematis, H. P. Roses, Shrubs, and Herbaceous Plants.

P. OIJWERKERK, 314 Jane St., Westchester Bldg., P. O. No. 1, Hoboken, N. J.

was last year, and bedding begonias have had and are still having a most remarkable run. They have an immense stock, varying from the pure white dwarf Snow Queen of the Erfordii type, up through all shades of pink and red.

The carnation sale this spring has been demoralized, says Mr. Wood, by the course of the trade papers, in soliciting and publishing limited lists of the "best" varieties, thus concentrating attention, especially on one, two or three sorts, that consequently monopolize the demand, and discourage the production of a more extended assortment. Growers of tender grapes under glass will find some fine stock of the best exotic varieties at Wood Bros.

NEWS NOTES.

Chicago, Ill.—The property of George L. Healy, on Elm street, has been secured by the Ernest Weinboer Co.

Memphis, Tenn.—A city tree and shrub nursery will be established on 53 acres of land leased by the Park Commission.

Rockford, Ill.—R. H. Shumway writes that the fire which partially destroyed his barn, as mentioned in HORTICULTURE of June 10, is believed to have been of incendiary origin.

Be a MUGWUMP. In other words be independent. Mugwump is from the Indian "Mug-quomp" and means "leader." In 1884 the New York Sun gave the word political meaning indicating an independent voter; one who was considered a backslider or a person who considered himself of superior intelligence — capable of voting as he pleased. Some florists today buy from firms because they feel they are obliged to—perhaps such a firm may buy from them. Consider this—does the firm buy from you, Mr. Florist, because of your personality, or do they buy from you because they are glad to get the goods at their own price, or at a price which will net them the most profit? Would they not buy from your next neighbor if they could buy better or cheaper? Do you think they buy from you for love? If they do, it is not good business. Do they buy from you just because you buy from them? If they do, it is again not good business. Do you think we would buy from a bulb exporter abroad just because he might buy from us? Not much—we would not buy from him unless we were sure he had the goods. We are Mugwump buyers. The Mugwump, or independent buyer, is the successful man today. Be a Mugwump. Cold Storage bulbs for Mugwumps—ready for delivery now or later.

Write us.

Not How Cheap
But How Good

NEW YORK CITY

ANNUAL TRADE SALE

Tuesday, June 20th, at 11 A.M.

Grand Opportunity to Stock Up

It only affords itself once a year, so do not overlook it.

ELLIOTT AUCTION CO.

W. J. Elliott, Auctioneer

42 Vesey St., NEW YORK

CHICAGO NOTES.

Trade Jottings.

A shipment of palms, araucarias, etc., just received by Fischer Bros. of Evanston, arrived in fine shape, notwithstanding the extreme heat they encountered during transit.

The E. Wienhoeber Co. has made a valuable acquisition to its Elm street property in one of the finest residence districts of Chicago. The purchase covers 50 x 175 feet just off from State street.

Among the unusual wedding decorations of the week was one by A. Lange in the gold room of the Congress hotel. Sweet peas and peonies were used profusely and a unique feature was the bouquets of the six bridesmaids which were hats filled with pink sweet peas.

Most of the carnation growers have thrown out their plants. The hot weather has caused the cut flowers to be so small and soft that the plants were not worth while. The few houses that still retain their stock are sufficient to supply the light demand for carnations at this season.

The commencement events at Morton Grove are this year, as in previous years, doing credit to a town made up largely of florists. A pavilion will be hung with green and thousands of roses used to make the place a bower of loveliness. Daisy Brooks and Virginia Poehlmann have leading parts in the program.

Personal.

Frank Ayres, of Chas. McKellar's underwent a painful operation on his eye last week.

John Sinner and N. Wietor will leave together for their annual outing, June 23d, at White Sand Lake, Wis.

George Asmus, president of the S. A. F., has accepted the invitation to the 25th anniversary banquet of the St. Louis Florist Club.

J. D. Imlay, Zanesville, O., is buying material in Chicago for a new range of houses. He will also go to Champaign to witness the graduation of his son this week.

H. C. Blewitt, for many years a well known grower of Desplaines, Ill., is trying sulphur baths at Benton Har-

bor, Mich. Mr. Blewitt has been suffering from rheumatism for a year, and his condition is rapidly becoming very serious.

The marriage of Mrs. Margaret Thorpe Flint and Capt. David W. Evans is announced for Saturday, July 1. Mrs. Flint is the daughter of the late John Thorpe, and has been Chicago representative of the Florists' Exchange for the past two years.

Miss Frances Brundage, secretary of the E. H. Hunt Co., has resigned on account of poor health, and will spend some time with her sister in Paris, Mo. P. M. Bryant has taken her place for the present. Miss Brundage has many friends in the trade who hope to see her back again entirely recovered.

Visitors:—John M. Bommersbach, Decatur, Ill.; W. H. Troyer, Elkhart, Ind.; H. E. Kidder, Ionia Pottery Co., Ionia, Mich.; A. L. Glaser, Dubuque, Ia.; L. Potter, Waukegan, Ill.; Ed. Amerphol, Janesville, Wis.; J. D. Imlay, Zanesville, O.

INCORPORATED.

Portland, Ore.—The Portland Rose Nurseries, capital stock \$50,000.

Marietta, O.—The Marietta Floral Co., capital stock \$20,000. Incorporators, J. A. Gallagher and others.

Alvin, Texas.—Stockwell Nursery Co., capital stock \$100,000. Incorporators, E. S. Stockwell, W. A. Stockwell, W. H. Gammill and others.

Denver, Colo.—Colorado Co-operative Farmers' and Gardeners' Association, capital stock \$10,000. Incorporators Frank A. Buckman, A. C. Toothacker, R. J. Caille.

Topeka, Kans.—Mid-Continent Orchards Co., capital stock \$500,000. Incorporators, J. H. Davis and John B. Stephen of Denver, and L. J. Van Laeys, W. B. Flowers and W. R. Gilmore of Topeka.

Perry, Iowa.—The incorporation of the Perry Nursery Co., which was mentioned in the June 10 issue of HORTICULTURE is not yet complete as to details. This business has been running since 1871, for fifteen years under the name of Edmondson Bros., later E. F. Edmondson, who has now with the others previously mentioned, incorporated as the Perry Nursery Co.

DURING RECESS.

New York Bowlers.

On Monday afternoon, June 12, scores were recorded as follows:

Scott	148	144	181	Manda	189	161	203
Kakuda	146	153	178	Don'ton	166		153
R'us.Th	179	156	157	Tallman	133		147

The Astorias have their annual banquet and theatre party, with their wives, on Saturday evening, 17th inst.

Chicago Bowlers.

SCORES FOR JUNE 8.

Graff,	117	178	151	Vogel,	102	125	162
Schlos'n,	119	177	140	Wolf,	194	189	198
Stevens,	202	173	165	J. Zeck,	191	177	168
Lorman,	153	96	148	J. H'ck'r,	121	151	166
Schultz,	154	143	185	A. Zeck,	176	148	227
Farley,	166	190	179	A. H'ck'r,	200	127	176

Among the prizes offered for the convention meet is one of \$25 to be divided among the five highest qualifying.

Chicago Baseball.

A baseball team with wholesalers and retailers striving for the honors of the game will be organized at once, Allie Zeck leading the former and Wm. Wolf the latter. With the intervening weeks in which to practice some good playing will afford pleasure to the spectators at the annual picnic July 23rd, at Park Ridge.

The Chicago Carnation Co.'s baseball team won their first game of the season Sunday, June 11th. They will accept a challenge from any florists' team in Chicago or vicinity.

NEWS NOTES.

Greensburg, Ind.—Dille & Konzelman are succeeded by the Dille Floral Co.

Pittsburgh, Pa.—The business of Klinke & Wehrheim will hereafter be conducted under the name of Karl Klinke, Mr. Wehrheim having sold his interest to his partner.

Traverse City, Mich.—The Wolverine Co-Operative Nursery Co., of Paw Paw, are about to open a branch nursery here. This company is unique in that it is, as far as we know the only organization owned exclusively by farmers and fruit growers and is chartered as an association. The experiment is said to have proved very successful.

Coldwell Lawn Mowers

Hand, Horse and Motor

Coldwell's Motor Lawn Mowers

Will do the work of three horse
lawn mowers — and do it better

☐ They will mow up 20 per cent grades. ☐ They leave no hoof prints as horses do.
☐ They will roll the lawn smoothly. ☐ They do away with the expense of two
men and three horses. ☐ They are of no expense when not in use. ☐ They
are simple to operate and economical. ☐ They are a necessity on every large lawn

Seed Trade

A Disclaimer Disclaimed.

The recent decision of the House of Lords in England on the Seed Warranty issue will undoubtedly create much uneasiness among the seed trade of that country. The decision of the House of Lords is, briefly stated, that as the buyer could not determine without growing the seed and seeing the plants resulting, whether the seed was true or not, he was *compelled* to accept it, and that this fact overrode the disclaimer behind which the growers sought to shelter themselves from any consequences of mistake on their own premises.

We are at a loss to understand how the highest tribunal in England could have come to such a decision. The issue seems to hinge upon the word "compelled" and it seems surprising that the House of Lords should really have found that the customer was actually compelled to accept the seeds. Really he was not compelled to buy them, and in buying them at a price which did not carry with it any guarantee, and did not compensate the seller for any possible loss in consequence of the seeds being untrue, we can hardly see the fairness and equity of such a decision.

The suggestion made by the English "Horticultural Advertiser" that seeds of different kinds be packed in bags of particular colors is open to much criticism. Such a scheme would necessitate that the bags be used only once, but second-hand bags would undoubtedly be used again, and for seeds other than the kind they first contained, and errors even more serious might result.

We shall be interested to see what legal offset from this decision the English trade may adopt, or how they can legally defend themselves from suits of unscrupulous customers, at whose mercy the law laid down by the House of Lords on the bill now places them.

Next week the American Seed Trade Association meets at Marblehead, Mass., and we presume they will take up this monstrous English ruling and consider it in relation to the status of the seed trade in this country. We think it unlikely that our legislators, with the better judgment and greater spirit of fairness which prevails among them, will be disposed to regard this House of Lords' action as worthy of acceptance as a precedent in this country.

Notes.

Rochelle, Ill.—The Rochelle Seed Co., is erecting a brick addition, two stories, 48x32, adjoining their present building.

Philadelphia, Pa.—The Moore Seed Co. have leased the five-story building at 125 Market street for a term of ten years and will probably move about July first, after contemplated improvements are made.

Binghamton, N. Y.—Ezra Stanford, a representative of the George B. Carver Seed Co., of Buffalo, was slightly injured by an automobile here on June 3. In cranking his machine it started and dragged him about ten feet, finally going over him.

At the annual meeting of the Iowa Seed Dealers' Association, held at Des Moines, on June 6, the following officers were elected for the ensuing year: C. N. Page, president; Henry Field of Shenandoah, vice-president; B. H. Adams of Decorah, secretary; John P. Hamilton of Cedar Rapids, treasurer. H. A. Johns is slated to head the legislative committee, and Henry Field will act as chairman of the membership committee. It was decided at the closing banquet and executive session that the next convention will be held in Des Moines.

At the last meeting of the Board of Directors of the Wholesale Seedmen's League, immediately after roll call, W. Atlee Burpee offered the following motion of respect and esteem, and moved that the motion be placed on the Minutes of the Board, which motion was unanimously adopted:

"It is with deep regret that we record the death on December 13th, 1910, of our friend and colleague, Robert Buist.

"Mr. Buist had been a member of the Board every since the incorporation of the Wholesale Seedmen's League. He was faithful in attendance upon the meetings and we shall miss greatly his advice and sound judgment so freely and honestly expressed, while individually each of us feel the loss of a personal friend.

"Robert Buist was an old school gentleman, a Seedsman of thorough training and a loyal friend, whose loss is mourned by a wide circle of both personal and business friends."

THE TRUE EUGENE VERDIER PEONY.

By E. J. Shaylor before American Peony Society.

My investigation about Peony Eugene Verdier leads to the conclusion that there are three varieties sold under that name. The true variety is a "Salmon Pink" as the originator described it. Medium height, extra stiff stems, with the bloom at the top flat, and the foliage clear up close to the bloom. The outside is quite pink with the inside pronounced salmon color.

The second variety sold for Eugene Verdier is none other than *Eugenie Verdier*. Outside flesh pink, inside light flesh color turning nearly to white when open. Large loose flat flower on long stems that bend over with the weight of the bloom.

The third variety sold as Eugene Verdier is an old peony which has been sold for ever so long in Holland under the name of *L'Indispensable*. I quote from a Holland grower now:—"Some people call it Eugene Verdier, which is wrong. *L'Indispensable* ought to be the variety that has a dark flesh pink color. It is a round flower—very double flower, which has the peculiarity of never opening up entirely, the guard petals holds the entire flower after it is a little more than half open. It stays in this condition until it falls to pieces. That it is the way it acts in our country." Eugene Verdier, proper, is not known in Holland as far as we can see.

Another Hollander says that the nomenclature committee of Holland could not trace anywhere the peony *L'Indispensable*, and since they found a peony like it which had come from Paillet Nursery in France they decided to discard the name *L'Indispensable* and call it Eugene Verdier. This is how it comes to bear the name Eugene Verdier. It has no claim whatever by

HERBERT, ATCO, N. J.

DAHLIAS Every Day in the Year

right to the name Eugene Verdier. The name *L'Indispensable* cannot be traced, and I am in search to find out what its original and true name is. One grower says it burns, another says in a wet season the buds rot without opening. Another says the petals break and make many blooms come one-sided.

PERENNIAL FLOWERS

Every florist should have a fairly representable collection of "Perennial Flowers" in his establishment be it either for the purpose of growing them for cut-flowers or plant trade. Many of the best varieties are readily grown from seed but in order to have them fairly large in the spring they should be sown in June.

We offer a very complete collection in our "Wholesale Seed Catalogue." Write for it to-day

Of Interest to Retail Florists

ST. LOUIS RETAIL FLORISTS'
ASSOCIATION.

The retail Florists' meeting was held on Monday night, June 5, with a good attendance. The resignation of F. C. Weber, Jr., as secretary, was accepted and Robt. J. Windler elected in his place. Fred H. Weber was elected treasurer to succeed Mr. Windler. President Sanders said the new organization has done good work and would continue as things presented themselves. The elimination of the crepe puller is still in the hands of the House of Delegates and City Council and until they act on the bill their fate will not be known.

A motion was passed to thank the Florist Club in co-operating with them in this matter. The next meeting of the association will be on Monday, July 3.

NEWS NOTES.

Pawtucket, R. I.—The Highland Floral Co. have closed their store here.

Leavenworth, Kans.—Miss Lilla E. Goodman, who has the management of the Sunnyside Floral Co., since the opening of the salesroom at Fifth and Shawnee streets, resigned her position June 3.

Detroit.—Another old landmark had to make room for encroaching commercialism and B. Schroeter's flower store is no more. Many a sorrowful event has been made more bearable and many a joyful happening has been enhanced by the innumerable artistic floral arrangements conceived and executed at this horticultural beehive. While Mr. Schroeter will be somewhat inconvenienced for a short time, next fall will see him blossom out with an establishment more convenient and attractive than the old.

PHILADELPHIA NOTES.

The manufacturers' exhibition which opened at Atlantic City on the 13th inst. (and continues for two weeks) is as elaborate as last year in its use of plants, flowers and decorative material, and the Habermehls of Philadelphia have been once more entrusted with this big job. Carloads of materials and their best men, with a corps of workmen, went forward weeks in advance and stayed on the contract until finished.

Visitors: James Farrell, Hoopes, Bro. & Thomas, West Chester, Pa. R. T. Brown and Joseph Dauphin, Queens, N. Y.; Winthrop H. Thurlow, West Newbury, Mass.; H. A. Bunyard and J. H. Pepper, New York City; M. C. Ebel, Madison, N. J.; C. A. Reeves, Mrs. and Miss Reeves, Cleveland, O.; S. G. Harris, Tarrytown, N. Y.; Bertrand H. Farr, Reading, Pa.; J. A. Styer, Concordville, Pa.; George H. Patterson, Fairlawn, N. J.; A. Anderson, Hackensack, N. J.; Mr. and Mrs. James M. Thoirs, Camden, N. J.; Harvey Schieff, Pittsburg, Pa.

NEWS NOTES.

Newark, N. J.—The partnership of Kroehl & Schutzi, florists, has been dissolved.

Attleboro, Mass.—D. E. Newell has retired from the florist business, and is succeeded by Martin Ockert.

Shelbourne Falls, Mass.—Paul Burtt, who recently bought the florist business of Lucius S. Fife, will take possession July 1st.

Apponaug, R. I.—On account of ill health W. B. King expects soon to re-

tire from the florist business. His son will continue the business.

New York, N. Y.—Joseph Leikens expects to open his new store at 20 W. 57th street, about Aug. 1. He is now in temporary quarters at his Plaza Hotel branch.

Gretna, La.—B. M. Wichers, florist, has won his case against the New Orleans Acid and Fertilizer Co., and gets \$1000 damages. He claimed that fumes from the company's plant killed plants and flowers in his gardens.

Flower Market Reports

This market is "short"

BOSTON on nothing in the flower line, but decidedly "long" on many things. Long Beauties take the lead in demand, and next to them no rose has a better standing than Carnot which is coming in gloriously. Of carnations there is an avalanche still, and the majority of the blooms are low in quality and short of life after arrival in the market. Peonies are plentiful, but of inferior quality as a rule. The general tone of the situation is depressed, and prices are demoralized. The buyer, when he materializes, commands the homage of the seller, and gets it without a struggle.

There was an abun-

BUFFALO dance of everything in the market the past week and business was only fair. Peonies were at their height and another week will see their finish. Roses are arriving in poor condition. Maryland in pink seems to stand the warm weather better than Killarney, though Bridesmaid is preferable. Kaiserin and Carnot are leaders and no better have been had this season than at present. Beauties are in good supply, also lilies, sweet peas, lily of the valley, daisies, etc., but demand is only light. Another week and graduation exercises will be in order and the trade is prepared to finish the balance of the month in a good old-time hustle.

The sales of the vari-

CHICAGO ous wholesalers differ considerably at this time, caused largely by the amount of shipping trade they possess. City trade is dull. The usual orders for stock for commencement are pouring in from all over the state, and, as is always the case, include a request for many times the quantity of yellow roses available. This favorite class color causes the Perle to be in even greater demand than the Bride roses in June. Sweet peas are also in good demand, though long-stemmed ones have the preference and bring double the price of the short ones. Carnations vary greatly; there are quantities of small and soft stock, but some growers are cutting very fair carnations for the season. There is a good demand for Beauties. Red roses also sell readily, and in fact good roses that will stand shipping are used to advantage each day. There is no change in the smilax situation, the scarcity of which makes what little there is sell at any price the grower asks. Asters made their appearance this week, the stock not being particularly attractive. The gladiolus season is nearly over here, which with the iris, will materially reduce the stock of showy summer flowers very early this year. The demand for gardenia as a June flower is rapidly growing.

Business since the

CINCINNATI first of June has been only fair. The continued hot weather has played

TYING TAPE SPECIAL

havoc with stock. Beauties are plentiful and poor. There was an exceptionally heavy demand for pink roses of which there is a decided shortage. Taft easily leads all other pink sorts, the quality being exceptionally good. Killarney is next in line, while 'Maids are of such poor quality they are hardly worth mentioning. White roses are just about equal to the demand. Kaiserin and Ivory are the best in quality, while Brides are on par with

'Maids. Carnations are over-abundant and the greater portion of those received are of an inferior grade. Lilies seem to have fallen off in demand and price, the supply increasing. The last of the cold storage peonies are gone. Shasta daisies have made their appearance and are an acquisition for June wedding decorations. Gladioli Augusta Victoria are good property. Smilax is on the short side, other green goods in ample supply.

Flower Market Reports

(Continued from page 893)

DETROIT Market conditions of last week were extremely trying to everybody concerned. Unusual weather conditions forced the growers to ship immense quantities to the market, while retailers, although very busy, bought cautiously because they knew that stock would not keep any length of time. On the other hand the commission man was kept busy receiving and dumping horticultural products, and at the same time trying to maintain half-way decent prices. Just now we are having a cold wave and the next few days at least will see sturdier and more lasting stock. Several retailers are booking large weddings for the last week of the month which indicates that this branch of the business will come up to the usual standard.

NEW YORK An abundance of all kinds of stock of a quality ranging from worthless to good, and very little business, is the condition prevailing now. Growers of roses have shown no disposition as yet to throw out and replant, with the result that there are many more than can be sold except at lot prices. Maryland and White Killarney are the best of the small roses with Beauty as the choice of all and they are cheap. The sweet peas are generally of poor quality. Up to this time outdoor stock has been spoiled by the frequent rains. Peonies are looking seedy and are on their last legs. Plenty of good lily of the valley is to be had this week, while lilies are hard to dispose of at any price. On the whole this week is the worst of the season. There is a big crop of carnations coming in and while the quality is fair for the season they cannot be cleared even at the lowest quotations.

PHILADELPHIA If the mountains of poor stock could have been eliminated, and only the first class flowers left, last week's business would have been considered excellent for all concerned. As it was, the wholesale markets were congested with carloads of flowers of all kinds, indoors and outdoors, that had no business being sent to market. All that this inferior stuff accomplishes is to worry the wholesaler (trying to find a market for it) and choke the wheels of legitimate business. Such stock had far better be kept at home, saving expressage to

market, and cartage to the dump after it has accomplished its evil mission of upsetting everything and doing no good to itself. But "twas ever thus," and we suppose human nature will have to change before things are ever any different. Commencements and weddings were, of course, the leading features in the week's business, and these called for large quantities of good roses, good sweet peas, and good lily of the valley. Cattleyas also moved a little better. Sunday was what is known as "children's day" in the churches of many denominations, and while flowers were used profusely, they were mostly from home gardens, the roadsides, and woods; and the demand in market circles was very limited. American Beauty was the most satisfactory item in the rose line. "Carnations," as one wholesaler puts it, "are in their second childhood," meaning that a whole lot of these are still being sent in that had far better be kept at home. Peonies are about over in this market—and "the market" draws a sigh of relief. They are bulky and hard work handling—for the money they bring—especially distasteful from the commission standpoint. It does not pay the commission man to handle low-priced bulky stocks. Lilium candidum is now arriving and selling fairly well. Longiflorum lilies are also in good shape, fine quality, and find a ready market. Callas are done. Snapdragon has run down badly in the past few weeks and is now nearly on its last legs. Coreopsis, cornflower, lupins, gypsophila, etc., are among the conspicuous minor items now in that are not seen regularly on the market. The "Baby Gladioli" which have formed such an attractive feature of the market for the past month, are now over and their place is taken to a limited extent by the large flowering sorts, greenhouse grown; but there does not appear to be any large supply of these, and we cannot look for the regular gladiolus season to commence for some time yet. White lilac—greenhouse grown—is still on the market and nice stuff for this season of the year, but it

is about over now. John McIntyre is one of the chief handlers of this item.

ST. LOUIS This market was in a very poor condition the past week. There was lots of stock to be had but all of poor quality and at cheap prices.

There was plenty of work with the retailers. The commission men cleaned up pretty well on roses, gladioli, lily of the valley and lilies, but carnations and sweet peas were too many to

Flower Market Reports

(Continued from page 895)

clean up daily. Prices are low on carnations, \$1.50 per 100 for choice and 40 cents for poor grades; sweet peas 10 to 25 cents; roses, \$4 to \$8; lily of the valley \$3; lilies \$10, and gladioli \$5 to \$8. The dry and hot weather has played havoc with out-door stock and growers need rain badly.

The excessive heat experienced here during the latter part of May (94 to 96 degrees in the shade for a week) completely carried off all outside spring flowers and seriously threatened the killing of carnations in the field. Since then some heavy rains have saved the situation, and the plants have started to make a good growth. Memorial Day trade was the heaviest ever experienced here. Cut flowers were very scarce and of course there was a sharp advance in price, which tended to help the men who grow more pot plants than cut flowers. For the first time the school children were asked to bring pot plants to decorate the soldiers' graves, in place of cut flowers. Over 1000 were donated and many a one was thankful for the innovation, as their gardens were spared the visits of those who are not particular how they gather stolen flowers. There have been cases known where flowers have been stolen even to decorate churches.

The condition of WASHINGTON trade varies with different firms, but in the main is good. At Gude's it is stated that commencement business is up to the standard and it is anticipated that trade will keep up strong until the latter part of June, as the presence of Congress helps wonderfully to stall off the slump that occurs usually in mid-summer. Others report business slackening up on commencement work and little trade coming in from high school commencements. Children's day was generally observed in Washington by the churches which held exercises appropriate to the occasion. Flowers, palms, potted plants, and canaries which sang during the exercises, were striking features in most cases. Stock is fairly plentiful. An unusually strong demand is reported for white roses and white carnations for this time of year. Dorothy Perkins rose is coming in plentifully and is being used with fine effect in decorative work. The rains of the early part of the week have helped general conditions materially.

O. J. Olson, of St. Paul, has an excellent article on "The Care of Cut Flowers" in the "Minnesota Horticulturist" for June. The paper is illustrated, showing the proper kind of vases for various flowers, methods of packing, instructions as to time and manner of cutting, etc.

To Exhibitors and Truckers

Vegetables, salading, herbs, their cultivation for exhibition and home use. An English work by Edwin Beckett, V. M. H., F. R. H. S., Member of the Royal Horticultural Societies' Fruit and Vegetable Committee, Winner of numerous cups and gold medals in highest competition, and one of the greatest exhibitors of the age. Each vegetable is given an

Exhaustive Treatise

in a separate chapter, followed by another special chapter on each for exhibition purposes, composts, methods and treatment, also what varieties will beat others in limited packing and shipping for exhibition. Forcing of all vegetables under glass, temperature and composts. The methods of setting up collections are Mr. Beckett's own inventions and all illustrations are actual photographs taken on the show bench. The special methods of cultivation for exhibition as contained in this work, are perfectly adaptable to this country, but intending purchasers please note, the monthly calendar of seed sowing is no good here, as climatic conditions make planting seasons diverse.

A Splendid Commonsense Work

thoroughly practical, simply worded, no theories. The practice of a lifetime's success in competition. I guarantee this the greatest work ever issued on the subject of Exhibition. Nearly 400 pages.

Price, postpaid, \$2.00.

F. J. MARCH, - Jenkintown, Pa.

Landscape Gardening

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions. A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

"Saved Two Carloads of Coal; Does Not Need to Fire Boiler from 11 P.M. to 6 A.M."

Your No. 9 boiler is heating my entire range of 2 houses 18 x 132; 1 house 6 x 108; 2 houses 16 x 88; 1 house 20 x 86; 1 house 24 x 50, and will easily take care of 5000 sq. ft. more with the thermometer 18° outdoors, fires at 11.00 P. M., and not again until 6 A. M. The boiler surely is giving me perfect satisfaction. I have used one steam and five hot water boilers. I like your boiler and cannot keep still when I meet a brother florist, but must tell him about your boiler and how much it has saved me in coal bills. With my last boilers I required four to five carloads of coal to heat the same space which is now heated by your boiler with about three carloads of coal. You for another boiler when I have to buy again.

Note that the distance from the center of the rod rivet to the centre of the shafting pipe when the arm is at right angles is only $7\frac{1}{2}$ inches.

Note that when the arm is open that it has an 8-inch throw.

Note the simple construction. One bolt securely fastens it to the shafting pipe. Easy to set up,

Note that when the arm is closed that it has an 8-inch throw.

You know what an Advance ventilating apparatus is and how successful it has proved. Here is a new arm called our "twistless," which is to be used in connection with this apparatus. It has some remarkable features, a few of which are illustrated in the accompanying cuts. Under test this new arm proved itself to be 41 2-3 per cent. advantage over the elbow style. It works wonderfully. Our new catalogue will be out in a few days; get one, they are free. Don't buy before consulting us.

6000 of these new twistless arms in use at this writing and every one giving perfect satisfaction.

HYDRANGEAS

FOR SUMMER FLOWERING

LARGE PLANTS IN TUBS FOR JULY AND AUGUST FLOWERING

We have an unusually fine lot of hydrangeas, which have been held dormant all winter. These plants will begin to bloom the end of June or early in July, and are in fine shape for flowering during July and August. We can furnish these plants in ordinary tubs at \$2.00 and \$3.00 each.

Plants in new cedar tubs painted green, with handles, as follows:—

Well budded plants in 14-inch tubs, \$3.00 each
Well budded plants in 16-inch tubs, \$4.00 each
Well budded plants in 18-inch tubs, \$5.00 each

FERNS

We have an exceptionally fine lot of Boston Ferns of the Harrisii type and a splendid lot of Pierson Extra fine plants, \$1.00 each.

Ferns, good and bushy well-grown plants in 8-inch pots that will please the most critical buyer.

MISCELLANEOUS BEDDING PLANTS

ABUTILON SAVITZI. 3½-in. pots, \$8.00 per 100.

AGERATUM. Blue and white. 2¼-in. pots, \$2.50 per 100.

ALTERNANTHERA ROSEA AND AUREA NANA. 2¼-in. pots, \$3.00 per 100.

ASPARAGUS SPRENGERI. 2¼-in. pots, \$3.00 per 100.

BEGONIA VERNON. 2¼-in. pots, \$3.00 per 100.

CALADIUM ESCULENTUM. Strong started plants, \$5.00 per 100.

CANNAS. Beaute de Poitevine, Florence Vaughan, Buttercup, Mlle. Berat, Robert Christie, Souv. d'Antoine Crozy, Rohallion, Frederick Benary, L. Patry, etc. Strong potgrown plants, \$5.00 per 100.

CROTONS. Fine assortment, 3½-in. pots, \$25.00 per 100; 5-in. pots, \$6.00 to \$9.00 per dozen—according to size.

GERANIUMS. Double Grant, Trego, S. A. Nutt, Marquis de Castellane, Double Dryden, Jean Viaud, etc. Strong plants, 4-in. pots, \$7.00 per 100.

HELIOTROPE. 2¼-in. pots, \$3.00 per 100.

LEMN VERBENAS. Extra strong plants, 2¼-in. pots, \$6.00 per 100.

NASTURTIUMS. Fine plants in bloom, 3-in. pots, \$5.00 per 100.

PANDANUS VEITCHI. Fine plants, \$3.00 to \$5.00 each.

PETUNIAS. Single mixed, 2¼-in. pots, \$3.00 per 100.

SALVIAS. 2¼-in. pots, \$3.00 per 100.

Seasonable Notes on Culture of Florists' Stock

ASPARAGUS PLUMOSUS

In growing this desirable and marketable product give sufficient headroom to have fine long strings, and if possible a solid bed that has been deeply dug. Where such a bed is once planted it should yield good returns for at least four years. Place a good layer of drainage in the bottom and on this fill to the depth of at least one foot of a rich compost of equal parts of rather heavy turfy loam and old cow manure. Select sturdy plants from 4-inch pots and set the plants from 10 to 12 inches apart in the rows, and from 15 to 18 inches between the rows. When the new growth assumes the character of running vines, it is time to adjust the strings. Give regular attention in keeping them trained to the strings and the management of the beds will be an easy matter. Give plenty of water, both overhead and at the root. Red spider and thrips are some times very troublesome. A vigorous overhead syringe will keep the foliage bright and keep red spider down. Thrips can be kept down by spraying with a nicotine solution. In regard to temperature they can be treated the same as smilax.

CARE OF ASTERS

As soon as the buds begin to form and right along through their entire season, if the weather is dry, they will require great quantities of water so as to bring forth a crop of large and perfectly formed flowers. There should always be some means of giving them the hose in prolonged dry spells. A good dusting of fertilizer spread between the rows and worked in will be of great help now. For the aster beetle syringe the plants with a teaspoonful of Paris green to a pail of water every ten days until the plants begin to flower. Keep the asters in the field free of weeds and the soil loose and open by frequent hoeings. In planting the latest batch of asters select if possible a cloudy and moist day for the work.

HYDRANGEAS

Plants that were propagated last February and given a judicious pinching back should by this time be worked up into nice compact and shapely specimens. After the first week in July all pinching or stopping on young stock should be discontinued for the season, for if followed up any later it will mean a sacrifice of bloom. When grown in pots all summer they should be plunged in coal ashes outdoors and exposed to the full sun until the first frosts. See that they have water at the roots whenever they may need it. Keep shifting them as they become potbound until the last of August or the first week in September, when they should have their last shift into either 6, 7 or 8-inch pots as the difference in vigor may indicate. These plants are great feeders and should have a soil of a rather heavy nature, with a third of well-decayed manure and some bone dust in their shifts. The principal points are to

have them make a strong growth during the summer and have the wood well ripened by the fall.

PELARGONIUMS

As these plants go out of flower they will require a season of rest. Give them a place outdoors where they will have full sun and reduce giving them water gradually, so as not to encourage new growth. As the leaves naturally take on a golden color, the plants should be placed on their sides and kept dry for two or three weeks to secure a thoroughly ripened up growth. In August prune them into shape, shake all the old soil from the roots and pot into pots just big enough to hold them. Give them a coarse turfy loam with about a fourth of well-decayed manure and pot quite firmly. For good sized plants for next spring you should take cuttings now.

STOCKS FOR NEXT WINTER

To have stocks for flowering during the winter they should be sown now in pans or shallow flats of light soil with plenty of sand in it, as there is then less liability of the seedlings' damping off. They should be potted when of sufficient size, using any good soil, and placed in frames under elevated sashes to afford a free circulation of air. When the plants have filled these pots with roots they should be shifted into 4 or 5-inch pots and kept in frames until late fall. As soon as the buds can be distinguished you can tell the double ones by the point of the buds being more stubby, while the single ones will be more slender. Throw out all the single ones as soon as they can be detected, as they are almost valueless as a cut flower. Any good compost such as will grow roses or carnations, will grow good stocks. When planting set them a foot apart in the rows and about 14 inches between the rows. They can be grown in any house where the night temperature can be kept from 45 to 50 degrees; anything higher will give poor flowers. There are a number of special forcing varieties, but I like Princess Alice, and Beauty of Nice the best.

SUMMER CARE OF PALMS

A good many of the larger and tougher-leaved palms will be benefited by a short sojourn out of doors at this time of the year, if a suitable place can be found for them—one where the fierce sun and dry winds cannot damage them. Under the shade of trees is a good place. All large palms such as latania, phoenix, kentia, also ficus, dracaena, croton, aspidistra and various other large and small inhabitants of the palm house will do well outside. Plants that should not be exposed to the risks and frequent sudden changes of outdoor weather condition are aloccasias, fancy caladiums, marantas, dieffenbachias and all ferns pushing forth a new crown of fronds. As growth is very rapid now they should receive some weak cow manure water once a week. As the rains wash off the shading it will be necessary to use some more whitening as palms are very easily scorched now. Give air freely and syringe a couple of times during the day which keeps the foliage clean and assists materially in keeping down scale and mealy bug. If scale becomes troublesome there is nothing better than Aphine. It can be applied one day, and with a good pressure with the hose it will come off the next day.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Cyclamen; Orchids; Ferns for Dishes; Geraniums for Winter Flowering; Mignonette; Nephrolepis.

The Grass Seed Combine

"Kentucky Blue Grass," writes a prominent Kentucky grass-seed operator, "is showing an increase of fifty per centum over the yield of last year." "Nevertheless," he continues, "because of the operations of the Grass Seed Combine, prices ranging as high as those of last year are maintained." Intending purchasers should take their time. There will be more than enough genuine Kentucky Blue to meet the demands of the trade—more, in fact, than the average annual sale. Artificially inflated prices reduce demand and we are assured that the crop is sufficient for the usual demand at normal prices. We advise the lambs to wait.

A warning

This office has received, in two instances, recently, advertising copy from parties in France, offering French bulbs for delivery in America at prices far below what we know to be the normal market values. This was sufficient to arouse suspicion, as was also the stipulation of a large per cent. of cash in advance and, the parties being unknown to us, the advertising orders were pigeon-holed and inquiry made of reliable French exporting houses which elicited replies confirming our suspicion. One of our correspondents advises that we sound a warning to buyers of French bulbs who may be approached by these irresponsible people. It is stated that many large firms have been victimized, attracted by the low prices quoted and induced to send cash in advance for diseased or wrongly named bulbs. The game is by no means a new one but its repetition does not seem to lessen the number of victims or the audacity of the operators.

Well done

The American Seed Trade Association's very successful meeting at Marblehead this week seems to have fully demonstrated the wisdom of having selected the quaint old rocky New England coast town for this annual gathering. There were misgivings on the part of some that the remoteness of Marblehead from the centre of activity in the seed trade would have an unfavorable effect upon the attendance but in this foreboding they were happily mistaken. The unusually large number of ladies present shows that the delights of sea air and rugged shore scenery were no small factor in inducing members to make the trip from far-away Nebraska and other inland states and we have no doubt that the ladies are entitled to much of the credit for some of the pilgrimages. It is a grand tribute to any such association that men of such large business affairs, with weighty responsibilities, should consider it worth their while to travel such distances for the purpose of attending its meetings and assisting in its deliberations. The American Seed Trade Association is more strongly intrenched than ever as a potential factor in the life of the American seed trade, in consequence of this inspiring exhibition of loyal interest.

The Lure of the Iris

The fascination of a beautiful flower is resistless. We have been but recently aroused to the peculiar charms of the Iris. In fact the newer kinds were not heard of ten years ago. Iris was the goddess of the rainbow. In her garments were woven the splendors of the two worlds. This summer in my invalid chair I have watched the unfolding of beauty I never dreamed of. I have 200 kinds of the best, gathered regardless of cost. I had no comprehension of what was in store for me. If you are sick do away with your doctors and give yourself to the soothing influence of Nature. I called on our beloved Thurlow of blessed memory in his last illness. He said, "One day I was feeling very badly and hardly knew how I would get through the day. Then Susie and the boys went out and brought in armsful of peonies and placed them in full view. I tell you they almost cured me. Their smiles and fragrance were the most grateful tonics I ever had."

Dear reader, can you realize what it is for a strong man to be laid aside with the burden of disease, to go into a slow and sure decline? As one nears the four-score mark this is inevitable. But then come the compensations, and when I count my blessings there is no room for the grouch. Two sons watch over me with a motherly tenderness, a faithful wife would do too much if I did not call her off, and then comes in the soothing sympathy of Nature. The birds give me their jolliest songs. The robins come and looking out of the corners of their eyes seem to ask, "How do you do this morning?" And then my flowers—the finest earth affords vie with each other—were ever such fascinations unfolded to the light of the sun? The Irises have a charm all their own. The soft velvety beauty, the rich coloring, the exquisite pencilling and veining are past description. Here is *Perfection*, a very tall vigorous robust plant as well as a rapid, multiplier. It is yet rare and costly but is cheap at a dollar. The standards are mauve, often dashed with deeper colors, the inside showing the most exquisite veining. Falls droop outward to show those large beautifully soft and velvety petals. Their color is rich deep violet, veined and traced in the most exquisite manner.

Elegans is a winsome flower. Standards nearly white splashed with violet. These markings are striking and unusual in any flower; inner petals are light lavender. Falls are violet veined with white—one of the choicest. It is some times variable in bloom not showing up as well some years as in others. Well, my pencil seems tired. I may have more to say some other time.

C. S. Harmon

York, Nebraska.

Mushroom Pranks

Mr. Edgar's bed of mushrooms figured in last week's HORTICULTURE surely is an exception and is one of those most complicating propositions which gardeners sometimes find themselves up against. Were there a hard and fast rule which could be set for growing each individual plant or group of plants how much easier it would be and then again only one-quarter of the skill now required to produce first class stuff would be needed. Other instances have come under my notice where growers have diverged from the beaten track of growing methods and still had results. These were mostly cases of obligation there being no alternative, or the stuff in question being of a secondary consideration. Necessity is said to be "the mother of invention," but how many discoveries have been made accidentally.

To go back to the "oddities" of mushroom growing readers will remember my writing of a man who regularly spawned at 60 degrees and had results. Now, Mr. Edgar's bed goes to the other extreme. The wonder is how the mycelium lived through the heat of 110 degrees.

One may be excused for sitting back awhile and then saying these are the ups and downs of a gardener's life but one thing is *sure*—these are exceptions rather than the rule. No one would advocate their adoption for regular use; they are "100 to 1 shots." Such illustrations as these are always interesting to readers of the horticultural press. Why do not more readers of HORTICULTURE come forward as Mr. Edgar has done and give others the benefit of their experience—results which have been obtained when conditions were averse? It is only by using the columns of a widely read paper like HORTICULTURE that this end can be obtained and growers' views exchanged.

George H. Benson

Constant Inquiries as to Where Stock or Supplies can be Secured

Are made at this office. These inquiries *should* go first hand to those who can supply the need—not delayed by going through this office. But how can inquirers know where to apply unless the article they are after is advertised?

Much time and business is lost by not having your ad. before the readers of HORTICULTURE all the time—in season to let them know you have the stock, out of season to let them know you are still in business, and also so they will not forget you and go to somebody else when ready to buy.

Write our Advertising Department for rates and information.

AMERICAN SEED TRADE ASSOCIATION

It was a grand and altogether successful affair—that Marblehead meeting—and will stand in the history of the American Seed Trade Association as something delightful in memory. The quaint old New England seaside town gave the visitors an inspiring welcome with glorious weather, punctuated on the first day with a few lively showers as an evidence that Nature had come out of her contrary fit and proposed, hereafter, to do her part for high percent, germination. Quite a number of the visitors came a day or two ahead of the scheduled opening day and found themselves very much at home in the hospitable Rock-mere by the time the first session came to order at the sound of President Page's gavel. The attendance was large and there was an unusual number of ladies. The officers and every member of the executive committee were present and, as the list of members in attendance shows, the various sections of the country were well represented. D. A. Brown, of Cincinnati officiated as official stenographer.

TUESDAY MORNING, JUNE 20.

The first session opened as scheduled, on Tuesday morning, with an address of welcome and description of the various attractions and points of interest in Marblehead, by Edgar Gregory which was much enjoyed. Then President E. L. Page delivered his annual address.

President's Address.

In opening, Mr. Page extended congratulations and felicitations on the work done in the past year and the added number, strength and honor which had come to the Association. He spoke appreciably of the business connections and the close friendships developed in these annual gatherings and declared that the knowledge gained, companionship enjoyed and the privilege of contributing something to the advancement and protection of the seed trade had repaid, many-fold, the effort, the time and the money spent in attending these meetings. He continued:

State Correspondents Useful.

As recommendation number one; I would recommend that each state correspondent be instructed to look up the eligible and desirable seed firms in their state or states, and those that they can personally recommend, secure their applications for membership, if possible, and submit the same to the membership committee for action. It has always been more or less difficult for the officers of the Association, and particularly for our Counsel, to know just the person to write to in any particular state for information upon certain matters and oftentimes the right party was not written to and very often no reply received. Last year for the first time state correspondents were appointed in each state, or nearby state, and it has proven a most excellent plan. So far as I can recall, there has been but one instance of my writing to a state correspondent, without receiving a reply. Our Counsel has also found the state correspondents of great value and help. But it has added largely to his work as well as increas-

ing his efficiency. Therefore as recommendation number two, I recommend that state correspondents again be appointed for the year 1911-12.

A Prosperous Year.

The past year has been a very strenuous one for the seedsmen. Some varieties of seeds were the shortest in years, some in surplus. Some varieties were almost prohibitive in price, some were much below the cost of production. Some varieties contained too much moisture, averaged low in vitality. The season was not a normal one. Business disappointing some months—a surprise others. Our law-makers at Washington sent out as usual millions of free packets. Postmasters in some places insisting on transparent packets. Yet notwithstanding all this, I think, on the whole, the seedsmen had a fairly prosperous year.

Value of Counsel.

There were over sixty bills introduced in the different state legislatures. Recommendation number three: That Counsel be employed to represent

the suggestion of our secretary and delegate, they used but \$125, so there is really left from last year's appropriation \$75. Recommendation number four is that \$75 in addition to the \$75 left from last year, or a total of \$150 be voted to the National Council of Horticulture.

About the Disclaimer.

Some things are old, yet ever new. I do not know if this can be said of our disclaimer or not, but there is one thing certain, that at about every meeting of our Association this matter is brought up and discussed, and only recently a disclaimer was adopted that we thought to be as near perfect as possible. Now, an attorney who is said to have made commercial law a specialty says that unless the disclaimer or non-warranty clause used by seedsmen is placed on stationery between the date line and the signature it is not a part of the contract and is useless. If this is so most of us will have to make some changes and, as this is an important matter, I make recommendation number five; That a committee of three be appointed, one of which shall be our counsel, to consider this matter, and report at a future session of this meeting, if possible, but if unable to do so, report to our Secretary, who shall notify each member of the Association by mail, the findings and decision of this committee.

Seed Legislation.

I wish to say just a few words in regard to legislation affecting the seedsmen. Our Counsel will make a recommendation in his report in regard to this matter, and I wish to heartily second it. I believe the time is at hand when we must expect legislation of some kind. The farmers and grangers are clamoring for pure seed bills, and our lawmakers are ready to listen and introduce bills that will please them. I do believe in federal seed legislation—the kind that will so far as possible, protect the planter and the honest seedsmen. I believe we are bound to have seed legislation. Why not all unite in trying to get federal legislation of a kind that every seedsmen who is doing a straight, legitimate business, can honestly work under. Therefore I would earnestly recommend that some action be taken upon our Counsel's recommendation.

Deaths.

It is with regret that I am obliged to announce that our Association has been sadly invaded during the last year, and that we have lost by death more numbers than in any previous year. Mr. Chas. P. Braslan, of California, known by nearly every seedsmen, Mr. W. A. Denison of New York state; Mr. John L. Turner of the firm of Griffith & Turner, Md.; Mr. Wm. Rennie, of Canada; Mr. R. C. Steele of Steele, Briggs Seed Co., of Canada; Mr. E. L. Coy, one of our honorary members, of New York state, and our former well-known member, Mr. S. M. Pease.

In closing I wish to thank the members of the Executive Committee for the work and help they have given me, also all of the various committees and state correspondents, some of whom

E. L. PAGE

President American Seed Trade Association.

this Association and its members and, if the present Counsel can be engaged at a satisfactory fee, that he be engaged for another year. His services, so far as I know have been entirely satisfactory to the Association and its members. He has been prompt, energetic and successful. He has made a study for our business and of legislative matters affecting the seedsmen and is without doubt the best posted man along these lines in the country.

Council of Horticulture.

There is no question but what the National Council of Horticulture are doing a good work and should be supported. Some of our members in the past have not favored making an appropriation to this Council, but I am inclined to think that it is a lack of knowledge of what this Council is doing and accomplishing, that makes them so feel. At our last meeting we voted an appropriation of \$200 but at

have spent much time and of their means liberally, for the benefit of this Association, as well as all other seedsmen, and, as I have said in your hearing before, no matter who you elect for your President, no one man can do all the work, and in fact can do but little of it. Most of it must be done by the various officers, committees and members, and no matter whether you are an officer, member of a committee or not, each of you have, or should have a work to do, and if that duty is well done, the Association will go on from year to year, as it has in the past increasing not only in members but in quality, power and achievements.

SECRETARY-TREASURER'S REPORT.

Secretary-Treasurer C. E. Kendel made a detailed report of the minutes of his office for the year, a summary of which showed that the receipts had been \$2526.16 and disbursements \$2453.20. The membership up to the opening of this meeting numbered 164.

Committees.

The president appointed the following special committees: On president's address—Leonard H. Vaughan, W. S. Woodruff, J. Chas. McCullough. On obituary—Charles N. Page, H. W. Wood, W. H. Barrett. Audit—S. F. Willard, J. C. Robinson, J. Chas. McCullough.

Miscellaneous business matters occupied the balance of the session.

TUESDAY AFTERNOON.

Soils and Fertilizers.

The afternoon session opened with the reading of a paper on the Relation of Soils and Fertilizers to Seed and Crop Failures, by Dr. H. J. Wheeler of the R. I. State College. Dr. Wheeler spoke at length on the adaptation of weeds, grasses and miscellaneous farm crops to certain types of soil. He told of twenty years' systematic studies carried on at Kingston, R. I., of the effects of natural soil conditions and of artificial cropping and manuring upon the fate the various seeds and seedlings. He reasoned that questions of proper soil conditions and the selection of fertilizers adapted to the maintenance of certain crops may often be of vital importance to the reputation of the seed grower, seed jobber and seed dealer. In fact, it would be well if seedsmen were so fully informed on points connected with soils and fertilizers that they could advise purchasers wisely in order that they might make good use of their seeds.

Departments of the Seed Business.

W. D. Ross of Worcester, Mass., then read a paper on the advisability of carrying "side lines" in the retail seed store. He favored department store methods, and recommended the carrying of a large variety of goods in order to meet the demands of the public according to the business methods prevailing generally at the present time. Agricultural and garden implements, poultry supplies, bee supplies, nursery stock, bulbs and plants, fertilizers, insecticides, etc., would all tend to help through the dull season. All this, of course, should be under the direction of good department managers.

Seed Legislation.

Curtis Nye Smith, counsel for the

Association gave a talk on seed legislation and the best way of combatting same. Dr. C. D. Woods of the Maine Agriculture Experiment Station followed, and deprecated the use of the term "combat." He said the best way to handle a fractious mule is to get so close to the mule that he can't kick. In like manner the seedsmen should get close to the men whose duty it is to legislate. He believed that seed legislation would eventually be looked upon as a good thing for the seed trade. Dr. Woods' views were received with applause and merriment.

Reciprocity.

George H. Clark of Ottawa was called upon for some remarks on reciprocity with Canada, and the probable effect of free peas. He excused himself from expressing any opinion on reciprocity, other than to say he thought it would be a mutual advantage. As to peas he said that the districts of northern Ontario are admirably suited to pea growing, the severity of the climate being death to the weevil. He believed that a well managed seed laboratory would do much to insure wise seed legislation. In nine cases out of ten of complaint as

LEONARD H. VAUGHAN
President-elect American Seed Trade Association.

to vitality, he had found that the fault laid with the farmer himself.

N. B. Keeney thought that reciprocity would not make much difference either way to the seed trade, and S. F. Leonard expressed himself as satisfied that reciprocity would prove beneficial.

Purity and Germination—Their Relative Value.

Dr. Chas. D. Woods being called upon on the above topic, replied that the demand for vitality is much more widespread and insistent than that for purity, in seed tests. The trade should regard the question of vitality percentages as a very serious one, which the laboratories have thus far failed to solve. Results widely divergent follow the lack of uniformity of method, and until some basis of uniform testing has been reached, everything possible should be done to retard legislation on this line. As soon as uniform results from the various testing stations are assured then the seedsmen can say "go ahead." As to purity, how-

ever, he thought the trade could well stand on its record.

F. W. Bolgiano followed Dr. Woods with some remarks on the "purity" question. He believed a central testing bureau, conducted by disinterested parties, would be a great help for the seedsmen. F. H. Ebeling spoke of the difficulties that would be encountered in carrying on germination testing, under extraordinary conditions, such as have prevailed this season.

A paper on Improvement in Grains, by Prof. R. A. Moore of Madison, Wis., was read, but Prof. Moore was not able to be present.

Dr. Wheeler extended an invitation to the members to visit the R. I. State College at Kingston on their way home.

On Tuesday evening a social good time was enjoyed, with music and dancing, etc., in the parlors of the Rockmere. The Wholesale Grass Seed Association in the meantime held a special meeting.

WEDNESDAY MORNING.

Seed Potatoes.

After a number of committee reports, etc., Prof. Chas. D. Woods, Director of the Maine Agricultural Experiment Station at Orono, read a paper on the "Proper Growing and Handling of Seed Potatoes." This was a very interesting paper and provoked considerable discussion. Prof. Woods stated that whatever criticism his remarks conveyed was directed, not against the handler, but against the grower, who could do much better if he were to try. The growers fail to use the best potatoes for seed and they store their stock badly. Secretary Kendel and F. C. Woodruff participated in the discussion, Mr. Kendel considering the methods of cold storage and favoring ice storage as against artificial refrigeration and Mr. Woodruff going on record as prophesying that Maine potatoes would surely lose their prestige if the growers were not careful.

Peas and Beans.

C. N. Keeney, of Le Roy, N. Y., then took the platform with a paper on "Peas and Beans; Future Probabilities and Cost, Supply and Demand." There was no discussion on Mr. Keeney's paper and on its completion adjournment was made.

WEDNESDAY AFTERNOON.

Wednesday afternoon's session was "Executive" and no public report of the proceedings will be permitted. Telegraphic crop reports were a prominent feature of the meeting, coming as they did from widely separated sections, and much interest was manifested in this feature which was of increased volume as compared with last year and was replete with practical information for the members. On adjournment the visitors went—some to the ball game and others to a boat ride in Marblehead harbor.

THE BANQUET.

The banquet at the Rockmere on Wednesday was a most delightful social affair. Many of the ladies were beautifully gowned in honor of the occasion. The hotel did its part right royally. After the coffee, President Page took charge of the exercises and in an eloquent manner expressed his gratification at the success of the

meeting and warmly welcomed the guests. He called severally upon the following gentlemen, all of whom responded in good style with stories and wit until the midnight hour: Messrs. L. H. Vaughan, G. H. Clark, F. C. Woodruff, Harry L. Holmes, J. Lewis Ellsworth, F. H. Smith, W. C. Langbridge, C. F. Wood, S. F. Willard, E. F. Dibble, Linnaeus Allen, C. N. Keeney and F. C. Woodruff, the latter gentleman making the presentation speech accompanying a handsome gold watch to the retiring president amid much enthusiasm and applause. Watson Woodruff read some original poetry on the ball game.

THURSDAY MORNING.

Most of the session of Thursday morning was executive. Papers were read on the Distribution of Fungous Diseases by Seed, by Dr. E. Mead Wilcox, and on the Importance of Live Breeding in the Establishment of Varietal Forms Suited for Special Conditions, by Dr. W. W. Tracy.

The committee on obituary and other special committees made their reports. On motion of Kirby B. White a resolution was unanimously passed calling upon Congress to investigate charges publicly made that the seed trade had been guilty of fraud in importations.

ELECTION OF OFFICERS.

Officers for the ensuing year were elected as follows:

President, Leonard H. Vaughan of Chicago; first vice-president, Marshall H. Duryea, New York City; second vice-president, Edgar Gregory, Marblehead, Mass.; secretary-treasurer, C. E. Kendel, Cleveland, O.; executive, J. H. Ford, E. L. Page, Kirby B. White, C. C. Massie, Henry Nungesser, C. F. Wood.

THAT BALL GAME.

The Grass Seed men and the Garden Seed met on the diamond, Wednesday afternoon, and displayed their respective knowledge of the fine points of the national game. Gordon F. Wood pitched for the Grass Seed contingent, and C. Herbert Coy for the Garden Seed bunch. The catchers were Mr. Hammond and Linnaeus Allen respectfully. Some said that the game was well played on both sides; others asserted that the entire playing was done by the men in the box. All agreed that it was a most inspiring spectacle. When the dust cleared away it was announced that the Grass Seed men were the victors by a score of 3 to 0, and thus it is recorded.

MEMBERS PRESENT.

Following is a partial list of those in attendance. Very many of them were accompanied by wives and daughters.

E. L. Page, Greene, N. Y.; Leonard H. Vaughan, Chicago; C. E. Kendel, Cleveland, O.; J. C. Robinson, Waterloo, Neb.; C. N. Page and F. H. Page, Des Moines, Ia.; S. F. Willard, Wethersfield, Conn.; S. F. Leonard, Chicago; Kirby B. White, Detroit, Mich.; A. W. McCullough, Cincinnati; F. W. Bolgiano, Washington, D. C.; J. E. Tracy, Washington; B. Hammond Tracy, Welham, Mass.; Alex. Forbes, New York; C. Herbert Coy, Valley, Neb.; F. P. Kiser, Paris, Ky.; Henry Rix, Omaha, Neb.; H. W. Johnson, Phila.; H. Anthony, Portsmouth, R. I.; O. H. Dods, Boston; F. H. Smith, Norwich, Conn.; C. H. Breck, Boston; E. H. Dibble, Honeyc Falls, N. Y.; W. D. Ross, Worcester, Mass.; J. A. Smith, Toledo, O.; W. E. Stone, Toledo; L. L. Olds, Madison, Wis.; W. D. Steele and E.

F. Crossland, Toronto, Ont.; G. B. Edger-ton, Buffalo; W. S. Phillips, Toledo; C. A. Boller, Rochester, N. Y.; H. Stimmers, Toronto; Ammi Whitney, Portland, Me.; W. B. Currie, Milwaukee; F. W. Eberle, Albany, N. Y.; F. H. Ebeling, Syracuse, N. Y.; H. J. Wheeler, Kingston, R. I.; Curtis Nye Smith, Boston; Wm. J. Stewart, Boston; Jerome B. Rice and W. C. Langbridge, Cambridge, N. Y.; A. N. Clark, Milford, Conn.; W. H. Barrett, Adrian, Mich.; C. B. Coe, Detroit, Mich.; H. W. Wood, Richmond, Va.; Frank Howard, Pittsfield, Mass.; B. F. Brown, Fitchburg, Mass.; L. H. Williams, Norfolk, Va.; J. W. May, Alexandria, Va.; B. W. Delaney, Pittsfield, Mass.; D. A. Brown, Cincinnati, O.; C. S. Briggs, Rochester, N. Y.; Chas. McCullough, Orange, Conn.; J. Chas. McCullough, Cincinnati; A. B. Clark, Green Bay, Wis.; B. C. Cornell, St. Louis, Mo.; W. G. Scarlett, Baltimore; C. F. Wood, Louisville, Ky.; A. E. Reynolds, Crawfordsville, Ind.; F. W. Jaeger, Toledo, O.; Burnett Landreth, Bristol, Pa.; E. J. Sheap, Jackson, Mich.; H. Perkins, Chicago; J. H. Ford, Ravenna, O.; C. N. Keeney, Le Roy, N. Y.; W. S. Griffith, Baltimore; Sam. M. Sibley, Baltimore; W. H. Woodruff, Orange, Conn.; F. G. Johnson, Jackson, Mich.; H. G. Hastings, Atlanta, Ga.; Geo. H. Clark, Ottawa, Ont.; H. A. Sulthorp, Port Hope, Ont.; Linnaeus Allen, Floral Park, N. Y.; O. P. Beckley, Harrisburg, Pa.; L. A. Kelley, Cleveland, O.; F. S. Platt, New Haven, Conn.; F. S. Plant, Webster Grove, Mo.; C. D. Woods, Orono, Me.; O. J. Barnes, Malone, N. Y.; W. W. Barnard, Chicago; I. L. Radwaner, New York; Harry Holmes, Harrisburg, Pa.; Francis Brill, Hempstead, N. Y.; Wm. Rehm, New York; Albert Dickinson, Chicago; Henry Nungesser and M. H. Duryea, New York; L. B. Shoulter, Houston, Texas; Knud Gundestrup, Chicago; F. S. Plant, Webster Grove, Mo.

WHITE BANKSIA ROSE.

The value of this rose in California is well-shown in the accompanying illustration, which we have received from J. A. DeL. Bray, gardener at Eden Vale Park, Eden Vale, Cal. The plant, which has climbed to a height of 60 feet, on a white oak, is 19 years

old and is one of the sights of the park. The picture was taken about May 15, this year. The park as a whole is beautifully laid out, with palm garden, Japanese garden, Chinese arbor, etc., and all kept in fine condition under Mr. Bray's care.

Boston, Mass.—J. B. Velie, Boston manager for Lord & Burnham Co., was operated on for appendicitis, June 20th. The operation was very successful and it is expected that Mr. Velie will be in the office in ten days or two weeks. Until he returns, T. B. De Forest of the New York office will be in charge.

BRITISH HORTICULTURE.

A Rhododendron Display.

The interior of the Royal Horticultural Society's fine hall in London, was lately transformed into an immense rhododendron garden, through the enterprising efforts of Messrs. John Waterer & Sons, of The American Nurseries, Bagshot, Surrey. This noted firm for some years past have made a specialty of rhododendrons, which are grown to perfection in their picturesque Surrey nurseries. The whole of the floor space of the hall was tastefully arranged with floral beds. There were altogether about 1,000 rhododendrons in all their brilliance, 100 varieties being represented, interspersed with a splendid array of Japanese maples, kalmias, palms, etc. Some of the firm's latest introductions were to be seen, besides a selection of the varieties which have now gained a world-wide fame. Prominence was given to an imposing plant of Lady Eleanor Cathcart, standing 10 feet high and carrying about 300 trusses of bloom. The flower is of a bright clear rose tint, with crimson spots. Following their annual custom, early in June Messrs. Waterer also arranged a display in the Royal Botanic Gardens, Regent's Park. Once again they demonstrated the striking effects which can be produced by grouping some of the best known kinds. The exhibition was visited by a fashionable assemblage, and on all sides there were the highest eulogies for the beautiful effect produced. The firm are to be congratulated on the success which attended the special displays, and on their enterprise in extending the popularity of these fascinating flowering shrubs.

A Norwich Flower Show.

In connection with the annual show of the Royal Agricultural Society, to be held this year at Norwich, at the end of June, an extensive horticultural exhibition has been arranged. A valuable collection of orchids will be contributed by Sir Jeremiah Colman and Messrs. Cypher. A new and interesting feature will be a decorative display of ripe fruit. Another new class will be a display of herbaceous flowers, bamboos, lilliums, and foliage arranged for effect. Carnations will be seen in profusion from well known growers. A special marquee will be set apart for sweet peas, and here the latest introductions will be seen. Roses will likewise be a strong feature. Messrs. Hobbies are constructing an artistic rose pergola. Alex. Dickson & Sons are sending a collection of their new hybrid and seedling roses. One section will be devoted to a display of hardy and aquatic plants. There is to be a good array of fruit trees in pots, from the Kings Acre Nursery, who are in addition making an enterprising show this summer at the Festival of Empire at the Crystal Palace.

W. H. ADSETT.

American Photography for June has some very fine examples of tree and flower photography, with useful papers on this topic, by William S. Davis and Roy J. Sawyer. Richard Penlake has a contribution on photographing botanical specimens.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS
AND ORNAMENTAL HORTICULTURISTS.

At the Mid-Lent meeting of the Society of American Florists and Ornamental Horticulturists the following appropriations were made for the year 1911:

Tariff work of the Legislative Committee, \$100.00; general work of the Legislative Committee, \$100.00; entomologist, \$50.00; pathologist, \$50.00; botanist, \$50.00; annual badges, \$75.00; clerical assistance to Secretary at annual convention, \$50.00; clerical assistance to Secretary at adjourned meeting, \$25.00; sports committee, \$50.00; President's messenger and assistants, \$25.00 or so much of such amounts as might be needed.

Attention should be called to the work of the entomologist, pathologist and botanist. Prof. H. H. Whetzel of Cornell University is the pathologist and has taken up the study of certain plant diseases upon which he will report at the August meeting. Dr. S. A. Forbes, the entomologist, being unable this past year to give the work the proper amount of time, placed it in the hands of Mr. J. J. Davis who presented the report given on pages 34 to 42 of the Twenty-sixth annual report. This is well worth studying. The botanist, Prof. J. F. Cowell, is always ready to help the members on any botanical question. I call your attention to the work of these officers as it is well worth your support.

At the same meeting, on motion by Mr. Pierson, seconded by Mr. Kasting, the adoption of the following amendment was recommended to the Society:

To amend Article IV. Section 2, to read as follows:

Sec. 2. Fees and Assessments.—Any eligible person may become a member of the Society on the payment of \$5.00, and such payment shall cover the annual dues for the balance of the calendar year. The annual dues shall be \$3.00 per year, payable in advance on the first day of January. Any person may become a life member on payment of \$50.00 and be exempt from all further assessments.

The object of this amendment is to make it possible for any person to become a life member of the S. A. F. on the payment of \$50.00 irrespective of the fact that he is already a member or not.

A rate of 13-5 on the certificate plan has been granted by the Trunk Line Association. The New England, the Central and the Eastern Canadian are still to be heard from. Further information regarding rates will appear later.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the roses, "Ruby Queen," "May Queen," "Pearl Queen" and "Royal Cluster," by The Conard & Jones Company, of West Grove, Pa., becomes complete.

H. B. DORNER, Sec.

June 15, 1911.

MINNESOTA HORTICULTURISTS.

The annual mid-summer meeting of the Minnesota State Horticultural Society was held at University Farm, St. Anthony Park, June 15th. Between three and four hundred interested horticulturists and ornamental gardeners

were in attendance. The exhibit of flowers was not quite as large as usual, owing to the extreme earliness of the season. The Jewel Nursery, of Lake City, and the Hoyt Nursery, St. Paul, each made fine showings of peonies and roses. Some forty varieties of peonies were shown by each nursery. Roses were of better quality than usual and of greater variety. A good number of perennials, such as canterbury bells, delphiniums, forget-me-nots, and lilies, were also shown. At noon those in attendance enjoyed a picnic dinner on the campus. The afternoon session consisted of impromptu talks by a large number of practical horticulturists present. This meeting seemed to be characterized by the large attendance of older horticulturists and fruit growers of the state, as well as a large number of members of the Rose Society.

Collections of strawberries were shown by Wyman Elliott, A. Brackett, Mrs. S. R. Spates and Thomas Redpath. This fruit was of fine quality and size. The strawberry crop generally throughout the state is very light, although there is promise of a good crop of apples, plums, grapes and raspberries. The fruit experiment station of the University showed a large number of seedling strawberries, some of good promise, and a few hybrid plums, cherries, peaches, etc., which had been raised in the greenhouse.

NATIONAL SWEET PEA SOCIETY
OF AMERICA.

Program.

First Day. Thursday, June 29th, 1911. 3 P. M.—Address of welcome; President Burpee's address; secretary's report; nomination of officers for 1911; invitations for the next meeting place; paper by Leonard Barron, New York managing editor of the Garden Magazine, "The History of the Sweet Pea"; election of officers.

7 P. M.—Vote on the next meeting place; paper by Prof. Craig or Mr. Beal, Cornell University, Ithaca, N. Y.; addresses and discussions.

Second Day. Friday, June 30th, 1911. 11 A. M.—Question box; unfinished business.

Afternoon—On the invitation of Mr. W. Atlee Burpee, the members of the National Sweet Pea Society will visit the trial grounds of W. Atlee Burpee & Co., at Fordhook Farms, Doylestown, Pa.

NORTH SHORE HORTICULTURAL
SOCIETY.

The regular meeting at Manchester, Mass., of the North Shore Horticultural Society on June 16th was the last till September 15th. A committee was appointed to arrange for a picnic probably August 30th. A delegation from the Boston Gardeners' and Florists' Club is expected to attend. It is to be a basket picnic. The Society voted to furnish coffee, ice cream and punch. Considerable business was transacted. A discussion committee was appointed for the following year and a vote passed that the Society put a float in the July 4th parade.

ROBERT A. MITCHELL, Sec'y.

NASSAU COUNTY HORTICULTURAL
SOCIETY.

The summer exhibition of the Nassau County Horticultural Society was held in connection with the regular monthly meeting at Glen Cove, N. Y., Wednesday evening, June 14. Despite the heavy rains just previous to the show there was quite a good display. Messrs. Duthie, Marshall and Johnstone were the judges and their decisions were as follows:

Collection of T. and H. T. roses—1st, Mrs. B. Stern, gardener G. Auger; 2nd, Mrs. H. L. Pratt, gard. H. Gaut. Var. H. P. roses—1st, Mrs. B. Stern; 2nd, Capt. J. Delemar, gard. R. Marshall. Var. T. and H. T. roses—1st, Mrs. B. Stern; 2nd, Mrs. H. L. Pratt, gard. F. O. Johnson. Vase of H. P. roses, 1 var.—1st, Mrs. Bucknall, gard. Geo. Barton; 2nd, Capt. J. Delemar. Vase of H. T. roses, 1 var.—1st, Mrs. B. Stern; 2nd, Mrs. H. L. Pratt. Collection of Rambler roses—Mrs. H. L. Pratt, 12 sprays Rambler rose, 1 var.—Mrs. B. Stern. Collection herbaceous flowers—Mrs. H. L. Pratt. Vase of peonies—Mrs. Bucknall. Vase perennial delphinium—Mrs. H. L. Pratt. Vase of snapdragon—Mrs. H. L. Pratt. Vase of flowering shrub—J. H. Otley, gard. Jas. McDonald. Vase of ornamental foliage—Mrs. B. Stern. Six var. vegetables—1st, A. G. Hodenpyle, gard. F. Petrocchia; 2nd, J. H. Otley. Lettuce—1st, A. G. Hodenpyle; 2nd, F. S. Smithers, gard. V. Cleres. Cauliflower—Capt. Delemar. Six var. strawberries—Felix Menze. Twelve largest strawberries—Mrs. H. L. Pratt. Dish any other outdoor fruit—Mrs. H. L. Pratt.

A certificate of culture was awarded T. A. Havemeyer, gard. A. Lahodny, for a very fine display of peonies and hydrangeas; also to F. S. Smithers for cucumbers and to A. G. Hodenpyle for mushrooms. Hon. mention to John F. Johnstone for Trachelium coeruleum; also to F. Petrocchia for lettuce.

Mrs. B. Stern of Roslyn has offered a silver cup for a collection of dahlias at the dahlia show. As there was no competition for the prize which J. Ingram offered for sweet peas at this show Mr. Ingram again offered it for competition at the July meeting for 12 varieties sweet peas, 25 sprays of each. The Society's prize will be for sweet peas, 25 pink, 25 white, 25 any other color.

PENNSYLVANIA HORTICULTURAL
SOCIETY.

The regular monthly meeting of this Society was held on Tuesday evening last. The business done was chiefly pertaining to the Sweet Pea exhibition which will be held on the 29th and 30th. Harry A. Bunyard, of New York, secretary of the National Sweet Pea Society, was present, and brought with him the completed schedule, which contains upwards of \$500.00 in prizes in addition to quite a variety of silver cups. Some of the members present thought that the dates were a little too early, but after considerable discussion the dates as arranged by the Sweet Pea Society were adopted. The outlook for the exhibition is very good. W. Atlee Burpee & Co. alone, will fill a space of 400 square feet with their exhibit. The exhibition will be open from 3 P. M. to 10 P. M. on the 29th, and from 10 A. M. to 6 P. M. on the 30th.

W. Atlee Burpee & Co. made an exhibit of sweet peas at this meeting for which they were awarded special mention. The exhibit included some very fine seedlings, among them being a seedling from King Edward 7th, and

also some double flowers of a beautiful shade of pink. Among their exhibit was also an English variety of orange shade which no doubt will be a very desirable addition to the sweet pea family.

Robert Craig was selected to make the address of welcome at the opening session of the Sweet Pea Society.

DAVID RUST, Secretary.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Ladies' Night, looked forward to with ecstatic anticipation by the lads and lassies of horticultural Greater Boston, was celebrated on Tuesday evening, June 20, in a style befitting an organization which has reached its quarter centennial and counts among its family not only some of the most proficient flower and plant men in the world, but also as attractive and fascinating a lot of youthful ladies, regardless of age, as can be found anywhere. On Ladies' Night they all turn out in best attire, all ready to applaud and encore those who seek to entertain them with music, recitation or dance, do credit to the caterer's viands, trip the "light fantastic," or listen with heroic patience while the secretary's minutes, the reminiscences of the oldest inhabitant, or other routine stuff is imposed upon them.

There must have been four hundred or more members, wives, sisters, daughters and sweethearts present on this occasion, and it was pronounced by all to be "the best ever." President Miller was beaming, and his trusty staff of assistants were "right on the job" from start to finish. In the routine club business Mr. Downs reported that the annual picnic had been arranged for July 26, at Caledonia Grove, and asked for a big attendance on that occasion. A communication from Frank H. Traendly was read, inviting the Boston party to join with the New Yorkers on the convention trip to Baltimore. A vote of thanks was accorded. W. J. Stewart, Thos. J. Grey and Kenneth Finlayson were appointed a committee to prepare resolutions on the death of F. R. Mathison. Then came the entertainment, consisting of piano solos by Raymond Pugh, songs by Miss Batley, C. E. Tasker and F. E. Littlefield, recitations by Miss Hayes, and highland dancing by Misses Nellie and Jeannie Irvine, all of which were of a high order of merit, and enthusiastically encored. Interspersed were talks by Wm. J. Stewart, first president of the Club, C. W. Parker, president of the Mass. Horticultural Society, Secretary Parsons of the North Shore Horticultural Society, and Ex-president Thos. H. Westwood. Refreshments and dancing followed. Hutchins' Orchestra furnished the music.

On account of roses being late the Newport Horticultural Society has postponed its exhibition from June 22nd and 23rd to 27th and 28th.

Reports from France on various nursery stocks indicate that there is a great scarcity in cherry and plum seedlings, and in Manetti rose stocks, the late frosts having done much injury.

AMERICAN ASSOCIATION OF NURSERMEN

The 36th annual meeting of this association was held at St. Louis, Mo., on June 14, 15, 16. A large trade exhibit was held on the ground floor and the meeting on the second floor of the Southern Hotel. Secretary John Hall's book showed that four hundred delegates were in attendance. The trades exhibit was in charge of J. W. Schuette, who had everything in readiness when the convention opened. The meeting was opened by President Stark, who introduced Mayor Kreismann, who made a short speech of welcome. He was followed by J. W. Hill of Des Moines, Iowa, in response. This was followed by President Stark's address. This finished, the reports of Secretary Hill and Treasurer Yates, both of Rochester, N. Y., were heard. Then came the reports of the following committees: Transportation, D. S. Lake, Shenandoah, Iowa, and C. M. Sizemore, Louisiana, Mo.; legislation, east of Mississippi River, Wm. Pitkin; west of the Mississippi, Peter Youngers, Geneva, Neb.; tariff, Irving Rouse, Rochester, N. Y.; co-operation with entomologists, J. W. Hill, Des Moines, Iowa; publicity, Orlando Harrison, Berlin, Md.; co-operation with fruit growers and associations, J. M. Irvine, St. Joseph, Mo.; trade opportunities, Jefferson Thomas, Harrisburg, Pa.; nurserymen's share on civic improvements, J. Horace McFarland, Harrisburg, Pa.; membership, John Watson, Newark, N. Y.; root gall, E. A. Smith, Lake City, Minn.; entertainment, F. A. Weber, St. Louis.

The afternoon was taken up by a visit to the Missouri Botanical Garden. The evening session was devoted to a meeting of state vice-presidents, also of the Nurserymen's Protective Committee and the American Retail Nurserymen's Protective Association.

At Thursday's session John H. Dayton of Painesville, Ohio, was elected president; W. H. Wyman, of North Abington, Mass., vice-president; John Hall, of Rochester, re-elected secretary, and C. L. Yates re-elected treasurer. Members elected to the executive committee were E. M. Sherman, H. B. Chase and J. M. Pitkin. A number of interesting papers were read. The afternoon was spent by the delegates and their ladies visiting points of interest throughout the city.

Friday's session was well attended. "How to Extend Our Wholesale Markets," by E. S. Welsh, Shenandoah, Iowa; "How to Extend Our Retail Markets," J. M. Pitkin, Newark, N. Y., and F. H. Stannard, Ottawa, Kans.; "Our Mailing Lists—Who are Entitled to Them?" by E. W. Kirkpatrick, McKinney, Texas, and J. Parker, Tecumseh, Okla.; "Our Mailing Lists—Should They be Classified?" C. J. Maloy, Rochester, N. Y., and N. J. Robinson, Bedford, Mass.; "Our Mailing Lists—How Best Kept Up to Date," by C. J. Brown, Rochester, were among the papers present-

ed. The afternoon was spent on board the steamer Alton for a trip down the Mississippi River to Jefferson Barracks, where the visitors were lavishly entertained.

Resolutions were adopted which will be sent to both houses of Congress, protesting against the passage of the Howard bill, which proposes to put a quarantine on all seedlings and nurserymen's imports from France and other foreign countries. Resolutions were also adopted favoring a federal inspection law. State inspection, now in effect, was approved. The legislative department was authorized in the different states to make test cases of state inspection laws. Protests were entered against state inspectors in Colorado and Montana condemning and destroying large numbers of trees, in enforcement of the state inspection law. The parcels post and 1-cent postage were favored. The tariff schedule for seedlings was approved by the delegates. Seedlings under four years are admitted under the free list and on those over, 25 per cent. ad valorem duty is charged.

Boston was chosen as the place for the convention of 1912.

THE SHAW BANQUET.

The twenty-second annual banquet of the Missouri Botanical Garden, provided for in the will of Henry Shaw, was held on the evening of June 15, in honor of the visiting nurserymen in the Southern Hotel, St. Louis. Nearly all of the 400 delegates were present.

William Trelease, director of Shaw's Garden, presided as toastmaster. He introduced the first speaker, J. H. Dayton of Painesville, Ohio, president-elect of the association, who spoke on "Our Guests." Mr. Dayton accounted for his election on the ground that the association has adopted the custom of electing its officers on the basis of personal beauty rather than oratorical power.

"Ourselves" was the second toast, and was responded to by Adolph Jaenicke. J. J. Beneke, secretary of the St. Louis Florists' Club, responded to the toast "Our Quarter-Centenary." "Our Parks" was responded to by Dwight F. Davis, park commissioner of St. Louis; "Our Opportunities," by J. W. Hill of Des Moines, Ia.; and "Our Plans" by John H. Gundlach, president of the City Council. Mr. Gundlach outlined for the visiting delegates some of the plans on foot for beautifying St. Louis. Dr. J. C. Whitten, professor of horticulture in University of Missouri, spoke last.

The "Technical Educator" devotes a large portion of its issue for May to views on Rochester, N. Y., and notes thereon, naming it the "Highland Park Edition." Many beautiful avenues, private grounds and views in parks are included in the illustrations, such as the residence of W. C. Barry, office of Ellwanger & Barry, etc. A fine portrait of Mr. Barry is given in connection with a paper by that gentleman on The Lamberton Memorial Conservatory.

BOBBINK & ATKINS

WORLD'S CHOICEST FLORIST AND NURSERY PRODUCTS.

We are growing in our greenhouses and in our 250 acre nursery a large variety of material constantly in demand by florists. Our Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

B. & A. SPECIALTIES.

PALMS, BAY TREES, BOXWOOD AND HARDY HERBACEOUS PLANTS, EVERGREENS, ROSES, RHODODENDRONS, VINES AND CLIMBERS, AUTUMN BULBS AND ROOTS, CONIFERS, PINES.

Florists are always welcome visitors to our nurseries. We are only a few minutes from New York City; Carlton Hill station is the second stop on Main Line of Erie Railroad.

Nurserymen and Florists

Rutherford, N. J.

During Recess

New York Bowlers.

On Friday, June 16, the scores were unusually good and great expectations as regards the Baltimore trophies are rapidly taking form. Read the following:

Ch'dwick,	170 184 203	Manda,	151 164 164
Rickards,	133 134 158	D'n'ld's'n,	163 264 166
Kakuda,	176 154 146	Scott,	162 147 175
Nugent,	111 114 122	Shaw,	183 157 159

Chicago Bowlers.

Scores for June 13, were as follows:

Pyfer,	92 93 92	Graff,	166 158 160
Wolf,	157 163 181	Byers,	142 169 161
Sch'sm'n,	142 162 153	Fink,	85 96 122
Asmus,	209 203 216		

Kraus,	200 131 122	J. H'b'n'r,	196 160 177
Schultz,	146 168 144	Olsen,	137 193 189
Vogel,	108 114 153	A. H'b'n'r,	145 119 137
Lorman,	173 192 137		

At this game Geo. Asmus made a three-game average of 209 1-3, which is 2-3 higher than that made by A. Fischer last winter and the highest record made within the memory of the team.

The Chicago Carnation Co.'s baseball team played the Marley team Sunday and beat them 11 to 7. Next Sunday they will play against the Lockport team. They have applied for the Highland Park diamond for the season.

Wednesday, June 28, is the date for the annual "Outing" of the New York Florists' Club. Chairman J. S. Fenrich of the Outing Committee has sent out the last call for "All Aboard," the time of sailing being 9.30 A. M. at the East 24th street pier. Those who expect to go should send for tickets at once so that the probable number in attendance may be known and proper provision made for the entertainment and comfort of all.

The management of the Michell baseball team will be pleased to hear from any seed or florists' association having teams in the field, to fill one vacant date each in July and August.

The employees of the Henry F. Michell Company have organized their baseball team for 1911 and the follow-

ing officers have been selected: President, F. J. Michell, Jr.; manager, Maurice Fuld; captain, T. A. Eadon. Games have been scheduled with teams representing Henry A. Dreer, William Henry Maule, Robert Craig and John Burton.

PERSONAL.

David Welch, of Welch Bros., wholesale florists, of Boston, will sail for a trip to Europe, on the Franconia from Boston, June 27.

C. N. Page, president of the Iowa Seed Dealers' Association will start soon for a European trip. He expects to be away about six weeks.

Walter Edmond Eglington has taken charge of the orchid department of P. A. Carbone of Berkeley, Cal., one of the largest orchid establishments on the coast.

Paul Klingsporn, salesman for Berger Bros., Philadelphia, was married on the 17th, to Miss Gherke of Chicago. After the honeymoon at the Delaware Water Gap, the couple will reside at Oak Lane, Philadelphia.

The marriage of Miss Lillian C. Fuller and Dr. Percival N. Nordgren is announced for next Wednesday evening, June 28, at the home of the bride's parents, Mr. and Mrs. Joseph Fuller, Leominster, Mass.

Alex. P. Dewar of R. & J. Farquhar & Co.'s seed store, Boston, sailed for Europe, accompanied by his family, on the Zealand of the White Star Line from Boston, on Tuesday, June 20. Mr. Dewar will be absent for several months.

St. Louis visitors: E. G. Hill and E. H. Mains, Richmond, Ind.; F. H. Wild of Sarcoxie, Mo.

Boston visitors.—Wm. Rehm, representing L. Daehnfeldt, Odense, Denmark; R. J. Irwin, of Skidelsky & Irwin, L. Daehnfeldt, Odense, Denmark, Philadelphia, Pa.; D. F. Roy, Marion, Mass.; E. J. Harmon, Portland, Me.; Joseph Fuller, Leominster, Mass. Also a legion of seedsmen going to or returning from the Marblehead Convention.

When we buy bulbs abroad they are paid for in pounds sterling instead of in dollars. When you go abroad your banker gives you a Travellers Credit on London—not on New York, and you likewise pay tribute to England, whether you travel in Japan or Australia. This is because London is the banking center of the World. When the Bank of England changes the rate of interest, the World sits up and takes notice. Now the Bank of England was founded by a Scotchman primarily to keep the Kings supplied with war money and incidentally maintain the usual commercial supremacy. The strength of this great and powerful institution is owing largely to the fact that the Englishman spends money in accordance with his "income" (pronounced "inkum") which is merely the revenue or earnings of his capital without regard to his income. That's where the British are wise. They are safe. If American business men today would live within their income, there would be fewer automobiles and among florists less glass but their capital would be greater and it would not be long before we had England beaten to a frazzle, even though some of our candy-faced damsels of codfish plutocracy are annually exported with million dollar jack-pots as a bonus for the bankrupt, monocle-eyed element of fancy British breed. It's about time the American heiresses made a mop of the dog-biscuit dukes and cleaned the earth, instead of licking their boots for a title. Invest in bulbs that will net you an income sufficient to warrant the investment or don't invest at all. Horseshoe Brand Cold Storage lily bulbs are the kind that pay a revenue worth while. Write for prices.

Ralph M. Ward & Co.

12 West Broadway
NEW YORK CITY

Not How Cheap
But How Good

After Adjournment

According to a correspondent in the State of Washington, the third Sunday in June has been selected as "Father's Day," and a red rose is to be the emblem. Let the old man sleep and rest that day, and he won't care much what the emblem is.—*Boston Journal*.

Let the old man select his own emblem, "Mourning Bride" or "Bouncing Bet" or "Love in a Mist," might hit his case better.

Because the women at the Chicago Beach Hotel, where the convention was held last year, referred to the delegates of the American Association of Nurserymen as a "bunch of farmers," Chicago lost next year's convention and Boston was chosen.—*St. Louis Exchange*.

Boston is de-lighted and we doubt not her ladies will find some more appropriate and flattering cognomen for the nursery visitors. We don't mind snatching something from Chicago once in a while. It keeps things a-moving.

The name of William F. Kasting of Buffalo, N. Y., has been presented to Governor Dix for his consideration as Commissioner of Agriculture to succeed Raymond A. Pearson, whose term expires soon. Mr. Kasting is park commissioner and is general committeeman of the Thirteenth Ward. The Governor could not name a more industrious and capable man for this important position, and we hope Mr. Kasting may be so honored.

PRESENT-DAY GARDENING.

There is nothing whatever to be said against the modern rage for gardening, which is the most innocent and healthy of amusements, except that it tends perhaps to be too purely horticultural. It has not, says "The Times," the vices of the old kind of horticulture, for no one now tries to make flowers look as artificial as possible; but it has new weaknesses of its own which do to some extent lessen the beauty of the modern garden. There is a rage for newly discovered and for rare and difficult plants, and many a skilful gardener spends all his skill upon horticultural experiments. The enormous variety of hardy plants tempts the ambitious amateur to make a collection rather than to ornament his garden. There are so many of them which he must grow if he is to win the respect of other amateurs that he is apt to find no room for the old favorites, which anyone can grow and everyone ought to grow. In fact, the art of gardening is to some extent affected by the hurry and competition of modern life, and there are fashions in plants as violent and as transient as fashion in dress. With all our advance in horticulture we have not attained, like the Japanese, to any settled canons of judgment. Our fancy is taken by new and lurid colors in flowers, by mere size, or by some violent eccentricity of their habit. But these weaknesses are all part of our general defects of taste. They are not caused by the modern passion for gardening; they may sometimes pervert it. We are learning to think more of the plant than of the cut flower, and that is the beginning of all sound taste. The old kind of flower show encouraged both exhibitors and spectators to think only of the flower and to ignore its relation to the plant. The Temple Flow-

HORTICULTURE

A BEAUTIFUL MEDAL.

Our illustration is from a photograph of the Kroeschell gold medal awarded Charles Strout, Biddeford, Maine, at the recent National Flower Show, Boston, Mass., for the twelve largest carnation blooms. The general design is along the lines of an ancient coin. It is made to be worn as a watch charm, or fob. The charm proper is of solid polished gold; the

lettering on the outer edge rich green enamel; the carnation in the center is carved out of a solid piece of light yellow gold in high relief and rests upon a background of antique rose-colored gold, and these contrasting colors bring out the whole design in a very effective manner. The reverse is finished in Roman colored satin finished gold. It was designed and made by the Schrader-Wittstein Co.

er Show does not foster this kind of error. More and more it becomes a show of plants rather than of flowers; and its enormous popularity is a proof of the growth of good taste in gardening.—*Journal of Horticulture, London*.

CARNATIONS AND AMERICAN BEAUTY ROSES TOGETHER?

"1. Can carnations and American Beauties be grown together? About what temperature? House 65 feet long, 25 feet wide, good light.

"2. At how low a temperature (night) can Beauties be grown?"

"G. J."

1. It would not be advisable to grow American Beauties and carnations in the same house. The average carnation needs a temperature of 50 to 52 degrees, and while there are some varieties like Lawson and one or two other sorts which can be made to do fairly well in a slightly higher temperature, it is not generally found successful to attempt to grow roses and carnations under the same conditions. It would also be difficult to handle these two crops in the same house on account of their requirements not being the same as regards syringing and ventilating.

2. American Beauties demand a temperature from 56 to 58 degrees, 58 degrees probably being the safer mark, even though they can be made to do fairly well in a temperature of 56 degrees.

Wilmington, O.—Fred Weltz succeeds to the business of Geo. Weltz's Sons as the partnership has expired. It is the intention of the present proprietor to put the place in good repair and continue the business.

NEWS NOTES.

Alvin, Texas.—The Stockwell Nursery Co. incorporated, is to take over the business of the Gulf Coast Nursery.

Des Moines, Ia.—Charles N. Page has been elected for the sixth time president of the Iowa Seed Dealers' Association.

Memphis, Tenn.—A greenhouse belonging to Frank Trimble, 23 Diana street, was slightly damaged by fire on June 12.

Nashua, N. H.—George W. Coburn will now do business under the name of George W. Coburn & Son, having taken his son into partnership.

Manchester, Mass.—Axel Magnuson will utilize a large tract of land, recently purchased, for nursery purposes. He will retain the greenhouses on Bridge street.

Moscow, Idaho.—J. L. Bourn's range of greenhouses have been purchased by Scott Bros., of Garfield, Wash., and they will be run in conjunction with their present range.

Charlotte, Mich.—William Breitmeyer, brother of ex-Mayor Breitmeyer of Detroit has purchased three acres of land here and will erect greenhouses to cost about \$15,000.

Mr. Ebel of the Aphine Manufacturing Co. has received the following communication from the Metairie Ridge Nursery Company, Ltd., Harry Papworth, president, New Orleans, dated June 13th:—

Replying to your favor in regard to your Fungine, we are pleased to say that we have found it a fine fungicide, especially on our Chrysanthemum cuttings, and all cuttings generally. Also fine for mildew on roses. It is the best fungicide we have ever tried. Yours truly, METAIRIE RIDGE NURSERY CO., LTD., per R. E. S.

Coldwell Lawn Mowers

Hand, Horse and Motor

Coldwell's Motor Lawn Mowers

Will do the work of three horse
lawn mowers—and do it better

☞ They will mow up 20 per cent grades. ☞ They leave no hoof prints as horses do.
☞ They will roll the lawn smoothly. ☞ They do away with the expense of two
men and three horses. ☞ They are of no expense when not in use. ☞ They
are simple to operate and economical. ☞ They are a necessity on every large lawn

California Sweet Pea Outlook.

Edwin Lonsdale, resident manager of the Burpee Seed Farm at Lompoc, Cal., reports under date of June 12th: "Our crops are late this year—quite a month later than 1910. This has been a very trying season, but it may turn out all right at harvest time. The sweet peas have brightened up very much in the past few days, and if we get some warm weather they will just jump. Howard M. Earl, manager of our company, paid us a visit last week, and we expect him back again after he has inspected other crops in various parts of California. We have a number of Spencer novelties which he is very anxious to see here, and they will be more advanced by the time he gets back. I am more than ever impressed with the glorious improvement the Spencer type is over the grandiflora, and the end is not yet. We are all watching the new developments with keen interest."

Notes.

Rochdale, Ill.—The Rochdale Seed Co. is erecting a 48 x 82 building adjoining their present quarters.

Champaign, Ill.—L. B. Ransom of Columbus, O., is organizing a seed company and has decided to locate here.

Portage, Wis.—The T. H. Cochrane Co. have increased their capital stock from \$48,000 to \$100,000. They contemplate erecting a large seed house.

Rockford, Ill.—Condon Bros. is a new seed firm with offices at 413 West State street. Both Leonard R. and John R. Condon have been with H. W. Buckbee.

Martinez, Cal.—George A. Putnam, a prominent vineyardist of the Ignacio Valley, has commenced suit in the Superior Court against the Oregon Nursery Co. charging that plants and seeds shipped him by the company had proved worthless. He seeks to recover \$1624, the price of the seeds and cost of planting.

CATALOGUES RECEIVED.

Quaker City Machine Co., Richmond, Ind.—Illustrated Catalogue of Evans Ventilating Apparatus.

Union Nurseries, Oudenbosch, Holland. McHutchison & Co., 17 Murray St., New York, sole agents.—A very complete wholesale list of forest and ornamental trees, shrubs, forcing plants, etc.

Yokohama Nursery Co., Yokohama, Japan.—Descriptive Catalogue of Bulbs, Plants and Seeds, 1911-12. A very attractive catalogue, as always. The colored plates and cover are fine examples of Japanese color printing art. The subjects are peonies, maples, lilies, Iris Kaempferi, flowering cherries, fern designs and porcelain flower pots—to each of which a full page plate is devoted.

June 20, '11.

HORTICULTURE:

Will you please take out our advertisement as we are having more orders for peonies than we can fill.

T. C. THURLOW'S SONS, INC.,
West Newbury, Mass.

PHILADELPHIA NOTES.

Samuel S. Pennock and family left on the 16th inst. for a visit to Westerville, R. I.

William R. Smith and John Clark of Washington, D. C., will take the boat from Baltimore on the 22nd inst. en route for Commodore Westcott's opening at Waretown on the 23rd.

Parry & Le Blache have opened a wholesale flower store at 14 South 17th street. Mr. Parry is well known in wholesale circles in this city and Mr. Le Blache is a grower with greenhouses at Somerdale, N. J.

The new Niessen building at 12th and Race streets is making rapid progress, having now reached the seventh story. The Niessen Company state that they will be doing business in their new quarters by Oct. 1st.

The S. S. Pennock-Meehan Co. have announced that during July and August their store will be closed at 5 p. m. daily instead of 6 p. m., as at other seasons. The Philadelphia wholesale flower trade has been slow in adopting the modern humanitarian system of shorter hours.

The chief event this week in local circles will be Commodore Westcott's opening at Waretown (23rd). The interesting affair for next week will be the Sweet pea show and convention of the sweet pea show and convention of hook at the invitation of W. Atlee Burpee is scheduled among the local courtesies to visitors.

H. L. Holmes of the Holmes Seed Co., Harrisburg, passed through this city on Thursday en route for the seedsmen's convention at Marblehead. He reports a very successful season for his company—withstanding the backward March and April. The demand for their introductions Premo sweet corn and Hauser cabbage has been greater than ever.

That gay troubador of the Reading system, Paul Huebner, will twang his guitar at the July meeting of the Florists' Club on "Railroad Gardening as a Paying Investment." Note that the stated date for this meeting, 1st Tuesday of each month, happening to fall this year on the fourth will be held one week later, to wit: July 11th.

Jno. Stephenson Sons have completed glazing their new house, 70x400 feet, at city line and York Road. Killarney, white and pink, will be the sole crops. Wide passage-ways—enough for a team to drive in are a feature. Soil, manure—going and coming—just like a factory. This is one of the best specimens of Lord & Burnham construction we have seen. The old range of houses, about half a mile nearer the city, will be kept on as usual. Mrs. Jardine rose is a feature there, and Mr. Stephenson has given them all an object lesson on its culture. It is really a great rose, but few know how to handle it.

Visitors this week:—Antoine Leuthy, Boston, Mass., Harry A. Bunyard, New York City.

Grand Rapids, Mich.—Crabb & Hunter Co. have sold their ground at 509 Madison Ave. on which their original greenhouse plant was located to the city, and will remove their houses to the new plant in the suburbs.

PERENNIAL FLOWERS

Every florist should have a fairly representable collection of "Perennial Flowers" in his establishment be it either for the purpose of growing them for cut-flowers or plant trade. Many of the best varieties are readily grown from seed but in order to have them fairly large in the spring they should be sown in June.

We offer a very complete collection in our "Wholesale Seed Catalogue." Write for it to-day

Of Interest to Retail Florists

Washington.—The silver wedding anniversary of President and Mrs. Taft was an event of much importance to the flower trade. Many of the ladies wore orchids. The interior of the Executive Mansion was decorated with palms, potted plants and great masses of cut flowers, among which Beauties and orchids were prominent. All of Washington florists, and some in other cities, were called on to furnish great quantities of their choicest blooms. Gude sent 25 orders to the White House, chiefly orchids and Beauties. One of the finest pieces was a great silver basket of cattleyas, tied with silver ribbon, for the B'nai B'rith. The Washington florists, Otto Bauer, manager, sent many orders, including several silvered baskets of Beauties.

Blackistone had a large number of orders for the anniversary. Marché contributed several baskets of orchids, and one effective arrangement of orchids and roses in a vase. J. H. Small had to send to his New York house to help him fill orders for Beauties and vases of orchids. Many of the floral offerings which gave color and charm to the East Room, the Blue Room and the Red Room at the White House were from foreign governments with the compliments of their rulers.

The season here is about over. Business will be quiet from now on, although there have been a number of weddings in Virginia to help out the trade. What entertaining is done is mostly at the country clubs, where some dinners are being given.

CHICAGO NOTES.

Flower Growers' Association.

Several meetings of the board of the Chicago Flower Growers' Association have brought the final arrangements nearly to an end. Though not officially announced it is generally understood that 176 Michigan Ave. will be accepted as the most desirable place for handling the flowers. The choice of manager will be made at the next meeting on Thursday and the Association will be ready for business.

Park Proposition.

A proposition to build a tract of land on the lake front, between and connecting Grant Park on the north and Jackson Park on the south is the latest proposition made by the Chicago Plan Commission. As in the case of Grant Park it would be "made land" and would take several years but would give the people a lake front of five miles, something to be greatly appreciated by the thousands of people who live by the lake for a lifetime and never see it.

Trade Jottings.

The E. H. Hunt Co. has just imported several cases of fine Japanese ware for the supply department.

Beginning July 1st the Schiller Co.

will give its employees the annual outing so much appreciated after a busy season.

J. Schoepfle, 933 Belmont Ave., is fortunate in having selected his greenhouse site many years ago in what has become a good business district of Chicago, too valuable longer to be used for the original purpose. He has just closed a contract to erect a post-office for the use of the government and will remove the greenhouses but the retail store adjoining will be continued.

Personal.

E. F. Winterson, Jr., has returned from a month's trip among the trade.

Lloyd Vaughan and family are planning to take their outing in Canada this year.

Mr. and Mrs. O. P. Bassett, who are visiting relatives here, are purchasing furniture and shipping it to Pasadena, Cal., which they have decided upon as their future home.

Mr. and Mrs. H. C. Wolbrandt of the Globe Greenhouses, West Madison and 53rd Ave., will leave on an automobile trip about July 1st. They will visit Boston, New York and other eastern cities.

On Wednesday morning, June 21, at St. Paul's Church, occurred the wedding of Frank Pasternick and Elizabeth Klineselter. Mr. Pasternick has been for many years buyer for the E. Wienhoeber Co. and is a very popular young man.

G. H. and E. E. Pieser are both far from being as well as their friends in the market could wish. For over thirty years these pioneers in the wholesale cut flower market of Chicago have stood at their post and no one knows the ins and outs of the business better than they.

Visitors.—Leonard Lawson, Rockford, Ill.; C. B. Knickman of McHutchison & Co., N. Y.; H. E. Kidder of Ionia Pottery Co., Ionia, Mich.; Geo. Franks, Champaign, Ill.; H. Roth, Lafayette, Ind.; Mr. McClave, Benton Harbor, Mich.; C. E. Gullett, Lincoln, Ill.; M. F. Nagel (Forester), Santa Fe, N. M.; Wm. Desmond of the L. S. Donaldson Co., Minneapolis, Minn.

NEW FLOWER STORES.

Kenosha, Wis.—P. N. Obertin.
Columbus, O.—Howard & Co., South Fourth street.

Providence, R. I.—M. McNair, Chestnut and Broad streets.

Greenwich, Conn.—Alexander Mead & Son, Greenwich avenue.

CINCINNATI NOTES.

Mr. and Mrs. Ray Murphy left Monday, June 19, for a fortnight's visit to Portsmouth, O.

The outing of the Cincinnati Florists' Society will be held Thursday, July 20, at Coney Island.

Wm. Murphy and S. S. Skidelsky have bought the red seedling carnation Delhi from C. C. Murphy and will disseminate same in the spring of 1912.

NEWS NOTES.

Pittsburgh, Pa.—Fire damaged the East End Floral Co. to the extent of \$100 recently.

Pawtucket, R. I.—The retail store of the Highland Rose Co., 23 High street, has been closed.

Jermyn, Pa.—The florist business of Burton H. Parks has been purchased by James Nicholson.

Findlay, O.—A. H. Marshall has purchased the florist business of S. J. McMichael, for whom he has been manager.

Washington, D. C.—A parcels post would be a great help to florists, the House Committee on Post Offices and Post Roads was told the other day by William F. Gude. Mr. Gude mentioned the extensive violet industry along the Hudson river, the product of which would enter much more largely into commerce if it could be transmitted at reasonable rates through the mails.

Flower Market Reports

An improved tone is seen **BOSTON** in this market for the past few days. Stock of all kinds has shortened up in quantity, and there has been a brisk demand for whatever good material was offered. In roses the favorites are Beauty and Carnot, with a good second in Killarney, when in presentable shape. Carnations have fallen off badly, the quality being very inferior as a rule. Cattleyas find a good call, and bring top price if large and clean. The good market for lily of the valley continues unabated. Among the good sellers at the moment are the pond lilies, pink and white. Sweet peas seem to be very popular also.

There was very little **BUFFALO** doing up to the middle of the past week. Stock accumulated heavily, and on Friday and Saturday the market could not hold the enormous supply and sell at fair prices. In consequence, there were bargains for all, especially in carnations, which were all cleaned up at low figures. Roses did not suffer, as they had already shortened in receipts on Thursday, and on Sunday the market was practically sold out on everything. On Monday, June 19th, school commencements were in order, and at the close of the day's business nothing was left over, and it is hoped that the market will continue to remain in such condition throughout the month. There was plenty of everything except sweet peas, which were scarce.

A great change has come **CHICAGO** over the market, and stock is now scarce.

Where for weeks it has been impossible to move it, now orders bring a lively hurrying from counter to counter in the wholesale market to secure the stock to fill them. Orders are coming in from all over the country, showing the shortage is general. The extreme hot weather has hurried the throwing out of old stock, and July conditions are here in the middle of June, with weddings and commencements at their height. Some very good carnations are occasionally seen, but the great bulk of the stock is small. Long-stemmed Beauties are in good demand. Good roses, though small, sell readily. Some fine longiflorum lilies are seen, and cut down the sales of the candidum, which are now in the market in vast quantities. Gladioli also, and other summer flowers grown under glass, have helped to make it less lucrative to grow the candidums. Smilax, asparagus plumosus and Sprengerii are all very scarce. A good quality of ferns is now coming from Michigan fully two weeks early, and selling at \$2.00 per 1000. Liliun candidum was shipped from Michigan into Chicago in great quantities the past week. Every wholesaler had a stock on his counters. The June brides would have none of them, and as it was not a week of funerals they held over. Sweet peas have about departed. Any first-class ones create a lively

strife among the buyers. That they may last through the month of weddings is the hope of the florists. Comparatively few peonies are left in storage. Some of the largest dealers are rapidly nearing the end of their supply. On the whole, the peony season has been as far from normal as the last, when cold and not excessive heat played havoc with the crop. The growers do not seem at all disheartened, and the accounts will balance up, with something to the good, no doubt, in spite of all.

Trade during the past week was nothing to brag about, still all stock that could be classed as good sold at fair prices. There are a good many flowers coming in that are poor in quality and it is these that suffer, as they are hard to move at any price. This makes the average price of stock seem low, while as a matter of fact really good stock is bringing fair prices. Owing to numerous weddings and a light

Flower Market Reports

(Continued from page 925)

supply, the market is way short on pink roses. The Taft rose is superior in quality to any of the other pink sorts. There being only a couple of growers that are growing Taft for summer forcing the supply is limited and all orders are usually placed two or three days in advance. Quite a few growers are already throwing out carnations, preparatory to benching for indoor culture, but supplies all during the week up to Saturday were greater than the market requirements. Saturday found the retailer skirmishing for carnations and grabbing up anything that looked anyway fair. Outdoor peas are not as plentiful as in other years owing to the hot and dry weather the latter part of May and the early part of June. Shasta daisies are in heavy crop. Gladioli continue good property. There was an improvement in the demand and prices for lilies. The call for lily of the valley has been good and supply light. Smilax continues scarce while other green goods are plentiful.

The summer hush has already begun to settle down over the retail flower marts of the city. The "coronation" festivities have drawn away a very large number of the florists' patrons, and earlier than is customary for the annual European exodus. Saturday before last there were over 2000 such passengers on outgoing steamers. But the call for graduations and weddings has helped the situation for the time being and the shortening up of supplies has brought a gratifying resumption of activity in the wholesale district. Storms have made havoc with outdoor flowers and peonies and garden roses are all done. Beauty is the best seller in the rose line. Small roses are of poor quality generally, particularly Bride and Bridesmaid. There are some excellent Maryland, Testout and White Killarney coming in. Carnations are holding out in good shape considering the season.

So much stock PHILADELPHIA came in last week it made the wholesalers tired to look at it. Then the warm weather made it open so quickly that altogether there was a terrible mess. The most plentiful item of all was carnations, and very little of this stock was any good. There were roses galore and piles and piles of such things as cornflower and coreopsis. The demand early in the week was good for American Beauty roses in the shorter stemmed grades, but

the fancies did not sell so well. More good white roses could have been used. Very good demand for sweet peas. Orchids went only fair. Lily of the valley has suffered in quality from weather conditions, but the demand has been all right. Peonies are over. Lilies—including candidum—are good and meet with ready sale. The gladiolus market is confined mostly to America which cleans up all right. A few early asters have made their appearance. Yellow daisies sell pretty well, but will not be a feature much longer. The water lily market is good in spots—very erratic; our local stores do not seem to make nearly as much of this item as is done in other cities. Plenty of greens of all kinds and market for same anything but brisk.

The last week of the flower season here was a busy one with most of our retailers. The work was mostly for school graduates and weddings which have been plentiful all week. The social folks have mostly all left the city for summer vacations, so, practically speaking, the flower season is ended until September. The market was a busy one all week and stock scarce in all lines except carnations. The big call was for sweet peas and lily of the valley. Roses and gladioli, too, sold clean up. Carnations were most plentiful and cheap, but of very poor quality—poorer than at any time this year. The dry, hot weather is responsible for all this and a good soaking twenty-four-hour rain is needed.

Local stock is very small and poor. This is attributed to the state of the season. Buds do not develop properly before they open. The rains have also affected stock. Sweet peas are getting poor. Some good roses are coming in from Connecticut and other northern points. Good stock is bringing fair prices, but poor stock is low. "Even the best stock is poor," says one dealer.

ST. LOUIS NOTES.

Wild Bros. and Gilbert H. Wild of Sarcosie, Mo., made good peony displays at the Nurserymen's Convention held here last week.

Two carloads of visiting nurserymen left over the Burlington R. R. on Saturday morning, June 17th, for a visit to Stark Bros.' Nursery at Louisiana, Mo.

On June 1st, J. F. Ammann of Edwardsville, turned over his Edwardsville greenhouse plants to the new owners. Mr. Ammann has also advertised his Alton and East St. Louis stores for sale.

Secretary Beneke of the Florist Club reports that President Geo. Asmus and Secretary H. B. Dorner of the S. A. F. and O. H., have accepted their invitations and will be present at the club's 25th anniversary banquet, June 28th.

Very little enthusiasm among fathers over the idea of setting aside a Sunday especially in their honor. Evidently they feel that they might have to go to church.—*American Cultivator*.

Obituary.

W. D. Bastow.

W. D. Bastow, formerly a florist in Peoria, Ill., died on June 13, aged 84 years. He was born in England and came to this country when twenty years of age.

Mrs. A. Woerner.

Mrs. A. Woerner, wife of August Woerner, florist, 628 Artesian avenue, Clinton, Mo., died May 26, aged 52 years. She is survived by her husband and eight children.

Charles H. Magoon.

Dr. Charles H. Magoon, nurseryman, died at his home in Wakefield, Ia., on June 1, aged 70 years. It is said he started the first nursery in the state, settling in Algona, Ia., in 1857.

Preston W. Butler.

Preston W. Butler, nurseryman, died suddenly at his home in East Penfield, N. Y., on June 13. He was for many years one of the most prominent nurserymen of Monroe County.

Mrs. Mary Hanson.

Mrs. Mary Hanson, wife of Hubert Hanson, retired florist, at 1250 Grace street, Chicago, Ill., died on June 10, aged 51 years and 11 months. She is survived by her husband and one son.

Chauncey P. Coy.

Chauncey P. Coy, a pioneer seed grower of Nebraska, died at his home in Waterloo, Neb., June 10, after a short illness. He was senior member of the firm of Chauncey P. Coy & Son, wholesale seed growers.

John Trusty.

John Trusty, florist, of Pleasantville, N. J., died of heart failure very suddenly on June 13. He was a veteran "fresh violets" vender on Atlantic avenue, Atlantic City. Overwork in the hot sun was the immediate cause of his death.

Mrs. A. B. Packard.

Mrs. A. B. Packard, for forty years a florist in Quincy, Mass., died recently, aged 72 years. Her greenhouses were started for pleasure, but finally became a business proposition. Up to a short time before her death she was actively engaged in the business.

Mrs. Alfred Hannah.

Mrs. Alfred Hannah, wife of Alfred Hannah of the Grand Rapids Floral Co., Grand Rapids, Mich., died at the residence of her son, 1145 South East street, on June 14. Mrs. Hannah was born in Richmond Center seventy-four years ago and married Mr. Hannah in

Position as second gardener on private place where roses, carnations and general line of plants are grown. Several years good experience; best references. "L. W.," care HORTICULTURE.

MISCELLANEOUS

WANTED TO LEASE—From 15,000 to 30,000 feet of glass, within 50 miles of New York City; modern place required, with good dwelling and outbuildings; prefer several acres. Chas. Barson, Ossining, N. Y.

land Stanford University, died in San Francisco, Cal., on June 5, aged 62 years. He was a graduate of Cornell University and for sixteen years a member of the faculty. He had been at Stanford since 1892.

W. Taat.

We are sorry to have to report that the accident to this well-known representative of M. Van Waveren & Son, which was mentioned in our last week's issue, resulted fatally, Mr. Taat dying at the hospital after the amputation of his foot following an accident in the Boston subway. Mr. Taat was highly esteemed, and had many warm friends in this country.

TO COMBINE EXPRESS AND POSTAL SYSTEM.

The sub-committee on Post Office and Post Roads, at Washington, has taken up for consideration the Lewis bill, which provides for condemning and purchasing the express companies and adding them to the postal system, and establishing a complete system for the quick transport of packages and the eatable products of the farm and truck garden, etc. At their last conference in Washington, representative business men and farmers asked Congress to establish such a system.

"There are two main reasons why the express companies must be added to the postal system," said Mr. Lewis in his argument. "First, the express company service does not reach beyond the railways to the country or the farmers, which the post office does, through the rural free delivery, which is waiting with empty wagons to receive the express packages and take them to the country stores and the farmers, and carry back to the towns and the cities the produce of the farms and truck gardens for the people to eat, at living prices. Second, the contracts of the express companies with the railways give them an average transportation rate of three-quarters of a cent a pound; and with this rate the express charges by post would be reduced from two-thirds to one-half on parcels ranging from 5 pounds to 50 pounds, and about 28 per cent on heavier weights, as a consequence of the co-ordination of the express company plants with the post office and rural delivery, and the elimination of the express company profits, which are averaging over 50 per cent. on the investment.

"The express companies are positive hindrances and obstacles to the business of the country. The average charge for carrying a ton of express in Argentina is \$6.51, and for the countries of Europe \$4.12, while the average express company charge in the United States is \$31.20. They charge 5 times as much to carry a ton of express as a ton of freight in other countries. Here the express companies charge 16 times as much. Of course, these charges simply prohibit by half or more of the traffic in the United States. Our average is less than one hundred pounds per capita, while that of the other countries is over two hundred pounds per capita, although we have far greater demand for quick transport on account of our longer distances and more extensive business."

Under the system now in vogue in Germany, shippers, Mr. Lewis shows, pay only double freight rates, less than a tenth of the express rates here.

The food problem, the "high cost of living," according to Mr. Lewis's figures, is largely the result of the want of a proper articulation of our transportation with the rural sources of supply. While prices are often prohibitive to the consumer, crops may be rotting at the place of production, for want of a REAL express service.

INCORPORATED.

Columbus, O.—The City Greenhouse Co. Incorporators, John B. Heimhofer, J. O. Reed, Dr. N. L. MacLachlan, A. H. Marshall, C. J. Oller

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale, and all soft-bodied insects. An excellent cleanser for decorative stock. Used as a spray, you can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has no equal for destroying mildew on roses, and carnation rust.

\$2.00 per gallon, 75c. per quart.

What the Users Say

"Fires Once Every Four to Six Hours in Coldest Weather; Kroeschell Better than Other Boilers."

I am fully satisfied with your No. 2 Kroeschell boiler. I have had different kinds of saddle and tubular boilers, but none of them give such satisfaction as yours. I have 7,000 sq. ft. of glass, and your boiler would take care of 8,000 sq. ft. of glass. I maintain 50° temperature, and fire every four to six hours in cold weather; otherwise from six to eight hours.

TO BUYERS

Patronize our advertisers, they will treat you right

ONE OF THE WHYS, WHY THIS PLAN IS GOOD

It can be easily and economically added to. That's a thing to consider seriously when you build, as it involves the question of economical distribution of heat, convenience of working the various compartments and the preservation of the general attractiveness. You don't want some freak house. You want one that's planned right, built right, and that *costs enough to really be right*. The surest way to get such a house is to buy it of an entirely reliable firm. One that has been reliable for, say, 25 years or so. You can't go very far wrong on such a firm.

We have been in business over 60 years, so there's reliability and some to spare. Send for catalog. It shows some of the reliable things we have done.

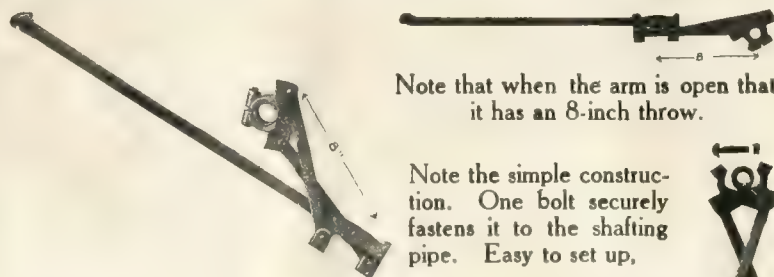

Hitchings & Company, ELIZABETH, N. J.

Or Call at our New York Office: 1170 BROADWAY.

Write to our General Offices:

Note that the distance from the center of the rod rivet to the centre of the shafting pipe when the arm is at right angles is only $7\frac{1}{2}$ inches.

Note that when the arm is open that it has an 8-inch throw.

Note the simple construction. One bolt securely fastens it to the shafting pipe. Easy to set up.

Note that when the arm is closed that it has an 8-inch throw.

Our new twistless arms are mechanical wonders. A few of the arm's remarkable mechanical features are illustrated in the accompanying cuts. They are fully protected by a patent allowed us on the construction of the parts that clamp to the shafting pipe and a patent is now pending on the construction of the rod bracket.

Advance Ventilating Machines continue to maintain a high standard and will be used in connection with this arm on all heavy lifts. We will still continue to manufacture an elbow arm, which we will use on short runs as it is faster in operation than our new twistless arm.

For full particulars, get our new catalogue.
